EXTENSIONS OF REMARKS

A CASE AGAINST PROTECTIONISM AND FOR A MORE COMPETITIVE AMERICA

HON. BILL FRENZEL

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 2, 1983

● Mr. FRENZEL. Mr. Speaker, on January 20, Ed Spencer, chairman of Honeywell, Inc., delivered a paper on United States-Japan Trade and Investment Issues to the governing board of the Electronics Industry Association.

Mr. Spencer surveys the Japanese competition and the Japanese market in part I of his paper, and in part II he examines actions which threaten exports-embargoes, restrictions reciprocity legislation, and local content legislation—and suggests instead actions to protect import threatened industries and 12 specific measures to encourage U.S. foreign trade and investment.

The paper is must reading for those interested in foreign investment and export expansion. It is too long for full reproduction here, but I will furnish it on request. The section dealing with specific measures to encourage trade expansion follows:

TWELVE POSITIVE MEASURES TO ENCOURAGE U.S. FOREIGN TRADE AND INVESTMENT

There are a number of positive measures industry and government can and should take together to expand our foreign trade and investment. The Reagan Administration and Congress have taken some such steps, but much remains to be done to stimulate both exports and foreign investments, the latter in turn stimulating more exports as well as earning interest and dividends. This list is not all-inclusive, but indicates where action can begin.

1. *Fiscal and monetary policy.*—Nothing is more important to the economic health of our industry than fiscal policies that encourage saving and investment and monetary policies that assure long-term, non-inflationary growth. Recent steps to increase cash flow in some industries by speeding depreciation schedules, to improve tax credits for investments, to stimulate investment in new venture businesses by reducing capital-gains taxes, and to lower income taxes are very positive and over a long time period will increase the productivity and competitiveness of American industry. The 25-percent tax credit for an increase in qualifying R&D expenses is also a positive step, but should be expanded to include all R&D, or at least to permit a higher incremental portion of R&D to qualify for the credit. Also, the credit should become permanent, and not be allowed to expire in 1985. The suspension of IRS regulations on the allocation of R&D expenses to foreign source income should also be made permanent.

I won't comment on the massive Federal deficit, except to observe that it must be reduced. If not, industrial demands for credit in an expanding economy will compete with government borrowing, signaling higher interest rates and an early return of inflation.

2. *Industrial policy.*—We have been criticized for the absence of a national industrial policy and the Japanese praised for having one that builds future industrial strengths, rather than protecting non-competitive and out-of-date industries. The Japanese, incidentally also handle the latter very well and are already talking about what to do with displaced auto workers when Toyota, Nissan, and Honda are no longer internationally competitive. There are in the United States a rising number of proposals for some type of government-funded Reconstruction Finance Corporation or sectoral approach to channel low cost funds to target industries, or to industries in economically depressed areas.

The complexity and diversity of our political system may make the selection of such target industries impossible on a national basis. It might be done within states, and indeed is being tried in some. There are opportunities within the Federal R&D budget to help specific industries, and funds to help industry retrain displaced workers are of some value.

The best industrial policy, however, is to let the market decide which industries expand and which contract. This in turn will work best in a political climate which provides a fiscal and monetary policy that encourages productive investment.

3. *Federal Research and Development.*—5.6 percent of the federal budget is for research and development, the largest part going to the Department of Defense, National Institutes of Health, NASA, the Department of Energy (for nuclear related R&D) and the National Science Foundation. The administration's proposals to increase funding to universities through the NSF is a good sign, as that budget has shown no real growth over the past four years. There is a body of thought which is urging the federal government to set long-range goals and strategies for the nation's future, and then to target R&D for all agencies to accomplish these objectives in broad terms, rather than negotiating R&D on an annual basis through countless line items in the budget. While such a proposal may be politically difficult to achieve, it should be discussed and pushed.

4. *The Role of U.S. Government Contracts.*—The federal government has played a major role in industrial development, with substantial fall-out from government contracts benefiting related products subsequently sold in the private sector. Here are a few notable examples:

"Commercial aircraft which got a start with air mail contracts and benefited from military aviation needs.

"Synthetic automobile tires, which got their start in the government-sponsored synthetic rubber industry in the early 1940's.

"Commercial radar (plus its impact ranging from television transmission to microwave ovens).

"Lasers.

"Semiconductors, in which funding from the Department of Defense in the early 1960s accelerated the formation of a major new industry.

"Computers, an industry which grew out of government contracts in the 1940s."

A word about the Department of Defense's VHSIC program. VHSIC, of course, stands for Very High Speed Integrated Circuits. The program was initiated to jump the state-of-the-art of military integrated circuits by several years to a new generation. The rationale for the program developed when industry did not respond with its own funding for R&D in low-volume custom circuits needed in defense products. This has been called one of the most important DOD technology programs, and the Defense Science Board has rated it as the number one DOD technology program, even ahead of stealth technology, which is number two. The first phrase of the VHSIC program will end in 1984 with the early production of VHSIC circuits. Plans are already under way to incorporate these circuits in DOD programs in 1985 and beyond.

VHSIC is having an impact on the integrated circuit industry. Although a few semiconductor manufacturers opposed the program, it has stimulated the IC Industry to accelerate programs in finer-geometry integrated circuits with related systems benefits to the defense industry; in parallel, the use of these circuits in commercial markets has been accelerated. One criticism of the VHSIC contracts is that they were several years too late.

More federal funding of VHSIC-type programs in basic technologies affecting the future of our electronics industry will be essential to stay ahead in those technologies that are too far ahead of commercial feasibility to attract commercial funding.

5. *Industry Cooperation.*—Two recent examples illustrate how industry cooperation can further the objective of strengthening American ability to compete in international semiconductor and computer markets.

First, the Semiconductor Industries Association created the Semiconductor Research Consortium. The goal is to increase private-sector support for those university research programs that have the greatest potential for strengthening the U.S. semiconductor technology base in light of the Japanese challenge. SRC has a fulltime director (Larry Sumney) and a Board of Directors (chairman Erich Block of IBM). There are about 30 members, whose contributions are based on their integrated circuit use and/or sales. The director and the Board will distribute the fund in response to proposals from universities and will initiate new areas of research most needed by U.S. industry. Incidentally, many electronics companies are also independently funding microelectronic and computer studies in universities, quite apart from the SRC.

Second, a group of U.S. semiconductor and computer companies under the leadership of Control Data Corporation has established the Microelectronic and Computer Technology Corporation. There will be a small headquarters with a full-time chief executive officer. Each of the participating

● This "bullet" symbol identifies statements or insertions which are not spoken by the Member on the floor.

11-059 O-87-31 (Pt. 3)

companies will be part of one or more research programs in areas such as computer-aided design, and manufacturing, software, packaging, and new computer architectures. The objective is to provide a mechanism for industry to conduct joint long-term research with special attention to areas that have been targeted by the Japanese. The research will be conducted by personnel of MCC and results will be available for licensing. Development of this research into competitive products will be carried on outside of MCC by the individual participants. This is similar to a limited partnership for R&D in which companies combine to form a vehicle that performs the R&D at arm's length and licenses the results to avoid antitrust problems.

6. U.S. Antitrust Considerations.—U.S. corporations are falling behind foreign competition in many areas today, largely because much of the competition comes not from individual foreign corporations but from consortium-like groups, if not outright cartels, of cooperating corporations aided by their national governments.

Under existing U.S. law, corporations in similar lines of business can't cooperate with one another without running the risk of violating the U.S. antitrust laws. If U.S. industry is to improve its global competitive position, some of our traditional antitrust principles need modification so that our free competition can survive in a form that is consistent with the requirements of today's world economy. Here are some suggestions:

A. In the area of research and development, individual U.S. companies face many projects too large and costly for them to handle alone, but they are reluctant to engage in cooperative joint R&D efforts with other companies because of antitrust risk. Some reduction of these risks came with the publication of the Justice Department's liberalized guidelines in 1980 recommending the issuance of "business letters" to specific joint ventures, indicating that the Justice Department had no intention to attack those ventures on antitrust grounds. However, since such letters are merely statements of present enforcement intentions and are not binding for the future, nor are they any protection against private antitrust suits, serious uncertainties and risks remain. The law should be modified to grant binding antitrust exemption, applicable to government as well as to private suits, for approved R&D joint ventures. Such exemptions would enable U.S. companies to combine complementary resources and skills to accelerate innovation and avoid duplication of effort.

B. In the area of production, there is a clear need in certain declining U.S. industries, such as steel, for combinations, rationalization of production and other forms of cooperation in order that they may once again compete in the world market. Such cooperative measures are now risky because of inherent antitrust complications. There is an existing exception to allow the merger of "failing" companies, but too many uncertainties remain. Legislation is needed to provide some official identification of the critical industries and to establish definite antitrust exemptions for the appropriate mergers, consolidations, transfers, rationalization and other cooperative action between companies within these industries.

C. In the area of marketing, there has long been a need for joint efforts to achieve economies in the administration of the complex export function as a way to encourage U.S. exports. A long step was taken in the enactment of the Export Trading Company Act of 1982, which enables companies to join together in handling export matters with less risk of antitrust violation. It provides for the formation of foreign-style trading companies to perform various marketing functions, shipping services, custom brokerage and insurance services for their shareholding companies and third parties. The law also enables certain banks to participate in the capitalization and financing of the trading companies. Each such trading company will have to be certified by the Secretary of Commerce and approved by the Attorney General in conformity with stated guidelines. There are still some uncertainties under the new law, but it is a step in the right direction.

7. U.S. Export Licensing and Controls.—None of us wants to help strengthen Soviet military capability, but considerable damage can be done to the position of U.S. industry in international trade by the too frequent and ill-conceived use of the U.S. export-control laws as a political weapon. The recent use of these laws to stop shipments of products and technology for the Siberian pipeline clearly illustrates this problem, but there are other examples.

Damage can also be done when restrictions are tightened—for example, recently tightened limits on the export of microprocessor-based products, which are not observed by European and Japanese competitors or included in parallel COCOM restrictions.

Here are some of the effects:

a. The U.S. economy is damaged by the resulting reduction in exports.

b. U.S. industry loses the profits on the banned business and often must absorb the loss of prior expense and investment related to the barred transactions.

c. The experience inevitably casts doubt on the reliability of the United States as a trading partner.

d. The possibility of such changes in regulations increases the uncertainty inherent in export-control enforcement, which in turn impedes and delays the negotiation of other agreements.

e. Enforcement of the rulings may compel foreign subsidiaries of U.S. corporations to violate their host country's laws, policies and customs.

f. The resulting restrictions on U.S. industry help foreign competition get established, improve their technologies and take more business, now and in the future, away from U.S. industry.

g. The enforcement may cause considerable harm to the interests of friendly nations.

h. The target nations, and sometimes even friendly nations, may be provoked into retaliatory action against the United States.

Experience has shown that the target country usually manages to find alternate sources for the embargoed products, services and technology. Rhodesia survived years of trade restrictions. South Africa built a military capability in spite of arms embargoes from the U.S. and Europe. The Soviet Union found alternate sources for grain and pipelaying machinery.

Embargoes and export license restrictions can only be effective if universally agreed to and applied by all producing nations.

Here are some suggestions for making our U.S. export licenses and controls more effective:

a. Consult in advance with other producing countries on embargoes and changes in license regulations. And then implement only if there is substantial agreement on the restrictions by all producing countries. Export license controls without OCOM support will not work.

b. Apply U.S. export-licensing regulations consistently, and make the procedures for approvals transparent and quick.

c. Limit to one agency, the Department of Commerce, final licensing authority. DoD license approval should be required only for truly strategic items and those in turn should be coordinated with COCOM before being put on the DoD approval list. In addition, many licensing requirements to non-Communist countries can and should be eliminated.

d. Don't use embargoes and licenses for short-term political purposes.

8. Export-Import Bank.—Under the Carter Administration, Exim's direct lending authority rose from $2.9 billion in fiscal year 1978 to $5.4 billion in fiscal year 1981. In terms of the proportion of total exports supported by government-backed financing, the U.S. in 1980 supported 5.7 percent of its exports with this financing. Comparable figures for government subsidized financing by other countries were: Japan, 44.3 percent; U.K., 39.0 percent; France, 27.2 percent; and Germany, 7.5 percent.

As part of its 1981 budget reduction program, the Reagan administration identified the Exim Bank as a business sector program that could be cut. The proposal was from $5.9 billion in the Carter budget to $3.9 billion in the first Reagan budget. The director of OMB was the main proponent of this cut. It was opposed unsuccessfully within the Administration by the Secretary of Commerce and the U.S. Trade Representative. Congress restored part of the proposed Administration cut and set a limit of $4.4 billion of direct lending authority in fiscal year 1982. It continues to operate at that level in fiscal year 1983 under the continuing resolution, although the Administration has been seeking a $3.8 billion limit.

Exim's loan-guarantee program currently has a limit of $9 billion. Changes in the loan-guarantee limit have generally followed the direct lending authority, although it has been less controversial. A substantial increase in export guarantees, as well as independent and direct lending authority, would be a positive step to support increased exports.

As far as interest rates are concerned, Exim has far less freedom than government-backed export financing institutions in other countries. The result is that when export-credit charges become a means of subsidizing export sales, Exim interest charges become noncompetitive. Attempts by the Reagan Administration to get minimum interest rates on export financing are a step in the right direction, but more needs to be done and promptly.

A suggested three-part program to increase the role of the Export Import Bank in helping U.S. exporters might be as follows:

a. Continue the effort to get minimum interest-rate agreements by Finance and Treasury ministries in other major exporting countries so as to remove subsidized interest as a competitive factor in export markets.

b. Gradually expand the lending authority of the Exim Bank so that it becomes a major source of export financing rather than a last resort.

c. Gradually expand the loan-guarantee limit.

9. DISC, ISC and ESC.—DISC (Domestic International Sales Corporation) legislation has provided cash-flow benefits for U.S. exporters by deferring some federal income tax on export sales. DISC, however, has been attacked by other countries as a form of export subsidy in violation of the GATT agreement. DISC benefits have also been subject to changes in accordance with congressional mood on fiscal policy and in 1982 were reduced.

Congress and the Trade Representative are now looking for alternatives consistent with GATT that would help stimulate small firms to more aggressive exporting. One such alternative is an International Sales Corporation (ISC) which would be incorporated abroad and would act as a sales arm for an exporting company. Another is an Export Sales Corporation (ESC), which would perform a similar function from a foreign place of incorporation where local taxes on profits would be paid. If DISC is to be replaced, an alternative must be found that is consistent with GATT rules and provides the equivalent flow benefits.

10. OPIC.—A federally backed insurance against political expropriation is available under OPIC (Overseas Private Investment Corporation). The Reagan administration has been aggressively pushing this disaster insurance as an export stimulator, with positive results.

11. Trade Fairs and Exhibitions.—The U.S. Department of Commerce has long had the responsibility for participating as a nation in international trade fairs and for establishing special U.S. exhibitions in other countries. Unfortunately, budget limitations have restricted this activity, to the detriment of smaller U.S. firms and companies newly trying to establish export activities. This activity needs to be expanded.

12. Equal National Treatment.—A major responsibility of the U.S. Trade Representative's office should be to search out and publicize countries and regulations that treat U.S. and other foreign firms differently from domestic firms with regard to making investments, having ownership, establishing branches or offering services. The United States is among the most open countries of all in offering foreign firms all the same advantages, rights, legal protection and access to government markets that domestic companies are permitted.

We should insist on the same from other countries, and in particular, advanced industrial countries whose companies are aggressively pursuing business opportunities in the United States. We have no MITIs, FIRAs or Ministries of Industry to limit or control foreign investments in our country, nor do we want such bureaucratic limitations on investments that create jobs and expand markets. We should insist on the same from Japan, Canada and France—in the cases cited—and be prepared to negotiate bilaterally and hard to get such equal national treatment for our investments in those countries. The only exception should be for national strategic reasons, where control of certain technologies in domestic hands is desirable.●

PRIVATE SECTOR SOLUTION FOR SOCIAL SECURITY

HON. CARROLL HUBBARD, JR.

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 2, 1983

● Mr. HUBBARD. Mr. Speaker, I have received an excellent letter from my constituent, Tom Waldrop, a 28-year-old realtor in Mayfield, Ky., with regard to the ongoing efforts to restore social security's financial solvency.

Tom recommends that we look at the private sector, specifically an IRA-like account in lieu of automatic inclusion into social security, as a possible solution to cure the system's problems. I receive many letters from young people such as Tom Waldrop who are concerned that they will never receive the benefits from a financially unsafe retirement system. Tom's comments are worthy of consideration, and his letter follows:

MAYFIELD, KY.,
December 15, 1982.

Congressman CARROLL HUBBARD,
Rayburn House Office Building,
Washington, D.C.

DEAR CARROLL: Enclosed you will find a reproduction of an article published this morning in the Louisville Courier Journal by Mr. James J. Kilpatrick. I enclose the article because it states far more succinctly than I, the only plausible solution to the Social Security disaster.

Each day, the news accounts are dominated by efforts of Congress, the Administration, and the Presidential Commission to save the present system, to which I respond, "Don't Save It For Me." Being 28 years old, I cannot forsee any way that I will see any return on my annual Social Security contribution. In the four years since I started my IRA, I have wished that the mandatory Social Security contribution could go into my personal retirement plan, but until now, that wish was too good to be true.

As a Realtor, I depend on lending institutions to finance property for clients and my own investments. Mr. Kilpatrick doesn't even mention the enormous impact these jumbo savings accounts would make on the capital base of our nation's Banks and Savings and Loans. I recall several "bail out" bills making their way around Capitol Hill for this beleagered industry. How convenient to kill the proverbial two birds with this one stone.

In response to this letter, I would like your honest opinion. Is it too much to ask of 535 professional lawmakers with limitless staff and resources to arrive at the same conclusion as a Western Kentuckian with only a B.S. in Economics?

Social Security can no longer survive demographically in its present form seems to be an accepted fact. The shape of federally mandated retirement programs is yet to be determined. Please consider the options available in the private sector, the stakes are too high to risk another system like the present.

Sincerely,

TOM WALDROP.●

VOA BROADCASTS IMPORTANT FOR NATIONAL SECURITY

HON. JACK F. KEMP

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 2, 1983

● Mr. KEMP. Mr. Speaker, the Voice of America is one of the most important and cost effective national security programs we have today. Americans have difficulty realizing the powerful impact truthful radio broadcasts can have, since we are never without multiple sources of news. But for struggling peoples under tyrannical regimes these radio broadcasts can break the information darkness that surrounds their day-to-day lives.

Radio, and not television or newspapers, is the principle source of information abroad. For instance, there are 10 times more shortwave radio sets in Soviet Russia than in America. The Voice of America now presents an objective and balanced presentation of news to a weekly audience of approximately 100 million people worldwide.

The operations of the Voice of America reflect American democratic principles in action—the free flow of information and ideas that inform other peoples on international events and help build trust between them and the American people. The more we can build that trust, the better our chances to weaken the will toward war that is such a tragic part of 20th century history.

I want to recommend to my colleagues this superb article by Ken Tomlinson, the new director of the Voice of America. Mr. Tomlinson makes a brilliant case for expanding our international broadcasts and outlines the need to modernize the Voice of America's broadcasting equipment. The most outstanding aspect of this article, however, is Mr. Tomlinson's ability to transcend our old ideological labels while proving to be a forceful advocate for American prestige around the globe. He certainly has my support and I urge my colleagues to help advance democracy by giving him their support as well.

[From the Washington Post, Feb. 20, 1983]

AMERICA'S STIFLED VOICE

(By Kenneth Y. Tomlinson)

Shortly before the Senate confirmed me as director of the Voice of America, I was approached separately by two political figures concerned about what we were going to do to VOA. One, a Democrat, was worried that we might be preparing to turn the institution into the propaganda voice of the right. The other, a Republican, feared we would not be tough enough to change VOA's alleged '50s-liberal slant.

The two represented exactly opposite attitudes toward the VOA, but, as each conversation developed, I found the two agreed on one important point. Both confessed that when abroad they listen to the BBC—not

VOA. Each declared the BBC's programming was far more informative, far more relevant.

Without question, the director of the Voice of America faces an extraordinarily difficult job. Within this institution are Foreign Service diplomats who frequently want to keep the broadcast lid on, VOA journalists who often want to blow the lid off and representatives of 42 separate language services, a number of which have a rich tradition of old-world guerrilla warfare. A fact often overlooked in articles about VOA is the managerial task involved in working with groups where interests are so widely separated. But the real challenge facing the new leadership at VOA is not to come up with a new scheme for running a radio station like a city council. *The real challenge is to reverse the years of official neglect that constitutes the real source of problems at VOA.*

This neglect has deprived us of credibility in strategic portions of the world where the use of old transmitting equipment means that our voice barely can be heard. Equally important, it has resulted in public affairs programming that conservatives and liberals alike recognize as often dull and irrelevant.

The solution to VOA programming inadequacies is really quite simple. The Voice of America should reflect the voices of America.

The principle is an extension of the philosophy on which this nation was founded. The founders believed that a great body of people, when exposed to a diversity of information and opinion, could decide for themselves—and do it well. That is precisely what we propose to do in broadcasting to the people of the world. Our news at the top of the hour is competitive with any international broadcast organizaiton. In VOA editorials we crisply identify and reflect the views of the U.S. government. But in current affairs programming VOA has never succeeded in reflecting the voices of the nation's opinion leaders on the important issues of the day.

Ironically, it will take greater resources to reflect opinions across the political spectrum. It is far easier and less expensive to produce in-house commentaries than it is to break outside our institution to reflect American viewpoints. But we are going to do this in the months ahead.

Whether those voices will be heard, however, is another issue.

In recent days a cable crossed my desk from an important capital in the Arab world. An American diplomat reported Radio Moscow's signal is loud and clear—as are the radio voices of numerous other nations large and small. The United States is not among them. VOA's signal is weak and often difficult to receive.

Anyone who wants to can come down to our studios at the base of Capitol Hill and see us broadcasting to the world using vintage 1950s equipment worthy of a broadcast museum. At a key relay station, we are actually using transmitter equipment captured from the Nazis at the end of World War II. So ancient are our facilities that we must maintain a machine shop to fabricate parts because they are no longer made by commercial dealers. The reminders of what this means abound:

In recent weeks, broadcasters from China and India came to tour our headquarters facility. I can only describe their reaction as one of shock. As one put it, "How can the world's most advanced nation be using some of the world's most backward equipment?"

In the last decade the number of high-power, short-wave transmitters worldwide has increased eightfold. During the same period, the VOA has added a number of languages and broadcast hours, but its technical capabilities have remained practically unchanged.

The Soviet Union spends more to jam Western broadcasts coming into the Soviet Union than we allocate for the entire VOA worldwide budget.

There is a bottom line to all this, of course. Listen to the words of a letter we received in recent weeks from Iran: "It bewilders me why a country whose astronauts can easily speak to Earth from outer space is not able to transmit her own voice across the world."

This administration is committed to a technological modernization program that would restore strength to the Voice of America.●

VOTING TAX CREDIT

HON. JOHN F. SEIBERLING

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 2, 1983

● Mr. SEIBERLING. Mr. Speaker, today I am reintroducing legislation, by request, which would amend the Internal Revenue Code of 1954 to provide a $30 refundable tax credit to taxpayers who vote in a Federal general elections.

The concept of a voting tax credit is the brainchild of Mr. Frank Martino, president of the International Chemical Workers Union. It proposes a voting tax credit as a method to get more Americans out to vote in Federal elections. According to the ICWU, the credit is "designed to provide an incentive for all Americans, rich and poor alike, to exercise their franchise as responsible citizens of our country."

Mr. Speaker, the low percentage of voter turnout in Federal elections has become a deplorable situation in this country. Apathy on the part of eligible voters has soared, and lately we have seen trends which indicate that many Americans do not vote simply because they are frustrated with politicians. More and more Americans seem to believe that their vote is not really important any more.

The extent of voter alienation is apparent in statistics released by the Census Bureau. These figures are disheartening as well as alarming. In the 1968 Presidential election, there was a 60.9 percent voter turnout. In the 1972 election, after 18-year-olds got the vote, voter turnout dropped to 55.6 percent. And in the latest Presidential election, only 53.2 percent of the American population eligible to vote participated. The figures are even more alarming for off-year elections. In 1970 there was a 43.5-percent turnout compared to 35.5 percent in 1978—with a population increase of 21 percent.

The nationwide decline in voting should be of serious concern to anyone who believes in democracy. One of our basic freedoms as American citizens is to choose our public officials through the election process. Then if we are not satisfied with those in office, we can make changes by exercising our right to vote. Those who cite disillusionment or disgust with the system as their reason for not casting a ballot are simply perpetuating the situation they dislike. We cannot stand back. It is time for all Americans to realize that our votes do count, and we must do something to encourage eligible voters to participate.

The voting tax credit is one way to encourage eligible voters to take the time to vote. Taxpayers who vote in a Federal general election—or the equivalent thereto—will receive the credit—$60 for a joint return—by attaching their ballot stub to their Federal income tax return. In those States where a ballot stub is not used, a stamp or other document which is evidence of voting will be issued.

Critics of a voting tax credit argue that increased voter turnout does not guarantee an improvement in the quality of legislators being elected. Certainly there is some merit to that argument, but we have to examine the overall picture. We all have to work for improved voter turnout, but we also have to help educate voters so that they can cast a responsible vote.

I think we owe it to the country to give this proposal our attention.●

POETS ON A COFFEE BREAK

HON. RONALD V. DELLUMS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 2, 1983

● Mr. DELLUMS. Mr. Speaker, I am pleased to call to the attention of my colleagues the following poem which was forwarded to me by its author, a constituent of mine, Mr. Thomas Dunphy.

POETS ON A COFFEE-BREAK

The poets of America
Have gone on a coffee-break
Sitting on Congressional decisions
About MX-missiles.
We smile, for the nonce,
For we are dreamers
Dreaming of a world
Of Peace
Remembering John Lennon today
On the second anniversary
Of his death
And hoping our pens and inspirations
Will not meet such tragic oblivion
On the end of MX missiles.
And today we affirm life
Love and the pursuit of happiness
We have delved into the endless
Beauty of humanity
And we would rather sing
Of its glories
Then mourn its passing, like John's.

Yes, we poets are on prolonged coffee-break
Holding onto our inspirations like the
Dove of peace his olive branch
And waiting our opportunity
To return to work with joy!●

TAX RELIEF FOR RENTERS

HON. MARIO BIAGGI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 2, 1983

● Mr. BIAGGI. Mr. Speaker, today I am introducing a bill to provide major new tax relief for some 28.6 million Americans who rent their homes.

Under my bill, renters would be allowed for the first time to deduct from their Federal taxes that portion of their rent which is used to pay State and local property taxes. Current law permits only landlords or homeowners to take the property tax deduction.

Nationwide, 20 to 25 percent of a person's rent goes toward the payment of property taxes. Furthermore, renters often pay a higher rate of property tax than homeowners because many apartment buildings are considered to be commercial property.

The current tax deduction law clearly favors homeowners over renters. My bill is aimed at correcting this tax inequity. It is based on the premise that taxpayers with the same taxable incomes should be taxed the same.

According to the 1980 U.S. Census of Housing, 28,591,179 or 35.6 percent of homes are renter-occupied and 51,787,104 or 64.4 percent are owner-occupied. In eight States, rental units comprise more than 40 percent of all housing units.

This bill would be of special significance to New York City and other major urban areas, where renters far outnumber homeowners. In New York City, 76.6 percent of all housing units are rentals. In San Francisco, the figure is 66.3 percent, in Washington, D.C. 64.5 percent, in Boston 70.8 percent and in Chicago 47.9 percent.

Over the last decade, tenants have paid an increasing percentage of their income toward rent. Presently, more than 50 percent of tenants pay in excess of 25 percent of their income toward rent. Because tenants are in a significantly lower income bracket than homeowners, they are in desperate need of relief. In 1977, over 56 percent of tenants had incomes of less than $10,000 compared ot 30 percent for homeowners.

Mr. Speaker, home renters have absorbed the cost of inequitable property taxes for too long. Therefore, I would urge that this bill receive prompt and favorable consideration.

Mr. Speaker, at this time, I would like to submit a breakdown of the percentage of rental units by States.

RENTAL UNITS BY STATE

	Total units	Rentals (percent)
Alabama	1,341,302	29.9
Alaska	131,463	41.7
Arizona	956,717	31.7
Arkansas	815,664	29.5
California	8,630,198	44.1
Colorado	1,061,249	35.5
Connecticut	1,093,678	36.1
Delaware	207,081	30.9
District of Columbia	253,143	64.5
Florida	3,741,356	31.7
Georgia	1,872,089	35.0
Hawaii	294,052	48.3
Idaho	324,107	28.0
Illinois	4,042,744	37.4
Indiana	1,926,978	28.3
Iowa	1,052,847	28.2
Kansas	872,239	29.8
Kentucky	1,263,565	30.0
Louisiana	1,411,113	34.5
Maine	395,184	29.1
Maryland	1,460,635	38.0
Massachusetts	2,032,717	42.5
Michigan	3,195,015	27.3
Minnesota	1,445,616	28.3
Mississippi	827,169	28.9
Missouri	1,793,720	30.4
Montana	283,742	31.4
Nebraska	571,400	31.6
Nevada	304,327	40.4
New Hampshire	323,493	32.4
New Jersey	2,548,594	38.0
New Mexico	440,575	31.9
New York	6,339,762	51.4
North Carolina	2,040,562	31.6
North Dakota	227,664	31.3
Ohio	3,833,706	31.6
Oklahoma	1,118,532	29.3
Oregon	991,593	34.9
Pennsylvania	4,220,520	30.1
Rhode Island	338,590	41.2
South Carolina	1,029,981	29.8
South Dakota	242,523	30.7
Tennessee	1,618,361	31.4
Texas	4,928,965	35.7
Utah	448,603	29.3
Vermont	178,325	31.3
Virginia	1,862,854	34.4
Washington	1,539,681	34.3
West Virginia	686,311	26.4
Wisconsin	1,652,354	31.8
Wyoming	165,624	30.8

●

INTERNATIONAL FLOWS OF DATA

HON. TIMOTHY E. WIRTH

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 2, 1983

● Mr. WIRTH. Mr. Speaker, I have occasionally brought the issue of international flows of data to the attention of the House. While this is something of an esoteric area, it is of enormous importance to U.S. companies doing business abroad.

If the United States is serious about expanding opportunities for international commerce, the impact of restrictions on information flows will have to receive more attention from our Government.

Recently, Mr. Harry Freeman of the American Express Co. addressed a conference on "New Directions in U.S. Foreign Policy" here in Washington, D.C. His remarks are, I think, a cogent expression of the issues involved in international data flows.

I do not agree with all that Mr. Freeman says. But his remarks are an important contribution to our understanding of this issue, and I commend them to your attention.

A TRADE APPROACH TO INTERNATIONAL COMMUNICATIONS

(By Harry L. Freeman)

I am delighted to be a participant in these two days of talks on new directions in U.S. foreign policy. Telecommunications and information may seem to pale when compared with some other topics at the conference. But I believe this sometimes arcane pair of subjects should be a serious focus of U.S. foreign policy in general and of trade policy in particular. And my remarks today are to that end.

There is a disturbing trend—the growth in barriers to the flow of information across national borders—or transborder data flows. I believe these barriers should be viewed in a trade context. Further, I think it is possible to develop a trade approach that is responsive to the diverse, and even conflicting, needs of differing sectors and differing societies.

One of the crucial economic issues today for the U.S.—and many other developed countries—is productivity and competitiveness at home and abroad. At the heart of business and its competitiveness is how business uses communications.

International businesses have come to depend on computer-communications technologies for the rapid transmission of information. Companies from all countries rely on these systems for the coordination of production and marketing; for planning, accounting and financial management; for inventory control and sales coordination; for the communication of complex engineering and design computations; and for servicing both customers and suppliers on a global basis.

American Express, my company, is typical. We are a major user of communications for the delivery of financial and information services. All of our principal businesses—insurance payment systems, asset management, international banking and securities—could not function without rapid, reliable global communications. In 1981, for example, American Express on-line systems:

Processed 310 million American Express Card transactions;

Authorized daily 250,000 Card transactions from throughout the world within an average response time of 5 seconds;

Processed more than 350 million American Express Travelers Cheques sold by more than 100,000 banks and other selling outlets around the world;

Completed 56 million insurance premiums and claim transactions;

Automatically executed approximately $10 billion a day in international banking transactions; and

Responded instantaneously to 500,000 daily messages directing high-speed trading in securities, commodity futures, bonds, Treasury bills and a host of other items.

These systems support 17,000 on-line terminals within the company, 5,700 American Express point-of-sale terminals in the U.S. and abroad, and over 50 direct links to approximately 30,000 terminals at airlines and department stores. American Express is steadily interconnecting many of these networks and terminals into a single corporate data network.

Please forgive the commercial. It is, however, a testament to the variety of computer-communications needs of modern business. At American Express we rely on every form of communications media, from private leased line to public data network, from microwave to satellite transmission, and,

soon, optical fiber. The cost of developing, operating and maintaining our information processing systems, including data and voice communications, exceeds several hundred million dollars annually. And we are not atypical.

Communications provides the life support systems for our company—and, I can attest, for most other international businesses.

Obviously, telecommunications and information technologies have become essential to international production and international trade.

This brings me to a second point: telecommunications and information are especially vital for the most dynamic sector of the U.S. economy—the service sector. One of the important trends we see today is the steady and dramatic shift of the U.S. and other developed economies from an industrial base largely dominated by manufacturing to one heavily reliant on services. In the U.S., services have come to represent 67 percent of economic output and 72 percent of employment. According to OECD statistics, services accounted for more than half of gross domestic product in 13 developed countries.

In international trade, services are a bright spot. World service exports during the past decade expanded at an average annual rate of 17 percent. In 1980, service exports from France increased by 28 percent to $51 billion; from Britain, by 16.5 percent to nearly $50 billion; and from Japan, by 33 percent to $26 billion. According to a study of the International Trade Commission, services will amount to $135 billion in the U.S. current account in 1982, a 52 percent increase over 1980.

Clearly, communications and the closely tied information industry are emerging as major factors in this growth. OECD statistics show that between 1960 and 1977 exports of information services, which are so dependent on communications, rose annually by 25 percent in Japan, 19 percent in West Germany, 16 percent in Canada, 12 percent in France and the United States, and 11 percent in Britain.

Through applications of computers and communications, the world has seen a virtual explosion of business innovation, productivity and trade. Trade has particularly advanced through new forms of communications, better communications infrastructures and greater transparency of service across national borders.

Were I to stop here, the prognosis for the decade would appear rosy indeed. On the other side of the coin, however, I see a disquieting picture.

As growth in world trade as a whole and world trade in goods in particular have grown stagnant and even declined, the communications industry is emerging as a strategic sector in many countries. In this environment, communications is becoming an instrument of nationalism and protectionism. The new protectionism does not receive the same public attention as steel, autos, agriculture, pipeline technology and semiconductors. But its consequences are just as disruptive and possibly even more far-reaching. The new protectionism takes the form of invisible barriers to the international flow of electronic information, the transborder data flows that I mentioned earlier.

Countries have quite rightly come to view information as fundamental to a secure economic future. They are understandably anxious about questions of sovereignty, jurisdiction, confidentiality and the cultural consequences of unconstrained international information exchange. But in the 1980s, the motivation for national information policies appears to be more openly economic. Countries are seeking to promote domestic processing and technologically advanced information industries by discouraging the flow of data across national borders. And telecommunications authorities are becoming the instruments of these policies.

Restrictions on the activities of international users more often than not resemble classic non-tariff trade barriers:

Discriminatory pricing of data transmission services for international users;

Local content laws requiring the processing of data within the country of origin, as a condition of the user's transmission requirements;

Mandated use of national data networks;

Outright denial of certain types of circuits; and

Restrictions on the use of leased lines that deny the user the ability to offer competitive services.

Particularly dangerous are the emerging policies which provide the basis for customs duties and value-added taxes on classes of information.

To some countries, tariff and non-tariff barriers may seem justified from a short-term national perspective. Moreover, because of its dominant role in international communications and information markets, it may also appear that the U.S. is the only party interested in liberalizing the flow of information.

Such a view overlooks the fact that impeding the flow of information, like other trade barriers, damages all national interests. A protected market raises costs, decreases efficiency and lowers technical quality for domestic companies and local citizens. It reduces the competitiveness of other domestic industries in which communications and information have become a major factor. And it endangers a country's own suppliers who may suffer from retaliatory measures when exporting to foreign markets—markets such as the U.S., where, I strongly regret to say, strong signs of protectionism are also growing.

Few remedies exist against arbitrary and discriminatory actions of another country. The principle of "free flow of information" when applied to business is too often simply that—a principle, without teeth and without force in international law. In the United States, some argue that the Federal Communications Commission has the authority to consider the openness of foreign markets when granting licenses to foreign applicants; however, it rarely exercises such authority.

So, we have a rapidly emerging foreign policy issue. What, then, can be done to improve the communications environment in the 1980s?

For one thing, discussion, at such meetings as this one, helps.

Second, business and government must work together on telecommunications policy. New and beneficial signs of liberalization are beginning to appear. Britain, for example, is liberalizing telecommunications and turning to the market to foster a competitive and healthy national information industry.

Third, in the U.S., liberalization of telecommunications is also moving apace. In liberalizing telecommunications, however, recognition of the international context of decisions should be taken into account. Communications is a cooperative effort, in which the differing structures of national policy must receive consideration.

Finally, the international flow of commercial data is moving rapidly from being a communications issue to becoming a trade issue. As a trade issue, it should be subject to international trade negotiations and a system of internationally agreed trade rules.

I urge, therefore, that services, including communications and information services, be dealt with by the GATT, and that the GATT launch a work program on these issues. While the communique of the GATT Ministerial in November received mixed reviews, its three paragraphs on services may prove an historic economic milestone. Out of those intensive negotiations, trade ministers agreed to examine service issues at a national level and to exchange information on services through the GATT.

The objective is to determine by 1984 whether an international agreement on services is desirable and, if so, how to proceed. It marks the first time the GATT has formally taken up the question of services and, in the calculus of international trade issues, that constitutes a clear step forward.

How could the GATT address communications and information services? There are a number of ways:

One approach would be to expand existing GATT codes on government procurement, standards and subsidies to cover these two industries.

Yet another approach would be a separate code or agreement on trade in telecommunications and information.

But the approach which we think most promising is to address telecommunications and information as a part of a comprehensive approach to trade in services. GATT provides a remedy for any restriction on services that has the effect of impairing concessions on trade in goods. While the application of GATT to services has not been tested, discriminatory treatment of information flows would appear to be illegal in any case where discrimination would affect the sale of goods in a foreign market. Clearly, communication and information serve as integral support mechanisms for international trade in goods. Moreover, banking, insurance, shipping, and other services fundamental to the export of goods could not function without unrestricted information flows.

In addition, GATT codes also contain references to services used in the production of goods. These are criteria which could easily apply to data processing and software.

Let me hasten to say, the work needed to develop internationally accepted rules and remedies in the communications sector will take many years at both national and international levels. But the work should begin now. And that work in my view, should begin with the GATT. Other international organizations, such as the OECD, are already involved.

In the interim, we believe the U.S. should take steps to integrate communications and information with evolving trade policy.

We also need changes in U.S. communications legislation which we understand are under development in both the House and Senate. This legislation should provide guidance for negotiations or regulatory decisions and remedies for situations of trade discrimination. It should also give telecommunications and information higher-level policy attention in the trade context.

I want to underscore here and now that strict bilateral or sectoral reciprocity in communications and information, as in other areas of trade, would be a significant and dangerous departure from the uncondi-

tional most-favored-nation principle that the United States has followed since the formation of GATT.

We are optimistic that out of the principles and process of a trade approach will come the recognition that liberalization of trade in communications and information products and services will provide the same benefits as liberalization of trade in goods, that liberalization in these areas will, in fact, expand trade in goods as well as services, and that liberalization will prepare the way for future communications and information exports now in embryonic stages of development in every industrialized country.●

A CONGRESSIONAL WHITE PAPER; HILTON HEAD ISLAND BOARD OF REALTORS

HON. THOMAS F. HARTNETT

OF SOUTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 2, 1983

● Mr. HARTNETT. Mr. Speaker, I would like to share with my colleagues in the House a congressional white paper prepared by the Hilton Head Island, S.C., Board of Realtors. The paper addresses issues which the board of realtors believes to be of national economic importance. As you know, the housing industry has been hard hit by the recession. I trust their statement will be of great interest to the Congress.

The material follows:

A CONGRESSIONAL WHITE PAPER; HILTON HEAD ISLAND BOARD OF REALTORS

The Hilton Head Island Board of Realtors respectfully submits this Congressional White Paper in an attempt to accentuate it's support for issues which it feels are important to economic prosperity in our area of the Lowcountry of South Carolina.

Government spending, the size of the Federal Deficit and Tax Policies—especially those that induce savings and investment are of primary concern to the Hilton Head Island Board. The Board acknowledges and commends the progress that Congress has shown in the past year in beginning to restrain Federal deficit spending and hopes more strides for continued improvement will be made in this area. The Board advocates the need to curb the Federal deficit so that interest rates can stabilize. It is our desire that if Congress considers another balanced budget/tax limitation constitutional amendment as it did last year, that they avoid a situation in which taxes would be arbitrarily raised to balance the budget rather than pursuing the moderation or restraint of spending. In the area of budget restraint, it is our opinion that the entitlements programs and the defense budget should be scrutinized. It is also our opinion that future projected spending be kept at a minimum. We see no room for recovery if deficits remain high.

In the area of taxes, the Hilton Head Island Board opposes any change in the home or second home mortgage interest deductions. This would cause negative and adverse effects on real estate investment and/or would be highly detrimental to the National economy and especially those communities which are now heavily dependent upon the second home industry, as is Hilton Head Island. Communities with economies similar to Hilton Head Island are highly dependent on tourism. If the second home industry is impaired by the termination of mortgage interest deductions, unemployment and business failures surely will increase in those areas. The building industry is just beginning to lead the U.S. economy out of its slump and the second home industry is a very important part of this recovery. The proposed changes in the mortgage interest deduction would certainly hinder this recovery.

The Board urges Congress to consider changes in laws that would encourage pension investment in mortgages. It believes that this is an important alternative source of housing capital and should be explored. This activity in mortgages should prove beneficial to both pensions and the housing industry.

The Board is in agreement with the Administration's proposed Federal Land Sales on a selected basis and urges that the proceeds from the sales be earmarked for reducing the Federal Debt.

The Board also favors the continued support for Federal Flood Insurance for seashore oriented development, such development to be carried out with strong environmental considerations. It is the Board's resolve that the Federal Flood Insurance Program be given support by Congress to encourage future development. Also, it is our belief that as a result of our special environmental relationship, that in order to maintain a reasonable level of economic growth in our area and similar areas, Federal funding for the construction and maintenance of seawalls is mandatory.

The necessity for the maintenance of the extraodinary beauty and quality of environment of the Lowcountry is widely accepted. Just as widely accepted is the fact that the special requirements of reducing the impact of even existing economic activity in such a delicate area is generally beyond the jurisdictional and financial means of most communities. Therefore, we, the Hilton Head Island Board of Realtors, feel that the development of the Lowcountry requires Federal assistance for water and sewer projects so that the personal and economic health of our citizens may be guaranteed.

A solution to the budget problems of the Social Security System is necessary for a healthy economy, as well as for the continued flow of retirement and other Social Security benefits. Both tax and benefit revisions are needed, but those must not fall unfairly on any single group. We do not feel that self employed men and women should suffer under an increase of $450.00 in higher taxes next year, while corporate and other employees will pay no additional taxes under the proposed Social Security Tax Plan. The Board opposes this unfair treatment of the self-employed as we support equal sacrifice for a solvent Social Security program.

It is the Board's belief that increased industrial productivity is essential to the well being of the American Economy. We advocate a cooperative and coordinated effort between Federal, State and Local government, business, industry and labor so that economic development will provide our nation and individual communities a solid tax base, jobs, and a healthy environment for people to live and work in. In addressing this matter, a center for business, government and labor studies should be created to act as a consultant on issues that impact on these sectors individually and as a group. It is our feeling that such a center could be profit oriented and become self-supporting after a few years of existence. Its impact could more than pay for itself. In conjunction with the above center, an indepth study of the American Economy supported by the Private and Public sector should be carried out to, among other considerations, measure the effects of supply side economics on the economy and chart a path for future economic growth and stability.

The Hilton Head Island Board of Realtors wishes to continue to work with the elected representatives of South Carolina and advocates a liaison between those officials and the Board.

This report is respectfully submitted by RPAC representatives and the Hilton Head Island Board of Realtors.●

JOSEPH PETRONELLA: AN EXTRAORDINARY POLICEMAN

HON. JACK F. KEMP

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 2, 1983

● Mr. KEMP. Mr. Speaker, without question, police have one of the most difficult and demanding jobs in our society. Within that profession, the undercover cop is a particularly rare and dedicated individual.

Western New York is privileged to claim one of the most outstanding undercover police officers in the United States. He is Joseph A. Petronella, now assistant chief of the Narcotics Enforcement and Intelligence Bureau of the Erie County Sheriff's Department.

During his 10-year career in law enforcement, Joseph Petronella has made more than 1,000 arrests and he has a 99-percent conviction record. A pioneer in the art of disguise, he has received numerous commendations for utilizing innovative and effective techniques that have been instrumental in apprehending criminals.

Noted authorities in law enforcement have stated that Mr. Petronella is very possibly the best undercover narcotics officer in the country.

While Joseph Petronella's identity must remain concealed, his tremendous accomplishments should and must be recognized.

Last December, the Buffalo News published an article praising Joseph Petronella's achievements. I hope my colleagues will read this article with the knowledge that our communities are safer places because of policemen such as Joseph Petronella:

[From the Buffalo News, Dec. 19, 1982]

PETRONELLA TO DON A NEW ROLE—MASTER OF DISGUISE PROMOTED

(By Anthony Cardinale)

Detective Sgt. Joseph A. Petronella, who has made more than 1,000 arrests during his 10-year career as an undercover lawman, has been promoted to assistant chief of the

Narcotics Enforcement and Intelligence Bureau by Sheriff Kenneth J. Braun.

He will assist the narcotics chief, Captain Santo Costantino, but will continue his undercover work on the street, Sheriff Braun said. He is about to embark on a new type undercover investigation, the sheriff added.

Coinciding with the announcement was the release this weekend of the fall issue of the Empire State Sheriff magazine featuring a cover story on Sgt. Petronella headlined, "Under the Cover of Many Different Faces."

The promotion and the article recognize an undercover career that has brought renown to the Erie County Sheriff's Department across the state for its imaginative "sting" operations to infiltrate the drug market and burglary rings.

"As far as I'm concerned," Sheriff Braun said, "Joe is the equivalent of a Congressional Medal of Honor winner in civilian service. He's a brave and very smart police officer. In my 34 years in law enforcement, he's the best I've seen. No one else can do what he can do, but pretty soon we're going to use him in a new technique on the street."

Capt. Peter Scaccia, chief of investigative services, said he has worked closely with Sgt. Petronella and is looking forward to "a very innovative technique we are in the process of formulating" for combating street crime.

"Joe has arrested over 1,000 suspects in his career," Capt. Scaccia said. "He has a 99 percent conviction ratio. When he gets them, he gets them."

The undercover lawman has been able to survive a decade of undercover work in the same county "because of his ability to change his appearance effectively and realistically" and because he is "a natural actor," according to the story in the magazine published by the New York State Sheriffs Association Institute.

Calling Sgt. Petronella "very possibly the best domestic undercover narcotics officer in the United States," the Empire State Sheriff said the "gutters and alleys" haven't given him the glamour of the Serpicos in real life and movie fiction. "The closest Joe has been to big-time media is an appearance with Sheriff Braun on 'Good Morning America,'" it added.

But Joseph Petronella has made big headlines in Western New York since his first big "sting" operation, in which he infiltrated the food-stamp black market after the Blizzard of '77. Two years later, he was promoted to criminal deputy, and in 1980 he was named a detective sergeant.

The 15 major "sting" operations—in which an undercover man masquerades as a criminal while a team of agents photographs and taperecords the illegal transactions—have come in such quick succession that many people have asked how he can avoid running into the same street criminals a second time.

The answer, he says, is that he often does cross paths with convicted defendants. Not only has he deftly avoided the ones who might have recognized him, but he actually has dealt with and arrested some criminals a second time.

After the food stamp investigation there followed a series of primarily drug-related probes starting with Operation Scatter, in Kenmore and Town of Tonawanda, and Operation Delaware, in which a pound of cocaine was confiscated.

Then came Operation Siamese, in the twin Tonawandas; Operation Bittersweet, near Sweet Home High School; Operation Pied Piper, near Southside High School; Operation Needle, near the methadone center at Buffalo General Hospital; Operation Rock in Black Rock and Riverside, and Operation Polar Bear in North Buffalo.

Next came Operation Market near the Broadway Market, Operation Operation at Erie County Medical Center, which centered on the thefts of hospital property; Operation Stripcaine, on the Elmwood strip; and Operation Grasshopper, in which youths on bicycles sold pot at Burgard High School.

More recently, Sgt. Petronella spearheaded Operation Pac Man, arresting drug dealers and other criminals hanging around video arcade rooms.

Honored with a public service medal from the New York State Bar Association in 1981, Sgt. Petronella used the $500 award to establish a scholarship fund for a high school student wishing to study criminal justice in college.

The first award was given to a Riverside High School graduate last June, and now the scholarships also have been opened to law enforcement officers wishing to further their education. A foundation to administer the Joseph A. Petronella Scholarship has been formed by several friends under the leadership of businessman Robert Rich Jr.●

HONORING DR. JOHN J. COLLINS ON HIS RETIREMENT

HON. WILLIAM M. THOMAS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 2, 1983

● Mr. THOMAS of California. Mr. Speaker, I would like to commend to my colleagues the long and distinguished career in education of Dr. John J. Collins, president of Bakersfield College, who is retiring this month after 25 years with the college.

It gives me particular pleasure to honor John Collins today, because he is a close friend and former colleague whom I have known since I first came to Bakersfield College as an instructor in 1965. I have always held John Collins in the higher regard, and I am proud to have been associated with him.

This respect is shared among community college presidents throughout California and indeed, the Nation. In a State which boasts the finest community college education system in the Nation, Dr. Collins has helped to make Baskerfield College one of the top community colleges, not only in California, but in the United States.

Dr. Collins was an instructor and coach at Bakersfield College when the school—finally—received its own campus in 1955. Except for a tenure as president of Moorpark College from 1961 to 1966, Dr. Collins has served the students of Bakersfield College continuously since then.

He has been a leader and an innovator on behalf of Bakersfield College. Dr. Collins helped to plan and establish two learning centers which have brought the college to the community in Delano and downtown Bakersfield. He has helped to bring computers into the classroom, establishing a new high technology curriculum and computers to aid in teaching the more traditional disciplines.

Under Dr. Collins' direction, Bakersfield College has become more accessible to the community and more responsive to the training needs of local industry and business, but it has also maintained its national standing among the more traditional curricula. Many of the learning programs at Bakersfield College have served as models for other colleges throughout the Nation. As a charter member of the League for Innovation in the Community College, the school shares its methods with educators around the country. Dr. Collins had a role in forming this forward-looking body.

All of these achievements speak well for John Collins' abilities as an administrator, but they are grounded in his experience and dedication as a teacher of students. John Collins spent 41 years in education, and everything he has accomplished has sprung from his dedication to learning.

In addition, Dr. Collins has served his community as a member of the board of directors of the United Way and Red Cross chapters. He also interrupted a budding teaching career in 1941 to serve as an infantry company commander in the Pacific theater during World War II.

I am delighted for this opportunity to honor Dr. Collins before this body. I wish him well as he leaves Bakersfield College. He has been an outstanding educator and a good friend, and the college will miss him. He has earned his retirement many times over.●

CONGRESSMAN TONY P. HALL TESTIFIES ON CONVENTIONAL ARMS TRANSFER LIMITATIONS LEGISLATION

HON. TONY P. HALL

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 2, 1983

● Mr. HALL of Ohio. Mr. Speaker, on February 23, 1983, I had the honor of testifying before the House Foreign Affairs Committee's Subcommittee on International Security and Scientific Affairs on the issue of conventional arms transfer limitations.

For the benefit of my colleagues, the text of my remarks follows:

CONVENTIONAL ARMS TRANSFER LIMITATIONS

Mr. Chairman, I am honored to have the opportunity to appear before this Subcommittee today to discuss the issue of conventional arms transfer limitations. The Subcommittee on International Security and Scientific Affairs, under your leadership, Mr. Chairman, deserves to be commended

for the efforts it has made over several years to focus attention on this serious international issue.

My interest in conventional arms transfer policies was stimulated in part by the Falkland Islands conflict last year. I was deeply concerned that a country like Argentina could acquire the sophisticated military equipment capable of challenging—and almost defeating—the British navy. Ironically, over $200 million worth of this equipment was sold by Great Britain itself to Argentina.

My study and research of conventional arms transfers led me to introduce H. Con. Res. 415 on September 29, 1982. In November and December of last year I contacted over 125 individuals and organizations to stimulate interest in the legislation in preparation for this 98th Congress. The positive and enthusiastic response I received has encouraged my efforts this year with the reintroduction of the conventional arms transfer limitations measure as H.J. Res. 128.

Most of the discussion about arms limitation has focused on the important issue of nuclear arms control. The nuclear freeze legislation has succeeded in stimulating national and international debate on the prospects of nuclear war, and led to broad citizen involvement in one of the most critical issues facing all of humanity.

It is my hope that similar attention can now be directed to another challenge of arms limitation: the alarming escalation of global conventional arms sales. The hearings scheduled by this Subcommittee on the issue are a significant part of this process.

It is worthwhile to recall that while there have been no deaths since World War II as a result of the use of nuclear weapons, between 12 and 15 million people have been killed in wars and conflicts involving conventional weapons.

Currently, the world spends $22 on military purposes for every $1 it spends on development aid to poor countries. According to the U.N. Center for Disarmament, the money required to provide adequate food, water, education, health and housing for everyone in the world has been estimated at about $18.5 billion per year. The world spends this much on arms every two weeks. In the developing world, ten times more is spent on arms than on health, education, and welfare combined.

According to the Congressional Research Service, between 1978 and 1981 conventional arms transfer agreements between developing nations and arms supplying nations totaled $120.6 billion. During this period, the Soviet Union was the developing world's leading individual arms supplier, with arms agreements with developing countries totaling $33.2 billion. Third World arms deals on the part of the United States trailed at $30.7 billion.

The most interesting statistic for conventional arms agreements for these four years is the $45.5 billion worth of agreements with developing nations by free world nations other than the United States. Our Western Allies, such as France, the United Kingdom, West Germany, and Italy actually have the largest share of the conventional arms market.

Particularly alarming is the fact that the world's leading arms developers are now exporting their most advanced weapons with little or no time lapse between introduction into their own arsenals and transfer abroad. Among the examples of this are the transfers of advanced French Mirage fighters and Exocet missiles, Soviet T-72 tanks, and United States F-15 and F-16 fighters and Phoenix and Sidewinder missiles.

Weapons and warfare have been an ongoing element of the human experience. Clearly, it is unrealistic to expect that all arms transfers can be stopped or that swords will be beaten into plowshares around the globe.

Nevertheless, I do believe that there are specific, practical steps that the United States can take to rein in the runaway conventional arms race. The stituation becomes hopeless only if we refuse to act.

The legislation I have introduced, H.J. Res. 128, calls for a four-point program to achieve conventional arms transfer limitations. It prescribes a simultaneous multitrack approach to conventional arms restraint. Permit me to briefly outline the four tracks recommended in H.J. Res. 128.

RESUMPTION OF THE CAT TALKS WITH THE SOVIET UNION

The first point of my resolution is that the United States and the Soviet Union should immediately begin negotiations to resume the Conventional Arms Transfer (CAT) talks. It is my contention that we should commence discussions with the Russians to provide for the formal resumption of the talks initiated by the Carter Administration in 1977.

A possible first step might be to establish a bilateral working group to consider the means of moving forward with renewed CAT talks. I make this recommendation fully aware of the traditional difficulties of finding common ground for any arms-related agreement between the superpowers.

Observers and participants have cited several reasons for U.S. difficulties with the CAT talks of 1977 and 1978. Some contend that the internal clash between the Arms Control and Disarmament Agency and State Department perspectives on the talks was the principal factor. Others point to the restraining impact of improved relations with the People's Republic of China. Yet a consensus seems to be that a significant element was the failure of the Carter Administration to pursue parallel discussions about conventional arms limitations with the Western arms suppliers.

In my opinion, the problems that led to the lack of success of the first CAT talks are not insurmountable. Indeed, the CAT experience under the Carter Administration provides a valuable guide for a renewed effort with the Soviet Union.

First, the CAT talks proceeded further than most observers ever thought possible. Genuine progress seemed to have been made prior to the fourth round of negotiations. Second, the talks showed that there might be room for some reasonably specific restraints on certain classes of weapons, such as those useful to terrorists. Third, the Soviet Union did not flatly reject the American proposal to discuss specific regional guidelines. This particularly was a most encouraging development.

The most important reason for a continued United States-Soviet dialogue is that regional arms races are most often a direct result of competition between our two countries. The attempt to win friends or to compete through proxies has been a dangerous and destabilizing dimension of superpower competition. Such local conflicts carry with them the potential for eventual direct involvement of the United States and the Soviet Union. It is therefore in both countries' interests to discuss the conventional arms competition between them in the Third World.

The CAT talks offered hope that progress could be made on conventional arms transfer limitations between the United States and the Soviet Union. The United States should take the initiative in attempting to get these talks back on track. Let us demonstrate to the world our willingness to restrain and set rules for the conventional arms competition both nations are supporting in the developing world.

CONVENTIONAL ARMS TRANSFER LIMITATION DISCUSSIONS WITH THE FREE WORLD ARMS SUPPLYING NATIONS

The second point of my resolution is that the United States should immediately begin discussions with the free world arms supplying nations to limit conventional arms transfers to developing nations and to establish qualitative guidelines for conventional arms transfers. While bilateral talks between the Soviets and the United States are necessary if long-term progress on arms restraint is to be realized, the most immediate goal should be to encourage multilateral initiatives. As I mentioned in discussing the CAT talks, these bilateral talks might have been helped if simultaneous arms limitation discussions with our Western allies had been in progress.

It is important to re-emphasize that the major Western suppliers combined deliver a majority of the weapons traded in the international market. Moreover, they are more often in direct competition with each other than are Eastern and Western suppliers. It makes sense for some coordination to take place among the Western suppliers, since a joint effort on their part would limit the ability of the Western-oriented arms recipients to "shop" elsewhere.

Initially, this free world arms suppliers track might proceed without formal agreements in order to accustom the participants to a new coordinating mechanism. This might then lead to more formal agreements at a later stage.

Developing channels of communication on conventional arms restraint among the Western allies would be especially valuable during times of crises. For example, a consultative mechanism would have been most useful during the Falkland Islands crisis.

While there is bound to continue to be competition among the free world suppliers, it would be beneficial if an effort could be pursued to develop a market-sharing approach. Such an approach could begin by acknowledging French and British interests, for example, in continued production of certain weapons systems. Thus, French supersonic aircraft and helicopters and some types of British missiles or surface ships could be given assurances of adequate export outlets. It is in the interests of the Western alliance to bring important suppliers into the restraint framework and to reenforce common security interests.

Discussions among the free world suppliers should aim to establish criteria for what will be sold and where it will be sold. Qualitative restraints on certain classes of equipment should be a primary initial goal. An example here might be advanced missiles of the caliber of the French Exocet.

In addition, agreements should be sought with respect to not introducing certain sophisticated weapons into regions of the world where those weapons presently are not available. A reasonable goal might be a consensus on the part of the Western arms sellers not to sell advanced supersonic fighter aircraft to regions like South America and sub-Saharan Africa.

The Western or free world track poses some of the greatest challenges to conventional arms restraint, but at the same time, offers the hope of some of the greatest rewards. Moreover, cooperation on the arms selling issue could lead to cooperation on other vital issues affecting the alliance.

DISCUSSIONS BETWEEN THE ARMS BUYERS AND THE ARMS SELLERS—THE GENEVA TRACK

The third point of my resolution is that the United States should immediately, through the Committee on Disarmament in Geneva or through some other appropriate international forum, begin conventional arms transfer discussions between nations selling conventional weapons and nations purchasing such weapons to limit such arms transfers.

This third track focuses upon the Committee on Disarmament at Geneva, more formally called the Conference of the Committee on Disarmament, which was created in 1962 as a multilateral forum for negotiations on disarmament. It reports to and is instructed by the U.N. General Assembly. Its membership includes nations of both Eastern and Western blocs, as well as a number of non-aligned nations. This multilateral forum has been the site of discussions on general disarmament, nuclear testing, demilitarization of the seabeds, chemical and biological weapons, and humanitarian laws. Several advantages might be derived from a dialogue in such a body.

First, a better understanding of the legitimate defense requirements of developing nations could be a primary target. It is important that this sensitivity be considered and addressed.

Second, some initial gains might be achieved by focusing on weapons useful to terrorists. This focus might defuse the more volatile aspects of such a dialogue by concentrating on common problems.

Third, such a forum might be able to discuss the outlines for an internationally recognized code of principles regarding legitimate arms transfer practices. This approach could be modeled after discussions of internationally recognized standards of human rights.

Fourth, such a forum might begin to serve as a vehicle for differentiating among various regional interests and concerns. This, in turn, could serve as an impetus for initiatives within the existing regional organizations, such as the Organization of American States.

It is imperative to initiate a supplier/recipient track for conventional arms transfer limitation talks. The Committee on Disarmament offers a pre-existing forum with which members of the international community have had some experience. In addition, it offers the advantage of not being closely identified with U.S. interests.

SELECTIVE SELF-RESTRAINT

The resolution finally calls upon the United States to reaffirm a commitment to the self-restraint it has demonstrated with respect to selective conventional arms transfers to developing nations and a commitment to qualitative guidelines for conventional arms transfers. I refer to this approach as the self-restraint track.

I want to emphasize that this is not a call for unilateral abandonment of conventional arms agreements with the Third World. Rather, it urges the Administration in selective cases to follow a common-sense policy of refraining from transfering sophisticated weapons to certain countries. Examples of this policy were cited in the Congressional Research Service report "Changing Perspectives on U.S. Arms Transfer Policy" which was prepared for this Subcommittee in 1981. The report mentioned the Carter Administration's turndowns of the F-5E aircraft for Guatemala, the A-7 for Pakistan, the F-4 for Taiwan, the F-4G for Iran, and F-16's for Turkey.

Used carefully, a measure of self-restraint can signal continued willingness to engage in negotiations. Such restraints also may encourage reciprocal action by other suppliers—creating tacit multilateral agreements in those cases where explicit negotiations are not possible. We engaged in such restraint with the Russians during both the Korean and Vietnamese conflicts.

At the very least, selective self-restraint can play an important, if limited, part in the initial stages of a larger effort to encourage conventional arms control and also allow a nation to refuse to transfer weapons on grounds of principle. Human rights, economic development, and other general principles supported by the United States are vital threads in the fabric of U.S. diplomacy.

There also is the less esoteric consideration of the potential adverse impact of overseas sales of sophisticated U.S. equipment on our own military supplies. The C.R.S. report for this Subcommittee called attention to the issue of an aggressive arms sale policy resulting in a draw-down of U.S. service inventories. That report cited the example of the impact of F-16 aircraft sales to non-NATO countries. I would urge this Subcommittee to pursue the draw-down issue further with Administration officials and to solicit the comments of the appropriate Pentagon personnel.

The Administration should be encouraged by Congress to continue selective self-restraint and to continue to observe qualitatitve guidelines with respect to the levels of sophistication of the weapons transferred. The United States should resist the temptation to unilaterally up the ante in regional balances of power. Inevitably, the balance of power will be restored, but at a higher and more potentially explosive level.

SUMMARY

The legislation I have introduced, H.J. Res. 128, is intended to offer a concerted, broad-based conventional arms transfer limitation effort on several tracks. The multitrack approach recognizes the complexity of the international arms transfer network. Regional differences, bloc competition, economic considerations, and security needs are but a few of the factors which make conventional arms restraint difficult to accommodate within just one negotiating framework or track.

I believe it is essential for the Congress at this juncture to urge the Administration to develop a coherent and visible conventional arms transfer limitation strategy. Further, the Administration should immediately begin multitrack discussions that will lead to both informal and formal agreements and guidelines with respect to conventional arms sales.

In order to facilitate Congressional oversight of this endeavor, H.J. Res. 128 requires the President to report to Congress every six months on the actions taken by the United States in accordance with the resolution and the progress being made toward achievement of the objectives expressed in this resolution. The report envisioned by this legislation would be a most useful and valuable document concerning the global efforts at conventional arms transfer limitations. I would hope that it could serve as the basis for Congressional and other initiatives on the issues relating to conventional arms transfers.

In conclusion, I would like to again thank the Subcommittee for holding this hearing and for providing leadership on this issue. I am grateful for the attention the Subcommittee has given to H.J. Res. 128, and I hope that this legislation will receive favorable consideration by the Subcommittee.

It is my hope that H.J. Res. 128 will be a catalyst for further efforts concerning conventional arms transfer limitations. My objective in introducing this legislation is to stimulate debate and interest, and encourage the active involvement of those who are in a position both to influence and to direct the conventional arms transfer policies of this country.

The issues relating to conventional arms transfers will not be resolved in this Congress. We can, however, begin the processes through which these issues can be addressed. I look forward to working with this Subcommittee on these efforts.●

LITHUANIAN INDEPENDENCE DAY

HON. MATTHEW J. RINALDO

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 17, 1983

● Mr. RINALDO. Mr. Speaker, I rise today to bring to the attention of the House of Representatives the 65th anniversary of Lithuanian independence. Born in the ravages of World War I, the Lithuanian nation had a brief but noble existence. For 24 years their democratic institutions and climate of intellectual vigor stood in marked contrast to the Gulag of their Soviet neighbors to the east.

This brief freedom was short lived. In 1940 over 300,000 Soviet troops invaded and illegally annexed the independent Lithuanian nation. Little did anyone know that this action portended a future and equally cruel Soviet expansion into other nations of Eastern Europe.

While we in the United States have refused to legitimize the Soviet annexation of Lithuania by not recognizing this status, the people of Lithuania must live with the hard reality of Soviet domination. Most of the 3½ million people in Lithuania are devout Catholics who face systematic harassment and obstruction of their right to practice their religion freely. The Kremlin continues to deny them religious freedom and cruelly suppresses and denies Lithuanian ethnic and cultural development.

Lithuanian is a small nation composed of hard working and industrious people. Many of its sons and daughters have come to live in my district in New Jersey where they are admired and respected members of the community. The history of the land which they left reaches back nearly 1,000 years. It has not always been a happy

history, for most of that time it was dominated by foreign powers. Nevertheless, the Lithuanian people have remained strong in spirit and successfully fought off efforts to replace their culture with that of their conquerers. For that reason, they are especially well prepared to withstand the continuous efforts by the Soviets to eradicate their national identity.

Mr. Speaker, I know that I am not alone when I say that our prayers and hopes lie with the Lithuanian people whose courage under domination is an inspiration to us all. Our prayers must be matched by vigilance in our actions to pressure the Soviets to exhibit respect for human rights and liberties in their policy toward all the oppressed nations of the Soviet empire.●

ARMS CONTROL AND FORCE MODERNIZATION

HON. LEE H. HAMILTON

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 2, 1983

● Mr. HAMILTON. Mr. Speaker, I would like to submit my Foreign Affairs newsletter for February 1983 for inclusion in the CONGRESSIONAL RECORD:

ARMS CONTROL AND FORCE MODERNIZATION

The prevention of war and the control of arms are the most important issues of our time. These paramount tasks require a strong commitment to maintain sufficient strength so that we can protect our interests and deter aggression. Peace and security must also be preserved by a strong commitment to secure the agreement of potential adversaries to verifiable cuts in military forces. There are no serious voices today who would deny that both these tasks must be undertaken.

Our record in arms control in the recent past is cause for concern. We have not completed an arms control agreement with the Soviet Union since 1976. For the first time since the administration of President Dwight Eisenhower, we are not engaged in negotiating a comprehensive test ban treaty. We have not ratified the second strategic arms limitation treaty, and we are now trying to renegotiate the peaceful nuclear explosions treaty and the threshold test ban treaty. We have just removed the head of the Arms Control and Disarmament Agency and are engaged at the moment in a fight over its direction. Most disturbing is that we have given the impression of building up our defenses pell-mell while delaying arms control. The rationale behind the buildup included the goal of negotiating mutual cuts in military forces from a position of strength, but the buildup has been pursued with an urgency and a momentum which has, as a practical matter, pushed that goal into the background.

The need to modernize our strategic forces is genuine. A few statistics tell a large part of the story. Seventy-five percent of our nuclear warheads are on weapons which are aged 15 years or more, while 75% of Soviet warheads are on weapons which are aged five years or less. In the decade of the 1970's, the Soviets deployed four new submarine types, two new submarine-launched missile types, and three new intercontinental ballistic missile types, while we deployed new types in none of these categories (though we expanded our arsenal of warheads at a faster rate).

Arms control and force modernization should be seen as equal partners, not competitors, in the drive to achieve peace and security. An example which makes the point is the anti-ballistic missile treaty, a pact under which both superpowers agreed not to build more than a small number of anti-ballistic missiles. The agreement was a successful piece of defense planning in that it made large investments in a new military technology unnecessary. There are other instances where we can see with hindsight that problems could have been avoided by an arms control agreement. If the American negotiating team had been allowed to follow the advice of its chief negotiator during talks on the first strategic arms limitation treaty, there would now be a ban against the arming of missiles with more than one independently targetable warhead ("MIRVing"). We had an advantage at that time in the appropriate technology, but the Soviets now have the advantage because they have larger missiles and can put more warheads on each one. It is this MIRVing which has made our land-based missiles theoretically vulnerable. Problems like this do not have to be solved if they are avoided.

If arms control is to play a key role in defense planning, certain conditions have to be met. First, the organization of government must reflect the equal partnership of arms control and force modernization. This has not been the case in recent months. In the President's first budget, there was no money for the resumption of negotiations, but there was $1,600 billion for a five-year military buildup. Important positions in the Arms Control and Disarmament Agency were left unfilled, and it took until November of 1981 for the formulation of proposals to control intermediate-range arms, and another six months for the formulation of proposals to control strategic arms. Arms control must be brought in as a concern in defense planning at the start. Once programs to develop weapons are almost complete, it is hard for arms controllers to do any more than formalize the upper limits on planned deployment.

The second condition is that arms controllers need to have criteria for deciding which weapons they most want to control. A freeze on all warheads, missiles, and other delivery systems is a desirable goal, if it is done by both sides in a situation of strategic parity and if it is verifiable. But it does not give us a way to distinguish among weapons. This is why I support efforts to give special emphasis to destabilizing weapons. Nuclear weapons which threaten a first strike to either side seem to be the most destabilizing because it is the existence of these weapons that tempts a preemptive strike, or the adoption of a launch-on-warning strategy which leaves the retaliatory response to the computers.

Third, the commitment to increase our armed strength and the commitment to pursue arms control need to be under firm political control. Decisions on defense must not be taken autonomously, with a momentum of their own. Leading defense planners have testified in Congress that they have not had adequate guidance from political authorities. If this guidance is not provided, the perception grows that the arms race is out of control. Without the active intervention of political leaders, this momentum cannot be halted. Arms control needs political support from the highest levels of our government.

There are great difficulties in educating political leaders to play this sort of role. The details of defense planning are complex, and these are disguised in almost impenetrable jargon. However, we can take encouragement from the large number of people who familiarize themselves with much of this detail. There is a startling contrast with a few years ago in the number of participants knowledgeable in the public discussion of these topics. This in turn has caused the political leadership to get more involved. The debate in Congress is more informed than it used to be. If this interest and this educational process can be maintained, we may yet be able to give arms control the importance it deserves in national security policy.●

GEORGE P. MILLER

HON. DON FUQUA

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Thursday, January 27, 1983

● Mr. FUQUA. Mr. Speaker, I am deeply honored to pay tribute to our former colleague, the Honorable George P. Miller of California, one of my distinguished predecessors as chairman of the Committee on Science and Technology.

George P. Miller served in this House for almost three decades, having been elected first in 1944. He was chairman of our committee, then known as the Committee on Science and Astronautics, for more than 10 years, from the fall of 1961 until he left Congress in January 1973.

Chairman Miller was a dedicated and effective spokesman for America's space program. He was a charter member of the Science and Astronautics Committee which was created as part of the Nation's response to the Soviet space program. From the time he became chairman in 1961 until he retired, his leadership helped to guide a massive scientific and engineering effort which proved to the world that American ingenuity and determination would more than meet the Soviet challenge. Some of the most spectacular achievements of the space program were accomplished during his chairmanship, the most remarkable being the landing of American astronauts on the Moon. It will come as no surprise to my colleagues when I say that I believe our national space program deserves our continued enthusiastic support, and if George P. Miller were here today he would surely urge a more vigorous space program.

One of the few Members of Congress who was a graduate engineer, George P. Miller seldom missed an opportunity to remind his lawyer colleagues in this Chamber that, "You guys think in circles. I am one of the few guys

around here who has been trained to think in straight lines." That comment was characteristic of a man who was serious about his work, but who never took himself seriously.

He never lost the common touch. Nor could he ever forget those who were left behind by our economic system. He experienced some hard times himself and often told how during the Great Depression of the 1930's he had worked as a street-sweeper in his hometown of Alameda, Calif.

One of the highlights of Mr. Miller's life was his service as an officer in the field artillery during World War I when he was involved in active combat on the European front. It provided him with special insight and deep respect for our brave men in the military services.

During his service in the Congress he acquired a reputation for honesty, sincerity, and friendliness while always evidencing the best traits of an older statesman—maturity, sensitivity, diligence, and wisdom.

Perhaps his fine sense of humor, his optimistic spirit, and his selflessness which he expressed in his sympathy for the common man all contributed to his long life, for he lived 91 years and so many of them were spent helping his fellow man.

George P. Miller was a credit to this House, a distinguished committee chairman, and a dedicated citizen of our great Nation. I am proud to say he was my friend, and I am grateful for his stewardship of the Science Committee in its formative years. He has passed on to all of us who have served on the committee since then a legacy of dedication and excellence. We are grateful for his example and his contributions.

I offer my sincere condolences to his loved ones.●

HOLOCAUST MEMORIAL

HON. LES AuCOIN

OF OREGON

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 2, 1983

●Mr. AuCoin. Mr. Speaker, yesterday I had the opportunity to listen to Mark Talisman, vice chairman of the U.S. Holocaust Memorial Council, present his organization's budget request for fiscal year 1984.

There is nothing I need add to what Mark said yesterday as to why there should be a Holocaust Memorial. I commend and endorse the work of the council. While it may be slightly unusual to insert a budget request statement in the Record, I believe that, in this particular case, it is something that all of us should be aware of and support.

STATEMENT OF MARK TALISMAN, VICE CHAIRMAN, U.S. HOLOCAUST MEMORIAL COUNCIL, BEFORE THE HOUSE COMMITTEE ON APPROPRIATIONS, SUBCOMMITTEE ON INTERIOR AND RELATED AGENCIES, ON THE 1984 BUDGET FOR THE U.S. HOLOCAUST MEMORIAL COUNCIL.

This spring will mark the 40th anniversary of the Warsaw Ghetto Uprising—one of the many, yet all too few, examples of heroism and martyrdom in the Holocaust period. In the Warsaw Ghetto, thousands of unarmed Jews held out against the Nazi war machine longer than did the entire armies of some European nations. Under P.L. 96-388, the Council will encourage Days of Remembrance Commemorative Ceremonies in 50 state capitals, as well as many other cities, and conduct the national ceremony in Washington, D.C. during the week of Days of Remembrance April 10. We will welcome to our Washington ceremony more than 10,000 Jewish survivors of the Holocaust who will convene here, as the American Gathering of Jewish Holocaust Survivors, not to petition their government, but to give thanks to the United States for liberating the death camps and offering sanctuary and citizenship to several hundred thousand of their numbers.

Fifty years ago this January, Adolf Hitler came to power with a pseudo-messianic vision of the one thousand year Reich, the total domination of western civilization, and a so-called pure-blooded, aryan race to be achieved through genocidal policies and practices. The Third Reich was destroyed within a dozen years, primarily because America entered the war. Even so, Hitler accomplished the most horrible of his primary goals, slaughtering of two-thirds of the Jews of occupied Europe, six million in all. As our Chairman, Elie Wiesel, wrote in his report of the President's Commission on the Holocaust, "not every victim of the Holocaust was a Jew, but every Jew was a victim."

In the several thousand years of recorded history only a handful of events have been so great or so evil as to change civilization for all time to follow. The Holocaust was such an event. It well may have been, if you will, the Flood of our millennium. No human response to such a catastrophe can be very adequate. Yet the passage of four decades since this awesome tragedy allows us now to begin to institutionalize remembrance of those events and the lessons from them. Thus it was in wisdom that Congress unanimously passed P.L. 96-388. We must never forget, and today the urgency of our task grows with ever-quickening pace, especially for the only living witnesses of the event—the survivors and the members of the liberating armies, the average age of whom is now in the sixties.

Occasionally we are asked, why build a living museum memorial to the Holocaust in the Nation's Capital, adjacent to the Mall which is consecrated to American values? The answers, which underlie the Congressional mandate, are many. First, perhaps, Hitler declared war on America's values and ultimately was stopped by our determination to preserve western civilization at an enormous cost in American lives and materials. Second, America is the home of the most allied liberators in the free world and the most Jewish survivors other than the State of Israel. Third, such lessons as the moral, economic and national security costs of anti-Semitism, racial discord and prejudice, appeasement of oppressors, and military unpreparedness still remain to be learned. And all of these lessons are ever central to the problems of governing the leading democracy of the world in a period that presents greater perils to human survival than even Hitler threatened in the pre-nuclear age. As distinguished from genocidal acts on the one hand, and World War II on the other, the Holocaust represented a governmental policy to purge from the human society an entire "race," i.e., all human beings with Jewish blood in their veins, regardless of their economic, political, religious or military views or circumstances. But the consequences for all free societies, and the lessons to be learned by participants and by-standers alike, can and must be generalized. In this respect it is especially fitting that a living educational museum/memorial to the Holocaust be established in the Capital of the free world.

To plan and implement this endeavor is an unprecedented task, calling forth the best efforts of skilled professionals and consultants working as a uniquely structured interdisciplinary team. In the first two years the Council, aided by a very small staff, established a pattern for the annual Days of Remembrance ceremonies, convened at the State Department an historic, International Liberators Conference, and worked with a number of historians and educators to frame the major issues and themes for the museum exhibits.

As this the third year began, the Council expanded its executive leadership and the tempo of professional planning increased dramatically. A comprehensive and detailed outline for museum planning has been adopted by the Council and a dedicated museum planning team is at work. Planning for the educational foundation and archival activities that will be integral to this living museum plan is now being sketched out. Finally, this spring will mark the inauguration of a national development campaign to raise the private funds necessary to design and build the museum memorial.

Fiscal Year 1984 will be a critical year because we will be making the transition from preliminary planning to final planning and the beginning of implementation. If, for example, we cannot during the coming year flesh out in minute detail the components of a full-scale information retrieval center, then our Museum will have no computer services when it is built. Similarly, if, by the end of 1984, we have not taken the fundamental steps toward a complete museum design for interior and exterior spaces alike, then it will be impossible even to begin to solicit and review bids for construction.

The move from preliminary planning to final planning and implementation will require three categories of major increases in funding: new full-time professional and support staff; a considerably expanded use of professional consultants; and substantially increased travel for the establishment of professional working relationships between the Council staff and related United States and foreign agencies and institutions.

It must be understood that Fiscal Year 1984 will find the United States Holocaust Memorial Council aggressively engaged in its major fundraising drive for approximately $75,000,000 to construct and endow the on-going life of a U.S. Holocaust Museum and Education Foundation. Thus, the Federal appropriations for the Council's budget in the coming year represent essential seed money for what will be a national undertaking of unparalleled proportions.

We are happy to report that the Council and its staff already have drawn up detailed plans and timetables for all activities up to

and including the construction, staffing and opening of the U.S. Holocaust Memorial Museum. We have every confidence that this project will unite the Federal government and broad sectors of the American people in what is one of the most worthy undertakings of our generation.●

WE LOVE LUCI

HON. J. J. PICKLE

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 2, 1983

● Mr. PICKLE. Mr. Speaker, a delightful event will be held at the Governor's Mansion in Austin, Tex., this coming April 14. Texas Governor and Mrs. Mark White will help culminate the "We Love Luci" project, honoring Luci Baines Johnson, the youngest daughter of our beloved former President and Lady Bird Johnson. A $50,000 goal has been set by the sponsors to endow the Luci Baines Johnson Chair in the University of Texas School of Nursing. And under a unique agreement in this, the university's centennial year, the University of Texas Board of Regents is embellishing this endowment and all others with matching funds.

This event is not only a way to celebrate one of the Nation's foremost nursing schools, but to pay tribute to one of our country's outstanding citizens.

Luci Johnson could have sat back and have been satisfied with wearing the label of "former President's daughter." But she has taken her family's love of public service in many creative directions. For several years, she has focused her activities in health education. She once chaired the University of Texas School of Nursing Development Board and currently serves on the National League of Nursing Board of Review, which helps accredit all nursing programs in our country. She is also a member of the Boston University School of Medicine Board of Review.

Many of us know Luci as the president of the nationwide group, Volunteers for Vision, which seeks to discover visually disadvantaged children for treatment.

You would think Luci's time is consumed with these pursuits of health care improvements. But she is also a full-time mother of four children and takes her family duties so seriously that you will often find her on field trips with her children and raising money for school activities. She also guides her children in Bible studies.

At the same time Luci's feet are planted firmly on the ground in the business world. She is vice president of the family's communications and real estate company and serves as chairman of the board of an Austin bank.●

NUCLEAR DISARMAMENT—NO PLACE FOR AMATEURS

HON. ROBERT J. MRAZEK

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 2, 1983

● Mr. MRAZEK. Mr. Speaker, while it is not in the province of this body to confirm Presidential nominations, nonetheless it is incumbent upon all of us to take a stand on the madness of the nuclear arms race and its threat to the future of human achievement.

The other body soon will be asked to cast a vote of confirmation on the nomination of Kenneth Adelman as Director of the Arms Control and Disarmament Agency. Certainly, there is reason to question Mr. Adelman's suitability for the post in light of his performance before the Senate Foreign Relations Committee and his general qualifications for the job.

In the past 2 years, the American people have sent out a clarion call to their leaders on the subject of arms control. The Reagan administration has chosen largely to ignore the sentiments expressed in town forums and elections across the land, apparently feeling that it holds a monopoly on intelligent arms control strategy. I also do not doubt that sentiment exists within the White House that the people will "return to their senses" in the near future, and that the fervor for nuclear disarmament constitutes no more than a fad. Like hula hoops, disco, and deely bobbers, this too shall pass.

As has been the case with a variety of subjects in the past 2 years, the administration once again is patronizing the intelligence and commitment of the American people. I have no doubt that we have yet to see the full fury of the people unleased on the subject of serious, efficacious arms negotiations. The nuclear threat is with us for all time—only our determination to keep the genie bottled can save us.

The administration's likelihood to succeed on arms control suffers with the nomination of Mr. Adelman to accomplish this sensitive task. The President has made the nomination a matter of personal prestige, and it may be that the other body will acquiesce to pressure and approve the nomination, despite the recommendation of rejection delivered by the Foreign Relations Committee.

But approval of Mr. Adelman's nomination should not translate into cause for optimism by the American people on the subject of arms control. In recent weeks, radio station WGSM has provided listeners in my district with a pair of succinct, thoughtful editorials on the subjects of Mr. Adelman's nomination and arms control. I would like to share these thoughts with my colleagues today, and urge an expeditious consideration of the matter of arms control in the coming days in this body.

The WGSM editorials follow:

NUCLEAR DISARMAMENT—NO PLACE FOR AMATEURS

You might not be familiar with the name Kenneth Adelman, but he could well hold your life in his hands. Adelman is President Reagan's nominee for arms control chief, the man who will negotiate life or death agreements with the Russians. He will be dealing with weaponry that can obliterate the human race.

Two weeks ago he appeared before the Senate Foreign Relations Committee for confirmation hearings. When asked if he thought a nuclear war could be limited, not exactly an unimportant question, the fate of mankind might rest on the answer, Mr. Adelman replied, "I have no thoughts in that area." When asked whether the Soviet Union was violating terms of the Salt II treaty, Mr. Adelman said, "I am not knowledgeable at all." When asked if the U.S. would seek ratification of Soviet/American treaties to limit underground nuclear testing, Adelman said he hadn't talked to the experts and would be very reluctant to give a date for any decision.

Adelman was rushed back to the Senate last week with a consultant at his side and answered all the questions he didn't answer previously. But this is not the position for a cram course candidate. The trouble with all this is that Adelman is supposed to be the expert. Until now, the chief negotiator for the U.S. in disarmament talks has been a truly bipartisan type appointment, usually a person of great knowledge, stature, background and judgment.

President Reagan fired Eugene Rostow from this position a few weeks ago. The reason was significant—Rostow, it was said, sought arms control too zealously. In other words, Rostow wasn't just going through the motions. To fire him made friends and foes alike feel that Ronald Reagan doesn't want disarmament or arms control. To nominate an obscure, uninformed, inexperienced person for this most vital position not only emphasizes Mr. Reagan's lack of enthusiasm for peaceful solutions but is downright dangerous.

MISSILES DO NOT DEFEND—THEY DESTROY

Currently, we're hearing a lot about the defense budget. In truth, there is no more defense in the defense budget—it's a military budget. Once, the money we spent for the military was largely defensive unless we were involved in war.

To defend means to shield, to protect, as coastal artillery might defend a shoreline sinking hostile ships so they could not do damage to our nation, or an anti-aircraft gun could shoot down a bomber to prevent it from dropping bombs on us. That's when the defense budget really bought defense.

Now the nature of warfare has changed. Our so-called defense budget is spent on missiles and bombers. There are offensive weapons. They can be used on a first strike or retaliatory basis but if used, they cannot prevent anyone from attacking us. Their purpose is to kill huge numbers of people, whether they are used by the Soviet Union or United States. With nuclear warheads on them, they can annihilate entire civilizations, all life as we know it.

The hope, of course, is that such weapons will deter an attack but if that attack

comes, no one will be defended. Since there is no defense, the difference between calling it the defense budget and calling it the military budget is more than just one of words. We should stop calling it the defense budget because it gives us a false security. It makes it easier to forge ahead toward the unthinkable. What we are talking about in this nation right now is spending nearly one third of every dollar the federal government takes in and giving it to the military. When that military budget is spent, we will be no safer than we are now. We will not be defended any more than we are now—quite the opposite. We will be that much closer to confrontation.

Only a scaling down, a sincere, enthusiastic, flexible policy toward disarmament and arms control is a viable defense in the 1980's. Record military expenditures by the Soviet Union and the United States take us in the wrong direction. Now, while there is still time to reason, discuss, and persuade is probably the time for citizens to inform their representatives that bigger military budgets are not the way to peace, that the only true defense lies in the opposite direction.●

CONGRESS MUST REPEAL THE "MILK TAX"

HON. JACK F. KEMP

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 2, 1983

● Mr. KEMP. Mr. Speaker, on February 17 I joined several hundred farmers in my congressional district at a meeting called by Mr. Bob Engel of Shamel Mills to discuss the disastrous impact the "milk tax" will have on the dairy farmer and the farm economy in general. Also participating in this very interesting and productive meeting were New York State Assemblyman Bill Paxon, New York State Senator Bill Stachowski, Erie County Executive Ed Rutkowski, Erie County Legislators Mary Lou Rath and Tom Reynolds, as well as representatives of Senators AL D'AMATO and DANIEL PATRICK MOYNIHAN.

All the participants in this meeting agree that the dairy industry is suffering from a serious—and expensive—surplus production. Total milk production has risen from 122.5 billion pounds in 1979 to 134.3 billion pounds in 1982, a 9.6 percent increase. At the same time, commercial use of dairy products has risen only 1.4 percent. The result is a net Government removal of over 10 percent of U.S. dairy production from the market, at a cost to the taxpayer of over $2 billion.

But while these costs are troubling, the costs of staying in business to the dairyman are even more so. Support prices have remained steady since October 1980; but the large surplus has reduced the actual market price paid to producers below the support level. These declining real prices, coupled with the rising cost of production, have reduced the average dairyman's return on labor, management, and investment and have forced some dairy farmers to "live off the depreciation."

We all agreed that something must be done to correct the imbalance of production and consumption in the dairy industry. But we also agreed—emphatically—that the milk tax is not the solution. This assessment will cost the average New York State dairy farmer $4,000 per year—a total revenue loss of $55 million annually to New York State dairymen. Yet while the dairy farmer receives a lower price for his milk, the consumer continues to pay the same high price for dairy products. In addition, the milk tax will actually increase dairy production as farmers struggle to maintain their income while receiving a lower price for their production. Therefore the milk tax fails to address the two central problems in the dairy industry—overproduction and underconsumption.

While failing to address the underlying causes of the dairy surplus, the milk tax will "succeed" in one tragic way—by forcing young, highly leveraged family farmers out of business. The Government must not assume the responsibility of keeping every farmer in business—like all small enterprises, the family farm is a high risk operation. But neither should the Government unfairly burden the family farmer by imposing a tax on his efficiency and productivity. That is why the milk tax must be repealed. Congress gave permission for the dairy tax to be imposed, and it is the responsibility of Congress to revoke this permission. I commend my colleagues Senator AL D'AMATO and Congressman STEVE GUNDERSON for their leadership on this issue, and I urge all my colleagues to cosponsor the legislation they have introduced to repeal the dairy assessment. I ask that all the farmers who will be hurt by the milk tax to write your representative and ask for his cosponsorship and support for these important bills.

Many of my colleagues may not realize that New York State is the Nation's third largest dairy producing State. We have 14,000 dairy farms, that provide a stable economic base for hundreds of upstate communities, many of them in my 31st Congressional District. The family farmer is a hardworking entrepreneur struggling to stay afloat in an economic climate that often punishes him for being a productive and efficient businessman. The New York State Farm Bureau, under the able leadership of Dick Maguire, has formulated some very worthwhile recommendations for a 1983 dairy promotion program; an increase in the FDA's minimum standards for fluid milk to assure a better tasting product; and a short-term reduction in the dairy price support coupled with a long-term "trigger" that will allow the dairy industry to effectively respond to the signals provided by the market. I hope my colleagues will consider these proposals as we tackle the issues facing the dairy community.

The dairy tax must be repealed. Congress must take responsible action to correct the distorted signals the Government has given the dairy industry; but we must not penalize the farmer for responding efficiently and productively to those signals. Mr. Speaker, in all my years of Congress I have never met finer people, more industrious and patriotic families nor more courteous constituents. I am honored to represent them and I believe this issue goes to the heart of what is troubling our Nation today, and that is every time someone thinks up a tax it further discourages production, free enterprise, and the incentive system so integral to our American family value system. I offer this editorial from the Buffalo News as a concise, well-reasoned argument against the milk tax. I hope my colleagues will join me in fighting for its repeal.

MUDDLED MILK LEVY

The October rise in milk production in both Western New York and the state as a whole gives credence to the complaints of many dairy producers that the new 50-cent per hundredweight federal tax on milk production, far from relieving mountainous government dairy surpluses, will only make them worse.

The "milk tax" on all U.S. dairy farmers was voted by Congress earlier this year to reduce costs of the dairy-support program. It called for an initial 50-cent levy beginning Dec. 1 to be deducted from federal price-support payments, and an additional 50-cent assessment next April if milk surpluses remain high.

Dairy leaders have protested that the federal levy will do nothing to lower consumer prices, but will take money out of farmers' pockets at a time when their costs are still rising. In the view of these critics, the net effect will be to spur farmers to offset their losses by stepping up production.

That seems to be the pattern now emerging in anticipation of next month's exaction. According to the New York Crop Reporting Service, statewide milk production during October was the highest on record for that month and 2 percent above October 1981.

Secretary of Agriculture John R. Block last month voiced his own lukewarm view toward the congressionally-mandated assessments. Noting that dairy surpluses are still increasing and now are valued at $3.1 billion, Secretary Block said of the tax: "I don't think it's a very good solution, but it is my obligation to administer it."

While farmers may eventually reduce their output, he noted, the immediate outlook is for still larger dairy surpluses that add to government costs while doing nothing to relieve consumer prices.

Dairy leaders in the Northeast stress that the growing surpluses are largely the product of Midwestern and California dairymen. Because they are close to markets, New Yorkers produce much closer to demand.

Instead of approving the 50-cent levy, Congress would have done better to reduce current price-support levels in an effort to

bring down prices and stimulate consumer purchases of dairy products. The trifling overall savings that the new milk tax can achieve in the federal budget are likely to be greatly offset by storage costs for growing surpluses in government warehouses.

One possible solution for the milk muddle advanced by some quarters is the adoption of a two-price support program. Under this approach, the government would pay one price for milk produced within a specified quota, and a much lower price for production beyond that quota. In any case, no one is apt to be helped by the pending milk-tax device—not farmers, not consumers and not a government drowning in surpluses.●

EXPORTING CLUSTER BOMBS

HON. JOHN F. SEIBERLING

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 2, 1983

● Mr. SEIBERLING. Mr. Speaker, I am today reintroducing legislation to prohibit the sale, credit sale, or grant transfer of cluster bombs and cluster artillery shells to any country by the United States.

Cluster bombs are basically large canisters filled with submunitions. When a fuse in the nose of the canister detonates, the canister opens, spewing the "bomblets" over a wide area. Some of the bomblets, slightly larger than golf balls, explode on contact with the ground. Some hit the ground and bounce back into the air before exploding. Others may have delayed action fuses, detonating hours or days after deployment, making the area where they lie extremely hazardous to anyone who passes through it.

While most cluster bombs are designed to be used against hardened military positions or lightly armored vehicles, there is nothing to prevent the bombs from being used against personnel or, accidentally, against civilians in a battle area. It doesn't take much imagination to figure out what happens to a human body that gets in the way of a weapon detonating with sufficient force to penetrate light armor.

Cluster bombs are not precision weapons. A recent publication by the Stockholm International Peace Research Institute (SIPRI) notes, "A cluster bomb * * * can be used only as an area weapon—and even in areas far to the rear of the battle zone where civilians are more likely to be affected. Added to this is the fact that the bomblets of a cluster bomb are in many cases fitted with unrealiable delayed-action fuses and may thus remain a long-term hazard."

I am deeply concerned by our emphasis on weapons sales as a means of promoting U.S. national security interests. I am not sure what benefits U.S. weapons bring to a subsistence farmer in Africa or Latin America. Nor can the massive export of U.S. weapons perpetuate repressive regimes that have lost the support of a majority of their people. It is ironic that Khomeini's Iran has been using U.S.-made tanks and F-4's and F-14's to attack Iraq. These weapons did not keep the Shah in power, and are now being used, in part, to help export the Ayatollah's revolution.

I am not suggesting a wholesale cutoff of U.S. military sales. However, I think the time has come for the United States to stop exporting weapons like cluster bombs, which have such devastating effect on innocent civilians who have the misfortune of being in a battle area. Accordingly, my bill would expressly prohibit the United States from selling, or guaranteeing the sale of cluster bombs and fragmentation artillery shells. The bill would also suspend the delivery of any such weapons which may be "in the pipeline," and would also prohibit the export of any data or information relating to the design or manufacture of cluster bombs or any components of cluster bombs. The sole exception to the prohibition is for components, such as fuses, which are not designed primarily for use in cluster bombs. However, the power of the President to waive the restrictions in specific cases, as provided in existing law, will not be impaired by this bill.

The Washington Post asked in a July 21, 1982 editorial, "if a particular weapon is so liable to misuse, why ship it in the first place?" The cluster bomb invites serious abuses and accidental deployments. It is time for the United States to stand up and say that we will no longer provide these weapons to the armies of the world.●

PROJECT INDEPENDENCE—TO STRENGTHEN LOCAL GOVERNMENT

HON. CHARLES PASHAYAN, JR.

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 2, 1983

● Mr. PASHAYAN. Mr. Speaker, responsible elected officials at the county, city, and special district levels in this Nation often complain, with considerable justification, that Federal and State governments frequently impose upon them fiscal and discretionary restraints that stifle the efforts of those local governments in dealing effectively with their unique problems.

On February 1, 1983, the board of supervisors of Tulare County, Calif., in the 17th Congressional District approved at the suggestion of Supervisor John R. Conway a resolution dealing with this issue and suggesting strategies on how it can be addressed.

I submit this resolution in its entirety to remind us all of the problems faced by local government.

RESOLUTION NO. 83-116—BEFORE THE BOARD OF SUPERVISORS, COUNTY OF TULARE, STATE OF CALIFORNIA

In the Matter of Support of Project Independence, a Proposal to Strengthen Local Government in California.

Whereas, the conditions and circumstances under which American local government must function today are perilous and difficult; and

Whereas, the issue now is whether the counties and other local agencies of this land, great and small, shall have the means to survive—in the interest of their own people, and in the interest of their states and the nation at large; and

Whereas, American government is today faced with a severe fiscal squeeze that begins at the federal level and proceeds straight to the smallest counties and townships; and

Whereas, the era of unlimited federal aid and government services to address society's ills will inevitably come to an end against the backdrop of ferocious and uncontrollable fiscal pressures of entitlement programs and federal pensions, massive defense buildup, deep tax cuts, and fast-mounting interest charges on the national debt; and

Whereas, the State of California and her local agencies, lacking the financial cushion to fill the gaps left by withdrawn federal aid, must innovate new and resourceful approaches to the problems of everyday life in our neighborhoods, counties and communities; and

Whereas, counties and other local agencies must now step beyond past expectations of local government—as a service caretaker for roads, fire protection, jails, code enforcement—working with business, other governments, and neighborhoods to plan for and safeguard the well-being of our citizens; and

Whereas, if federal and state governments are unable or unwilling to aid their counties and cities with cash, then they must grant us freedom, legal and financial, to plot our own survival unmanacled by their mandates;

Now, therefore, be it resolved,

That the Tulare County Board of Supervisors does hereby declare its support for Project Independence, a proposal to strengthen local government in California, and hereby calls for a fundamental guarantee of the following rights and liberties:

That local governments shall be guaranteed a stable source of revenue along with the flexibility, upon voter approval, to increase or decrease revenues to meet local needs;

That California counties shall have authority, under duly adopted local charters, to manage our administrative and fiscal affairs in the most effective and efficient manner possible, notwithstanding the edicts of state and federal bureaucrats and regulators;

That the Legislature and the Congress shall stop imposing, and start repealing, burdensome spending and program mandates on local governments;

That counties shall aggressively pursue new full-fledged partnerships with business, other governments and neighborhoods to assure that essential services are available to Californians at the least possible cost.

The foregoing was adopted upon motion of Supervisor Conway, seconded by Supervisor Mangine, at an official meeting of the Board of Supervisors held February 1, 1983, by the following vote:

Ayes: Supervisors Gould, Conway, Mangine, Swiney, and Webb.
Noes: None.
Abstain: None.
Absent: None.●

SOCIAL SECURITY REFORM

HON. RICHARD L. OTTINGER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 2, 1983

● Mr. OTTINGER. Mr. Speaker, the Ways and Means Committee is considering a number of changes designed to insure the solvency of the social security system. These are based largely on the recommendations of the National Commission on Social Security Reform. I would like to share my views on how we can best resolve the financial problems of social security with my colleagues.

STATEMENT OF HON. RICHARD L. OTTINGER ON SOCIAL SECURITY REFORM PROPOSALS

Mr. Chairman, I'm pleased to have an opportunity to share some of my views with you on how we can best resolve the financial problems of the Social Security program.

The National Commission on Social Security Reform has put together a pragmatic package of recommendations to resolve the Social Security financing problems, recognizing the wide divergence of opinion in Congress and with the Administration on how funding deficiencies should be met. I'm grateful that this package doesn't rely exclusively on benefit cuts as the Reagan Administration proposed in May, 1981. That plan would have reduced Social Security benefits by more than $81 billion from 1981 to 1986 and much more in future years. In light of the Administration's clear preference for benefit cuts as a solution to the problems of Social Security, I feel the Commission members did the best they could to put together a balanced package. There are still glaring inadequacies, however, that should be addressed by the Ways and Means Committee and Congress.

At this point, what we need is a plan to meet the short-term financing problems through the 1980's. From 1990 to 2015, the system should again be in comfortable balance as the lower birth rates of the Depression years will decrease the number of eligible retirees and those born in the "baby boom" after World War II will swell the workforce and pay into the system. What will happen in the long-term is impossible to know. Any structural changes or cuts in benefits in order to deal with a problem that may well not exist would be unwise and premature in my view.

BACKGROUND

It's important to point out that the problems and choices we are facing now are not due to flaws in the basic Social Security system, but are the result of the poor state of the economy over the past several years. The Reform Commission accepted this view when it agreed not to change the fundamental structure or undermine the principles of Social Security. It considered, but rejected, proposals to transform Social Security into a voluntary system, pay benefits exclusively according to an individual's contributions, or tie old age payments to financial need.

In 1977, we enacted substantial increases in the payroll tax, and made adjustments in benefit levels. At that time, we believed these changes would be sufficient to keep the system solvent into the next century. I supported this legislation only because of the urgent need to ensure the viability of the system.

Unfortunately, economic conditions—particularly under this Administration—have been much worse than anyone expected even 5 years ago. Higher than expected unemployment resulted in a drop in payroll tax receipts and in more unemployed older workers who were forced to start collecting Social Security earlier than they might have otherwise. In addition, inflation was much higher than Congress anticipated at the time of the 1977 tax increase. Social Security expenditures have exceeded revenues, producing the deficit and the crisis we presently face. If the economy were healthy, we wouldn't be forced to make the hard choices we're confronted with now.

GENERAL REVENUES

Since the well-being of Social Security is tied so closely to the overall state of the economy, and since benefits are not tied strictly to contributions, I believe it makes sense to fund part of the program with general revenues. These are derived from broad-based sources and the burden wouldn't fall disproportionately on low and middle income workers as the regressive Social Security tax does now. I've pushed this idea for a long time as have many senior citizen groups and others. Even the National Federation of Independent Businessmen recently stated, "The utilization of general revenues in proper proportions is appropriate."

The previous chairman of the Social Security Subcommittee, Rep. James Burke, proposed funding Social Security: One-third from employees, one-third from employers, and one-third from general revenues. I support this plan which was contemplated when the original Social Security Act was enacted in 1935. General revenues could be used in other ways. President Carter proposed a more modest, countercyclical plan: when unemployment is high (over 6 percent) general revenues would replace the "lost" Social Security taxes. Another possibility would be to fund the Medicare and Disability programs from general revenues leaving the Social Security tax for retirement benefits.

The Reform Commission added general revenues in several ways, either directly or by requiring the expenditure of general revenues through an offsetting tax cut. Many have called this a "back door" approach. Why not accept the principal of general revenues for Social Security and make this a permanent feature? This would underscore our intent to ensure that Social Security will be viable well into the future.

RECOMMENDATIONS OF THE COMMISSION

As with most compromises, there are parts I support, and others I do not. First, I'd like to briefly mention the recommendations that I support.

Social Security was proposed to be removed from the Federal budget. Social Security funds are kept separate from other government funds and cannot be spent for any purpose other than Social Security. Including Social Security in the budget improperly subjects Social Security to pressures to reduce the federal deficit.

The compromise provides for the investment of Social Security trust funds so as to ensure that funds not needed to pay current beneficiaries are earning the best rate possible. This is long overdue. Also, adding two public members to the Social Security Board of Trustees is properly designed to increase public confidence in the integrity of the trust funds.

Social Security is proposed to be credited for uncashed Social Security checks, which presently are charged against the Social Security trust funds. Although not mentioned in the Commission's report, I think we need to look into more aggressive ways to prevent Social Security checks worth millions of dollars from being issued to deceased individuals—either fraudulently or inadvertently.

The bonus for delayed retirement is proposed to be increased. It is far better to provide incentives for workers to delay their retirement and collecting benefits than to reduce benefits for those who choose—or are forced—to retire at 65 or earlier as the Reagan Administration advocates. Increasing these incentives complements our efforts to eliminate mandatory retirement and to encourage individuals to develop additional sources of retirement income.

The Commission properly recommended a few improvements in the Social Security treatment of certain categories of women. This issue really deserves more attention. Our present system is grossly unfair—it was set up when men were largely the breadwinners and women stayed home and were expected to receive benefits as wives or widows. As a result, the work effort of most married women is discouraged by providing essentially no additional benefits in return for their taxes. Some improvements were recommended by the Commission but I hope this whole issue will receive careful attention as soon as possible.

Five proposals of the package need additional work before they are acceptable to me.

1. Taxing social security benefits

The Commission has recommended that one-half of Social Security benefits be considered as taxable income for federal income tax purposes for taxpayers with adjusted gross incomes exceeding $20,000 for single persons or $25,000 for married couples. This tax revenue would be credited to the Social Security trust funds. According to the Commission, about 10% of the Social Security recipients—those more able to pay—would be required to pay higher taxes as a result of this change.

I've never supported taxing Social Security benefits. In 1980, I introduced a sense of the Congress resolution providing that Social Security benefits would not be taxed; this resolution was enacted by a wide margin. In addition, this provision unfairly penalizes those who saved to supplement their Social Security—we certainly don't want to discourage this saving. Finally, if it is to be, the change is not phased in slowly as any change should be.

At this point, however, it seems clear that some taxing mechanism will be included in the final plan. The one recommended by the Commission seriously discriminates against married people. Therefore, I hope that this Committee will consider a different threshold; $20,000 for an individual and only $25,000 for a couple isn't fair and is destructive to marriages.

2. Participation of nonprofits and State and local government workers

The Commission has recommended requiring participation of employees of all non-profit organizations and prohibiting further state and local government withdrawals from Social Security. I'd go farther

than this. Social Security is a program with a national purpose and should be all-inclusive. Some say there may be some Constitutional problems involved with bringing in presently exempt state and local government workers, but I think this is without substance.

3. Raising the self-employment tax

The Commission recommends raising the Social Security tax rates paid by self-employed persons to 100 percent of the combined employer-employee rate, but permitting them to deduct for income tax purposes one-half of the taxes they pay. This is regressive. The burden of the increased tax falls most heavily on low-income self-employed. The percentage of increase in Social Security tax would be uniform across all income groups, but tax deductions would be worth more to higher-income individuals. Tax deductions always favor high-income groups. I would prefer to make this a tax credit or find another way to resolve this clear inequity.

4. Accelerating the payroll tax increases

I'm concerned that increasing the regressive payroll tax will have an adverse impact on the low and middle-income workers and further damage the economy. These increases could be a real disincentive for hiring additional people, which in turn affects both Social Security and general revenue collections. Substituting general revenues would be much more equitable, as I earlier indicated, and I am pleased that this has been at least partially effected by the tax credit for further increases in employee taxes.

5. Bringing new Federal employees into social security

The Commission recommended extending Social Security coverage to all newly-hired federal employees as of January 1, 1984, and the establishment of a separate supplemental plan similar to plans in private industry for those workers on top of Social Security. This seems to be the most controversial part of the whole package.

First, let me say, that I support universal Social Security coverage, but only if it is done in such a way as not to prejudice federal employee benefits. Social Security represents this nation's basic commitment to its elderly—everyone should participate. I'd like all workers to be covered. Because 80% of federal workers are eligible for Social Security when they reach 65, by reason of non-federal employment, I believe it makes sense to provide for Social Security coverage of the remaining 20%.

I cannot support coverage of federal employees, however, unless absolute assurances are provided:

1. that all pension rights of current civil service workers are protected at no additional cost to these workers; and

2. a supplemental plan is simultaneously adopted which provides new federal employees with retirement benefits comparable to that of other public employees and those in the private sector. It's not fair to expect workers to accept a plan the details of which have not been disclosed, particularly in light of this Administration's callous attitude toward Federal workers.

The new supplemental plan should be designed so that when combined with Social Security it will supply as good protection as the present civil service system does alone. Good pension benefits are one of the most important incentives for joining the federal government; we need this to continue to attact qualified people to federal service.

Representative Pepper has suggested postponing the implementation of this provision for a year (until January 1, 1985) in order to give Congress time to work out this supplemental pension plan. I would support this if more time is needed in order to meet the conditions I've set out above.

It was a stupid omission to exclude Members of Congress from Social Security from the outset and the Commission should have so provided. Congress should rectify this inequity as part of this package.

COLA DELAY IS UNACCEPTABLE

I strongly object to the six months delay in providing the cost of living adjustment (COLA) which will cost the average recipient $120 in 1983. While a one-time delay is preferable to even more serious permanent benefit cuts, I feel the Ways and Means Committee should look for other ways to save this money.

For many the COLA is money they can ill afford to lose. A study done in 1982 by Data Resources Inc. found that the COLA cut proposed last year would have thrown an additional 1.2 million elderly into poverty by 1985 and 2.1 million by 1990. This cut will be especially devastating in conjunction with the cuts already enacted in Medicare, food stamps, low-income energy assistance, housing assistance and other federal programs to help the poor.

Finally, I'd like to add that I'm extremely disturbed that the proposed delay in the Social Security COLA is being used to justify similar delays in other retirement benefits and in the food stamp benefit adjustment. A recent New York Times editorial stated, "How many Americans—who pay 50¢ for a diet soda at a lunch counter—could manage on an average benefit that comes out to about 45¢ for a whole meal?" Not many. This delay would be unconscionable.

In conclusion, I hope this Committee will consider the points I've raised. While it is essential to ensure that the Social Security fund is adequately financed to ensure payment of benefits, the Commission's recommendations propose some very inequitable measure which the Committee and Congress should address.●

CAMPAIGN FINANCE REFORM

HON. TIMOTHY E. WIRTH

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 2, 1983

● Mr. WIRTH. Mr. Speaker, I commend to you and our colleagues the following editorial on the need for campaign finance reform, written by Mark Shields, the Washington Post, February 25, 1983.

As a long time proponent of campaign finance reform, I believe that we must move speedily on this issue, before the public's confidence in this institution is completely destroyed by the events Mr. Shields very correctly warns cannot be far off.

THE COMING CAMPAIGN SCANDAL

An unconditional prediction: a new federal campaign finance law—one that imposes severe limits on all political action committees and provides for some form of public financing of congressional elections—will be enacted within the next 24 months. While a majority in Congress and the president now almost surely oppose any such law, their resistance will be overwhelmed by future public events. A major political money scandal will be uncovered that will guarantee passage of the laws.

All congresses respond to crisis. The criminal excesses of Watergate, particularly in the illegal raising and spending of campaign funds, probably made full disclosure and public funding of presidential campaigns inevitable. We and Congress will learn, sooner rather than later, of another (probably more than one) major political money scandal. Once again, promising careers will be ruined, prison sentences will be handed out and Congress will pass and the president will sign a tough new campaign finance law.

Able and committed politicians in both parties see the problem clearly. Bob Teeter, the Republican pollster whose 1976 strategy brought President Ford from a deficit of 16 million votes to within an eyelash of victory in 11 weeks, is worried by the rivers of campaign money now drowning American politics: "It's just like 1972," he says. "There's too much money around not to have a scandal." Missouri Democratic Sen. Tom Eagleton, who has been winning statewide races since 1960, argues that contemporary political fund-raising is "a national scandal" that "is taking place every day." New York Rep. Barber Conable, the ranking Republican on the House Ways and Means Committee, sees the ever-growing public perception of scandal in present fund-raising practices as producing more pressure for public financing of elections. Conable, who refuses campaign contributions of more than $50, compares the existing system of candidates' dunning all who represent interests before the House for contributions to his days in private law practice, when judges running for reelection raised their compaign budgets by "putting the arm on all of us lawyers who appeared before their court."

Public financing will not be entirely unwelcome. Most candidates would, if given the alternative, choose root canal work over asking anyone for money. Most of the current resistance to public financing comes from the Republicans, many of whom, after telling us there is no connection between contributions and a congressman's vote, then remind us that "there is no free lunch," that every program has a price tag. Apparently altruism only applies to contributions by political action committees. But it will probably make little difference what anyone argues, because a major scandal will end the debate and move the previous question.●

RULES OF PROCEDURE AND STATEMENT OF POLICY ON PRIVATE IMMIGRATION BILLS

HON. ROMANO L. MAZZOLI

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 2, 1983

● Mr. MAZZOLI. Mr. Speaker, today I would like to bring to our colleagues attention the new Rules of Procedure and Statement of Policy on private immigration bills which were adopted by the Subcommittee on Immigration, Refugees, and International Law. These rules and policy will guide the subcommittee in scheduling private

bills as well as making determinations on their merit.

I insert into the RECORD, at this point, a letter describing the rules sent jointly by the subcommittee's able ranking member and myself to our colleagues and the rules themselves.

U.S. HOUSE OF REPRESENTATIVES,
COMMITTEE ON THE JUDICIARY,
Washington, D.C., March 2, 1983.

DEAR COLLEAGUE: On February 9, 1983, the Subcommittee on Immigration, Refugees, and International Law unanimously adopted its Rules of Procedure governing consideration of private immigration bills. These Rules were ratified by the full Judicary Committee on February 15, 1983.

At its February 9 meeting, the Subcommittee also adopted a Statement of Policy and Procedures setting forth general precedents and procedures for the handling of Subcommittee business—particularly the category of business called "private immigration bills."

The Subcommittee would like to take this opportunity to acquaint you with the Rules and Policy which will govern Subcommittee consideration of private bills in the Ninety-eighth Congress. The Rules and Statement are enclosed.

I. NATURE OF THE PRIVATE BILL

A private immigration bill is an effort to provide extraordinary relief to an alien—one who is not a U.S. citizen or permanent resident. The private immigration bill seeks to legislate an exception to the general immigration laws of the United States.

The Subcommittee examines each private bill carefully to determine whether there is sufficient equity to make an exception to the law. Often hearings are held to develop the facts further.

Introduction of a private immigration bill does not alone, under House procedures, stay the deportation of any alien. Stays are possible but only after the case has been examined and action taken by the Subcommittee at a regular meeting. No action to intervene in a pending deportation will be taken by the Chairman of the Subcommittee prior to a Subcommittee hearing.

II. RULES OF PROCEDURE AND STATEMENT OF POLICY

The Subcommittee Rules and Statement of Policy guide the consideration and processing of private bills. We urge you to review these materials. They will help you and your staff handle the inevitable requests and inquiries which will come during the Ninety-eighth Congress.

The Subcommittee rarely takes any legislative action on a private bill where an administrative remedy under the existing Immigration and Nationality Act is available and has not been pursued to exhaustion.

And, while the Subcommittee is not bound by precedent—its action in earlier Congresses—it rarely deviates from precedent when handling private immigration bills.

A private bill commences with a letter from the Member to the Chairman of the Subcommittee outlining the facts of the case. The Subcommittee recommends that you and your staff develop the facts fully before offering the private bill. Our experience is that a fully documented file serves the best interests of the beneficiary, but it also protects the Members from embarrassment in the event the beneficiary has omitted certain salient facts in the initial review.

We offer the assistance of our able Subcommittee staff in providing you and your office people advice on all aspects of your immigration casework. Call us at 5-5727 at your pleasure. Sometimes a call saves a lot of extra—and futile—work in your shop.

We appreciate your taking the time to review the Subcommittee's Rules and Statement of Policy.

Sincerely,

ROMANO L. MAZZOLI,
Chairman, Subcommittee on Immigration, Refugees, and International Law.
DANIEL E. LUNGREN,
Ranking Minority Member, Subcommittee on Immigration, Refugees, and International Law.

Enclosure.

RULES OF PROCEDURE AND STATEMENT OF POLICY

RULES OF PROCEDURE

1. The introduction of a private bill does not stay the deportation of aliens illegally in the United States or who have overstayed the terms of their visa. The Committee shall not intervene in any such deportation proceedings and it will not address any communications to the Attorney General to request stays of deportation on behalf of beneficiaries of private bills, except as indicated in Rule 4.

2. No bill shall be scheduled until all administrative remedies are exhausted, including suspension of deportation, asylum, and labor certification.

3. The Subcommittee shall not take any further action on legislation which has been tabled by the full Committee.

4. The Subcommittee shall entertain consideration of a request for a departmental report upon receipt of a letter from the author of the bill. In the case of beneficiaries who are in the United States, a determination on the request shall be subject to debate at a formal meeting of the Subcommittee and only those cases designed to prevent extreme hardship to the beneficiary or a U.S. citizen will merit a request for a report. The Immigration and Naturalization Service may honor a request for a report by staying deportation until final action is taken on the legislation.

5. A quorum of the Subcommittee shall consist of two Members for the purpose of holding hearings on private bills.

6. Testimony at private bill hearings shall not be received from any person other than the author of the private bill. All requests to testify shall be addressed in writing to the Chairman of the Subcommittee.

7. No private bill shall be considered where court proceedings are pending.

8. Action on legislation shall not be deferred on more than one occasion due to nonappearance of the author.

9. The Subcommittee shall await receipt of departmental reports before taking final action on any legislation.

10. All requests for consideration of a private bill shall commence with a letter directed to the Chairman of the Subcommittee outlining relevant facts of the case and attaching thereto all pertinent data. The following shall be submitted in triplicate:

(a) Date and place of birth of all beneficiaries. Address and telephone number in the United States.

(b) Dates of all entries (legal and illegal) and departures from the United States and type of visas for admission. Consulate where the beneficiary obtained a visa for entry to the U.S.; or where the beneficiary shall seek a visa.

(c) Status of any proceedings with the INS and whether any nonimmigrant or immigrant petitions have been filed on the beneficary's behalf.

(d) Name, address, and telephone number of intersted parties in the U.S.

(e) Names, address, dates and places of birth of all close relatives in the U.S. and abroad.

(f) Occupations, recent employment record and salary of beneficiaries.

(g) Copies of all communications to and from INS or the State Department.

The information above represents the minimum requirements for Subcommittee consideration. Pertinent data about the case and an explanation of the extreme hardship to the beneficiary or U.S. citizen must also accompany a request for processing of the private bill.

11. Requests for consideration of a bill shall be accompanied by a statement by the beneficiary that he or she desires the relief sought by the bill and waiving the Freedom of Information Act and Privacy Act.

12. A notice of meeting date shall be sent to the authors of all legislation which is scheduled.

STATEMENT OF POLICY

On February 9, 1983 the Subcommittee adopted as an addendum to its Rules of Procedure a Statement of Policy on private immigration bills which is set forth below.

The Subcommittee on Immigration, Refugees, and International Law has jurisdiction over all aspects of immigration law. In considering private immigration bills, the Subcommittee reviews cases which are of such an extraordinary nature that an exception to the law is needed. In fairness to those immigrants who are awaiting legal immigration, it is the policy of the Subcommittee generally to act favorably on only those private bills which meet certain precedents.

This policy statement will set forth the types of legislation which fall within the general parameters of favorable action and the criteria for reviewing certain categories of bills.

A. ADOPTION

Existing law provides for the immigration of foreign born adopted children if the adoption takes place while the child is under the age of 16 and (1) the child is an "orphan" as defined by immigration law or (2) the child has resided with the adoptive parents two years. Those cases where the Subcommittee has favorable precedents are when the child is of a young age and there has been a long-standing parent-child relationship. In support of any private bill relating to adoption, the following must accompany the request for Subcommittee action:

(1) Home-study on the home of the prospective parents.

(2) Evidence of support of child—cancelled checks, letters, clothing.

(3) Statement detailing ages and occupation of natural parents and brothers and sisters.

(4) Communications with the Immigration and Naturalization Service regarding applicable U.S. adoption laws.

B. DOCTORS AND NURSES

The Immigration and Nationality Act provides for the admission of foreign medical graduates if the doctor or nurse has passed certain exams required prior to seeking immigration. A doctor must pass the Visa Qualifying Exam which is given extensively throughout the world and a nurse must pass the Commission on Graduate Foreign Nurses Exam.

Any alien seeking immigration must also have a job offer certified by the Department of Labor indicating there will be no displacement of U.S. labor.

In the past several years, the Subcommittee has experienced a deluge of bills introduced on behalf of foreign medical graduates. The legislative history relating to this group indicates many doctors enter the United States as non-immigrants with the clear intention of remaining permanently. Legislation enacted in 1976 and 1977 sought to tighten the law requiring the return of such doctors to their home country; and recent legislation in 1981 generously grandfathered certain doctors for admission as permanent residence because of their length of time in the U.S. It is the Subcommittee's opinion the 1981 amendments to the Immigration and Nationality Act was the final chapter in a long and arduous struggle to provide equity to certain foreign medical graduates.

The Subcommittee is also dismayed to find that doctors who are beneficiaries of private laws often swiftly seek more lucrative employment upon gaining permanent residence, thereby leaving medically underserved areas without any medical assistance. Because of these experiences, the Subcommittee intends to look with very little favor on doctor bills. Further, if a bill on behalf of a doctor or nurse is pursued, the following is required before scheduling will occur:

(1) Passage of the Visa Qualifying Exam for doctors, and the Commission on Graduate Foreign Nurses Exam for nurses.

(2) Residence by the doctor or the nurse in a health manpower shortage area, or a recommendation by a U.S. Government Agency indicating the doctor or nurse's services are needed. It is the Subcommittee's desire that the beneficiary show substantial community ties over a long period of time. Extensive periods of residence would give the Subcommittee some assurance there is every likelihood the doctor or nurse would maintain residence in the area and provide medical services.

(3) Waiver of the two-year foreign residence requirement (this applies to all exchange visitors).

Legislation approved by the Subcommittee on behalf of doctors shall provide for suspension of deportation during an interim period while a doctor is serving in a community and permit adjustment of status to permanent residence upon completion of the designated time period.

C. DRUGS AND CRIMINAL ACTIVITY

The Subcommittee has few precedents for waiving grounds of exclusion relating to criminal activity. In the event such a bill is pursued, the following documents where available will be required:

(1) Complete transcript of court proceedings relating to the conviction.

(2) All other records relating to offenses, including state, and local police records.

(3) Waiver and Privacy Act and Freedom of Information Act by the beneficiary.

(4) An affidavit (notarized) from the beneficiary describing his criminal record in full.

It is the intent of the Subcommittee that all available information be submitted to the Subcommittee. The Subcommittee will conduct its own investigation with appropriate government agencies.

It is also the Subcommittee's desire to review testimony and affidavits relating to the beneficiary's behavoir after any criminal offense. Such information is helpful in making a determination as to whether legislation will serve the best interests of the community. In this regard, letters of reference, bank records, and employment records are particularly helpful.

D. MEDICAL CASES

The Subcommittee shall be reluctant to schedule bills on behalf of persons who enter the United States on nonimmigrant visas or who are paroled for the purpose of seeking medical treatment. This type of visa is available to accommodate persons seeking advanced medical treatment which may be available only in the United States.

Many cases have come to the attention of the Subcommittee where the medical visa is used to enter the U.S., and shortly thereafter, the person seeks permanent immigration. This type of activity undermines the intent of the medical visa; and flagrant abuses may seriously jeopardize its availability for those whose only recource is treatment in the United States.

The Subcommittee's reluctance to schedule such bills is based on the premise that persons may seek all available medical assistance while in the United States, but upon completion of any medical treatment the purpose of the visa expires and the alien must return home.

E. DEFERRED ACTION CASES

The Subcommittee shall be reluctant to schedule any bills on behalf of aliens who are in "deferred" status. It is the Subcommittee's understanding that the Immigration and Naturalization Service reserves the conferral of such status to cases of a particularly compelling nature. In view of INS action in this regard, the Subcommittee does not see any need for legislative action.

F. INVESTORS

Recent public legislation enacted on behalf of investors provided relief for persons who were able to establish their qualification for a nonpreference visa prior to June 1978.

The Subcommittee has studied the many cases relating to investors and has found many beneficiaries did not sufficiently acquaint themselves with the law prior to making an investment and operated under illusions with respect to qualifying for immigration.

It is the Subcommittee' opinion that most investors who entered the United States after the June 1978 date were aware that immigrant visas would not be available in the forseeable future, and there are no precedents for enactment of a private law solely based on a person's investment in the United States.

In the event a Member wishes to pursue this type of bill, the following is required: tax records, contracts, bank statements, and other pertinent information relating to the investment.

G. WAIVER OF EXCLUSIONS

1. Health—

All bills waiving the grounds of exclusion for mental or physical infirmities will require the posting of a bond. The Subcommittees notes there are few precedents for cases in this category. In order to obtain the best possible information, the Subcommittee will require all medical records as well as information from the state and/or federal government concerning possible public charge aspects of the case.

2. Draft Dodgers—

There are few precedents for favorable action on behalf of draft dodgers, and it shall be the Subcommittee's policy to continue to view such bills unsympathetically.

3. Fraud—

The Subcommittee has been extremely reluctant to act favorably on cases involving visa fraud, and it shall be the policy of the Subcommittee to adhere closely to precedents in this category.

H. NATURALIZATION

The Subcommittee shall require any bill relating to expediting naturalization be accompanied by evidence indicating such action would be in the national interest, as opposed to personal gain. There are few precedents for favorable action on bills waiving any naturalization requirements or granting posthumous or honorary citizenship. It is the Subcommittee's intent generally to view unfavorably legislation in this area and notes more appropriate mechanisms for rewarding individuals may be in the form of honoraria, medals, awards, statues, etc. The Subcommittee also notes there are few instances of favorable action on behalf of individuals who renounce U.S. citizenship, and the policy of the Subcommittee shall be to adhere to precedents in this category.

I. BILLS TABLED IN A PREVIOUS CONGRESS

Commenting on requests for reconsideration of legislation, Thomas Jefferson noted the right of reconsideration is not "a right to waste the time of the House in repeated agitations of the same question, so that it shall never know when a question is done with * * *"

The Subcommittee has been confronted with an increasing number of requests for reconsideration of private bills which have been tabled by the full Committee in previous Congresses. It has been the experience of the Subcommittee that each bill is given sufficient review during the meetings of the Subcommittee and the authors are afforded ample time to present the merits of the case. Repetitious consideration of these cases operates to the detriment of other private bills which are pending and reflects poorly on the integrity of the private bill process. For these reasons, the Subcommittee will be reluctant to reverse or reconsider its prior action absent new evidence or information that was not available or could not have been obtained by the author at the time of actual consideration by the Subcommittee.

PROCEDURE FOR HANDLING PRIVATE BILLS

Processing of private immigration bills is guided by the Subcommittee Rules of Procedure. Upon request for consideration of a private bill, the Subcommittee shall determine whether departmental reports will be requested.

The request for a report shall be addressed to the Attorney General and the Secretary of State by the Committee, at the request of the Subcommittee. In the event the person is in the United States, Rule 4 of the Subcommittee Rules of Procedure applies. That Rule states in part: ". . . the request shall be subject to debate at a formal meeting of the Subcommittee and only those cases designed to prevent extreme hardship to the beneficiary or a U.S. citizen will merit a request for a report."

If the Subcommittee has requested a report on behalf of a person in the United States, the Immigration and Naturalization Service may honor the request for a report by staying deportation until the reports are received and the full Committee acts on the bill. When a bill is adversely reported to the full Committee, and the Committee tables the bill, a stay of deportation expires. In

cases where legislation is favorably reported to the full Committee, the stay of deportation is in effect until the bill completes the legislative process.

The author is notified at such time as a report from the Executive Branch is requested and copies of the reports are forwarded to the author upon receipt.

When a bill is ready for consideration by the Subcommittee, the appropriate documentation is reviewed and an agenda prepared for a meeting of the Subcommittee.

The authors of the legislation and the Subcommittee Members are notified of the date of a hearing on private immigration bills. If adverse action is taken by the Subcommittee at the first hearing on the legislation, the author is given two weeks to submit additional material which may have a bearing on the case; or if the author requests an opportunity to be heard on the legislation, such a request shall be in writing to the Chairman of the Subcommittee within two weeks of Subcommittee notice.

Adversely acted upon legislation shall be forwarded to the full Committee within two weeks, unless the author has addressed a communication to the Chairman of the Subcommittee.

In the case of final action where a bill was adversely acted upon on two occasions, the legislation shall be ordered reported directly to the Committee with an adverse recommendation. Any bill tabled by the full Judiciary Committee shall not be scheduled again by the Subcommittee.

When favorable action is taken, the bill is ordered reported favorably to the full Committee. The author is requested to submit a statement for inclusion in the Committee report to the House on his bill as soon as the legislation is reported from the full Committee.●

PUBLIC CITIZEN RAISES RED HERRING

HON. NORMAN E. D'AMOURS

OF NEW HAMPSHIRE

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 2, 1983

● Mr. D'AMOURS. Mr. Speaker, while accusing opponents of interest and dividend withholding of engaging in gross distortions and shameless preying upon the fears of the elderly, Public Citizen's Congress Watch has reduced the level of debate on this issue to a new low by issuing a statistically indefensible study of bank support for opponents of withholding. Public Citizen has engaged in the same type of gross distortions which it accuses its opponents of making.

The Public Citizen study fails even the most rudimentary rules of scientific analysis by failing to include any type of a control group. While listing bank support for opponents of withholding, the study does not include any data on bank support for supporters of withholding. Had such data been included it would undoubtedly have shown little or no statistically significant relationship between a Representative's or Senator's position on interest and dividend withholding and support from banking groups.

While the study shows, for example, that the average House opponent of withholding received $2,438 in the last election, it fails to note that the most prominent House supporter of withholding received over four times that amount—$11,000—even though that Representative had an easy election race and won with over 83 percent of the vote. Similarly, while the average Senate opponent of withholding received $7,881 the study fails to note that the most prominent Senate supporter of withholding received even more—$9,000—and won with 64 percent of the vote. It is clear that there is no direct relationship between bank support and a Representative's or Senator's position on the withholding issue.

Public Citizen is unwilling to recognize the fact that it is on the wrong side of a genuine, grassroots consumer issue. In its desperation to rationalize its position on this issue Public Citizen has issued a disingenuous and indefensible study which would fail Statistics 101. Public Citizen does little to contribute to the public debate on this issue by raising a point which is in reality a red herring.●

TRANSIT AMENDMENT TO EMERGENCY JOBS BILL

HON. JAMES J. HOWARD

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 2, 1983

● Mr. HOWARD. Mr. Speaker, I testified before the Rules Committee today to request that the rule on the Emergency Supplemental Appropriations Act for fiscal year 1983 permit me to offer an amendment to restore mass transit funding to the levels proposed in the bipartisan jobs package agreed to by the House leadership and the administration.

The text of my statement before the Rules Committee follows:

STATEMENT OF HON. JAMES J. HOWARD, BEFORE THE COMMITTEE ON RULES, MARCH 2, 1983

Thank you, Mr. Chairman. I appreciate having the opportunity to appear before you today.

When the House considers the Emergency Supplemental Appropriations Act for fiscal year 1983, it is my intent to offer an amendment to the provision in the bill which provides additional funding for mass transportation. My purpose in testifying here today is to respectfully request that the rule on the bill make it in order for me to offer my amendment, and that it waive all points of order against such amendment.

Mr. Chairman, let me start by directing your attention to the provision which appears on page 7, line 20, of the committee print of the bill. This provision provides an additional $110 million for mass transportation for fiscal year 1983.

Of the $110 million, $44 million is for interstate transfer projects. The committee report earmarks these funds for the following areas:

	Millions
Boston	$20.0
Northeast Illinois	10.0
Oregon	1.9
Sacramento	8.0
Twin Cities, Minn	4.1
Total	44.0

The remaining $66 million is for urban discretionary grants. The committee report earmarks these funds for the following areas:

	Millions
Dade County, Fla	$33.8
Hartford, Conn	6.0
Long Island, N.Y	15.0
Philadelphia, Pa	7.2
Detroit, Mich	3.5
Hillsdale, Mich	.5
Total	66.0

I have two major problems with this provision.

First, the entire $110 million is earmarked for specific projects. The Secretary of Transportation would not have any discretion with respect to any of the funds, even though other projects might be more worthy or might create more jobs. Only eleven localities in the United States would benefit from this provision.

And second, the $110 million provided in this appropriation bill is far less than the $400 million which was included in the bipartisan jobs proposal supported by the President and the Democratic leadership. Mr. Chairman, as you know, this administration has not been a strong supporter of the mass transit program, and I certainly can find no justification for reducing the level of funding it has proposed.

I, therefore, intend to offer an amendment to the Emergency Supplemental Appropriations Act which would restore the $400 million in transit funding along the lines in the bipartisan proposal.

My amendment, a copy of which is attached, is a substitute for the provision in the appropriations bill. It is quite simple and would do two things.

First, it would provide an additional $171 million for section 3 capital grants. These grants would be available at the discretion of the Secretary for capital improvements to mass transit systems.

I do not intend to earmark any of these funds. All $171 million would be available at the discretion of the Secretary. All communities would be eligible to apply for a grant. I might note, however, that the Surface Transportation Assistance Act of 1982 requires the Secretary of Transportation to emphasize projects that are labor intensive and that can begin construction or manufacturing within the shortest possible time. This is certainly consistent with our effort to create jobs.

The second part of my amendment would have the effect of disapproving the President's deferral of $229 million in mass transit capital funding.

The Surface Transportation Assistance Act of 1982 provided contract authority of $779 million for fiscal year 1983 to be funded from the newly established mass transit account of the highway trust fund. This funding was to be distributed to both urban and nonurban areas in accordance with a new block grant formula and was to be available for capital expenditures only.

Mr. Chairman, less than 1 month after the President signed this historic piece of legislation, the administration took action to defer $229 million or nearly one-third of the authorized funds.

Frankly, this came as a shock to many of us who fought so hard to provide a reasonable and stable base of support for public transportation.

I think it is safe to say that we are still numbed by the speed and the extent to which the administration has abandoned the basic commitments to public transportation contained in the new act—a bill they fought doggedly to see passed, a bill the President signed into law with great fanfare, and a bill whose key provisions they now propose to disregard only 1 month after enactment.

Mr. Chairman, my amendment would see to it that the full $779 million in authorized gas tax funds would be made available as soon as possible. Not to do so will:

Frustrate our ability to step up vital capital improvements;

Restrain productivity;

Perpetuate the past pattern of deferred investment in basic facilities; and

Greatly reduce the job-creating potential of this new source of funds.

These funds will be made available to both urban and nonurban areas. Attached to my statement is a copy of the Federal Register notice making the initial apportionments for fiscal year 1983. If my amendment is adopted, each State or locality will receive an additional amount equal to roughly one-half of what it received under the initial apportionment.

If you look at the first page of the attachment, you will see, for example, that Tucson, Ariz., would receive one-half of its initial apportionment of $1,248,000. This would roughly amount to an additional $624,000. Likewise, the State of Arizona would receive about $67,000, or one-half of its initial apportionment of $134,000, for the nonurbanized portions of the State.

The total price tag on my amendment is $400 million, the same amount envisioned in the bipartisan jobs proposal. But this needs some explanation. Only $171 million of the $400 million is actually new budget authority. The remaining $229 million has already been provided in the Surface Transportation Assistance Act of 1982 and, thus, would not be new budget authority. But, I repeat, to make this $229 million available will require disapproval of the President's deferral.

As I mentioned previously, my amendment is a substitute for the provision in the appropriations bill. Thus, the $171 million in new budget authority in my amendment is only $61 million more than the $110 million in the appropriations bill.

In summary, Mr. Chairman, I request that you make my amendment in order under the rule on the Emergency Supplemental Appropriations Act and that all points of order against my amendment be waived.

Unlike the provision in the appropriations bill, my amendment does not earmark the funds for 10 or 11 cities.

Instead, $229 million—or more than half the money—would be distributed among all States and urbanized areas. You can tell roughly how much any area would receive by looking at the attachment and multiplying the amount it received under the initial apportionment by one-half.

In addition, the remaining $171 million would be available at the discretion of the Secretary. All areas of the country would be eligible to apply for these funds.

Mr. Chairman, this concludes my statement. I am available for any questions which you might have.

AMENDMENT TO THE COMMITTEE PRINT DATED FEBRUARY 25, 1983, OFFERED BY MR. HOWARD

Page 7, strike out line 20 and all that follows through line 2 on page 8 (relating to mass transportation) and insert in lieu thereof the following:

TO SPEED UP IMPROVEMENT OF MASS TRANSPORTATION

To accelerate the construction, modernization and improvement of urban mass transportation systems, to increase the mobility of the urban work force which will result in productive jobs, an additional amount of $171,000,000, to remain available until expended, for "Urban discretionary grants", to be obligated at the discretion of the Secretary of Transportation in accordance with section 3 of the Urban Mass Transportation Act of 1964.

The Congress disapproves the proposed deferral of budget authority in the amount of $229,000,000 for the Mass Transportation Capital Fund (deferral numbered D83-59), as set forth in the President's special message which was transmitted to the Congress on February 1, 1983. This disapproval shall be effective on the date of enactment of this Act and the amount of the proposed deferral disapproved herein shall be made available for obligation.

FISCAL YEAR 1983 PRELIMINARY APPORTIONMENT OF THE FUND MADE AVAILABLE FROM THE MASS TRANSIT ACCOUNT OF THE HIGHWAY TRUST FUND AS PROVIDED UNDER THE FEDERAL PUBLIC TRANSPORTATION ACT OF 1982

TIMES BEACH, MO.

HON. RON PAUL

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 2, 1983

● Mr. PAUL. Mr. Speaker, the dioxin contamination of Times Beach, Mo., is unfortunate and I share the feelings of the people in that town who are afraid and anxious about the ailments they may suffer because of the indiscriminate disposal of toxic waste within their community.

We are all aware that the EPA has agreed to buy the entire town for some $34 million. It appears that under these circumstances—the Federal Government paying for the damages—that the Federal Government is partially responsible.

It also appears that most of the dioxin dumping in the area was done by an individual, a Mr. Richard Bliss, a waste hauler who serviced the area. We should also keep in mind that dioxin was not well researched 10 years ago, and the EPA was newly born with no regulations for the use of dioxin on the books.

And all these facts takes us back to the central question, or what should

be the central question: Who is at fault here? The city of Times Beach, Mo., contracted the work done on the roads by choosing Mr. Bliss. According to commonsense, both Mr. Bliss and the city of Times Beach contributed to the contamination of the properties of the citizens in that town. It is they who should be held accountable for this action.

If we as a legislative body continue to ignore accountability in incidents such as this, we will be giving a license for States and municipalities to be reckless in their administrative duties because uncle sugar will bail them out in the end.

This incident appears to be the largest disaster involving toxic chemicals, secondary to Love Canal. It should be pointed out that the property now known as Love Canal was originally purchased from Hooker Chemical Co., which had used the area as a chemical dump and had specified in their sales contract to the purchasers, which happened to be the local school board, that residential properties should not be constructed in the area. How many citizens and legislators are aware of these facts? Again, the taxpayer was asked to bailout this community because of the reckless decisionmaking of a local government.

I have long been a dissenter to many policies of the Federal Government, especially when it comes to financing boondoggles and granting subsidies to corporate interests. It appears that we are now in the business of subsidizing stupidity as well.●

THE 1983 CONGRESSIONAL CALL TO CONSCIENCE

HON. WILLIAM D. FORD

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 2, 1983

● Mr. FORD of Michigan. Mr. Speaker, it is indeed a great privilege to join in the 1983 Congressional Call to Conscience. At this time, I would like to remind my distinguished colleagues of the plight of the noted Ukrainian writer, Mykola Danylovych Rudenko, who has been serving a 12-year sentence in a corrective labor colony in the Mordovian complex in the Soviet Union since 1977. The innerstrength and profound courage of Rudenko is never ending. He serves as a model for all of us here today who join together in affirming our conviction to insuring human rights for all mankind.

Rudenko's life is filled with a series of great accomplishments. As an active member of the Communist Party he fought in World War II where he received a serious spinal injury. After the war, he began his literary career by publishing collections of his poetry and later was appointed chief editor of the Kiev literary journal, DNIPRO. Ultimately, he was elected secretary of the party organization of the Writer's Union of Ukraine. Rudenko's later poems and essays began to reflect his subtle protests of the Soviet lifestyle. As a writer in the Soviet Union, he became increasingly aware of the limits to his freedom of speech. His writings caused him severe reprisals by the Soviet authorities. His protest became more evident as he began writing letters to the Central Committee of the Communist Party of Ukraine (CCCPU) outlining his philosophy on ways to improve the social and economic conditions in the Ukraine. After disapproval of Rudenko's writing, the Soviet authorities expelled him from the party and forbade him to publish any more of his literary work. In 1976 he was expelled from the Union of Writers for behavior incompatible with membership. It was at this point in Rudenko's life that he became actively involved in his quest to obtain improvements in human rights. He joined the Moscow chapter of Amnesty International and is most noted for his founding of the Ukrainian Public Group to Promote Observance of the Helsinki Accords. In 1977, Rudenko was arrested and sentenced to 7 years of strict labor followed by 5 years of internal exile. The Soviet authorities charged him with anti-Soviet agitation and propaganda.

As Rudenko continues to serve his sentence, a matter that remains of great concern to me is the state of his health. There are reports that his health has deteriorated considerably during his imprisonment because of the spinal injury he received during the war. Despite his condition, Rudenko is required to work long hours making cords for electric irons. This work, which involves keeping the body in one position and bending the spinal cord, is quite dangerous to his physical condition. Recently, his handicap was reclassified to a lesser degree of severity requiring him to work even longer hours. The authorities are planning punitive measures against him, because of his refusal to comply with this latest command.

It is no secret that the conditions in these labor camps are grueling and the prisoners receive inadequate nourishment and medical care. When Rudenko's wife, Raisa, visited her husband in 1980, he was so ill that he was unable to stand. She, too, was arrested and is currently serving a sentence because she attempted to smuggle some of her husband's writing out of prison.

Mr. Speaker, I am outraged by these reports on Rudenko's condition. He has not committed any crime and to subject him to such inhumane torture is yet another example of the flagrant disregard for human rights by the Soviet Government. We must continue to remind the Soviet officials of the terms of the Helsinki accords on human rights which they signed in 1975. The plight of Rudenko, and other prisoners, will not be forgotten by the free nations of the world. We must continue to speak out against Soviet aggression and their denial of basic human rights.

Mr. Speaker, I am proud to report that the Helsinki Commission has again nominated Mykola Rudenko and seven others for the Nobel Peace Prize. I can think of no greater honor for this man. Mr. Speaker, I am most grateful for this opportunity today to pay tribute to Mr. Rudenko. He is truly an inspiration to all of us in the free world that continue our fight for human rights.●

PEOPLES BANK CHIEF ANNOUNCES RETIREMENT

HON. RICHARD C. SHELBY

OF ALABAMA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 2, 1983

● Mr. SHELBY. Mr. Speaker, I would like to pay tribute and honor to Mr. B. Frank Wilson, who will be retiring in June from the duties as board chairman and chief executive officer of Peoples Bank in Selma, Ala.

Not many people achieve the measure of admiration and respect that Frank has enjoyed in his past 47 years of service with the bank. He earned that admiration and respect because he genuinely cared about the people he served and about the welfare and growth of his community.

Following is a wonderful article written by Jeanette Berryman of the Selma Times-Journal staff about Mr. Wilson's retirement announcement that I would like to share with my colleagues in the House.

PEOPLES BANK CHIEF ANNOUNCES RETIREMENT

(By Jeanette Berryman)

"I hate to say goodbye, but that's what it is," Peoples Bank board chairman and chief executive officer B. Frank Wilson told stockholders as he announced his impending retirement Tuesday night.

But Wilson, seated under a "Happy Birthday" banner at the Selma Convention Center, was caught by surprise when the annual stockholders' meeting became a belated birthday celebration and tribute for the man who worked his way from runner to board chairman.

The festivities followed a business session in which Dr. Clyde Cox Jr. was added to the bank's board of directors and a 100 percent stock dividend was declared.

Wilson smiled broadly as bank employees recounted his 47 years at Peoples Bank. Seven employees clad in green-and-white bank jackets and caps sang choruses to Wilson as other officers gave a history of Wilson's rise in the growing bank.

Schuster Siegel, senior vice president, said Wilson came to the bank in 1936 after working as a soda jerk at Swift's Drug Store. He

was a runner, and one of seven employees. A few years later, Wilson was named head teller and married Margaret Elebash.

As Siegel's story came to 1942, the year the Wilson's first son was born, Ben Wilson, who now lives in California, made a surprise appearance. A few minutes later, Wilson was surprised again to see son Joe Wilson and his wife, Kay, join the party. They live in Vermont.

As Peoples Bank grew from 12 to 49 employees, Wilson worked as bookkeeper, assistant cashier, cashier, vice president and executive vice president. He became the fifth president of Peoples Bank in 1971.

During the next 10 years, the bank's assets grew from $37 million to $93 million, Siegel said. The board chose to remain home-owned, with no affiliation to any holding company.

"When we say people make the difference, we mean it because of you," bank president Dick Morthland told Wilson. "We are now the strongest financial institution in this section."

Wilson's retirement is effective June 30. In the meantime, Morthland said, the Wilsons will enjoy a week-long cruise of the Caribbean, then represent the bank at a meeting in Bermuda.

Morthland also presented Wilson with a gobbler and pair of turkey hens hand-carved by Selma artist Dennis Bushey as the bank's retirement gift.

"I can't say how much I appreciate this," said an overwhelmed Wilson to the 300-plus dinner crowd. "I knew nothing of this. My birthday was Saturday, and I thought maybe I'd get a birthday cake."

During the business session, Morthland said he believes the local economy has "turned the corner" from last year's lows.

Wilson said the new stock dividend is the ninth time since 1933 that the bank has declared a dividend or stock split. One share purchased in 1933 would be 166 shares today, he said.

Cox, a surgeon, was elected to the board at the recommendation of the bank's directors.

"The board is proud to have Clyde nominated," Wilson said. "He is not only a skilled surgeon, but also a Christian gentleman and an astute businessman."

As one can see, the city of Selma has truly been fortunate to have a man such as Frank Wilson as a community leader. His influence and past decisions in the financial arena will be felt for generations to come in the city's history.

It takes a man of a certain outstanding caliber to devote 47 years of his life to one profession. He has assisted so many people through the years and I know will be missed by those who have worked with him.

I am honored to be able to share this tribute about B. Frank Wilson with my colleagues in the House of Representatives. All of us need to salute outstanding Americans like B. Frank Wilson, who believe in our free, democratic ideals and represent the true meaning of hard work and success.●

BLACK HISTORY MONTH

HON. PETER W. RODINO, JR.

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 2, 1983

● Mr. RODINO. Mr. Speaker, Black History Month, celebrated during February, has just ended. Once again it served as an important time for all Americans to focus attention on the countless accomplishments of black Americans from the beginning of our Republic. Despite the years of slavery, injustice, and discrimination through which black people suffered, they endured and with unswerving courage and tenacity have made significant progress toward becoming part of America's mainstream.

I think most Americans are aware of the contributions of many black Americans in major fields of endeavor. Crispus Attucks fought in our Revolution for Freedom from Great Britain. Frederick Douglass and Harriet Tubman led in the fight for emancipation. George Washington Carver and Booker T. Washington are noted names in education and science. More recently, black Americans have made outstanding contributions to our cultural and artistic life and to the high quality of American amateur and professional sports.

And we must certainly single out Dr. Martin Luther King, Jr., who stirred the conscience of Americans and inspired the movement that brought about adoption of long overdue laws and actions to guarantee civil rights, equal opportunity, and an end to discrimination.

What has impressed me, beyond national commemorations such as the fine presentations on public television, are the myriad local exhibits and events calling attention to the many lesser known but outstanding and talented black Americans and the rich cultural heritage our black citizens have brought us.

In my State of New Jersey, a special conference on Black Historical Scholarship and the Black Historian was held on February 19 at Rutgers University's Paul Robeson Campus Center in Newark. Supported by a grant from the New Jersey Committee for the Humanities, the conference was also sponsored by black study programs at Jersey City State College, Trenton State College, Rutgers University, Seton Hall University, Essex County College and the New York Public Library; the Newark branch of the NAACP; the New Jersey Federation of Colored Women's Clubs; and the New Jersey Historical Commission.

I am particularly proud of the fine and varied series of exhibits and events presented by the Newark Museum during Black History Month. On view was an exhibit on "Black American Landmarks: Interpreters of History", a Smithsonian traveling exhibition which focused on 76 sites selected as national historic landmarks for their significance in black American history. Another exhibition, originated in the Newark Museum, was of over 80 textiles celebrating events of local and international significance in 26 African countries. "Art in African Living", in the Permanent African Gallery, featured traditional objects of sub-Saharan Africa including household items, representations of the spirit world, ritual objects and articles of clothing and adornment.

The museum's schedule of concerts, lectures and films was dazzling, with programs including gospel music, jazz, African dance, song and drumming. A family heritage workshop was conducted the day before the highlight of the month on February 20—Alex Haley's first appearance as a lecturer in Newark.

Mr. Speaker, this year's Black History Month was a time of celebration and of learning. But it was also a time to reflect on the enduring need to continue the struggle to achieve full equality and opportunity and freedom from discrimination for our black citizens.●

THE FRENCH NUCLEAR FORCE

HON. ROBERT H. MICHEL

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 2, 1983

● Mr. MICHEL. Mr. Speaker, among the most cynical of Soviet ploys when it comes to the question of nuclear disarmament is its insistence on counting French and British nuclear weapons in negotiation aimed at reducing Intermediate-Range Nuclear Forces (INF) in Europe. As Claude Cheysson, Foreign Minister of France, has pointed out, the French force is not a threat to Soviet security. The French are a sovereign nation and have chosen to build their own independent nuclear force for their own national purposes. To suggest this force—and the British force—should be counted in negotiations involving Soviet SS-20's aimed at Europe is, as Mr. Cheysson pointed out, a "disastrous" idea.

At this point I wish to include in the RECORD, "French Defense Policy and the U.S." by Claude Cheysson, Foreign Minister—France, in the Wall Street Journal, Friday, February 25, 1983.

FRENCH DEFENSE POLICY AND THE U.S.

(By Claude Cheysson)

The present debate on defense issues may have far-reaching consequences for the West. If unhappily it were to compound misunderstandings and embitter mutual criticism, the discussion might unsettle public opinion, introduce profound divisions

between the U.S. and the European countries and weaken security all around.

However, an examination of the difficult problems that defense poses for all our democratic societies may, if we approach it with a clear mind and make an effort to understand each other, lead to a stronger alliance and greater confidence in the future.

France has its own views on these problems. These have been clearly stated by my country's successive governments since the presidency of Charles de Gaulle, and I think it is useful at a crucial time to make these known to the American public.

Despite major changes on the international scene over the past 34 years, none of the reasons that made the Atlantic Alliance necessary have lost their value. As then, the peoples of Western Europe and those of North America are linked by the same concept of society, the same respect for man, his freedom and his rights. As then, the future of the U.S. is irrevocably linked to that of our European countries. As then, the European countries cannot by themselves secure the defense of their "space." As then, the presence in close proximity of powerful Warsaw Pact armies and the Soviet nuclear forces gives rise to a link of security across the Atlantic.

This link implies that any idea of aggression against the European countries should be made impossible and senseless through the prospect of response by American nuclear weapons. The allies of NATO's integrated command have structured this concept of deterrence into the "flexible response," that is, a series of graduated responses. It is their responsibility not to allow any doubt to emerge with regard to deterrence in its entirety.

The Soviet Union deployed the SS-20s with the express purpose of dividing and compartmentalizing the rationale of deterence. These arms cannot reach the heart of the alliance, the U.S., yet have the capacity to destroy in the space of a few moments all the means of retaliation of Europe itself. The objective is clear: to destroy the first components of the flexible response so that the sole remaining threat is that of strategic arms, which are the most feared, with the hope that this threat will not be used.

TRYING TO UNDO THE LINK

In political terms this means that an attempt is being made to undo the transatlantic link and to separate the defense of Europe from that of the U.S. The aim is to decouple the ultimate means of deterrence from those of the defense of the "European glacis."

Thus, doubt as to the credibility of American deterrence is surreptitiously creeping into the picture. In some quarters in Europe—fewer than they are said to be—there is a vague and growing feeling that American protection is uncertain and that uncertain protection is more dangerous than no protection at all. So Europeans are coming to feel more frightened of the arms you are sending to Europe to protect them than of the arms buildup in the East.

This malaise is difficult to understand in the U.S. It is wrongly perceived as a sign of relinquishment, of giving up, and many Americans are being tempted by the idea of pulling back. Reacting this way would consummate the very thing that must be avoided. The remedy therefore lies in greater deterrence backed by American strength and in dispelling all doubt regarding it.

The malaise I have described here does not affect France because French defense has remained national and independent and because public opinion has thus not been aroused by the installation of foreign nuclear arms on our soil. Nor has public opinion been subject to the key question of the credibility of the Allies determination.

France acquired its national nuclear force 20 years ago. It has provided for and will maintain it at the minimum level necessary to make any power understand that France's capacity to respond is greater than the stake our country represents. This policy is understood and approved by all the French people and by all the political forces in the majority and in the opposition. The effort therefore continues and will be pursued so we can remain at this level; the decision to build a seventh nuclear submarine, an end-of-the-century generation submarine, and the determination to perfect our nuclear arsenal have been accepted without much opposition. Contrary to what is happening in other countries in Europe, no one in France thinks that strengthening defense could draw an attack on our soil. And no one would understand that this policy might be thought disturbing to the countries of Eastern Europe.

Our independence does not imply isolation. Our future is linked to that of our neighbors. European construction is a precondition of our future. That process of construction is being pursued with peoples who must remain free in their thinking and in their policies. They must not be affected by outside threats. They must feel protected and secure. But they are not thus protected by us. Adequate to guarantee our vital interests, our nuclear arms are not now intended—nor will they be in the future—to insure the protection of the entire European zone of the Atlantic Alliance. Nor may they be used to this end, since we retain exclusive control over them. The guarantee of European territories that do not have nuclear weapons therefore can come only from the integrated command of NATO, that is to say, in fact, the U.S. For this reason, maintaining the American nuclear deterrent and continually modernizing it insofar as this is necessary are in our view essential.

Allies and yet independent, sole masters of our deterrent force yet standing solidly with the U.S., with our neighbors and with our European partner—what do we advocate in the present situation?

(1) In the first place, the importance of the U.S.'s world responsibilities does not permit it to adopt a posture of minimal deterrence that would protect only American territory. Such a posture would also reduce the function of deterrence and thereby render highly dangerous the undisputed imbalance in the European part of the alliance that does not have nuclear arms capable of reaching the Soviet Union.

(2) You should give your allies and your adversaries the assurance that you will not resign yourself to this lesser role. This is why proposals for a nuclear freeze, however well-intentioned they may be, seem to us dangerous for they could appear to many to be a first step toward withdrawal.

(3) With even greater reason we find the insistence sometimes voiced in the U.S. on a commitment to on-first-use of nuclear weapons to be profoundly destructive to the ties of solidarity in defense, and thus to your own security. Certainly, given your position, one can understand your concern not to make everything depend on a premature and massive use of nuclear arms. But, as Mr. Mitterrand said on Jan. 20 before the Bundestag, "The nuclear weapon, the instrument of deterrence, whether one likes it or deplores it, remains the guarantee of peace." This important truth is entirely understood in France. It is understood in Europe much more than you think.

(4) The credibility of deterrence could be affected by the nature of Soviet overarmament. So the balance must be reestablished. Deployment of medium-range missiles should be sought at the lowest possible level. Zero level would be ideal. Is it still attainable? If the Geneva negotiations on Intermediate-Range Nuclear Forces (INF) fail, we believe that NATO will have no other recourse than to go ahead with the decision taken in 1979 to modernize U.S. nuclear forces in Europe.

(5) Counting the French and British nuclear forces in the negotiations would permit the Soviets to justify keeping 162 SS-20s (or 486 warheads) targeted on Europe before any American arms were allowed. The fallacy of this reasoning is evident.

THE UNITY OF THE ALLIES

Who, moreover, could believe or even suggest that the French force is a threat to the security of the Soviet Union? Let's not forget that in addition to the SS-20s, 9,000 nuclear warheads carried on strategic rockets and bombers can reach French territory. The Soviet claim to include our forces in the count has no strategic foundation.

In acceding to the Soviet request, the U.S. would be giving up the notion of restoring the continuity of deterrence that was broken by the introduction of the SS-20s. This task, as we have seen, cannot in any way be accomplished by the French and British forces. In yielding, the U.S. would leave the Federal Republic of Germany and the other nonnuclear states of Europe without adequate protection. In point of fact, for our European partners, the inclusion of third-party forces in the Geneva calculations would be a disastrous piece of deception.

Lastly, the U.S. would be putting itself in a weak position for demanding a balance, for it would be acknowledging the acceptability of having a quantity of missiles lower than that of the Soviets by a number at least equal to that of the French and British missiles.

Too often the Soviets consider themselves a threatened country, encircled by hostile states. This justifies in their eyes their determination to obtain a greater degree of security than other states.

Establishing trustful and cooperative relations between the West and the Soviet Union, which my government wishes to see and to which it is ready to contribute, depends on the Soviet Union being brought around to a more normal and less excessive vision of its own security needs.

Such a readjustment is possible. It can take place only through the unity of the Allies, through their common determination and first and foremost through the determination of the United States.●

MAKING DISASTER ASSISTANCE EQUITABLE

HON. SAM GEJDENSON

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 2, 1983

● Mr. GEJDENSON. Mr. Speaker, today I am introducing a bill to repeal

the credit elsewhere test for use in determining who is eligible for low-interest Federal disaster loans. My bill also would place a cap on the level of interest that could be charged for these loans.

The modest savings achieved through charging higher interest rates on Federal disaster aid do not, in my opinion, justify the suffering they inflict on disaster victims and the delay they cause in recovery.

Recent events in Connecticut prove my point.

A CASE STUDY

In June of 1982, the State of Connecticut suffered the worst floods in nearly a century. The disaster took the lives of 10 residents and caused an estimated $289 million in damages. Dozens of bridges, homes, and businesses were washed away by water from bursting dams and heavy rains. Because of the storm's severity, the President declared the State a major disaster area.

What ensued after the disaster declaration is a case study on why Federal disaster assistance laws should be changed.

There was a general impression following the declaration that the Federal Government would be awarding low-interest loans to anyone who qualified for disaster assistance. What most eligible residents did not know was that the current administration, as part of its 1981 budget cuts, had changed the law to incorporate a "credit elsewhere test." In other words, low-interest loans are no longer awarded to those individuals or businesses who can obtain credit elsewhere.

Many businessowners and homeowners were outraged to learn that they were ineligible for low-interest Federal loans because they had maintained good credit standing. Instead of loans at 8 percent, they were offered Federal assistance at the prime rate of 16 percent. Many of these residents felt cheated by promises of Federal assistance and punished by having remained creditworthy.

At Senator CHRIS DODD's and my request, the General Accounting Office conducted a study that in part examined the effectiveness of the credit elsewhere test. Of the 1,103 loan applications approved by the Small Business Administration, 34 percent—329 home loans and 39 business loans—were at the high rate. Because of this higher rate, the GAO estimated that the test would save $224,000 during the first year. This savings represents less than 2 percent of the total amount loaned to businesses and individuals in Connecticut.

The savings to the Federal Government are further reduced after taking into account the fact that interest payments may be deducted from Federal income tax. In addition, the GAO calculated that it took the SBA staff an additional 368 hours to process the 1,100 applications using the credit elsewhere test.

I do not believe that these projected savings justify the credit elsewhere test. My bill would repeal the test and require that the interest rate charged for disaster loans be set at one-half of the market rate of Government securities, plus 1 percent for administrative costs. A cap would be placed at 8 percent for both home and business loans.

This legislation would prevent the problems we experienced in Connecticut from occurring in other States and provide more equitable assistance to all victims of natural disasters. I urge my colleagues to support this measure.●

THEY MAY BE RIGHT

HON. BOB LIVINGSTON

OF LOUISIANA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 2, 1983

● Mr. LIVINGSTON. Mr. Speaker, contrary to claims by its opponents, the Economic Recovery Tax Act of 1981 has led to payment of more, not less, taxes by Americans in the highest tax brackets. If there was ever any serious doubt about the fairness of the President's 25-percent cut in tax rates for every single taxpayer, there should be none now. By the same token, the recent tax revenue figures confirm that the tax cuts can help solve the problem of budget deficits, as reduced tax rates encourage upper bracket taxpayers to invest in productive enterprises, not tax shelters.

I would like to draw my colleagues' attention to the recent article analyzing the fiscal 1982 revenue statistics, and I ask unanimous consent that it be printed in the RECORD.

The article follows:

[From Forbes Magazine, Feb. 14, 1983]

FACT AND COMMENT II—THEY MAY BE RIGHT

(By M. S. Forbes, Jr., Deputy Editor-in-Chief)

Two years ago supply-side economists assured us that cuts in income tax rates would pay for themselves. Collections from the highest brackets would go up at once, and revenues from the other brackets would increase within 24 months. These economists cited the Mellon tax reductions of the 1920's and the Kennedy cuts of the early 1960's; in both cases revenues increased and the proportion paid by the top brackets rose substantially.

Events seem to have proven the supply-siders wrong.

Or have they?

People who must make estimated income tax payments each quarter to the IRS are generally in the higher brackets. David Stockman's Budget Office estimated that collections from this category of taxpayers would fall from $77 billion in fiscal 1981 to about $72 billion in 1982. The Reagan tax-cut bill of 1981 had just been passed, and the top tax rate was being slashed from 70 percent to 50 percent.

The fiscal 1982 results are in. The take from this category was $85 billion, 10 percent more than the year before. The proportion of U.S. income tax payments from this group was 29 percent, up from 27 percent.

If the tax reductions enacted in 1981 had been made effective at once (only the maximum rate was brought down in one step), instead of being staggered over 2½ years, David Stockman's revenues would have been beefier. British Prime Minister Margaret Thatcher put in smaller, but immediate, income tax reductions in 1979, and Britain's income tax revenues, despite a recession more painful than our own, went up, confounding treasury officials.

Too bad the Administration has forgotten that, if you let people keep a little more of each additional dollar they earn, everyone, including the tax collector, comes out ahead.●

GOVERNMENT REFORM LEGISLATION INTRODUCED

HON. C. W. BILL YOUNG

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 2, 1983

● Mr. YOUNG of Florida. Mr. Speaker, since the birth of our Nation, the success or our democracy has depended on the ability of the Federal Government to respond to the needs of its people. Unfortunately, as the Nation's population has grown, so has the size and bureacracy of its Government. We must never lose sight of the kind of government envisioned by our forefathers—one operated by its citizenry and attuned to their needs. In an effort to promote those goals, I am introducing legislation aimed at making the Government more responsive.

The first measure will guarantee the public's right to know how its money is being spent. By closing a loophole in the Freedom of Information Act, this legislation would require public disclosure by recipients of Federal grants as well as Federal agencies. The American people provide the funds to run our Government, and I believe they are entitled to a full accounting of how those funds are spent.

Two additional bills I am introducing would allow a one-House veto of rules and regulations established by Federal agencies. They would mandate 4 weeks' notice before holding hearings on new regulations and a 60-day comment period on proposed rule. Increasingly, Congress has passed legislation which delegates broad regulatory powers to the Federal agencies responsible for administering the laws. This, of course, leads to government by executive decision rather than by representative assembly. My proposal would mean an increased opportunity for many Americans to organize effective responses to the seeming flood of Federal regulations.

Finally, I am also introducing legislation requiring the Federal Government to make public annual consolidated financial statements using the accrual method of accounting. Currently, the Federal Government has no precise idea how it stands financially because it does not compile consolidated financial statements. This bill would establish an accurate annual accounting of our financial situation and allow us to intelligently establish funding priorities.

We need to continue to improve our Government and work together to solve its problems. I urge my congressional colleagues to join me in supporting these legislative proposals in the 98th Congress so that the Government can operate more effectively and continue to respond to the people it serves.●

FEDERAL BUDGET AND ITS DEFICITS

HON. PHILIP M. CRANE

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 2, 1983

● Mr. PHILIP M. CRANE. Mr. Speaker, the current topical discussion of the Federal budget and its deficits has led to whispers about tax increases. Tax indexing—the linking of income tax rate brackets and the personal exemption to the cost of living—is being targeted for repeal. I introduced the first tax indexation bill in the House of Representatives on May 13, 1974—H.R. 14738, the Cost of Living Adjustment Act, and every year since then I have reintroduced the measure. In 1981 indexing was part of our economic recovery plan. Its enactment is critical to the overall success of the President's program.

Tax-indexing provisions constitute genuine and fundamental reform of our Tax Code. They are the only enduring parts of the Internal Revenue Code that provide the greatest benefit to the taxpayer. Repealing the provisions would reimpose the hidden tax of inflation on us all, but would be felt most by those with incomes under $10,000. No other legislative battle is more important to the taxpayer right now than preserving the indexing provisions of current law.

Martin Feldstein's excellent article on the subject appeared in the Wall Street Journal on March 1, 1983. I include it in the RECORD at this point in the hopes that it will shed light on this very crucial matter. I commend the article to my colleagues' attention:

[From the Wall Street Journal, Mar. 1, 1983]

WHY TAX INDEXING MUST NOT BE REPEALED

(By Martin Feldstein)

The most important legislative battle this year will be the attempt to repeal the indexing of the personal income tax that is now scheduled to begin in 1985. Although tax indexing may seem at first to be a rather technical tax matter, it actually holds the key to controlling the future growth of government spending and to preventing a resurgence of spiraling inflation. the long-term success or failure of Ronald Reagan's economic program is likely to hinge more on retaining tax indexing than on any other piece of legislation.

In practice, an indexed tax system prevents inflation from pushing individuals into higher tax brackets and increasing the share of income taken in taxes. This is achieved by increasing each of the bracket points by the rate of inflation during the previous year. For example, in 1984 the 18% tax bracket will include income between $16,000 and $20,200. If consumer prices rise by 5% in the year ending Oct. 1, 1984, the 18% tax bracket for 1985 would be adjusted to the range from $16,800 to $21,210. Indexing would also raise the personal exemption from $1,000 to $1,050.

The repeal of indexing would mean that bracket creep would raise taxes higher and higher, permitting Congress to finance ever greater amounts of government spending without having to vote explicitly for any increase in tax rates. The repeal of indexing would permit Congress to reduce the budget deficit over time without any cuts in government spending by just waiting while tax receipts grow and grow.

TAXES WOULD BE HIGHER

Even with inflation declining gradually over the next few years as the administration forecasts, the repeal of indexation would raise tax revenue by $17 billion in 1986, $30 billion in 1987, $44 billion in 1988 and ever higher amounts in later years. A $44 billion tax increase in 1988 would mean that the repeal of indexing had raised taxes by more than 10%. And after a decade of inflation at just 4% a year, taxes without indexing would be 25% higher than if indexing is retained.

Of course, a higher rate of inflation would mean more bracket creep and thus a bigger tax increase each year. If inflation averaged 6.5% for the next five years, the extra tax revenue in 1988 would be about $80 billion instead of $44 billion. And a replay of the inflation experience of the Carter years—with inflation rising from 6.5% in 1985 to 13.5% in 1988—would raise tax receipts by about $120 billion more in 1988 if the tax system is not indexed.

The repeal of indexing would thus give Congress a strong incentive to pursue inflationary policies. With indexing gone, spiraling inflation would generate a surge of tax revenues that could finance greater government spending while permitting Congress the political luxury of voting occasional "tax cuts" that actually failed to offset inflation but provided a framework for further income redistribution.

Many financial investors and others would interpret the repeal of indexing as an indication that inflation would soon be on the rise. This change in the expected rate of inflation would raise interest rates, especially long-term interest rates on bonds and mortgages. Higher interest rates could threaten the recovery in housing and other interest-sensitive sectors and possibly bring the incipient recovery in the economy as a whole to a premature end.

Those who want to repeal indexing frequently wrap themselves in the cloak of fiscal responsibility and argue that "with the large budget deficits that we now face, we cannot afford an indexed tax system." What they should say is that the large budget deficits in future years mean that we must either cut spending or raise taxes or both. The administration's budget calls for a balanced package of spending cuts and revenue increases, including a standby tax equal to 1% of GNP that will go into effect in October 1985 unless very rapid economic growth between now and then has reduced the deficit to less than 2.5% of GNP.

If tax revenue must be raised, the repeal of indexing isn't a satisfactory substitute for an explicit tax increase. Because the repeal of indexing is a hidden way of increasing taxes, it removes the pressure to choose between spending cuts and more taxes. And unlike voting an explicit tax increase, repealing indexing doesn't provide a fixed amount of additional tax revenue but starts a money machine that will squeeze more and more money from taxpayers in the years ahead. The repeal of indexing is politically tempting to many in Congress because it increases revenue without explicitly increasing taxes. But it is the very opposite of responsible budgeting.

A common alternative rationale for repealing indexing is given by those who mistakenly believe that the combination of indexed benefits and indexed taxes inevitably produces budget deficits because "indexing raises benefits but reduces taxes." This argument is wrong because it misrepresents what indexing is all about. The indexing of benefits means that benefits just keep pace with inflation. The indexing of tax rates means that tax receipts don't rise faster than inflation through bracket creep. With complete indexing, inflation doesn't alter the real value of either benefits or taxes and therefore doesn't increase or decrease the real value of the deficit.

There are finally those who claim that they don't want to repeal indexing but just to postpone it for a year or two to help shrink the budget deficit. In reality, postponing indexing would have relatively little effect on future budget deficits. Slipping the starting date for indexing to 1986 would only raise an extra $12 billion in 1988. It is hard to avoid the suspicion that those who advocate postponement believe that if indexing is postponed once, it will be postponed again and again until it is eventually repealed. It is critically important to start indexing on schedule in 1985 because once the American taxpayers experience indexing it will be here to stay.

If indexing were repealed, the resulting tax increases would be relatively greatest for the lowest income taxpayers. It is the lowest income taxpayer who benefits most from the indexing of the $1,000 personal exemption and the $3,400 zero bracket amount. In addition, since the tax brackets are narrower at lower incomes, bracket creep is more severe. Eliminating indexing would cause the 1985 tax liability of those with incomes under $10,000 to rise by more than 9% while the tax liability of those with incomes over $100,000 would rise by less than 2%.

The liberals who want to repeal indexing are unconcerned about this increase in the tax burden on low-income taxpayers. They know that the vast increase in tax revenue that would result from de-indexing would permit Congress to vote further tax cuts for these lower income groups that would more than offset the effect of bracket creep on their tax liabilities. Tax reform would thus be deflected from a proper concern about incentives and simplification and would be fo-

cused instead on annual debates about egalitarian redistribution.

NO NATURAL CONSTITUENCY

The current congressional discussion about the repeal of indexing is counterproductive in several ways. By raising the possibility that indexing might be repealed, it increases the risk of high inflation in future years and thereby keeps current long-term interest rates higher than they should be. By focusing attention on the indexing issue, Congress avoids facing the difficult decisions about the control of spending and about the explicit tax changes that must eventually be made as part of this year's budget process.

Unfortunately, despite the critical importance of the indexing issue, it doesn't generate much pressure on Congress from individuals or from representative groups. While proposed policies that would affect a segment of the population often induce intensive lobbying activity, a major subject like indexing that influences the entire economy doesn't have a natural constituency. There is therefore the danger that Congress won't recognize how important indexing is to the public both now and in the future.

President Reagan strongly supports indexing as a central feature of his tax program. He has said clearly that he will veto any legislation that would repeal indexing or postpone its starting date. The president believes that an unindexed tax system is fundamentally dishonest. The repeal of indexing would eliminate political accountability and encourage wasteful government spending. It would make greater inflation an aid to politicians and an extra burden to taxpayers. It would initiate a continuous battle over the distribution of the tax burden.

The indexing of the personal income tax is the most fundamental and far-reaching aspect of Ronald Reagan's tax program. It must not be repealed.●

TRIBUTE TO J. DUDLEY DIGGES

HON. ROY DYSON

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 2, 1983

● Mr. DYSON. Mr. Speaker, it was with great sadness that I recently learned of the death of one of the highly respected residents of Maryland. J. Dudley Digges, who died on February 25 at his home in La Plata at the age of 71, was, from 1969 to 1982, a prominent judge on the highest tribunal in the State of Maryland, the court of appeals.

Judge Digges' tenure on the appellate court was marked by compassion, dedication and intelligence. His job confronted him with many challenges and he rose to all of them.

Before beginning his term on the appellate court, he served for 20 years as a judge of the seventh judicial circuit, which includes Charles County, Calvert County, Prince Georges County and my home county, St. Marys.

It was this region's fascinating mixture of rural and urban populations that provided Judge Digges with the diverse experience which made him unique among the judges of the court of appeals. As a result of his extensive experience as a trial judge and his vast knowledge of constitutional law, Judge Digges won the immediate and unanimous respect of the other judges on the court of appeals.

His leadership qualities which we all admired so much were best illustrated in his firm handling of the Spiro Agnew case. Digges is most widely remembered for writing the opinion disbarring the former Vice President and Governor of Maryland after Agnew pleaded no contest to charges of income tax evasion.

Judge Marvin Smith, another judge of Maryland's Court of Appeals and one of Judge Digges' very close friends, described Judge Digges to me as "one of the most solidly grounded members of the legal profession in Maryland."

"He was good at anything he did. It was always done thoroughly and promptly," Judge Smith said, recalling his friend's reputation on the appellate court. "Everybody recognized that this was a guy of outstanding ability."

Judge Digges, a former president of the State bar association, played a leading role in changing and improving the organization of the association. He helped turn the bar association from a small legal-social group into the well-organized system for sanctions that it represents today.

Judge Robert Murphy, chief judge of the Maryland Court of Appeals, called Judge Digges "a man of the greatest intellectual depth." In recognition of Judge Digges' accomplishments and contributions, Maryland Gov. Harry Hughes ordered that the flags on the State house and the court of appeals in Annapolis be flown at half staff.

Judge Digges was a lifelong resident of La Plata. He graduated from La Plata High School, St. John's College in Annapolis and the University of Maryland Law School. In 1936, he set up a private practice in Upper Marlboro with former U.S. Representative Lansdale G. Sasscer. During World War II, he served in the Army Judge Advocate General's Corps.

Judge Digges retired from Maryland's highest court early last year at the mandatory retirement age of 70 after participating in some of the most important legal decisions in Maryland history.

After he retired, he was appointed by Governor Hughes to head the Maryland Heritage Committee, which is organizing next year's observance of the 350th anniversary of the founding of Maryland. He was also chairman of the Court of Appeals Rules Committee and a former president of the Southern Maryland Society.

Judge Digges received honorary doctorates of law from the University of Maryland and St. Mary's College of Maryland.

Mr. Speaker, I am proud to have known Dudley Digges. I ask you to join me in paying tribute to a man who made invaluable contributions to the Maryland legal system and everyone who is a part of that system. Judge Digges set an example that other appellate judges will be proud to follow.

I know I speak for all Marylanders in extending my sympathy to Judge Digges' sister, Mrs. Calvin Harrington Jr. of Cambridge, Md., and his two brothers, W. Mitchell Diggs Jr., and Edward S. Diggs, both of La Plata.

The principles which guided Judge Digges in life will continue to characterize Maryland's legal system, a perpetual monument to this great man.●

A COST-EFFECTIVE SOLUTION TO ONE NATO PROBLEM

HON. TOBY ROTH

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 2, 1983

● Mr. ROTH. Mr. Speaker, last April, I was privileged to attend a ceremony in Bonn, Germany, at which the U.S. Ambassador, Arthur Burns, and the German Foreign Minister, Hans-Dieter Genscher, signed a historic document—the United States-German Agreement on Wartime Host Nation Support (WHNS). Under the terms of this agreement, the United States reaffirms its commitment to a 10-division D-Day force in NATO's central region; in return, Germany is committed to providing essential goods and services to U.S. forces in wartime from the German civilian sector and to creating a 93,000-man force of Bundeswehr reservists, dedicated to the support of U.S. forces fighting in Germany.

By this means, one of NATO's most difficult problems can be resolved.

By 1978, most military analysts had come to recognize that the rapid Warsaw Pact buildup dictated increases in NATO's conventional forces in the central region. Without these increases, NATO could not achieve the minimum force levels essential to a successful conventional defense; without them, it was clear, the only remaining means for defending NATO would be nuclear—either tactical or strategic systems, or both.

Faced with this situation, in 1978, the NATO heads of state agreed to the long-term defense program (LTDP). Under its provisions, the U.S. was, and is, committed to providing a 10-division D-Day force, an increase of 3 divisions over our previous commitment. Our commitment for tactical aircraft on D-Day was increased commensurately. That augmentation of our

early-deploying force represents our share of the total NATO conventional buildup.

Honoring that increased commitment—particularly its ground forces component—confronted the United States with a serious dilemma. To reinforce NATO with three additional divisions within the same period of time as previously required, we had to: first, increase our strategic airlift, or second, increase our forward stationed active forces, or third, plan to commit our forces to combat without necessary support. All of these alternatives are undesirable; increasing our airlift capability is terribly expensive; increasing our peacetime overseas strength is neither politically nor economically practicable; going without essential support—openly forgoing the ability to engage successfully in sustained combat—drastically curtails the deterrent effects of our NATO commitment and forces us to resort to a defense based on nuclear weapons when deterrents fail us.

In 1980, seeking a way out of this dilemma, the United States proposed to its NATO allies a transatlantic bargain, under which we would increase our early-deploying combat forces, without essential support, provided the allies made that support available to us. Our allies responded favorably to that offer.

Since we have entered into WHNS agreements with the United Kingdom, Belgium, the Netherlands, and Luxembourg under which each of those powers guarantees to provide from its civil sector, essential goods and services to U.S. forces in wartime. These four agreements relieve us from the need to deploy some 50,000 U.S. military personnel to NATO in times of tension or crisis.

Because of Germany's unique geographic situation—the NATO-Pact boundary is along the German frontier and many of our initial support requirements are likely to lie in combat areas—the United States-German WHNS Agreement was different in some respects from the other agreements. Like the others, this agreement called for the Germans to furnish us with goods and services from their civil sector. But it went far beyond the normal arrangement by incorporating a unique provision under which the German Government agreed to create an organized military force of some 93,000 Bundeswehr reservists, dedicated to the support of U.S. ground and air forces in wartime. In combination, these actions to which the Germans have committed themselves will obviate our need to deploy more than 150,000 U.S. support troops to NATO in times of crisis and tension.

Through these several agreements, the United States has been enabled, without increasing our previous strategic lift capabilities, to deliver sustainable conventional forces in the numbers to which our Nation has committed itself to NATO.

As is usual, under the terms of these agreements, all goods and services from the civil sector are provided on a reimbursable basis. Since they are to be furnished only in wartime, this form of support entails no peacetime costs.

But the German Bundeswehr Reserve units do have peacetime costs—capital outlays for equipment and facilities; recurring costs for salaries, maintenance, and training. Since the Germans are providing a service—the support of U.S. forces—to meet what, in accordance with NATO practice, is a U.S. national responsibility, we would normally be expected to bear all of the costs for the 93,000 reservists. But the United States-German WHNS Agreement departs from the norm by having Germany share these costs with us. Under the provisions of our agreement, the Germans will bear approximately 50 percent of the capital costs and about 60 percent of the recurring costs.

Pursuant to our agreement, the German Government already has assigned personnel to this program and has set aside nearly $18 million to pay its share of the 1983 costs for implementation. We anticipate that the German contribution will be doubled in 1984, as more units come into being.

The Germans have furnished all facilities needed for scheduled 1983 activations; the United States will provide facilities for activations in 1984. NATO infrastructure funding will be requested for any future activations for which suitable facilities are not available from existing assets.

The continuing resolution authority (CRA) does not include funds for the U.S. share of implementation costs during 1983. Indeed, the report of the conferees directs the Department of Defense not to proceed with the WHNS program.

I would like to comment upon the arguments against funding this program, which were advanced by Members of Congress during last year's debates on the budget and the CRA. Some Members who oppose this program have also expressed their belief that our NATO allies must be required to assume a larger share of the defense burden than they have done until now. Ironically, the WHNS program is one measure that would cause the Germans to do more than heretofore.

Some Members have argued that we should not provide equipment for German reserve unit until all U.S. reserve units have been fully equipped. This argument is doubly flawed. First and more importantly, the German reserve units will be available to support U.S. units within 2 to 3 days after both countries determine that support is needed. U.S. reserve units cannot be mobilized and deployed to Europe in time to provide the needed support, even if sufficient strategic airlift were available. We are not dealing with equivalent alternatives here, only the German reservist are able to meet the support requirements of our combat forces. Second, since the equipment to be procured by the United States includes only essential items which cannot be mobilized from the German civilian sector, it constitutes a very small part of the equipment involved in the total program; the effect upon our own reserve components or applying it to this program is almost negligible.

The CRA conferees indicated that this WHNS program should be treated as a part of the foreign military aid budget. That would be most inappropriate, for under the United States-German agreement, we will retain title to all equipment which we procure for use by Bundeswehr reservists in support of U.S. forces in Europe. The United States could not retain title to this equipment if it were transferred through a foreign military sales program. But beyond that technical problem, I am troubled by the notion, implicit in the conference report, that this is foreign aid. It is not the Germans whom we aid by this program—it is the United States. We are not dealing with foreign aid here; instead we seek to provide our own soldiers and airmen with the support they must have to survive and succeed in combat.

Our failure to fund this program runs counter to our efforts to further the military revitalization and political cohesion of NATO. There is general agreement here that both we and our allies need to do much more to strengthen NATO. We do not advance that policy by forcing, through lack of appropriations, unilateral withdrawal by the United States from an agreement which has been carefully tailored to strengthen deterrence and improve NATO's conventional defense capability.

The President's fiscal year 1984 budget request includes $41 million to pay the U.S. share of costs associated with implementing the WHNS program in that year. I understand that the Department of Defense intends, in a supplemental appropriations request for fiscal year 1983, to seek authority to begin implementing this vital program now.

I urge your support for the wartime host nation support program which will enable the United States to fulfill a critical international obligation, and also, far more important to all Americans, to provide the means for sustaining our forward deployed and reinforcing troops in the event of a NATO war.●

CHILD-CARE ASSISTANCE ACT OF 1983

HON. EDWARD R. ROYBAL

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 2, 1983

● Mr. ROYBAL. Mr. Speaker, today I am pleased to introduce the Child-Care Assistance Act of 1983. This measure is a companion to S. 4, which has been introduced in the Senate by my good friend Senator ALAN CRANSTON.

The number of working families faced with a lack of adequate child-care facilities is rapidly growing. Single parents and working mothers, especially those with low incomes, are finding it increasingly difficult to insure that their children are properly supervised. Since 1977, the estimated numbers of working mothers of children under 18 and working mothers of children under age 6 have increased by almost 20 percent—from 50.7 percent to 59 percent and from 40.9 percent to 50 percent, respectively. In just the last 2 years, the number of children under the age of 6 whose mothers are in the work force has risen from 7.5 million to 8.5 million—an increase of more than 13 percent.

Moreover, demographic data indicate that these increases will continue. It has been projected that by the year 1990, there will be 11.5 million children under the age of 6 and 17.2 million children between the ages of 6 and 13 whose mothers will be working. That represents an increase of almost 7 million children from the current 22 million children under age 13 with mothers in the work force.

The data also indicate a wide disparity between the number of children with working mothers and the number of available child-care slots. The Department of Health and Human Services, in reports issued in 1980 and 1981, indicated that there were some 900,000 center-based and 5.2 million family-based day-care places available. That is roughly 6 million places for 22 million children under the age of 13.

Obviously, the problem is multifold. There is a severe lack of centers available and those that are open tend to be filled. In addition, many families are unable to afford these services. As a result, many school age and even preschool age children are left at home for several hours a day without supervision. This is accompanied by an alarming increase in school vandalism, juvenile alcoholism, and a variety of other disruptive and criminal activities. As for younger children, studies have shown that the years from birth to age 6 are crucial in a child's development. Children should be afforded the most positive environment possible to enhance their personal and social progress in all areas. Making qualified and accessible child-care services available to all families will obviously be of immediate benefit to these children. But such a system would also have a huge impact on our country as a whole, in terms of insuring well-adjusted and productive members of our society. When the costs of leaving these children alone is compared to the benefits of providing proper supervision, I think we can all agree that it is a price we can well afford to pay.

Equally serious is the case of a family that does not have access to day care services, but chooses not to leave their children alone and unsupervised. This can encompass a number of situations: Either both parents must work to insure the economic stability of the family, or it is a single-parent household, but whatever the case they do not intend to leave their children unsupervised for the length of time employment would demand. An increased availability of affordable child-care centers will give these parents an opportunity both to seek employment and to work full time. Certainly, this can only strengthen the family unit, as well as reduce public assistance costs.

That is the purpose of this measure—to promote the availability and diversity of quality child-care services for all children and families who need such services. My bill would provide assistance to the States to expend the existing supply of child-care services, improve the quality of and coordination among child-care programs, and generally foster increased coordination of programs at the local, State, and Federal levels. Grants would be available to States, under the terms specified in this act, to carry out these activities and to make additional resources available to help families find and meet the costs of child care. The bill is also designed to provide mechanisms to facilitate an assessment of the extent of the need for child-care services throughout the Nation, both an initial assessment within the next few years and continuing assessments periodically thereafter.

Additionally, and fundamentally, this bill is aimed at strengthening the functions of families by seeking to assure that parents are not forced by lack of available programs or financial resources to place a child in an undesirable care facility or arrangement. It is in the national interest that we implement such a policy. I urge my colleagues to study the situation and my proposal, and to join with me in support of such action.●

RIGHT DIRECTION IN EL SALVADOR

HON. ROBERT J. LAGOMARSINO

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 2, 1983

● Mr. LAGOMARSINO. Mr. Speaker, I would like to share with my colleagues the following correspondence expressing the views and recommendations of the American Chamber of Commerce of El Salvador:

EL SALVADOR 1983: IN THE RIGHT DIRECTION

"Human rights", "land reforms", "military oppression", "oligarchies", "military advisors", "Vietnamization", "extreme left", "extreme right", "dialogue", etc., are some of the emotional terms that partisan internal politics and pressure groups have manipulated to confuse the American people and Congress so that the reality about El Salvador has been lost. The real issue at stake is whether the U.S. will, for obvious national interest, develop a position of commitment that will insure the future of democracy and the private enterprise system in El Salvador; or will the U.S. position and policy permit another Nicaragua to occur and thereby progressively lose the entire Caribbean Basin and Mexico to Castroism.

The American Chamber of Commerce of El Salvador urges that this commitment be evidenced by increased economic and military assistance to El Salvador to save the economy and to counteract the international communist attack. Failure to support El Salvador would again demonstrate that the U.S. is incapable of defending the principles of democracy against a determined and programed international communist aggression.

We also urge Congress to embrace the investment and trade package of the CBI as a program designed to eliminate the regional economic environment which has stymied political, social and economic progress.

In dealing with the question of El Salvador it is essential to recall March 28, 1982 when we witnessed one of the most incredible voter turnouts ever in the history of democratic elections. This election was even more astonishing since the people had to expose themselves to the threat of loss of life in order to exercise their right as defined in Article 21 of the United Nations Human Rights charter, which states: "The will of the people is the base of the authority of public power."

In March 1982 the Frente Democrático Revolucionario (FDR), which has always used violence and terror as a means to obtain power or promote change, created the hostile political and security environment which they then used as an excuse for not participating in the elections. The FDR's decision to stay with the GUNS and not the BALLOTS confirmed their disregard for the Human Rights of those that did decide to participate and vote.

The election result is the testimony of over 80 percent of the Salvadorean voters who spoke to the world with one clear message: We do not support the FDR movement. The U.S. cannot ignore this fact and have a reasonable policy toward El Salvador or, for that matter, towards any other developing democracy of the world. The U.S. must identify with this one event over any other to establish the cornerstone of its commitment to El Salvador.

The above facts must be kept in mind when analyzing the pressure by some elements in the United States to force the people of El Salvador into a dialogue with the FDR to reach a political solution. This position under the present realities must be discarded for it is in direct contradiction to the voice and spirit of the March 28 elections, and could give the FDR a role in the government which they have been unwilling to earn through the democratic process. Those arguing "dialogue" still have not recognized nor accepted the FDR for what it represents.

In our presentation to the Congress last year before the elections we said:

"The principal misunderstanding concerns the opinion surrounding the make-up and strength of the FDR. The basic controversy about the FDR regarding their strength or weakness is a matter of opinion. The opinion that because of their terrorist activities the FDR represents some major group of Salvadorean is accepted by certain sectors out of hand, while the true majority of Salvadoreans, the church, the government, the unions, the military and the private sector, which support elections and reject the FDR, are conveniently ignored. The FDR, as documented, is an umbrella political front for the international sponsored marxist-leninist terrorist groups. They have intelligently incorporated renegades from the social and Chistrian Democrats to give it appeal within the western world. They have not, by fact or history, won any popular internal support for their cause. They portray support by trying to capitalize on and usurp the popular movement of the late 70's, which sought change in the "old system", but did not seek communism as the "new system". Any support they had within that popular movement disintegrated. When the extreme left leadership made public its marxist-leninist ideology and the social reforms were implemented by the government. As social outcasts, not only for their ideology but also for their violence, they retreated to the hills and resorted to hit and run terrorism, while being idolized as Robin Hoods by the media."

This analysis has not changed and within the country the FDR is still viewed as a band of traitors to the principles of democracy and private initiative. Reasons for their continued existence can be summarized into six major points:

1. Continued arms and logistic support from the international communists with the help of Nicaragua as a bridge from Cuba.

2. Ability to draft youths (mostly under 18), drifters and common criminals who do not necessarily support their cause but join for the obvious adventurism, theft, etc., associated with outlaw bands, and those forced to cooperate through terror.

3. Ability to con and use mistaken idealists who believe they will have a voice in some future government, but who will be obviously discarded as the Nicaraguan example clearly shows.

4. Ability to continue to receive support and recognition from interest groups and political leaders which only view the faults of the present government and do not look at the final objective of the FDR which is clearly communism for El Salvador.

5. The publicity they receive when they destroy the economy by means of violence, making them look powerful and numerous.

6. The use of well-orchestrated propaganda machine available to them within the U.S., to create misinformation throughout the world.

The fourth point is of particular importance for the people of the U.S. to help correct. It is most ironical and contradictory that some human rights activists, certain religious groups and political leaders provide propaganda and political support to the FDR by charging the abuses committed by a few undisciplined elements to the entire government and military, which are publicly committed to the correction of their faults and to democracy. While not ignoring this fact, the daily destruction of public and private property caused by the FDR clearly affects all Salvadoreans' livelihood, their right to work, to move freely about their country, and to enjoy such basic necessities as electricity, water, medicines, education and food. By ignoring the above violations committed by the FDR, makes these religious, human rights and political groups collaborators in providing justification for treason instead of helping develop the necessary democratic solution.

The unmistakable conclusion from the analysis of the March 28 results and the nature of the FDR is that the U.S. Government must support the existing legally and democratically elected representatives of the people of El Salvador and encourage the further development of their democratic process.

The U.S. and its congress must make a clear and public rejection of the FDR principles as antidemocratic and anti-U.S. The U.S. must insist that the FDR reject terrorism and seek acceptance through the democratic process. With these political steps taken then it is very feasible to expect the Salvadoreans to be able to participate in a true dialogue for the conditional surrender of the FDR, providing guarantees of life and future participation in the society. The conditional surrender of the FDR must be urged to bring to an end the unnecessary death and suffering they are imposing on the Salvadorean people.

The focus on land reform as a condition for continued U.S. aid to El Salvador must be carefully put into context not only for El Salvador's case but for the signal we are sending to our other Latin American friends. The land reform, the nationalization of the banking system, and the state control of the sales and marketing of El Salvador's major and traditional exports were in the late 1970's political steps to defuse an explosive social condition. The blueprints for these reforms were based upon a set of circumstances that existed at that time but which with the evolution of the past few years, including the successful implementation of the key purposes of the reforms and especially the demonstration of March 28 elections, do not continue and now have placed the U.S. ironically in defense of a highly socialist program not compatible with U.S. principles. The Salvadorean government continues to consolidate the reform program. The real threat to its progress is from the Marxist-Leninists through their open and declared war on the national economy and their continued undermining of the security and well-being of the rural communities. In spite of the "Scared Cow" image imposed on the reforms, U.S. policy makers must reassess them in the context of reality in El Salvador of 1983 and not El Salvador of 1978 when they were supported by the Carter Administration. Within the land reform movement, if anything is necessary at this moment, it is to guarantee the people of El Salvador the basic human right of ownership of private property and to do so *without reversing* the rights of ownership to the new land reform beneficiaries. Flexibility is required to give the reforms the opportunity they need to become adaptable, realistic and productive under the present set of circumstances.

A reform rarely emphasized, but yet the most important, is the democratic pluralism being developed within El Salvador. This has been one of the principal goals of American Foreign policy towards El Salvador, and while it has demonstrated growing pain, its existence is evidence of political progress.

Economically, El Salvador can not support all the task before it alone. History shows that El Salvador has never been an aid burden on the people of the United States. Aid, even now, is considered by the people of this country as short term help. El Salvador's record as the most productive country in the region with the least natural resources will be reconfirmed once peace is established and the CBI is implemented. But very serious and long lasting problems at a much higher price in lives, immigration problems and aid will face the U.S. in the neighboring countries if this specific economy, a benchmark for the hemisphere, is allowed to collapse. The aid given to El Salvador, even though limited, in the last couple of years has accomplished a great deal. The economy daily being damaged by the FDR is still providing jobs and the private enterprise system has demonstrated endurance. Political pluralism, a freely legally elected government and widespread social awareness all have emerged to alleviate the anarchy and turmoil which plagued El Salvador before a U.S. began providing assistance. Much more assistance is needed to improve the economy, to discourage the marxist-leninist and to bring the needed social development through jobs, until the benefits derived from the CBI trade package can materialize.

When summarizing about El Salvador, one should remember the worlds of Oliver Wendell Holmes: "The great thing in this world is not so much where we are, but in what direction we are moving."

El Salvador is moving in the right direction and progress depends on our ability to support it in stopping those who have declared themselves against our values. Our political, economical and military support will insure that El Salvador's developing and fragile democracy will strengthen, bring the economic and social progress that these people are willing to work for. If our support is stopped or even short of their needs, then El Salvador will fall into Castro's hands. Then what cost will that bring to the U.S.A. in near future and what will our "bottom line" look like before the world?

THE PEOPLE'S PARADISE

HON. JACK FIELDS

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 2, 1983

● Mr. FIELDS. Mr. Speaker, some form of socialism/communism is dominant in many nations and every conti-

nent. The idea of socialism is especially attractive to intellectuals who are able to maintain a comfortable distance from actual socialist practices.

Though socialism is a god that fails continuously, and causes more human suffering and tragedy than any idea or practice in history, there are those who stubbornly cling to its high-minded idealism. They religously close up their eyes to the reality that the socialist promise of instant utopia brings only the tyranny of a real dystopia.

It is for them that the following glimpse of reality is provided.

[From the Washington Times, Jan. 20, 1983]

ERASING A PEOPLE'S HISTORY

(By Albert Wass)

Bulldozers roar and old brick houses crumble under the pounding of the giant wreckers in the outskirts of the ancient Hungarian city of Kolozsvár in Transylvania—now a part of Communist Romania. Six-century-old hand-carved stone portals proudly showing the name of the builder and the year the house was built fall into dust. Dictator Ceausescu's regime does not tolerate historic landmarks. The Hungarian past must go.

In 1382 the commander of Kolozsvára, the Fort of Kolozs, a wise man by the name of András Pethö, moved 32 Hungarian families from his Maros valley estate to rich bottom land next to the fort to raise vegetables, poultry and hogs. He gave them about 1,000 acres of land and built a village which was named in the 15th century by German merchants "Hoch-stadt" (High Town), changed to suit the Hungarian tongue into Hóstát.

Over the centuries, the hard-working people of the settlement fed the growing town with vegetables, fruits, milk, and poultry. As Kolozsvár became the cultural and administrative center of Eastern Hungary, they established their own landmarks there and engraved their deeds into history. After six centuries of honest and frugal labor, the new and intolerant regime of Romanian dictator Ceausescu decided to remove them from the face of the earth as an affronting landmark of Transylvania's Hungarian past.

Though their lands were taken by the state in 1946, the sturdy farmers held on to their way of life, turning their small back yards into intensively cultivated gardens. Nevertheless, the heavy hand of the rulers fell upon them anyhow.

There was no place for Hungarians in Romania, and no place for independent workers under the communist system. Block by block, the famous old Hostat was demolished to yield space for apartment houses built for the thousands of "first class" citizens, Romanians, moved into the newly acquired province from the East with the purpose of changing the Hungarian character of this ancient city.

The people of Hostat were loaded into trucks, like cattle, and dumped somewhere in old-romania, where language as well as culture was foreign to them. Those who tried to resist were beaten and sent to forced labor camps. In their new environments, the Hungarians were strangers and destitute. Old-age pensions were refused under the pretext that they were not laborers but "capitalists" who owned their own land. Many died of hunger and cold. Others took their own lives as an escape.

In the first week of December 1982, a full 600 years after their forefathers established themselves on the land with the purpose of feeding the city of Kolozsvar—known today as Clug—the last 16 families of once-prosperous Hostat were dragged out of their homes, loaded into trucks and driven away.

According to an eyewitness, there was an old man among them named Sandor Bognar, who begged Romanian police sergeant to allow him one last favor. In his yard stood an old stone monument with the inscription:

"Here Stood King Mathias The Just And Swapped Jokes With The Humble Owner Of This Home Ambrus Bognar, Anno Domini 1468."

The old man wanted to take that old stone with him, wherever he had to go.

The sergeant rudely refused his request and kicked him in the groin. The old man fell, but got up and reached for an axe. He was shot to death, his body thrown in the truck midst his horrified family and driven away. But not too far, just some 15 miles to the top of the Felek ridge. There the truck stopped and the Bognar family was ordered off into knee-deep snow. They were left there with the old man's body, in the middle of nowhere, to die.

Officially nobody seems to know what happened to them. But the rumor is that some good people from one of the nearby villages took them in and hid them from the police. But this is only hearsay, of course. Nevertheless, the fact is that in one of the abandoned old cemeteries up there on the slope of the Felek there is a new grave with a strange stone laid flat over it.

On the top it says "Here Rests Old Sandor." Nothing more. But on the bottom, hidden from sight, there is supposed to be more. Something about a king who swapped jokes with simple peasants, back in the olden days, when socialism was not yet invented.●

REPEAL WITHHOLDING TAX ON INTEREST NOT DIVIDENDS

HON. C. ROBIN BRITT

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 2, 1983

● Mr. BRITT. Mr. Speaker, Congressman BILL HEFNER and I are introducing legislation that would repeal the withholding of taxes on interest by banking institutions but would not repeal the existing law providing for withholding of taxes on dividends. After careful study, I have concluded that the interest withholding provision creates an undue burden, especially on the small saver and the elderly. Additionally, it creates an administrative nightmare for banks, savings and loans, and credit unions.

Much of the initial revenue from the withholding measure comes from the Government's use of taxpayers' money—roughly one-half in fiscal year 1984. This is especially unfair to those who will receive refunds at the end of the year. Although there are exemption provisions to cure this problem, filing an exemption is an unfamiliar, complicated, and uncertain process and many, especially the elderly, will not pursue this procedure.

At the same time, given the size of the Federal deficits, we must be hesitant to adopt measures that reduce revenues. For this reason, the bill introduced today, unlike other bills to repeal the withholding provisions enacted by the last Congress, would not repeal the withholding of taxes on dividends. Dividend withholding poses fewer inequities. Dividend withholding is much easier to administer and that provision has much less impact on the elderly and those with limited income. Preserving the dividend withholding provision would save the Federal Government roughly $8 billion between 1983 and 1987. Dividend withholding accounted for roughly 40 percent of the revenues projected from the combined withholding on interest and dividends.

Efforts to repeal both interest and dividend withholding are gaining momentum in Congress. The bill we have introduced today strikes a new balance between fairness and preservation of revenues. It is a more fiscally responsible measure.●

SUPPORT OF THE CONSUMER DEBTOR BANKRUPTCY AMEND- MENTS ACT OF 1983

HON. WILLIAM H. GRAY III

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 2, 1983

● Mr. GRAY. Mr. Speaker, I am pleased to join my colleague, the Honorable MIKE SYNAR, and others, in introducing the Consumer Debtor Bankruptcy Amendments Act of 1983. This legislation, which is important to working people in this country who depend on unsecured credit at reasonable rates, would amend certain provisions of the Federal Bankruptcy Code which have had the unintended effect of making it more difficult for the average consumer to find and afford consumer loans. This is badly needed legislation that will benefit both consumers and creditors.

Mr. Speaker, since their inception, our Nation's bankruptcy laws have signaled a compassion for honest debtors who, often for reasons beyond their control, are unable to meet their debts. At times, the loss of employment or other unexpected misfortunes can make the repayment of consumer loans impossible for the most well-intentioned borrower, and a discharge in straight bankruptcy under chapter 7 of the Bankruptcy Code has traditionally provided such a borrower an opportunity for a fresh start. This fresh-start concept has been one of the hall-

marks of our bankruptcy system, and it has worked well for over a century, allowing individuals to reorder their lives when faced with a burden of debt which they could not repay.

In 1978, the Congress considered and approved a series of beneficial changes to the Bankruptcy Code designed, in large part, to strengthen and refine the basic protections offered to consumer debtors. Many of these changes were specifically designed to increase the protections available to individuals who, due to no fault of their own, could not afford to meet all of their debts and needed a fresh start. Most of these changes were, and still are, needed. But I also believe that in several instances the Congress may have created unintended incentives for individuals to invoke the protections of straight bankruptcy where other options may be available.

Mr. Speaker, it is obvious that most debtors who seek a discharge of their financial obligations under chapter 7 have little prospect of paying any reasonable portion of their debts. A consumer debtor's continuing obligation to support himself and his family frequently exhausts his available income, and the debtor will often not have sufficient current or future discretionary income left after satisfying these basic living expenses. No purpose is served by continuing to burden such debtors with legal obligations they simply cannot satisfy. On the other hand, there are a substantial percentage of debtors who are not financially incapacitated at the time of filing bankruptcy, and for whom a discharge in bankruptcy constitutes a headstart rather than a fresh start. It is the increasing chapter 7 filings of these debtors that are causing problems for the credit industry and, indirectly, problems for unsecured debtors who are already finding it more difficult to secure consumer credit.

This problem is particularly acute for the young, and minority, and low-income borrowers who may not enjoy the advantages of owning their own home or other collateral necessary to secure a consumer loan. As losses from unnecessary bankruptcies—estimated by some to be between $1.5 and $1.6 billion annually—cause lenders to tighten eligibility standards, renters and others without substantial collateral will find it is increasingly difficult to obtain credit at reasonable rates. Clearly, this was not the intent of the 1978 reforms.

These concerns, Mr. Speaker, were extensively documented in hearings last year before the House Judiciary Subcommittee on Monopolies and Commercial Law, and I know that they are shared by a number of my colleagues. The Consumer Debtor Bankruptcy Amendments Act builds upon that record as well as the recommendations of the National Bankruptcy Commission by incorporating a series of reforms intended to correct the problems which I have described, while preserving the integrity and purpose of the Federal bankruptcy system. The legislation also builds upon and improves on last year's consumer bankruptcy reform bill, H.R. 4786, which, among its provisions, contained the so-called future-income-threshold test.

Under the terms of the future-income-test provisions, a creditor and others in a bankruptcy proceeding were permitted to raise the issue of whether, given his likely future income, a consumer debtor was properly seeking relief under chapter 7's straight bankruptcy provisions or whether resort to the payment rearrangement provisions of chapter 13 was more appropriate. Although these provisions were intended only as a means of preventing abuses of chapter 7 procedures, some feared that the future-income test would afford creditors an opportunity to harass consumer debtors. It was argued that it would have allowed creditors to determine whether in fact a debtor could discharge his debts and get a fresh start. The consumer debtor bankruptcy legislation eliminates these future-income provisions so that there can be no question regarding potential creditor abuse. Under the bill being introduced today, only the bankruptcy judge would be able to move to abstain from or dismiss a chapter 7 proceeding, where to permit it to continue would constitute an abuse of the Bankruptcy Code. Creditor involvement in that process is eliminated.

Mr. Speaker, the consumer debtor bankruptcy bill makes a number of other needed reforms to our bankruptcy laws. It would enhance the Congress ability to oversee the bankruptcy system by providing for the collection of important statistical information; it would create standards for court confirmation of repayment plans; and it would eliminate costly and unnecessary bankruptcy procedures. In addition, the legislation would address the many pressing problems faced by our farmers during grain-elevator-bankruptcy proceedings.

I am pleased to join my colleagues, the Honorable MIKE SYNAR, BARNEY FRANK, GILLIS LONG, BUTLER DERRICK, DICK GEPHARDT, VIC FAZIO, BILL MCCOLLUM, TRENT LOTT, HAL DAUB, HAL SAWYER, and BILL EMERSON, in introducing this legislation. This is an important bill that is badly needed by both creditors and consumer debtors. I hope it will be given swift and favorable consideration in the Congress.●

SELECTION OF BISHOP JOSEPH F. MAGUIRE OF SPRINGFIELD, MASS., AS RECIPIENT OF THE JOHN F. KENNEDY AWARD BY THE ST. PATRICK'S DAY PARADE COMMITTEE OF HOLYOKE, MASS.

HON. SILVIO O. CONTE

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 2, 1983

● Mr. CONTE. Mr. Speaker, I come before my colleagues today to share my thoughts on the recent selection of Bishop Joseph F. Maguire of the diocese of Springfield as the 1983 recipient of the John F. Kennedy Award by the St. Patrick's Day Parade Committee of Holyoke. The coveted award is presented each year to an American of Irish descent "whose life and career have made an indelible and noble impact upon society."

Bishop Maguire was installed as prelate of Springfield on November 4, 1977 as leader of a diocese that includes most of my First Congressional District. He is a nationally recognized spiritual leader and holds a number of prestigious positions in the church. They include national spiritual adviser of the Holy Name Society and trustee of the National Shrine of the Immaculate Conception in Washington, D.C.

The admiration and respect that I have for Bishop Maguire was instilled in me when I first read the address he gave on the day of his installation. He said, "We must root out from our hearts injustice, prejudice, and discrimination." He has proven over the past 5½ years as bishop of Springfield, that he practices what he preaches. All of us should learn from his words of wisdom and from his living witness of kindness, understanding and inspiration.

It is evident that his spirituality is an inborn instinct, for by nature, he is a very humble man with a great sensitivity to people in need. He is delighted to be called to visit the sick and he was eager to assist in the establishment of the soup kitchens in Springfield and Holyoke.

Bishop Maguire is a gentle man and relishes the opportunity to be with children. In church, he often pauses on his way to the altar to pat a child on the head or to pay a compliment to the child. He is a very friendly man with an attractive personality and gets along easily with strangers because of his warm smile and natural, homey attitude. His lifelong involvement with sports, both as participant and observer, epitomizes much; he enjoys playing as much as winning; he thrills at the process regardless of the outcome. As a fan, he cheers for an underdog and is jubilant in another's victory. Whoever

wins, the game is important because of the people he meets there.

All who know him rejoice at this honor given to Bishop Maguire. The conferring of the John F. Kennedy Award says publicly what so many feel—it is good to give praise to this man of God who is a man of the people.●

MBFR: THE WESTERN PROPOSAL

HON. WM. S. BROOMFIELD, JR.

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 2, 1983

● Mr. BROOMFIELD. Mr. Speaker, hardly a day passes in which the Soviet Union fails to charge the United States with foot-dragging in the arms control arena. Such unfounded allegations are often picked up by Western journalists without critical commentary. This leaves many American readers with the impression that the Soviet position is accurate. I believe we must set the record straight on this crucial subject.

As all of you know, in 1973, the United States was instrumental in initiating the ongoing Mutual and Balanced Force Reductions talks (MBFR) in central Europe. These talks involve the 12 members of NATO and 7 Warsaw Pact countries.

The nations of the West rightly believe that the seemingly endless buildup by the East of a wide variety of arms in central Europe must be addressed and, hopefully, reduced. The West's goal is to attempt to reduce tensions with the Soviets and its allies through a reduction in ground forces and the establishment of manpower parity at lower levels.

The key issue which has to be addressed is the significant Eastern superiority in ground forces. This imbalance has been a major destabilizing factor in the military situation between East and West for a number of years. The elimination of this imbalance would reduce the risk of war in Europe.

Lest we forget, it was the Warsaw Pact, not NATO, which initially upset the balance of forces in central Europe. Over the years, the pact deployed 57 divisions and a total of about 960,000 ground force personnel. This level dwarfs NATO's 25 divisions and 800,000 men. The buildup gives the East a superiority of 160,000 men which the Warsaw Pact claims is rough parity in manpower.

Since 1973, the West has presented many proposals to the Warsaw Pact. As of this date, no troop cuts have been made. On June 10, 1982, the President announced a new NATO initiative to seek common collective ceilings in the reductions area. The latest Western proposal calls for a single comprehensive agreement. Under that agreement, all direct participants, with major military formations in central Europe, would assume contractual obligations to undertake ground force reductions. These cuts in strength levels would continue to a common ceiling on each side of about 700,000 ground personnel and 900,000 ground and air force personnel combined. Reductions would be accomplished in four fully verifiable stages within 7 years. A detailed program of verification and inspection was appropriately included as a prerequisite to an agreement of this nature.

One of the critical points of disagreement between the parties is the large discrepancy between the two sides' figures on Eastern manpower. A difference in manpower can turn the tide in a conflict. Another factor is that Warsaw Pact divisions are equipped with more tanks and artillery than comparable Western units.

Quite properly, the West has insisted on a resolution of this troop data problem as the basis for an agreement on the size of reductions needed to reach parity. NATO has full confidence in Western force figures and continues to insist that an agreement be based on agreed data. It is widely known that the initial troop strength data submitted by the Warsaw Pact was contrived to understate the Warsaw Pact's actual troop levels. Although the West has offered several detailed proposals to resolve the discrepancy, the East has refused to budge.

The second area of difficulty is that the West believes that reductions be accompanied by thorough inspections and monitoring. These would help insure verification of, and future compliance with, the agreements. The Warsaw Pact has difficulties with many aspects of the verification process.

Considering the lack of good faith which the Pact has displayed on the troop strength levels, and the East's reluctance to accept the concept of permanent onsite inspection measures, I can understand why the West's efforts to bring about troop reductions have been unsuccessful. Let those who question NATO's intentions take a look at the record and at the facts.

It is the Soviets and their allies who should be charged with foot-dragging over arms control. Most importantly, when the Soviets have a military advantage, as they do in conventional troop and arms strength in central Europe, they are apt to prolong that advantage. That is why they have indeed frozen MBFR negotiations for more than a decade and why they prefer a freeze on strategic weapons today. They are the ones who have launched a new round of nuclear weapons deployments. They are the ones whose basic philosophy preaches world revolution and Communist domination, and they are the ones who made a mockery of the Helsinki accords.

I am certain that many of my colleagues in Congress will join me in saying that the Kremlin has little respect for agreements of any kind. Let the negotiator beware.●

LEADER OF YWCA

HON. RICHARD L. OTTINGER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 2, 1983

● Mr. OTTINGER. Mr. Speaker, I would like to take this opportunity to congratulate Gay Dickerson, executive director of the YWCA of White Plains and Central Westchester County, N.Y., on the occasion of her retirement.

Gay has made an immeasurable contribution to the work of the YWCA since becoming executive director in 1966. She presided over the Y's movement from a small house with a membership in the hundred's to a modern facility with a membership in the thousand's. In addition, the Y achieved broader representation throughout the county.

During Ms. Dickerson's tenure, the YWCA developed many valuable programs to aid various groups in need of special services. Handicapped people are able to lead full lives with the Y's swimming and social programs. Senior citizens find vital social contact in the summer weekend program. An outreach program helps disadvantaged young women, and a residence facility built in the early 1970's provides needed housing for 168 young women. Finally, to provide help urgently needed by today's women in the job market, the Y sponsors a VISTA counseling service, free of charge for those unable to pay.

Despite the financial crises which plague nonprofit organizations, especially in this time of recession, the YWCA has remained solvent, due in large part to the able leadership of Gay Dickerson. Ms. Dickerson's dedication to the vital work of the YWCA enabled the organization to carry out its programs smoothly and effectively, providing enormous benefits to the community. While her leadership will be sorely missed, the people of Westchester can rest assured that, thanks to Ms. Dickerson, the YWCA has a stable and secure future.●

THE UNITED STATES AND THE WORLD'S DEBT PROBLEM

HON. BOB LIVINGSTON

OF LOUISIANA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 2, 1983

● Mr. LIVINGSTON. Mr. Speaker, many of us are concerned about the pending proposal by the administration to increase the resources of the International Monetary Fund. In the course of my study of this most important issue, I have found several informative newspaper articles and columns, which I have inserted into the RECORD recently.

Today I would like to recommend to my colleagues and the American people an article written by Treasury Secretary Donald Regan, which addresses the major criticisms of the proposal. I believe that each of us would do well to carefully consider both his concise explanation of the international financial system and his persuasive answers to the specific questions that we receive from our constituents.

I appreciate President Reagan's concerted effort to bring this message to all of us, and I again recommend to all Secretary Regan's February 8, 1983, article in the Wall Street Journal, which follows:

THE UNITED STATES AND THE WORLD'S DEBT PROBLEM

(By Donald T. Regan)

International negotiations for an increase in the resources of the International Monetary Fund (IMF) are nearing completion and final decisions are expected at the Feb. 10-11 IMF Interim Committee meeting in Washington. The administration will soon send a request to Congress providing for the American share of that increase.

Why is it so important that those resources be increased? The answer lies in the importance to the U.S. economy of a sound world economy and financial system. The answer also lies in the central role of the IMF in resolving current economic problems.

The major strains in the international financial system which emerged in 1982 had their roots in the rising inflationary pressures in the late 1960s, the twin oil shocks of the 1970s, and policy responses that attempted to avoid adjustment to new economic realities. Many governments sought to maintain real incomes and employment in uncompetitive industries by subsidies rather than pursue policies to counter inflationary pressures and reallocate resources to reflect new competitive conditions. The results of these policies were higher inflation, slower real economic growth, and large balance of payments deficits and external financial requirements.

'WRENCHING DIFFICULTIES'

The bulk of the external financing was provided through private markets—largely commercial banks—and was heavily concentrated on the developing countries. During 1982, however, financial markets began to recognize that the inflationary environment of the 1970s was changing and that inflation expectations were undergoing a dramatic shift. Therefore, levels of debt which had previously been considered manageable are now viewed as high in real terms and large in the face of weak export prices and slow world economic growth.

The nature of these difficulties has been known for some time. In addressing the annual meeting of the World Bank and the IMF a year and a half ago, I said that, "The United States is deeply aware of the wrenching difficulties facing many of the countries . . ., and we are conscious of our responsibilities for shaping and supporting the efforts of the Fund and the World Bank."

But with our own country just beginning to come out of a serious recession, there is a very natural tendency to feel that "other nations' problems are other nations' problems." It is tempting to conclude: The countries with the big debts and the banks got themselves into this mess; let them get themselves out.

For the sake of discussion, what would happen if the U.S. did, in fact, adopt a "hand-off" attitude toward the international debt problems?

The American economy functions within an increasingly interdependent world economy. Exports of goods and services as a share of U.S. gross national product doubled between 1970 and 1979, accounting for about 12% of GNP. At present, roughly 20% of all goods produced in the U.S. and 40% of our agricultural production go into export. We no longer live—if we ever did—in a world where adversity in the economy of a foreign country will not impact on the United States.

This year, if lenders were to pull back sharply in the absence of any interest or action on the part of the major industrial countries, new lending could begin to dry up. Trade would consequently have to be reduced to match the new lower level of external financing. For the United States, growth would be about one percentage point less than we're expecting, and our trade deficit would grow very rapidly due to the loss of $12 billion or so in exports to the developing world. Lost jobs in vital export sectors would compound our recovery efforts.

And what if the debtor nations cannot service their debts? If interest payments to U.S. banks are more than 90 days late, the banks stop accruing them on their books, they suffer reduced profits and bear the costs of continued funding of the loan. Provisions may have to be made for loss, and as loans are actually written off, the capital of the bank is reduced. In that case the creditors banks' capital/asset ratios would shrink. American banks would then have to take measures to restore their capital/asset ratios. Banks would be forced to make fewer loans to all borrowers, domestic and foreign. Auto loans in Cincinnati, housing loans in Dallas, capital expansion loans in California—all would be affected.

And this phenomenon wouldn't be limited to us. Banks in Europe, Japan and elsewhere would be forced to curtail their own domestic lending.

The real goal here is to assure that those nations with large external debts adjust without resort to draconian measures that would create chaos for them and financial instability for everyone else.

Helping nations make that essential adjustment is part of the role of the IMF. The IMF was founded to promote a sound financial framework for the world economy and is at the center of international efforts to deal with current economic and financial problems. The resources of the IMF are available to provide temporary balance of payments financing in support of the efforts of members to restore their external positions to a sustainable basis. The economic policy conditions associated with use of IMF resources are designed to ensure that a country establishes the basis for sustainable domestic economic growth as well as a sustainable external payments position.

The IMF is indeed a fund—a revolving fund to which each member is obligated to provide its currency to the IMF to finance drawings by other countries facing balance of payments needs; each country in turn has a right to draw upon the IMF in case of balance of payments need. The U.S. subscription fo IMF resources has been used many times over the years. In turn the United States is the second largest user of the entire membership! The U.S. drew upon IMF resources 18 times in the 1960s, six times in the 1970s, most recently in 1978, for a total of about $6.5 billion.

The re-emegence of large balance of payments financing needs and growing debt problems has led to a sharp resurgence in requests for IMF financing and it is clear that the IMF's liquidity position will be under serious strain in the near future.

Based on a U.S. initiative, agreement has been reached in principle by the major industrialized nations to establish a contingency borrowing arrangement which could be used to deal with threats to the stability of the system. The existing General Arrangement to Borrow (GAB) in the IMF is being increased to about $19 billion. In addition we are also negotiating an increase in IMF quotas in the range of 40% to 50% which would bring the total quotas up to about $93 billion to $100 billion. The U.S. share of the increase, for both the GAB and quotas, would be $7.5 billion to $8.0 billion.

I have already had some discussions with members of Congress about the coming request for congressional authorization. Several serious and legitimate concerns have been raised.

First, we are asked: Why are we "bailing out the banks"? Didn't they make all those foreign loans with their eyes open? While it makes a snappy headline to say that the fund wants more money to "bail out the banks," the facts are otherwise. The IMF provides assistance to nations which have balance of payments difficulties. It doesn't loan to banks—big or small. It lends to nations—only. But by lending to nations, the IMF serves as a catalyst for continued private lending. In the past few years, for each $1 in IMF financing, the banks have provided roughly $4 in net new financing, Hardly a bailout.

SOUND WORLD ECONOMY NEEDED

The second concern often heard is: Why is the administration urging such a large expenditure of money when it is pushing so hard for a curtailment of domestic spending?

When the U.S. increases its commitment to the IMF, a "line of credit" is established which the fund may draw upon, if needed, in conjunction with commitments provided by other nations. As our line of credit is used, the U.S. receives a corresponding increase in liquid international monetary reserve assets which earn interest. Consequently, our increase in "quotas" doesn't affect budget outlays or the budget deficit, although transfers to and from the U.S. and the IMF affect Treasury borrowing requirements.

Finally, some have asked if we aren't throwing good money after bad unless the borrowing nations have economic growth which will provide the wherewithall to repay.

It is essential that the debtor nations move into a period of economic growth. But the soundness and prosperity of each of the national economies is inextricably linked. It isn't possible to get growth at home unless we have a sound world economy. We are supporting a system of interim funding during a period of transition where nations move away from a "borrowing binge" and onto a firm foundation of sound economic policy and stable growth. That is a difficult process. But the world economy simply must go through it.

It is crucially important to the debtor nations and to our economic interests—to U.S. economic activity, jobs, production and investment—that these problems be dealt with in a constructive and orderly way, and the United States cannot escape playing a leading role in that effort. An effective strategy is in place, and welcome progress is being made. But the strategy will not succeed unattended. The IMF is a central element of the solution, and it is essential that we and others act to assure that it has adequate resources to perform that central role.●

AMERICANISM ESSAY WINNERS

HON. WILLIAM LEHMAN

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 2, 1983

● Mr. LEHMAN of Florida. Mr. Speaker, I would like to bring to the attention of my colleagues the two prize-winning essays written by two students at Sabal Palm Elementary School in North Miami Beach, Fla.

The grand prize winner is Elaine Goldenberg of the sixth grade, and the runnerup is Gary Seligman, a fifth grader. This annual contest is important in getting our young people to reflect on what our great country has to offer, and I am pleased to have provided two flags to Sabal Palm Elementary School to be presented to the essay contest winners.

I extend my sincere congratulations to Elaine and Gary on their excellent essays.

Their prize-winning entries, written as letters to the President, follow:

SABAL PALM ELEMENTARY SCHOOL,
North Miami Beach, Fla.

DEAR MR. PRESIDENT: I love my country. I guess one reason I love it is because I was born here, and have lived here all my life. Everybody has a certain amount of patriotism.

There are other very good reasons, of course. America is, and always has been, a model democracy that the rest of the world follows. The initiative and ingenuity of its people have made our lives better. This country has courage and foresight.

America is the great melting pot. Many people from other countries have come here, forsaking their homeland for the promise of America whose streets are "paved with gold." Here they can be the person they want to be.

We have our faults, everyone does, but I wouldn't live anywhere else.

Sincerely yours,

ELAINE GOLDENBERG,
Grade 6, Mrs. Sherg's class.

SABAL PALM ELEMENTARY SCHOOL,
North Miami Beach, Fla.,
February 2, 1983.

DEAR MR. PRESIDENT: I love my country because I can do things I couldn't do in other countries, like speak out against our government, give my views and opinions, and various other things.

Through the 206-year history of our country, we have fought wars, passed laws, and established organizations to protect our freedom.

Freedom and equality are what this country thrives on. They are also essentials in every person's life—America is one of only a few countries where your rights demand your freedom to do and say what you think is right.

Probably in the near future we will have to fight for our freedom, but if we band together and carry out our duties as good citizens, we will not need to fear!

Sincerely,

GARY SELIGMAN,
Grade 5, Mr. Monday's class.●

THE NEW AMERICAN GOLD COINS

HON. RON PAUL

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 2, 1983

● Mr. PAUL. Mr. Speaker, when it delivered its report to the Congress, the U.S. Gold Commission recommended that Congress enact legislation to resume the minting of gold coins, which ended in 1933. The Commission wrote:

We favor Treasury issue of gold bullion coins of specified weights, and without dollar denomination or legal tender status, to be manufactured from its existing stock of gold and to be sold at a small mark-up over the market value of the gold content, and recommend that the coins shall be exempt from capital gains taxes and that the coins shall be exempt from sales taxes.

I have introduced the "American Eagle Gold Coin Act of 1983," H.R. 1663, which provides for the minting of two coins bearing the same design, but each containing a different weight of gold: One ounce and one-half ounce.

The coins would be denominated by weight only, just as the first American gold coins were. The first U.S. gold coin, the $5 half eagle, bore no dollar denomination from 1795 to 1806. The early $10 eagles carried no dollar denominations until 1838. The new American Gold Eagles would wisely continue this same practice.

The design of the new American Eagle would be the figure of "Walking Liberty" from the 1908 St. Gaudens' double eagle on the obverse, and on the reverse, the heraldic eagle of the Great Seal of the United States.

As official coins of the United States, the new American Eagles would not be sold as the gold medallions minted under the American Arts Medallions Act are, but exchanged for other official currencies of the United States through the banking system. Just as with Federal Reserve notes and the present clad coinage, there would be no tax imposed on the exchange of such coins. The new gold coins would be acceptable in the settlement of private debts, just like any other official money, but unlike other moneys, the coins would not be acceptable in payment of any Federal taxes, duties, or dues.

The coins could be minted from the Treasury's own stock of gold, up to a maximum of 10 million ounces, and any owner of gold bullion or foreign gold coins would be able to deliver them to a mint of the United States and receive in exchange an equal weight of American Eagles.

Under Article I, section 8 of the Constitution, the Congress is given power "to coin money." The meaning of this phrase is clear, but Congress has been ignoring it for the past 70 years, ever since it delegated power to the Federal Reserve System to print money and create credit ex nihilo. For those 70 years we have had the worst depression, inflations, unemployment, recessions, bankruptcy, and interest rates in our history. Nothing we suffered with an imperfect gold standard during the 19th century can compare to the damage our economy has sustained under the management of the Federal Reserve.

The authors of the Constitution wrote article 1, section 8 precisely for the purpose of outlawing the type of monetary system we now have.

When the Founding Fathers wrote the Constitution in the summer of 1787, they had fresh in their minds the debacle of the paper money printed and issued by the Continental Congress during the Revolutionary War. The paper notes, "Continentals" as they were called, eventually fell to virtually zero percent of their original value because they were not redeemable in either silver or gold. They were "greenbacks," and were the first of three major experiments with "greenbacks" that this Nation has conducted. The Continental greenback failed miserably, giving rise to the popular phrase "not worth a Continental."

Consequently, when the Constitutional Convention met in 1787, the opposition to paper money was strong. George Mason, a delegate from Virginia, stated that he had a "mortal hatred to paper money." Delegate Oliver Ellsworth from Connecticut thought the Convention "a favorable moment to shut and bar the door against paper money." James Wilson, a delegate from Pennsylvania, argued that "It will have a more salutary influence on the credit of the United

States to remove the possibility of paper money." Delegate Pierce Butler from South Carolina pointed out that paper was not a legal tender in any country of Europe and that it ought not be made one in the United States. Mr. John Langdon of New Hampshire said that he would rather reject the whole Constitution than allow the Federal Government the power to issue paper money. On the final vote on the issue, nine States opposed granting the Federal Government power to issue paper money, and only two favored granting such power.

The framers of the Constitution made their intention clear by the use of the word "coin" rather than the word "print," or the phrase "emit bills of credit." Thomas M. Cooley's "Principles of Constitutional Law" elaborates on this point:

To coin money is to stamp pieces of metal for use as a medium of exchange in commerce according to fixed standards of value.

In his explanation of the constitutional provisions on money, James Madison, in Federalist No. 44, referred to the

Pestilent effects of paper money on the necessary confidence between man and man, on the necessary confidence in the public councils, on the industry and morals of the people, and on the character of republican government.

His intention, and the intention of the other Founders, was to avoid precisely the sort of paper money system that has prevailed for the past 10 years.

This intention was well understood throughout the 19th century, and was denied only when the Supreme Court found it expedient to do so. For example, Daniel Webster wrote:

If we understand, by currency, the legal money of the country, and that which constitutes a lawful tender for debts, and is the statute measure of value, then undoubtedly, nothing is included but gold and silver. Most unquestionably, *there is no legal tender, and there can be no legal tender in this country under the authority of this government or any other, but gold and silver,* either the coinage of our mints or foreign coins at rates regulated by Congress. *This is a constitutional principles, perfectly plain and of the very highest importance.* The states are expressly prohibited from making anything but gold and silver a tender in payment of debts, and although no such expressed prohibition is appplied to Congress, yet as Congress has no power granted to it in this respect but to coin money and to regulate the value of foreign coins, *it clearly has no power to substitute paper or anything else* for coin as a tender in payment of debts in a discharge of contracts. . .

The legal tender, therefore, the constitutional standard of value, is established and cannot be overthrown. *To overthrow it would shake the whole system.* (Emphasis added.)

In 1832, the Select Committee on Coins of the House of Representatives reported to the Congress that:

The enlightened founders of our Constitution obviously contemplated that our currency should be composed of gold and silver coin . . . . The obvious intent and meaning of these special grants and restrictions [in the Constitution] was to secure permanently to the people of the United States a gold or silver currency, and to delegate to Congress every necessary authority to accomplish or perpetuate that beneficial institution.

The select committee states its conclusion that:

The losses and deprivation inflicted by experiments with paper currency, especially during the Revolution; the knowledge that similar attempts in other countries . . . were equally delusive, unsuccessful, and injurious; had likely produced the conviction [in the minds of the framers of the Constitution] that gold and silver alone could be relied upon as safe and effective money.

Twelve years later, in 1844, the House Committee of Ways and Means concluded that:

The framers of the Constitution intended to avoid the paper money system. Especially did they intend to prevent Government paper from circulating as money, as had been practiced during the Revolutionary War. The mischiefs of the various expedients that had been made were fresh in the public mind, and were said to have disgusted the respectable part of America . . . The framers [of the Constitution] . . . designed to prevent the adoption of the paper system under any pretext or for any purpose whatsoever; and if it had not been supposed that such object was effectively secured, in all probability the rejection of the Constitution might have followed.

Later in the century, Justice Stephen Field presciently wrote in the case *Julliard* against *Greenman* (1884):

There have been times within the memory of all of us when the legal tender notes of the United States were not exchangeable for more than half of the nominal value. The possibility of such depreciation will always attend paper money. This inborn infirmity, no mere legislative declaration can cure. If Congress has the power to make the [paper] notes legal tender and to pass as money or its equivalent why should not a sufficient amount be issued to pay the bonds of the United States as they mature? Why pay interest on the millions of dollars of bonds now due when Congress can in one day make the money to pay the principal; and why should there be any restraint upon unlimited appropriations by the government for all imaginary schemes of public improvement if the printing press can furnish the money that is needed for them?

Justice Field foresaw exactly what would happen in the 20th century when the Federal Government has used the printing press—and the computer—as the means of financing all sorts of "imaginary schemes of public improvement."

Under the Constitution, Congress has power to coin money, not print money substitutes. Such money is to be gold and silver coin, nothing else. It is significant that this power of coining money is mentioned in the same sentence in the Constitution as the power to "fix the standards of weights and measures," for the framers regarded money as a weight of metal and a measure of value. Roger Sherman, a delegate to the Constitutional Convention, wrote that:

If what is used as a medium of exchange is fluctuation in its value, it is no better than unjust weights and measures . . . which are condemned by the Laws of God and man . . .

For decades now, but especially for the past 10 years, we have had a medium of exchange, the Federal Reserve note, which is "fluctuating in its value" and therefore "no better than unjust weights and measures * * * which are condemned by the Laws of God and man." With the issuance of new gold coins by the Treasury, the Federal Reserve's monopoly on money will be challenged. H.R. 1663 represents a major step toward the eventual replacement of our present irredeemable paper money system with a gold based system.

NO JUSTIFICATION FOR NATURAL GAS DEREGULATION

HON. JOHN P. MURTHA

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 2, 1983

● Mr. MURTHA. Mr. Speaker, the Reagan administration is trying to add billions of dollars to consumers' home heating bills, and I say their efforts should be rejected firmly and strongly by Congress.

The natural gas deregulation plan sent to Capitol Hill this week would mean the following:

First. The home heating bill of every natural gas consumer would take a strong jump upward; probably stronger than the extra $13 to $20 billion the Northeast-Midwest Coalition estimates homeowners had to pay this winter because of back-door deregulation attempts;

Second. More businesses will be strapped by high energy costs, a factor that is forcing many industries in the Northeast and Midwest to shut down, and that resulted in a coalition estimate in some 300,000 jobs lost this winter;

Third. A major drag will be added to economic recovery; high energy prices helped produce this recession, now that prices are beginning to moderate and some recovery is in evidence, it is no time to head in the opposite direction; and

Fourth. At the very time when we have near record high unemployment throughout the country, this plan would take extra money out of the pocket of unemployed families. At my office hours, I meet each week with individuals who must make a choice between eating or heating the house. That whole situation is unacceptable, and would be made more so with this deregulation.

The 1978 legislation was carefully crafted to preserve a balance between the need to increase prices to lessen a natural gas shortage, plus protection for the consumer. Where changes are now necessary in the law, let us make them in the same spirit. I am not saying the law cannot be improved to benefit all parties, I am saying that deregulation will not benefit all groups, and that is not the way to go.

In Pennsylvania, in 1981, some 26,035 consumers had their natural gas service terminated because of an inability to pay their bills; from 1978 to 1981, the average statewide residential natural gas bill rose from $264 to $600; thus while a typical Pennsylvanian's income rose only 30 percent in the last 4 years, the cost of his natural gas bill was rising 127 percent. And all those figures were before the increase of this winter.

To raise prices drastically higher by deregulation in the face of those numbers is sheer folly. Deregulation deserves to be rejected. The consumer and the unemployed deserve to be protected. The public deserves the protection that only Congress can provide by rejecting natural gas deregulation. Rejection of this plan is a goal I will be working for very strongly.●

PERSONAL EXPLANATION

HON. RICK BOUCHER

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 2, 1983

● Mr. BOUCHER. Mr. Speaker, I regret that, because of a long-scheduled speaking engagement in my district, I was unavoidably absent during two rollcall votes concerning the Emergency Mathematics and Science Education Act. Had I been present, I would have voted for House Resolution 109, the rule providing for consideration of H.R. 1310, and I would have voted against the amendment offered by Mr. SENSENBRENNER striking the national teaching scholarship program.●

UNITED STATES LOSING GROUND IN COMPUTER EDUCATION

HON. GEORGE E. BROWN, JR.

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 2, 1983

● Mr. BROWN of California. Mr. Speaker, as addressed in H.R. 1310, the Emergency Math and Science Education Act, it is imperative that the Federal Government make a firm commitment to support math and science education. By failing to graduate enough students with advanced computer capabilities, the United States may lose its world lead in computer technology. The following Wall Street Journal article, January 14, 1983, illustrates how the Federal Government must act promptly to bring our schools into the so-called Information Age.

The article follows:

UNIVERSITIES IN UNITED STATES ARE LOSING GROUND IN COMPUTER EDUCATION

(By Carolyn Phillips)

URBANA, ILL.—It hadn't seemed like an impossible dream. After two years at Eastern Illinos University in Charleston, David Gerdes decided to transfer to the University of Illinois here to study computer engineering. He had the science and math courses that the University of Illinois requires for admission. He had good grades from Eastern—almost a B average. He has A's in all his computer-programming classes.

But with qualifications considerably better than average, 20-year-old Mr. Gerdes can't get into computer engineering at Illinois. There isn't room.

Even though overall enrollment is dwindling; U.S. colleges and universities can't accommodate the hordes who want computer education. Good students are denied admission as many schools cap enrollments at levels that already strain teaching staffs and overtax facilities. In fact, some educators say that to guarantee quality instruction, they would have to reduce current enrollments in computer courses by 25%. Meanwhile, employers lament that only 50,000 graduates were available last year to fill more than 115,000 computer-related jobs.

"This country could blow what is a terrific lead in computer technology by failing to graduate enough people with the capability to maintain it," warns Robert G. Gillespie, the vice provost for computing at the University of Washington in Seattle. But without money to augment inadequate facilities and increase staff sizes and salaries, recession-whipped schools will continue to produce insufficient numbers of computer-trained graduates and will fail to effectively introduce the computer as a learning tool in nonquantitative disciplines.

AWKWARD CHOICES

The conditions force would-be students of computer sciences or computer engineering to make some awkward choices. Mr. Gerdes, for instance, is enrolled in the college of arts and sciences at Illinois and is trying to raise his 3.9 grade-point average to 4.2, the current cutoff on the five-point scale for the admission of transfer students into the engineering program. James N. Snyder, the head of computer science at Illinois, calls 4.2 "ridiculously high" as an entrance requirement. The required grade for general admission to Illinois is 3.25.

Mr. Gerdes's chances for admission to engineering at Illinois "are probably diminishing instead of increasing," says Gary R. Engelgau, the director of admissions and records. By the time Mr. Gerdes attains a 4.2, if he ever does, the cutoff point could be pushed higher, as thousands more students continue to compete for the limited number of places. "You have to be a genius to get in," says Mr. Gerdes.

Life on the inside makes other demands—including patience. During peak periods, as at many institutions, students wait hours to use a computer terminal for sometimes just a few minutes. They also stand in long lines to talk to a professor or a teaching assistant about computer assignments. One of the biggest computer-education headaches is that classes fill up so fast students can't always get into the courses they need to graduate; as a result, a traditional four-year term often takes an extra term or two for some students to complete.

Teaching overcrowded classes is no more fun than taking them. "Clearly, the ideal situation would be for me to have two students come to my office and have tea or sherry and talk things over," says C. L. Liu, a professor of computer science at Illinois. Instead of tea for two, Mr. Liu has 200 to teach. He does concede, however, that such a large group isn't necessarily a bad thing. "I think I am able to have some dialogue with large classes. I prepare better for them. I psych up a lot more, and I'm more animated."

WATERED-DOWN EDUCATION

Mark Ardis, an assistant professor at Illinois, taught 18 students in a software-engineering course the first time the class was offered a few semesters ago. The second time the course was offered, 42 students took it. Mr. Ardis recently saw registration figures for the third offering of the class—126 students signed up. "There isn't much change in my presentation of material, whether I'm talking to 10 or 120," Mr. Ardis says. "What changes is the work done by the students. With a smaller group, I assign work I will look at and take an active role in grading. But with so many students, I will now give out assignments that only graduate teaching assistants will see." He adds: "I think you water down the education when enrollment goes up."

The Accreditation Board for Engineering and Technology thinks so, too; it granted 31 percent fewer six-year accreditations this school year than last to academic programs in engineering. The board looks at a number of factors—faculty, laboratory facilities, financing and others—in determining whether a program is accredited for six years, three years or not at all.

The University of Illinois has maintained accreditation for its engineering programs. "But we do see a deterioration in quality in a general sense," says Edward Ernst, the school's associate head of electrical engineering. "Faculty overload is the big problem. But we also aren't able to keep up with the equipment we need for general instruction in engineering, especially in the computer areas. It's a matter of having twice the number of students with no additional resources."

Throughout the country, educators marvel at how quickly student use of computer facilities expands to fill available capacity. "It's like the Santa Monica Freeway—expected to handle traffic for 20 years and overrun in one," says Joel Moses, the head of electrical engineering and computer science at Massachusetts Institute of Technology. Robert Knight, the manager of Stanford University's LOTS (low-overhead time-sharing) computer facility, says, "You'd probably be hard pressed to find a school that is keeping up with student demand for computing capacity. To meet that demand you'd have to spend extraordinary sums of money."

Extraordinary sums of money are being spent on university computer use—$1.3 billion a year, from the most recent estimates. "But more than half of that is for administrative purposes, not instruction or research," says Mr. Gillespie at the University of Washington. The amount spent on academic computer work translates into about $20 per student per year, only one-third the

$60 per student that was recommended in a 1967 report by the president's Science Advisory Council.

Even at the best schools, under-investment in computers for instruction results in penny-pinching compromise. At Stanford, Mr. Knight says, "We're probably a little bit behind the times in terms of whiz-bang hardware," because the computer facility there just bought a second machine identical to the model it bought in 1976. Sticking with the same machines meant the facility could use the same software and staff—two areas where costs are much higher than hardware costs. Although the purchase doubled the capacity of Stanford's LOTS facility, Stanford's vice provost Gerald Lieberman says student use increased accordingly. Mr. Lieberman projects LOTS will have to double capacity again—adding two more machines—in three years, if not sooner.

Most schools tolerate a certain degree of antiquation in the machines they use in general computer-center facilities, citing capacity as the more important concern. (Specific academic departments may buy more modern machines for exclusive research or academic use.) But many schools question whether the limited capabilities of yesteryear's computers are adequate, even for instruction. "We have to give students a sense of what the field is like today, not what it was like 10 years ago," says Kenneth W. Kennedy Jr., professor mathematical sciences at Rice University in Houston.

Providing sheer capacity (enough terminals, enough computer power) constitutes challenge enough for computer-center staffs as they serve the needs of traditional student users—business, science and engineering majors for whom the computer is often the subject of study. But many blanch at the thought of having to provide adequate facilities for all other students, too—students in literature, theater, history, religion, sociology and other disciplines who could use the computer, not for manipulating numbers, but for processing information. Educators see that as the next crest, an innovation in education termed a revolution by some. "But unless something changes drastically, the nation's best universities won't take part in this revolution," says Douglas Van Houweling, the vice provost for computing and planning at Carnegie-Mellon University in Pittsburgh.

Still, the most pressing problem in computer education is not machine obsolescence or lack of capacity or under-use of computers in nontraditional areas. The toughest problem remains the computer manpower shortage. Because of the short supply, industry offers high salaries that entice students with two-year, four-year or master's degrees into the workplace. So few students continue for the doctoral degree that the pool of people qualified to teach computer courses is drying up.

An American Association of Engineering Societies survey shows that computer-science and computer-engineering departments report a 17 percent vacancy rate—at a time when the 9 percent vacancy of engineering-faculty positions is considered a crisis. Jack Geils, a project director at the association, says that almost two-thirds of the vacancies in the computer-related departments date from a year ago or longer. Mr. Ernst of the University of Illinois adds: "More money alone to hire more faculty in computer science wouldn't help. We can't find anybody."

SALARY DISPARITY

Only about 250 people a year complete doctoral degrees in computer sciences, and that number has been decreasing 6 percent to 8 percent annually, says John Hamblen, a University of Missouri professor on leave to the National Bureau of Standards. In the competition for those graduates, universities lose the salary bid. "A person with a two-year degree can get a programming job for $20,000 to $22,000 a year in industry," estimates Andrew Molnar, a project director at the National Science Foundation. "A person with an eight-year Ph.D. might make $20,000 to $21,000 a year as an assistant professor."

The drawing card that universities once had—an ambiance conducive to scholarly thinking and research—is deteriorating in computer disciplines. Illinois assistant professor Mark Ardis says, "It's hard to stay at a university when there are offers from industry at two or three times your salary and better research equipment, too. And besides teaching and trying to do research here, I advise about 85 students. For the first few weeks of the semester, there is a student outside my door every minute of the day. No one gives tenure for advising students." Mr. Kennedy at Rice warns, "You can't let faculty get buried or they will leave."

Aware that it has been eating its own seed corn, industry has moved to remedy part of the manpower problem in colleges and universities. The American Electronics Association and some of its members—most notably Hewlett-Packard Co. of Palo Alto, Calif.—have developed a fellowship program designed not only to increase the number of doctoral students in computer sciences and electrical engineering but also to encourage the students to take teaching jobs after graduation. (The program waives part of the cost of a doctorate if the graduate takes a university faculty position after receiving a degree and waives the whole cost if the position is held more than three years.)

"We know if we don't make an investment in the development of engineers, then we won't have an industry, at least not one that's competitive internationally," says Patricia Hill Hubbard, president of the American Electronics Association's Electronics Education Foundation. She adds: "We also know that we're already late. We should have been doing this five or six years age."

FELLOWSHIP PROGRAMS

A number of companies—Xerox, Standard Oil of Indiana, Control Data and others—have introduced fellowship programs, faculty research programs, equipment grants and other means of helping higher education train high-technology workers. Many schools are watching closely a joint venture between International Business Machines Co. and Carnegie-Mellon that will result in each student and staff member at the institution having a computer work station.

Colleges and universities are also beginning to see the necessity of increased support of computer education from within. "They see that a good computing facility is similar to a library. It's something without which a university can't exist," says John G. Kemeny, a professor of mathematics and former president at Dartmouth College in Hanover, N.H. The University of California system attacked the faculty-salary problem directly by raising engineering, business- and management-faculty salaries across the board: 20% for assistant professors, 10% for associate professors and 5% for full professors.

In time, predicts John Hamblen of Missouri, the manpower shortage will work itself out—to a certain extent. he believes that as industry is saturated with two-year-degree holders—as is happening now—more students will go on for the four-year degree. He worries, however, that the process won't correct the doctorate shortage for a long while.

But Mr. Gillespie at the University of Washington questions whether colleges and universities, even with industry help and the factor of time will effectively absorb changes the computer is bringing to education, without some sort of national agenda. "The computer affects the foundations of American education in a way that means we should reexamine how we provide that education." Mr. Gillespie says. "We're floundering right now because there's a need for the federal government to provide resources and information policies. That lack of direction on a national level has us standing at the edge of a cliff."●

LEGISLATION TO GIVE FEDERAL RETIREES A CHANCE TO ELECT OR CHANGE SURVIVOR BENEFITS

HON. WILLIAM LEHMAN

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 2, 1983

● Mr. LEHMAN. Mr. Speaker, last Congress, I introduced legislation to give a second chance to Federal retirees who did not elect survivor benefits at the time of their retirement. I also sponsored a bill to give Federal retirees, who elected survivor benefits, a 1-year opportunity to modify their election. The response that our office received to both of these bills was very positive. I am, therefore, today reintroducing comprehensive new legislation which provides for both of these changes.

Under current law, a Federal employee must make his survivor benefit decision at the time of retirement, or if not married at that time, must decide if he or she wants survivor benefits within 1-year from the date of a marriage that occurs after retirement. My legislation would give those Federal retirees, who did not elect survivor benefits, a year from the date of the bill's enactment or date of retirement to elect a survivor benefit. This bill provides for the repayment of the necessary funds to the Federal Government.

Our office has also received correspondence from many retirees who elected survivor benefits in accordance with current law, but whose financial situation has changed. These retirees are no longer satisfied with the survivor benefit decisions that in most cases were made many years ago, and they are now very worried about the security of their loved ones. My bill would give these Federal retirees a single 1 year opportunity to increase, but not to revoke or lower, their survivor benefits.

In order to guarantee that Federal employees and retirees would be in-

formed of these changes, the bill stipulates that the Office of Personnel Management would have to notify all affected employees and retirees of these changes.

During this time of increasing financial pressure on our Federal retirees, passage of this legislation would, with little cost to our Government, give us an opportunity to help our deserving retirees. There is widespread interest in and support for this legislation among our Federal retirees, and I am hopeful that Congress will consider and pass this legislation during the 98th Congress.●

THE DEMOCRATS LEARN A NEW LANGUAGE

HON. ROBERT H. MICHEL

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 2, 1983

● Mr. MICHEL. Mr. Speaker, it would seem that the Democratic Party is taking language lessons and learning—however falteringly—to speak the political language of Ronald Reagan. That, at least, seems to be the substance of a report in the Christian Science Monitor. We have prominent Democrats saying things like:

> If you don't make the pie bigger, nobody's going to have a piece . . . we can't go back to the Great Society approach . . . we've got to grow ourselves out of unemployment . . . we (the Democrats) made too many bargains with interest groups . . .

It sounds almost like one of candidate Ronald Reagan's campaign speeches back in 1980. Republicans had better beware. The Democrats may at last have awakened to the fact that their kind of politics and economics needs what one prominent Democrat calls the Reagan rhetoric.

At this time I wish to insert in the RECORD, "Return of Old Democratic Wisdom—in Modified Form" from the Christian Science Monitor, Tuesday, February 22, 1983.

[From the Christian Science Monitor, Feb. 22, 1983]

RETURN OF OLD DEMOCRATIC WISDOM—IN MODIFIED FORM—NEW AGENDA: CREATE JOBS, CONTROL BENEFITS SPENDING, SPUR INVESTMENT

(By Julia Malone)

WASHINGTON.—If a favorite tie or dress goes out of style, hold on to it, the saying goes. Eventually the fashion will come back.

And so it appears with the Democratic Party, which only two years ago was wringing its hands over a disastrous loss of both the White House and the Senate. Democratic ideas, many of which dated from the New Deal, suddenly looked dowdy.

But already Democrats have pulled their old ideas out of the closet again. The party made a comeback during last fall's election with its most traditional themes, social security and jobs. Now it's claiming a victory in persuading President Reagan, the man who trounced them in 1980, to back a federal jobs bill that has a decidedly Democratic look.

In more than a dozen interviews with House and Senate members and officials of two "think tanks" formed to revitalize the party, Democrats conveyed a new mood of self-confidence.

At President Reagan's midterm, many Democrats on Capitol Hill are still reexamining their party's basic tenets and trying to devise new solutions to the nation's economic problems. But for others, the past two years of recession have served mainly to prove that Democrats were right in the first place.

"In 1981 the feeling was one of despair, a feeling that we really had to change everything around," says Rep. James M. Shannon of Massachusetts. "That's past."

The "search for new ideas" in the party has been oversold, he adds. "It's been approached as if it's a treasure hunt where you say, 'Eureka! Here it is.' That's not going to happen."

"We wasted an awful lot of time waiting for lightning to strike," says Sen. Christopher J. Dodd of Connecticut of the idea search. He argues that Democratic ideas are more successful today, but not because Democrats have changed. "The hard facts of life have settled in at the White House," he says. "So Democratic ideas are beginning to emerge draped in Reagan rhetoric."

The freshman Connecticut senator sees one benefit from the two years of questioning the party's values. "Maybe if we hadn't gone through that, maybe we would not have come to realize that some of those principles are good," he says. "Finally we realize that government must play a role in the economic life and social fabric of the nation."

But the experience of the last two years has not left Democrats where it found them. An effort to redefine the party is still under way. "It has started to catch on," says a Democratic staffer. "It's not going to dominate the party in the next two years. But it's where the party is going."

The new direction is away from the "politics of redistribution" of the wealth, established by President Lyndon B. Johnson's Great Society, and toward investment in economic growth and opportunity, says the staffer. He echoes a sizeable minority on Capitol Hill.

That movement will soon be overshadowed by Democratic candidates for president, who will be dominating the political arena by next summer. But it will have some effect even in presidential politics, since one candidate, Colorado Sen. Gary Hart, has been among the congressional Democrats seeking a new direction for the party.

"There's a new agenda for Democrats," holds Ted Van Dyk, president of the Center for National Policy, one of the think tanks set up in 1981 to invigorate the party. He lists as top priority control of the federal government benefits, including social security, as well as "stable" military growth, a tax policy "that stimulates growth and investment" in the private sector, and better government-labor-business cooperation.

As an adviser to Vice-President Hubert H. Humphrey, Mr. Van Dyk witnessed the birth of the Great Society, which once dominated the Democratic agenda. "It used to be based on an ever-growing American pie, LBJ's 'endless cornucopia,'" he says. "All you had to do is have a good idea and there would be enough money to pay for it."

"LBJ candidly told us, "We'll make small beginnings, but nobody will ever turn these [federal benefit programs] back,'" recalls Van Dyk.

"We found we made too many bargains with interest groups," he says. Now that the cornucopia has been depleted, he suggests that Democrats want to control the growth of entitlements, such as social security and medical payments, which go to the middle- and upper-income persons as well as to the poor.

"I think there is a consensus," he says. "It takes the Democrats to address entitlements, as it took Nixon to go to China."

Summing up the past decade of party differences, Rep. Paul Simon of Illinois, author of "The Once and Future Democrats," concedes the need for change. "There was a tendency for Republicans to say, 'We've got to work on making the pie bigger.' And for Democrats to say, 'We've got to distribute the pieces of pie equitably.'"

"The Republicans forgot the equitable side," he says, so that even though General Motors Corporation won tax incentives, the company didn't expand, because "if there's no demand for cars, GM doesn't do that."

As for the Democrats, "We have paid a great deal of attention to equity, but we forgot that if you don't talk about making the pie bigger, ultimately nobody is going to have a piece of that pie."

One of the chief proponents of making the economic "pie" grow, Rep. Timothy E. Wirth of Colorado, maintains he sees a "fundamental change among new [Democratic] members" of Congress. Mr. Wirth, a leader of the group nicknamed the "Atari Democrats" (after the manufacturer of computer games), is trying to push the party to look ahead and develop new industry with new technologies.

The Colorado lawmaker led a task force on economic policy for the Democratic caucus in the House that issued a set of proposals last year for long-term economic reforms.

With continuing high unemployment, Wirth concedes, the focus is now on the immediate problems. "When you're in the midst of a very deep recession, what do you do?" He says. "You focus on the people who are hungry, who are running out of employment benefits, or whose health-care benefits are gone. That's just fundamentally Democratic that those things have to be done."

But Wirth moves quickly to the long-range view. "On the second level, we've got to grow ourselves out of unemployment." He cites the need for new jobs for young workers entering the market, adding, "In the meantime, we need to try and get focused on retraining for displaced workers, recognizing first that great numbers of them are just not going to go back to their jobs."

He sees hope in new technologies, which he says go beyond electronics to include better ways to burn coal, new ways to make ceramics, and biotechnology.

"Even in a time of recession . . . there are investments we have to make for ourselves and the future of our country," he says. "We can't sit still." He says he hopes to convince the House Budget Committee, of which he is a member, to add federal money for research, for equipment for university laboratories, and for paying more to develop science, math, and engineering university faculty.

Such ideas have brought some criticism, especially from labor unions. "There's a tension between the pro-efficiency and [pro-] productivity" Democrats and those who are

"pro-equity," says Rep. Barney Frank of Massachusetts. Several Democrats say they worry that the new "efficiency" Democrats might be ignoring the traditional allies of the party in urban centers, including the elderly, minorities, and labor.

"People are always threatened by change," says Wirth, although he concedes, "We may be a little too far out front."

"I think what Tim [Wirth] is trying to do is provide some intellectual direction," says Rep. Vic Fazio of California, a new Democrat on the House Budget Committee. "In the long run, we're going to have to have new industry. We have to give the country hope that we have alternatives to providing for these people with public funds."

Newly elected Democrat Sen. Frank Lautenberg of New Jersey goes even further. "Unless there is some kind of new initiative, Democrats run the risk of not being able to capture the roses in '84 because there are obvious signs of recovery," he says. "So unless there are some new ideas and new initiatives, it's possible there will be a change in sentiment in favor of the President."

A self-made millionaire and son of immigrant parents, Senator Lautenberg built up a huge computer business before going into politics. He has been arguing for years that Democrats need more of a business perspective.

Despite his electronics background, he says he disagrees that "high technology is the salvation for all of our economic sins." His argument is that no matter what the industry, "Unless you have a profitable business environment, we're not going to have the jobs."

Sen. Max Baucus of Montana sounds a similar theme. "Democrats realize that if we're going to solve our economic difficulties, we can't go back to the Great Society approach," he says, noting that members of his party are spending "more time listening to the problems of businessmen."

One of those listeners, Sen. George J. Mitchell of Maine, says he has been visiting manufacturers in his state who tell him low demand for products keeps them from growing. "I think our plans should be growth-oriented," he says.

So far, there are many proposals, but no actual Democratic plan, and some say there never will be, at least until the party is united under a Democratic president. But after the rethinking of the past two years, Sen. David Pryor of Arkansas says the party has emerged "tougher, leaner," and more "fiscally responsible."

"It made us assess ourselves so that we do not repeat our past mistakes," he says.●

REMEMBERING YURI ORLOV

HON. BOB CARR

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 2, 1983

● Mr. CARR. Mr. Speaker, in 1975, the Government of the U.S.S.R. agreed to the Helsinki Final Act, which committed the signatories to abide by human rights standards. Yuri Orlov, a Soviet research physicist, created the first "Helsinki Watch" group, to monitor his government's compliance with the Helsinki accords. On February 10, 1977, Yuri Orlov was arrested and sentenced to a 7-year sentence.

To commemorate the sixth anniversary of Yuri Orlov's arrest, John B. Oakes wrote the enclosed editorial which appeared in the New York Times. Mr. Oakes is a member of the U.S. Helsinki Watch, a group of concerned American citizens who monitor compliance with the Helsinki accords and support Helsinki monitors in Eastern Europe.

I would like to take this opportunity to commend the editorial to my colleagues in the Congress, and urge you to contact the Embassy of the U.S.S.R. on Yuri Orlov's behalf. In the words of Mr. Oakes:

* * * the Soviet Union must somehow realize that, much as it would like to forget him, he and his colleagues are not forgotten by the civilized world.

[From the New York Times, Feb. 10, 1983]

ORLOV'S CRIME

(By John B. Oakes)

(John B. Oakes, a member of the U.S. Citizens' Committee To Monitor the Helsinki Accords (Helsinki Watch), is the former Senior Editor of the New York Times.)

The letter is not out of Kafka's imagination, or Arthur Koestler's. It was written in Moscow on Jan. 8, 1983. It comes from Orlov's wife.

"Yura's situation is terrible," it begins. "Yura is completely deprived of correspondence rights. The last two letters from him were dated Oct. 18.

"At the beginning of December, I sent an inquiry [to the Perm labor camp administration]: 'Inform me of the reason for the absence of letters from my husband Orlov for the month of November.' Answer: 'The quota of letters for the month of November has been entirely used up.' I wrote again: 'The letters have not been received by me. Inform me as to what address the letters for November were sent.' Answer: 'The administration does not give out information concerning the questions submitted.' I wrote again. 'Why have there been no letters for December?' No answer. I discovered an anonymous letter in my mailbox: 'Your husband is located in Perm Prison' [as distinct from the labor camp].

"Something is going on, but what? I get a feeling of terrible, terrible defenselessness—you can't do anything to help a person who is perishing, who is being annihilated, not allowed to write, deprived of his visits, kept in cold and hunger. The uncertainty is just torture.

"He was forced to perform unbearably hard labor: knitting metal netting by hand. This work is usually done on automatic machines. They have prepared reprisals against him in spite of his health. The criminal Tarasenko, who has already murdered two people, has threatened Orlov that he would cut off his nose and ears.

"If there is yet another prison sentence, Yuri will never get out of there. This year will be the most difficult and decisive. The regime is taking a path of increased brutality. I am at my wit's end; I don't know what to do."

Who is Orlov? What was his crime?

On Feb. 10, 1977, a half-dozen uniformed agents burst into a Moscow apartment and placed a brilliant 52-year-old research physicist named Yuri F. Orlov under arrest.

Since then, Orlov has never been free: 15 months in a Moscow jail awaiting trial; then in a "strict regime" labor camp on the border of Siberia, where he is now nearing the end of his seven-year term, nearly half of it in special-punishment cells where the routine is even harsher than in the camp. Due for release next year (unless, as now seems likely, his sentence is prolonged), he still is condemned to an additional five years in internal exile.

Orlov's alleged crime? "Anti-Soviet agitation and propaganda."

Orlov's real crime? Belief in the word of his own Government and the courage to act upon that belief.

When Leonid I. Brezhnev, Gerald R. Ford and the top leaders of 33 other governments signed the Helsinki Final Act on Aug. 1, 1975, they pledged "respect" for human rights. Each signatory guaranteed to its citizens the freedom to monitor its own (and others') compliance with the human rights provisions of the Helsinki accords. What other meaning could the document have in confirming "the right of the individual to know and act upon his rights and duties" in "the field of human rights and fundamental freedoms"—spelled out as covering "freedom of thought, conscience, religion or belief" and expansion of freedom of movement, contacts and information?

From the moment that he organized in Moscow the world's first Helsinki Watch group (the predecessor of others in Eastern and Western Europe and the United States), Orlov was a doomed man. In the nine months between its formation and his arrest, the Moscow Watch committee, of which he was chairman, issued 19 detailed reports on human rights violations in the Soviet Union. Orlov was tried—not for making false allegations but for circulating true ones.

Orlov is not alone. Some 50 of the 75 Helsinki Watch members throughout the Soviet Union are now in jail or exile. The Moscow committee, reduced to three old and ill individuals, is inactive. Virtually the entire Ukrainian contingent is in prison.

The 35 nations that signed the Helsinki accords are now meeting in Madrid, in a protracted review session that has been going on spasmodically for the past two years. The Soviet Union refuses to recognize that its persecution of the Helsinki Watch monitors is not only a repudiation of its word but a rejection of the entire Helsinki process, which it insists it wants to continue and expand.

Today, on the sixth anniversary of Orlov's arrest, the Soviet Union must somehow realize that, much as it would like to forget him, he and his colleagues are not forgotten by the civilized world.●

REPEAL TAX WITHHOLDING PROVISIONS ON INTEREST AND DIVIDENDS

HON. W. G. (BILL) HEFNER

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 2, 1983

● Mr. HEFNER. Mr. Speaker, rarely has any subject generated such a large volume of mail now flooding Capitol Hill as the campaign to repeal the tax withholding provisions on interest and dividends. Our people are outraged

that the Government should deprive them of the use of the little bit of interest they earn on small savings accounts, and they are demanding that Congress correct what they believe to be a gross inequity.

Since it is the small saver who is primarily burdened with the loss of income and administrative expenses which financial institutions will pass on to them, my colleague, ROBIN BRITT and I are introducing legislation which will repeal the withholding provisions that apply to interest from savings deposits.

Under this legislation, the withholding of taxes from dividends would go into effect as scheduled in July of 1983. Some 40 percent of the revenues expected to be gained under the Tax Equity and Fiscal Responsibility Act will accrue from dividends. Therefore, we can achieve fiscal responsibility by adding approximately $8 billion to the Treasury between 1983 and 1987 and still give the small saver a break.

The elderly are particularly distraught about this withholding issue. This is understandable, and even though they are exempt under TEFRA, they are overwhelmed with the burden and complexity of filling out the forms and the process by which they receive the exemption.

By repealing the withholding provisions on interest earned on savings, we can send a signal to the small saver that the Federal Government still encourages savings and that people will not be penalized for doing so. By retaining the withholding on dividends and with the provisions in TEFRA for tighter reporting requirements, the Treasury can capture most of the lost revenue that would be gained through the combined withholding on interest and dividends.

I commend the bill to my colleagues for consideration.●

A GROWING CONSENSUS: IT IS TIME TO NEGOTIATE IN EL SALVADOR

HON. MICHAEL D. BARNES

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 2, 1983

● Mr. BARNES. Mr. Speaker, this morning's Washington Post carried an excellent lead editorial urging talks in El Salvador. The Post said:

> The doubters fear the bottom is dropping out. They urge an effort to save the American investment by promoting negotiations, talks, "dialogue." They are right. . . . President Reagan pledged, in his recent American Legion speech, "to explore all possibilities for reconciliation and peace in Central America." It is a tall order, and he has yet to deliver on it.

The Post is hardly alone in calling for a political settlement in El Salvador through means including negotiations. Most of our country's major newspapers—including the Christian Science Monitor, the Los Angeles Times, the New York Times, and the Miami Herald—have endorsed a political route to a settlement in El Salvador in recent editorials.

These and other editorials reflect a growing domestic and international consensus. As chairman of the Subcommittee on Western Hemisphere Affairs, I have had occasion to meet with and hear testimony from a great many of our country's Latin America experts, and they are virtually unanimous that a political settlement is the only way out for us in El Salvador. In the same capacity, I have also traveled frequently and widely throughout the region, and it is unquestionably the opinion of our democratic friends there that we should be seeking a political settlement of the war.

No one is arguing that we should pull out, or cut and run, or whatever the administration's current rhetoric accuses us of wanting. What they do argue is that our strategy for involvement is fundamentally flawed. Our friends in Latin America want us to work constructively for a stable, democratic El Salvador, an outcome that cannot be achieved with our current policy. They do not want us to go down with a rapidly sinking ship.

Mr. Speaker, I include at this point a sampling of recent editorials on this subject:

[From the Washington Post, Mar. 2, 1983]

MORE AID FOR EL SALVADOR?

More aid for El Salvador, as the Reagan administration requests? Of course. It is an $80-million-a-year war—that's the amount sent last year and sought next year. This year, the foreign aid bill collapsed, leaving El Salvador short $60 million. Not to pony it up would probably finish off the government. Is that what the Congress wants or is ready to take the responsibility for?

The trouble is that the administration and its critics are drawing divergent conclusions from the condition that has launched this latest argument, the sagging of the Salvadoran war effort. The administration would bull through its program of financing the war (while sending more advisers), trying to edge forward reforms and human rights, and cosponsoring the local government's plan to draw the opposition into its electoral scheme. The doubters fear the bottom is dropping out. They urge an effort to save the American investment by promoting negotiations, talks, "dialogue."

They are right. The administration equates talks with letting the guerrillas "shoot their way into power." But a little perspective is in order. The generals who are now on top shot their way in. Granted, at American prodding they have devolved uncertain power on a body elected since. If full power had actually been taken by the body elected a year ago, the administration would have had fits, since a feudal party won. The point of government-guerrilla talks, their State Department advocates say, is not to distribute power arbitrarily but to shape democratic political processes. It's certainly risky. Increasingly, it looks like the only alternative.

Secretary of State George Shultz's attitude is puzzling. He was questioned in the Senate on the calls for dialogue emanating from Salvador's acting archbishop and from Pope John Paul II, whose visit to Salvador next Sunday is eagerly anticipated by partisans of reconciliation. Mr. Shultz replied with a reference to "churchmen who want to see Soviet influence in El Salvador improved." Separately, he was asked if the United States would actively oppose government-guerrilla negotiations even if the Salvadoran government were interested. "I wouldn't think it would be a good idea," the secretary said.

President Reagan pledged, in his recent American Legion speech, "to explore all possibilities for reconciliation and peace in Central America." It is a tall order, and he has yet to deliver on it.

[From the Washington Post, Feb. 7, 1983]

THE WAR IN EL SALVADOR

The military news in El Salvador is the guerrillas' capture and holding for two days of Berlin, population 35,000, a city in an interior province remote from their strongholds near the Honduran border. Most American observers have reacted cautiously, aware perhaps of the exaggerated response to the communists' Tet offensive in Vietnam. Still, Berlin was a serious embarrassment to the government. The guerrillas, relying on ambushes, sabotage and intimidation, do not seem to be near a country-wide military victory. Nor is there evidence that they have developed a mass following. But their pressure is constant and perhaps growing, and neither in San Salvador nor in Washington are the authorities certain what to do.

Some of the Salvadoran government's problems are familiar: Nicaragua continues to augment the guerrillas locally obtained arms. The Reagan administration has not gotten from Congress all the military aid it has sought. Other problems arise directly within El Salvador.

The Salvadoran armed forces had a year, 1982, to use their new American aid and training to turn the corner, and did not. They have been slow to adopt the aggressive, small-unit patrols their American advisers feel are best suited to routing guerrillas. The Americans favor reform, but now say the armed forces have been "distracted" by politics (pushing land reform) and political infighting. Others note that Salvadoran commanders, uncertain of their troops, have preferred the safer tactic of large-unit sweeps, and that the government has been spread thin by having to defend economic targets.

Some officers have political associations on the feudal right. One of them, much admired by the Americans for his military record, Col. Sigfredo Ochoa, last month challenged the reform-minded chief of staff in what Georgetown University's Robert Leiken aptly calls an episode pitting "the Americans' darling against their right-hand man."

There is a sense of a new turning point. The Americans nervously ask for "a more dynamic approach" by the Salvadorans and the transfer of American advisers from training to brigade-level operations. Mr. Leiken suggests that anti-communist military groups in El Salvador, Guatemala, Honduras and the Nicaraguan opposition may join and launch their own combined regional offensive.

No doubt there is room for military improvement. But steps that give greater sway to the military foes of domestic reform, and that threaten to bring outsiders more directly into the struggle, are self-defeating. A time of frustration is the right moment to renew a search for a political solution on the middle ground.

[From the Christian Science Monitor, Feb. 17, 1983]

WHEN TO STOP IN EL SALVADOR

Once again the US Congress is being asked to increase military and economic aid for El Salvador. The administration would also like to increase the number of American military advisers there charged with trying to improve the performance of the Salvadoran Army. Lawmakers are properly concerned that the US military effort in El Salvador is not succeeding and that the only way out of the dilemma lies in a negotiated settlement.

Not only Democrats are worried. "We need to find some framework for talks with the guerrillas," says Republican Senator Nancy Kassebaum. "We've always said a political solution is the only viable solution, but we're being pushed into a military solution."

To the American people, too, the scenario in that tiny Central American country is uncomfortably reminiscent of Vietnam: Leftist guerrillas try to overthrow an authoritarian government. The US steps in to provide aid and advisers. The army begins to improve but still has not learned how to cope with guerrilla hit-and-run tactics. The guerrillas grow bolder. The US says the army needs more time and training—and American help.

Where does the cycle stop? It seems that the situation to be faced up to is that the war is stalemated. Some 18,000 Salvadoran soldiers are still unable to put down 4,000 guerrillas. Earlier this month 500 guerrillas carried out their boldest operation to date, briefly seizing Berlin, a town of 35,000 people. They were forced to retreat once the army arrived, but they scored a propaganda victory. Efforts continue to get the Salvadorean troops to use small, crack patrols instead of launching massive attacks, in the face of which the guerrillas simply fade into the countryside. But the Salvadoran military is said to be bitterly divided and lacking in leadership drive.

Meantime, it has come to light that during the guerrilla retreat from Berlin American advisers were on helicopters controlling the army operation; one of the Green Berets was hit by gunfire. There are rules barring US advisers from engaging in combat operations. The incident may be an isolated one, as the administration claims. But legislators cannot be blamed for drawing parallels to Vietnam.

Then there is the difficult issue of human rights. The administration has certified some progress, including a decline in the number of deaths by "political violence" and plans for a presidential election next year. Yet the record leaves much to be desired.

Despite these concerns, no one would suggest that Congress cut off American aid altogether. Certainly the United States wishes to continue pushing military, political, and economic reforms in El Salvador, however difficult it is to do so in the midst of a civil war. Yet it is a question whether additional aid—an extra $35 million—will appreciably alter the situation or simply pave the way for more and more increases. Holding the aid budget at its present level might keep the pressure on the Salvadoran government to make faster changes in military strategy and improve its handling of human rights questions.

More fundamentally, if the judgment of Congress is that the war is in effect at an impasse, the time has come to press for the nonmilitary solution that is Washington's nominal goal. Even some high-level voices within the US State Department are urging this course; Spain, Venezuela, and others have been approached as possible mediators. President Reagan remains opposed to negotiations before the guerrillas agree to lay down their arms, but the risk is that the longer negotiations are delayed the worse the situation might become for the government side.

It is hard to fault the advice of those who say the sides in the three-year-old civil war should be encouraged to sit down and talk.

[From the Los Angeles Times, Feb. 27, 1983]

PROGRESS IN EL SALVADOR?

There is no surprise in the Reagan Administration's decision to continue military aid to El Salvador after certifying to Congress last week that the government there is making progress in protecting human rights.

President Reagan said two months ago on his trip to Latin America that the certification would be forthcoming. In the last two years, the White House has given little credence to criticism of Administration policy in El Salvador. Reagan appears determined to stand firm against what he sees as Soviet-inspired aggression in Central America.

Congress attached the certification provision to the legislation authorizing military aid to El Salvador two years ago. The President must report every six months that El Salvador's civilian-military government is curbing abuses of the civilian population by its security forces and pushing badly needed social changes in El Salvador—including a U.S.-backed land-reform program.

That law is up for renewal in October, and some members of Congress want tougher certification provisions. They believe that a more liberal 98th Congress would agree to amendments under which Congress could override a White House decision to continue military aid to a government that Congress found unacceptable. On a recent visit to Central America, Rep. Stephen J. Solarz (D-N.Y.) suggested that a new law could be written tying future aid to El Salvador's willingness to open peace talks with the leftist guerrillas who have been fighting to overthrow the government since 1979.

We think that it is wrong for Congress to put broad limits on a President's authority to conduct foreign policy. But leaders in El Salvador cannot avoid taking Solarz' idea seriously. Unless there is real movement toward peace, there may be no stopping the Solarz proposal—or something like it.

While there has been some progress in El Salvador in the last two years, it may have been too little, coming too late. The political and military situation in that small, strife-torn nation may have deteriorated to the point that no real progress can be made until the fighting stops. That is why we have argued for negotiations between the Salvadoran government and the rebel forces of the Farabundo Marti National Liberation Front, and why we still believe that bargaining is the best way out of the stalemate.

The liberation front is a broad coalition that ranges from moderate civilians to Marxist guerrillas. Serious negotiations could, at the very least, draw the moderate elements of the front away from their armed allies and into a coalition with the current government. They might even persuade the guerrillas to give up their war against the government, which neither side is now able to win.

The ultra-right in El Salvador refuses even to consider negotiations. Some of its most radical members doubt the need for social reforms, and have contemplated rejecting U.S. aid in order to finish the civil war as quickly and brutally as they see fit. The recent political dispute between a key military commander and Defense Minister Jose Guillermo Garcia was, for the Reagan Administration, an embarrassing illustration of how divided and erratic its Salvadoran allies can be.

There have been other, less publicized, indications that things are not going well in El Salvador.

Battlefield reports indicate that the civil war is a standoff. Rebel forces can coordinate action over wide areas and disrupt El Salvador's infrastructure and fragile economy almost at will. Security-force casualties are much higher than is normally acceptable in a guerrilla war, and the Salvadoran army has begun to forcibly recruit young men to meet its manpower needs.

Even more troubling from a U.S. view was the recent decision by the rightist-dominated Constituent Assembly to remove moderate judges handling the trials of security-force members accused of murdering six U.S. citizens in El Salvador and to replace them with right-wing jurists.

Government decisions like those continue to cast doubt on the Reagan Administration's assertions that progress is being made in El Salvador. The Administration must demand more of the Salvadoran government, not only for the sake of peace and stability in Latin America but also to forestall another sortie by Congress into foreign policy.

[From the New York Times, Feb. 6, 1983]

THE UNWAGED WAR IN SALVADOR

Although the news is of real war, and shrewdly timed guerrilla thrusts, what should mainly concern Americans in El Salvador is the unwaged war: a political campaign to end this inconclusive struggle.

Grabbing a provincial city for three days was a psychological boost for an outnumbered guerrilla army; the Reagan Administration concedes as much. But this was no Civil War Gettysburg. The town of Berlin was promptly retaken, confirming again that the leftist insurgents are still challengers, not conquerors.

The offensive's real damage was political. Presumably it impressed, or at least intimidated, new sectors of the Salvadoran population and produced a new impulse to flee. And you could almost sense a new doubt spreading in Washington, which has been betting all along that an American-aided army, even if it cannot win, could at hold out indefinitely against the guerrilla challenge. After Berlin, these calculations are less certain.

The offensive was cunningly timed to coincide with the Reagan Administration's ritual certification to Congress of what nobody really believes: that Salvador's Government is "making progress" on political and economic reforms, and taking steps to punish the killers of civilians, including six Americans. Obviously chastened, State Department officials even conceded that Amer-

ica's policy signals to Salvador have been, at best, confused.

Few Americans want to see El Salvador turn into a Marxist tyranny; on that, surely, there is no confusion. Nor is there a clamor for saintliness by a troubled regime caught up in a savage civil war that is itself rooted in a half-century of oppression.

But a troubled partner is one thing, a barbarous one something else. The mixed signals sent to El Salvador arise from the failure to draw this distinction. And more than morality is at stake; the barbarity has been as damaging to the Government's cause as any guerrilla strike.

What is nonetheless striking in El Salvador is that so many remain willing to fight for a decent, elective government. If the guerrillas can win only psychological victories, it is in part because they have not earned the massive popular support they claim.

What should also be remembered, however, is that the opposition is not monolithic or wholly Leninist. There are democrats on both sides of the barricades. Somehow bringing them together ought always to be the central purpose of the United States' patronage.

Merely denying victory to the insurgents and counting on military stalemate is half a policy. Offering the opposition a genuine share of political power is the card that no one seems to be playing.

It should be played precisely because neither side can be sure of winning, because the insurgents must fear wider American intervention, because the Government should fear American weariness and because Venezuela and Mexico, among others, stand ready to help negotiate a way out. Fighting the military battle makes no sense without a plausible political strategy.

[From the New York Times, Feb. 19, 1983]

IF WAR'S HELL, WHAT'S THE ALTERNATIVE?

Though he meant to sound tough and steady, Secretary of State Shultz sounded testy in telling Congress why he opposed negotiations to end El Salvador's civil war. He accused the guerrillas of "creating hell," trying to "shoot their way" into power and causing the violence. Buzzwords aside, that's a pretty good definition of a civil war.

No one faction has a monopoly on making life hell in El Salvador. It wasn't guerrillas who killed four American churchwomen and two American labor officials; the accused wore our side's army uniforms, and none have been punished. And for the most part, it isn't guerrillas who routinely drag civilians from their homes to be tortured or killed.

The insurgents hope to shoot their way into power and they should be resisted, not only with force but also with demonstrations that there are more humane alternatives. Similar insurgents succeeded in nearby Nicaragua when a cruel and corrupt regime fell of its own dead weight. It ought to be the aim of American diplomacy to prevent that happening in El Salvador, if still possible. The signs there now point to a battlefield standoff, which might provide some openings for a brokered peace that restores order and protects pluralism.

Just that idea was reported to be percolating in the State Department, but Mr. Shultz denies it. He denies it so vehemently that more than the merits of one or another proposal seem to disturb him. Surely he does not mean there's no conceivable way to transform the battle into political competition.

In Nicaragua, alas, the United States never got around to talking seriously with the leftist Sandinists until the last moments before their military victory. In return for support to their newborn regime, it exacted promises of early elections and a free press, which gave some small space to a democratic opposition to their authoritarian junta. Nicaragua today is certainly no advertisement for trusting leftists; but America's diehard support of the Somoza dictatorship was no precedent for siding with regimes of terror.

Given the military standoff in El Salvador, and the presence of democrats as well as authoritarians on both sides of the barricades, there may still be room to bargain. Of course the State Department should be thinking about negotiations among the Salvadoran factions; that is its job.

[From the Miami Herald, Jan. 25, 1983]

CHECK ON SALVADOR

As expected, the Reagan Administration certified to Congress the other day that "progress" is being made on several fronts in El Salvador. Continued U.S. military aid to El Salvador hinges upon that certification, which the law requires semi-annually, and which the Reagan Administration issues routinely.

Among the areas in which some undefined "progress" is required are improved government success in controlling the Salvadoran military and in protecting human rights. Congress surely will find much to debate about contentions of progress in El Salvador.

Was the recent rebellion by a regional Salvadoran army commander, Lt. Col. Sigifredo Ochoa Perez, "progress," for example? That episode showed that even the Salvadoran military is split between rival rightists and centrists. Is that "progress"?

Last fall a Salvadoran judge dismissed charges against a Salvadoran soldier accused of the Jan. 3, 1981, machine-gun murder of two American land-reform experts and a Salvadoran union leader. Even U.S. Ambassador to El Salvador Deane Hinton, a Reagan Administration appointee, flatly said the soldier was "the guy who ordered the murder." Mr. Hinton should know; it was his investigators, not Salvadorans, who accumulated the evidence.

Was dismissing those charges "progress?" Has there been any real progress since late October, when Mr. Hinton threatened to cut off U.S. aid if real, as opposed to mere cosmetic, progress were not made soon? Has real progress been made since Nov. 1, when he pronounced that nation's legal system "rotten?" Is there progress even yet on the battlefront, after the largest leftist offensive in two years?

Rep. Stephen J. Solarz, a Brooklyn Democrat, suggests giving Congress the power to veto Administration certifications of progress in El Salvador. That makes sense. It would put pressure on the Administration to be honest, and thus encourage it to push for real progress there.

Mr. Solarz also suggests that future U.S. military aid to El Salvador should be made conditional upon the willingness of El Salvador's government to enter negotiations with the left without preconditions. This idea has considerable merit as well.

Such a step would give leverage to moderate Salvadoran leaders in their continuing power struggle with extreme rightists, Mr. Solarz believes. Evidence supports his view. Rightist efforts to repeal forward steps, such as land reform, have been blunted by fear that U.S. military aid would be lost. Making such aid conditional upon willingness to negotiate would provide a similar incentive to negotiate.

The leftists frequently have stated their willingness to negotiate. After a new moderate coalition gained a narrow majority in El Salvador's Constituent Assembly last November, a spokesman for the moderates hinted willingness to seek a dialog with the left aimed at ending the three-year-old civil war. If U.S. aid were conditioned upon pursuing the idea, the moderates would be strengthened in that direction. Not to do so is to yield to the extreme right.

Negotiations are nothing to fear; both sides must agree before any result is produced. Negotiations are desirable not because the armed left is virtuous or represents a majority. They are desirable because the armed left exists; because it continues to destroy the nation; because it does hold some legitimate grievances; and because negotiations are the best hope for peace.

As it reflects upon the "progress" to date in El Salvador, Congress should weigh Mr. Solarz's suggestions carefully.●

SANTA ANA UNIFIED SCHOOL DISTRICT'S "SUCCESS DAY" 1983

HON. JERRY M. PATTERSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 2, 1983

● Mr. PATTERSON. Mr. Speaker, on May 18, 1983, the Santa Ana Unified School District, the Santa Ana Educators Association, and South Coast Plaza Village will be cosponsoring their third annual "Success Day." The purpose of this event is to encourage students in the district onto greater achievement. Former students and community leaders will participate in the festivities, and their message is clear: We made it, and with determination, hard work, and academic achievement, so can current students.

Mr. Speaker, success has many definitions, and for each of us, it has a unique meaning. The American Heritage Dictionary of the English Language defines success as "the achievement of something desired, planned, or attempted; the gaining of fame or prosperity." Ralph Waldo Emerson said: "There is no way to success in our art but to take off your coat, grind paint, and work like a digger on the railroad, all day and every day." Christopher Morley wrote that "there is only one success—to be able to spend your life—in your own way." My favorite expression of success is "to laugh often and love much; to win the respect of intelligent persons and the affection of children; to earn the approbation of honest critics and endure the betrayal of false friends; to appreciate beauty; to find the best in others; to give of one's self; to leave the world a bit better, whether by a healthy child, a garden patch, or a redeemed social condition; to have played and laughed with enthusiasm and sang with exulta-

tion; to know even one life has breathed easier because you have lived—this is to have succeeded."

Mr. Speaker, the future of the United States depends upon the investment we make in the education of our youth. Each student has the potential to contribute to that future. Just as Santa Ana's more famous graduates—actress Diane Keaton, professional football player Isaac Curtis, and space-lab astronaut Gerald Carr—have succeeded in their chosen fields, so can today's Santa Ana students define and achieve success.

As the former mayor of Santa Ana and now its Representative in Congress, I am well aware of the potential for growth that exists in this community's youth. I join with my fellow colleagues in the House to salute the efforts of the organizing committee, the parents, the teachers, and the administrators in seeking excellence for our students.

Mr. Speaker, let each of us remember that success is individually determined. As Santa Ana's "Success Day" begins, let us renew our commitment to the fundamental values present throughout American history. Values that have enabled our country to reach its position of greatness among nations.●

VOTE ON AMERICAN CONSERVATION CORPS

HON. DOUG WALGREN

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 2, 1983

● Mr. WALGREN. Mr. Speaker, I regret that due to other official duties I was not present to vote on H.R. 999, the legislation approved by the House on Monday to establish an American Conservation Corps to provide conservation jobs for unemployed youth on public and Indian lands. Had I been present, I would have voted aye.

I was pleased to see the bill pass with wide bipartisan support. Unemployment among our teenagers is at the highest rates ever recorded, and some action is desperately needed by this summer. All the projects in the bill, from conservation of forests, fish and wildlife to energy conservation, are worthwhile and deserving of our support. It is my hope that the Senate will quickly agree to these provisions so we can begin to put our young people to work.●

WISCONSIN AUTHOR CHUCK STODDARD RAISES THE RIGHT QUESTIONS

HON. DAVID R. OBEY

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 2, 1983

● Mr. OBEY. Mr. Speaker, in determining the paths that a country must follow, it is more important to ask the right questions than it is to provide the right answers. Unless the right questions are asked, the right answers are never forthcoming.

A recent book, written by a Wisconsin constitutent, Charles H. Stoddard and published by Macmillan, titled "Looking Forward: Planning America's Future," does raise the right questions. It also provides some fresh ideas that can contribute to the national debate over the future direction of our domestic and international policies.

Chuck Stoddard's book is neither a blueprint nor ideologically slanted. It tackles tough social and political problems with ingenuity and imagination. Whether or not one agrees or disagrees with Chuck Stoddard's answers, the process of arriving at the right answers is advanced immeasurably by his very thoughtful book.

Stoddard's work reflects a wide background of experience in administrative assignments, including President Kennedy's Director of the Bureau of Land Management, Chairman of the U.S. Army Corps of Engineers Environmental Advisory Board, as well as staff service on State and Federal legislative committees.

Testimony to the quality of the author's study is evident in the following excerpts from reviews of his book:

" 'Looking Forward' is an exciting and challenging volume writen by a true idealist and humanitarian. . . . If humanity adopted only a tiny fraction of the beautiful ideas in this volume, the next century would be a time filled with hope and confidence."—Robert F. Drinan, S.J., Former member of the House of Representatives, Massachusetts.

"To act, one needs understanding of change. Stoddard's intelligence, experience, and courage gives us the best blueprint yet on understanding and acting to create a positive future."—Huey D. Johnson, Secretary for Resources, State of California.

"Stoddard has produced a blueprint for the new political and economic institutions that will be needed to help us live with what we have. A tired two-party system needs some new ideas. 'Looking Forward' provides plenty."—Former Congressman Henry S. Reuss.

"Thoughtful, timely, practical—with optimistic hope for better tomorrows."—Frederick Wallick, Editor, UAW Washington Report.

"The progressive ethic of Charles Stoddard's 'Conserver Society' is needed nowhere more urgently than in food and agriculture . . . he embraces the human resources of the farmers and their families in the same caring concern that he shows for the land and water and natural things."—Robert G. Lewis, former chief economist of the National Farmers Union.

" 'Looking Forward' provides focus for the renewed environmental movement that will emerge from the defensive battles of today. Students desiring responsible roles in that environmental offensive should read Stoddard—a thoughtful writer with long experience in public service."—Henry P. Caulfield, Professor of Political Science, Colorado State University.●

PROPOSED CONSTITUTIONAL AMENDMENT

HON. NORMAN D. SHUMWAY

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 2, 1983

● Mr. SHUMWAY. Mr. Speaker, today I am proposing an amendment to the Constitution of the United States which designates English as the official language of the United States.

I share the view of many Americans that English must remain our only national language, and that the Federal Government should not encourage the use of others. I firmly believe that the linguistic minority groups in our Nation must learn English if they are to become fully integrated into American society. It is time for the Federal Government to stop sending conflicting signals to the non-English-speaking people in America. The United States has, for example, laws which on the one hand require a bilingual ballot for those who do not read English, and naturalization laws, on the other hand, which state that a person must "read, write and speak English in ordinary usage" to become a U.S. citizen.

This resolution, identical to House Joint Resolution 442 introduced in the 97th Congress by the Honorable Robert Dornan, will stop the use of the bilingual ballot, will allow the instruction in English in non-English languages for the purpose of making students proficient in English, and will end the use of foreign languages in subject-matter instruction.

It is important to note that this resolution does not seek to discourage the use of any language for religious or ceremonial purposes, for domestic use, or for the preservation of ancestral cultures, nor does the bill affect the teaching of foreign languages to American students.

The text of the bill is as follows:

That the following article is proposed as an amendment to the Constitution of the United States, which shall be valid as a part of the Constitution if ratified by the legislatures of three-fourths of the several States:

ARTICLE —

SECTION 1. The English language shall be the official language of the United States.

SEC. 2. Neither the United States nor any State shall require, by law, ordinance, regulation, order, decree, program, or policy, the

use in the United States of any language other than English.

SEC. 3. This article shall not prohibit any law, ordinance, regulation, order, decree, program, or policy requiring educational instruction in a language other than English for the purpose of making students who use a language other than English proficient in English.

SEC. 4. The Congress and the States may enforce this article by appropriate legislation.●

SUBCOMMITTEE ON HUMAN SERVICES EXAMINES ADMINISTRATION FISCAL YEAR 1984 AND IMPACT ON OLDER AMERICANS ACT

HON. MARIO BIAGGI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 2, 1983

● Mr. BIAGGI. Mr. Speaker, on February 23 and again on March 1, I conducted hearings of the Subcommittee on Human Services to examine the largely negative impact of the Reagan administration's fiscal year 1984 budget on the programs and services under the Older Americans Act.

The February 23 hearing focused on all titles of the act except for title IV, while the March 1 hearing focused exclusively on the title IV program which provides funds for research training and demonstration programs.

As a result of these hearings I today call for a full restoration of the $56 million funds which are proposed to be cut as part of the fiscal year 1984 budget request of the President. I take particular exception to a proposed $32 million cut in the vital congregate and home delivered meals programs also known as title III C of the act. I am also strongly opposed to the 77 percent cut proposed for research and training under the act which must be restored if we are to maintain our commitment to our senior citizens.

At this point in the RECORD I wish to submit my opening statements at each of the two hearings and hope my colleagues will join in opposing these unwarranted cuts in such a worthwhile program.

The statements follow:

THE OLDER AMERICANS ACT AND THE PRESIDENT'S FISCAL YEAR 1984 BUDGET REQUEST

I am pleased to convene this first hearing for 1983 of the Subcommittee on Human Services. Our topic today is the administration's fiscal year 1984 budget proposal and its impact on the programs and services provided by the Older Americans Act.

I approach this subject with a profound personal interest. There are few Members of the House who have worked harder or longer than I on behalf of the Older Americans Act, on this Committee or on the Education and Labor Committee, which has direct legislative responsibility for the act. On the basis of this experience, I am deeply concerned about the administration's budget and what it will mean to the future of the act.

I consider what has been proposed to be an unwarranted attack on the Older Americans Act and the millions of senior citizens who benefit—oft-times daily—from the services provided under the act.

I am opposed to the administration budget on two specific grounds. First, I am opposed to the overall reduction of some $56 million recommended in the budget which includes a $32 million slash in the vitally important nutrition programs. The second is the substantive legislative changes which accompany the budget proposal. The transfer of title V from the Department of Labor to the Administration on Aging is of special concern to us. The other legislative change being offered—even though rejected by Congress in the past—would transfer the U.S. Department of Agriculture Commodity Food Program into the Administration of Aging. We would like these issues to be addressed as well as other aspects of this proposal.

I consider these and any other legislative changes which may be part of this budget to be inappropriate proposals 1 year before scheduled reauthorization by Congress. There are few Federal programs which are monitored more carefully than the Older Americans Act. This committee alone has conducted several dozen hearings on the act in our 6-year history. The standing committees in both the House and Senate have done likewise over the years. This means that when legislative changes are made during reauthorization—they have had the benefit of review by Congress as well as by the aging network as well as the seniors receiving services and employment under the act.

As a result of this regular review, the reauthorizations of the Older Americans Act which have occurred during its 16-year history have been successful and have produced positive results. The administration budget seeks to usurp this traditional role of Congress and I stand totally opposed to any legislative alteration of the act before reauthorization.

It is my hope that Assistant Secretary Hardy can shed some light and dispel some of the confusion surrounding the administration's budget. In particular, has a bill been drafted reflecting the legislative changes which are being advocated? If not, why not? I have some specific questions which I hope will be addressed.

"Why—after President Reagan in December of last year signed into law a bill increasing funds for the nutrition programs—is the administration proposing to slash funds by some $32 million in these same programs for the fiscal year which begins in October? One of the reasons given is that certain management improvements should make up the difference. Does this include any form of 'means testing' or 'sliding scale fees' for participants—something which would violate existing prohibitions in the act?

"With respect to the title V employment program—it was last September when Congress overwhelmingly voted to override the Presidential veto of the supplemental appropriations bill. One of the main reasons for this action was the $27 million in funds for title V which the administration wanted to abolish. Now, just 6 months later, the administration is again proposing radical changes for this program—including terminating funds for the eight national aging organizations which currently administer three quarters of the program. Why are these changes being proposed?"

I am also concerned that separate funding for a variety of services under title III-B of the act might not be continued under this budget. It is essential that we continue to move toward the goal of increased coordination of the various services and programs within the act. Title III-B has been the glue which has held the programs together at the State and local level—and the services provided with III-B funds are those services deemed by State and area agencies on aging to be most needed for their seniors. Congress in 1981 specifically moved away from mandating services under III-B and increased local discretion. The administration's position regarding title III-B needs to be clarified to insure that the intent of the 1981 amendments will continue to be carried out.

I would also hope that the administration will be able to provide a justification for their proposed cut of some $2 million in funds needed to operate the 57 State agencies on aging in this Nation.

I view this hearing as vital to the future of the Older Americans Act. I will maintain my position that 1983 is not the year to reauthorize the Older Americans Act—it is scheduled by law for 1984 and that should not be changed. Therefore, any efforts to accomplish a "backdoor reauthorization" should be rejected by Congress. A budget proposal should concentrate on funding levels—not massive program changes. The funding levels provided for the Older Americans Act does not even constitute the equivalent of a "freeze." A $56 million reduction below last year's levels is much more drastic a reduction than a freeze would represent.

We have invited representatives from all major aging organizations which are involved on a day to day basis with the programs and services under the Older Americans Act. This includes representatives from all eight national contractors of title V. We want to learn their assessment of the budget proposal and what impact it will have on their ability to provide services. I look forward to all the testimonies this afternoon.

TITLE IV—OLDER AMERICANS ACT AND THE BUDGET CUTS

The Subcommittee on Human Services convenes its second hearing in less than 1 week to examine the administration's fiscal year 1984 budget and its impact on programs and services funded by the Older Americans Act.

Our sole focus today is on title IV of the act which provides funds for research, training, and a variety of discretionary programs and projects. The fiscal year 1984 budget request for title IV would reduce funds from the current $22.1 million to $5 million. I contend that a 77 percent cut will cripple this important program and will have a corresponding adverse effect on the rest of the Older Americans Act. I pledge today to work with others on this committee and elsewhere in Congress to get these funds restored at least to fiscal year 1983 levels.

We have invited the Commissioner on Aging, Dr. Lennie-Marie Tolliver, to present the administration's rationale for these latest radical cuts for title IV which has already been cut by some 60 percent in the past 2 years. The administration has offered as one justification their contention that the Older Americans Act is a service program not a research and training program. I challenge the premise that title IV and the rest of the Older Americans Act are two sep-

arate entities. The essential missions of title IV are to conduct research aimed at improving services; to train persons who can better serve the elderly; and to fund projects to demonstrate newer and better methods of providing services. This to me establishes title IV as a vital—as compared to a missing—link in the Older Americans Act.

Consider the fact that both the congregate and national home delivered meals programs which today are title III C1 and 2 of the Older Americans Act were outgrowths of demonstration projects funded by title IV. Consider the fact that more than 220 colleges and universities in this Nation have received funds from title IV, have developed training programs, and have produced professionals in the field of aging. Consider that in an AoA-commissioned survey of some 1,000 students who received degrees in gerontology from schools receiving title IV—82 percent of those employed went to work in programs helping senior citizens.

My point here is that title IV is being victimized unfairly by the budget cutting zealots of this administration. It represents misguided economics when one considers the actual and potential return of the investment from title IV dollars. One cannot overlook the demographics of our society. The 65 and over population is growing at a rate of 1400 persons per day. The growth rate is fastest among those 75 and over. We need to be developing and implementing new policies in response to our rapidly aging population. Title IV is one of the few Federal programs which can provide the funds to conduct the necessary research, training and demonstrations to help us develop a better national aging policy.

Common sense—and elementary mathematics both conclude that it is impossible to maintain programs and services provided under a $22 million budget with a $5 million budget. The question becomes—who gets reduced—who gets terminated—what worthwhile area will suffer. These are questions we want to have answered today.

The reductions and eliminations will have to come from critically important areas. Let me read some examples of projects which were funded with title IV funds as recently as fiscal year 1982 which could be reduced or eliminated:

Health promotion with the elderly;
Increasing effectiveness of services to minority elderly;
Training for volunteerism with the elderly;
Clinical training in aging and mental health;
Home care;
Congregate housing: how to make it work;
Developing an index of elder abuse;
Rural day care; and
Legal services—ombudsman services.

I would be naive to say that title IV is not without its flaws. I have addressed them in various times during my 14 years in Congress—I have developed amendments to better target certain title IV funds in areas such as mental health. I remain convinced that some previous recipients of title IV funds may have contributed to the demise of the program by failing to properly disseminate the products of their research. However, it is one thing to "fine tune" a program to make it better—it is something entirely different to perform radical surgery on a program without regard to whether or not it survives. I contend that a cut of the magnitude proposed in the administration's budget is more the latter than the former.

As I indicated in last week's hearing—1983 is not the year to reauthorize the Older Americans Act. It is scheduled by law for 1984. I stand prepared to work with the administration to develop meaningful amendments to enhance the act. I do not stand entrenched on title IV. There are changes which can and should be made—there is a need for improved accountability and better dissemination. However, I am opposed to reauthorizing as part of this budget process whether it be through legislative changes or by cutting a budget by 77 percent and expecting the program to survive.

The witnesses we have today represent some of the most distinguished people in the field of aging—all of whom have direct and first-hand knowledge of the value of title IV. I look forward to hearing all of the witnesses today and hope that we can maintain our commitment to the elderly of this Nation.●

ESTONIAN INDEPENDENCE DAY

HON. JOSEPH P. ADDABBO

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 2, 1983

● Mr. ADDABBO. Mr. Speaker, February 24 marked the 65th anniversary of Estonian independence.

Estonia retains its rich cultural background and heritage, despite its suffering under the yoke of Soviet oppression. Each day, Estonians are denied their basic freedoms, are kept from using their native language, and from identifying their distinct ethnic roots. The Estonian language has only secondary status in the Republic's schools, and youngsters there are being taught to discard their heritage and adopt the identity of the "new Soviet man."

Estonian Independence Day is not commemorated with the celebrations that we enjoy. We Americans acknowledge the diversity of our heritage but rejoice in our common nationhood. We are encouraged to retain and be proud of our roots. The Soviets are trying to make Estonia culturally homogeneous.

Estonia has been occupied since 1940. This and other Baltic nations cannot praise their freedoms. Estonians are being denied their fundamental right of self-determination and live under foreign rule.

The Soviet Union has colonized and has tried to Russify Estonia. We must praise the strength the Estonians have displayed thus far in preserving their traditions, which are under constant attack. Their freedom of speech, religion, and press is all but nonexistent, yet they persevere. Let us express our support for the Estonians in their quest to become truly independent.●

LARKSPUR, CALIF. 75TH BIRTHDAY

HON. BARBARA BOXER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 2, 1983

● Mrs. BOXER. Mr. Speaker, on March 5, 1983, Larkspur, Calif. will celebrate 75 years as an incorporated city.

Larkspur has maintained its small town character.

Its old downtown core has been deemed significant by the National Register of Historic Places and is listed on the National Register because it has retained the ambience of a typical California small town between 1900 and 1930. Its architecture has a mix of styles that convey the feeling of the past.

Growth and progress have been gentle to Larkspur. Remodeling and new construction have respected the past and retained the historic feeling of the community. In the commercial downtown area, 72 percent of the buildings, built between 1880 and 1930, still remain.

The city has maintained a natural character, expanding on both sides of the Corte Madera Creek which flows into the bay, into the redwood canyons, and up the oak-studded slopes of Mountain Tamalpais. Active citizen groups have influenced city planning to keep this natural setting and old town character. Purchase by the city of open space lands has preserved the natural backdrop of the city so that the view looking south along the main street of town is visually the same as at the turn of the century.

The town boasts one of the last ark communities existing along the creek; one of the few mobile home parks in the county; a major commercial flower grower in the heart of downtown; redwood groves, open space trails to Mountain Tamalpais, creekside bike paths as well as the Larkspur Ferry Terminal.

At 75 years of age, Larkspur is an interesting mix of people, businesses, and natural elements. Larkspur is still typical of a small California town, yet is just 12 miles north of the Golden Gate Bridge.●

COST BENEFITS FOR THE POSTAL SERVICE AND AMTRAK

HON. MICKEY LELAND

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 2, 1983

● Mr. LELAND. Mr. Speaker, today I would like to introduce a legislative proposal expressing the sense of this Congress that the Postal Service

should conduct a study of the potential for accruing cost benefits for both the Postal Service and Amtrak, by increasing the amount of mail presently transported on Amtrak.

As you are aware, the Postal Service is projecting a deficit for the coming year. Their budget difficulties are only heightened by the budgetary policies of this administration. It seems particularly appropriate at this time to mandate the conduct of a study which could result in a tremendous savings for the Postal Service as well as additional revenues for the financially beleaguered Amtrak.

The proposed study would serve the best interests of both the Postal Service and the postal customer as it would explore ways on which the Postal Service could transport mail more efficiently, at a savings which could be passed on to the consumer. The provisions of the study include; an analysis of the volume of mail currently transported via Amtrak, an identification of the most expedient Amtrak routes for the transportation of the mails, an assessment of the equipment available for the transportation of mail and the potential for added equipment. In every category, an estimation of the cost for providing this service would be made, which, combined, would provide the Congress with a well-documented figure as to the savings likely to be realized by both the Postal Service and Amtrak.

As of late there has been mounting concern over the effects of the Postal Service's financial difficulties. Already the nonprofit mailers are suffering from the increases in their mailing rates. The consumer is apprehensive about the threat of higher postal rates and reductions in services ranging from the closing of thousands of small post offices to the cessation of Saturday delivery. I believe this proposed study is a most responsible step toward investigating the most efficient means by which these difficulties can be alleviated and the ways in which the Postal Service can better serve the public.●

TAX TREATMENT OF RETIREMENT COMMUNITIES

HON. EDWARD R. MADIGAN

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 2, 1983

● Mr. MADIGAN. Mr. Speaker, I am pleased to introduce today a measure designed to provide residents of nonprofit residential retirement communities relief from unfair treatment under Federal tax laws. Residential retirement communities such as Westminster Village in Bloomington, Ill., provide individuals of retirement age with an opportunity for independent living, immediate access to medical care, companionship, and guaranteed lifetime residency.

The legal relationship between the retirement community and the residents is unique. Upon entrance to the community, a new resident pays what is described as a "life occupancy fee" which entitles the resident to occupy his apartment for life so long as the resident is able to live independently and without assistance. Under the terms of the agreement occupancy cannot be terminated by the community even though the resident becomes insolvent and unable to pay monthly fees. Thus while legal title to the resident's apartment remains in the community, the resident holds many of the rights and privileges of ownership.

Each resident is required to pay the real estate taxes attributable to his apartment. However, because they do not hold legal title to their apartments, the IRS has not allowed them to deduct the taxes from their income. The legislation I am introducing today will allow lifetime residents of nonprofit residential retirement communities to deduct from their income the real estate taxes paid by them attributable to the apartment they occupy.●

IRISH-AMERICAN CITIZENSHIP AWARDS

HON. PETER W. RODINO, JR.

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 2, 1983

● Mr. RODINO. Mr. Speaker, on Friday night, March 4, a dear friend of mine will be honored by the Independent Irish Society at a dinner in West Orange, N.J.

John J. Brown is presently the legislative director of the International Union of Operating Engineers, AFL-CIO here in Washington. Prior to that he served as an organizer and business representative of IUOE Local Union No. 68 and as secretary-treasurer of the New Jersey State AFL-CIO. In addition to his impressive career in the labor movement, John has built a distinguished reputation for his activities with Irish-American causes. He was the president of the Independent Irish Society from 1973-75, treasurer of the St. Patrick's Day Parade Committee from 1973 until 1976, and was the general chairman of the 1976 Irish Festival held at the Garden State Arts Center.

The Independent Irish Society presents a yearly award to outstanding individuals. This year John will be one of the recipients of this award, the Irish-American citizenship award. The other award will be given to Helena Sharkey, of West Orange, who is an employee of the Essex County Clerk's Office and was the first woman ever to serve as grand marshal of the West Orange St. Patrick's Day Parade.

I am very proud of these two individuals, and offer my sincere congradulations to both of them on this special occasion.●

ROSS PEROT: COMPUTER COMMANDO

HON. JACK FIELDS

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 2, 1983

● Mr. FIELDS. Mr. Speaker, Nick Timmesch has recently published in the Saturday Evening Post a remarkable article about an even more remarkable individual: Ross Perot.

Ross Perot is a man of singular character, courage, and decency. Ross Perot is an American in love with his country. And of course, Ross Perot is a Texan.

I strongly recommend the article to all my colleagues.

ROSS PEROT: COMPUTER COMMANDO

(By Nick Thimmesch)

Ross Perot's name is a household word for any American who believes in initiative, hard work, traditional values and love of country. Ross Perot stuck to these basic beliefs in his pursuit of success and what he fervently and unashamedly regards as the American dream. He is no phony. Even his detractors admit Perot's patriotism and sense of purpose are real.

His convictions, and a gumption and toughness forged in his East Texas upbringing, fired him to:

Build a $500-million-a-year computer-service business out of a $1,000 investment after he became impatient in the role of IBM's star computer salesman.

Direct a commando team that penetrated deep into Khomeini's Iran early in 1979 and, in a daring operation, rescued two of Perot's executives from a prison housing 12,000 inmates and got them out of the country.

Head a citizens' committee waging war on drugs, successfully persuading the Texas legislature to pass six tough antidrug laws, thus startling many cynical political observers in the Lone Star state.

Now, as Americans fret over the persistence of a high unemployment rate (it has been rising since 1970), with some people quite anxious over the need for job creation, it is encouraging to experience the confidence of a man such as Ross Perot.

The 10.8 percent unemployment rate marking the closing weeks of 1982 is the saddest part of America's economic decline of the past decade. It caused doomsayers to cry for massive spending by the federal government to create "public" jobs, meaning more bureaucracy and, ultimately, greater frustration.

Liberal and leftist organizations demanded a return to "make-work" programs operated during the '30s depression—a revival of WPA and the Civilian Conservation Corps, to name two. Other political voices cried for protectionist trade barriers or pork-barrel programs for their special interests.

Ross Perot just shakes his head over this sort of panic. He knows the U.S. has a tough challenge to rebuild and restructure its

economy, but with a conviction as strong as that which he feels for his country, he is convinced that government programs cannot be the prime remedy.

"Job creation must come from the highly productive private sector," he said in his cherry-paneled offices at Economic Data Systems, the Dallas company he founded. "When you try to create jobs in the public sector, you wind up adding to the tax burden, and this slows the economy.

"Make-work jobs weaken a country. They are to be avoided. By going big into public-sector jobs, you develop a situation where nonproductive people must be supported by productive people."

But he doesn't see the reconstruction of highways and bridges as a "make-work" program. The Reagan administration pushed Congress to raise the gasoline tax five cents a gallon so that a large-scale repair and construction project for deteriorating roads and bridges could begin. As Congress limped home for Christmas vacation last December, it was weary from the filibuster it had endured on the gas-tax bill. But it finally approved spending $5.5 billion from the additional tax for work that promises to employ 320,000 people.

"Bad highways and bridges are a drain on our economy," Perot says, "and it is vital that they are rebuilt. The gasoline tax is an indirect form of a toll road. The road user pays through this tax. I don't have a better idea for raising the money needed for this vital work, so until one comes along, I'll have to go along with it. There's not enough money in general revenue to pay for the rebuilding."

Perot believes it is a businessman's responsibility to run his company in such a way that it grows and creates new jobs. He is serious about this just as serious as he was when he decided to recruit volunteers from his own staff to help go rescue his imprisoned executives in Iran.

"A businessman has a duty to his employees, his company and his country." Perot says. "He must make that company successful, so it can add necessary jobs and broaden the nation's tax base. That's how private companies help the government cover its functions. Business and jobs build the nation's economy and create prosperity.

"It is a businessman's job to make a product that is wanted and sells in the marketplace. It must be sold aggressively. Now, all this may not sound interesting to some people who say, 'ho-hum,' but the truth is that there are no short cuts to creating jobs—no magic. It is fundamental business practice and imagination that creates jobs."

Perot's success in business, particularly the burgeoning computer field, is one of the spectacular stories of our time. In 1957, when he was 27, he became a computer salesman for IBM. He quickly blitzed the sales force and sold so many orders that IBM had to impose a yearly quota on the commissions an individual salesman could make.

Perot says that he exceeded his entire year's quota for 1962 only 19 days into that year, and that left him impatient and frustrated. So instead of sitting around thinking about golf or a larger home or a new car, Perot, on his own initiative, developed the idea of "facilities management," meaning a service the IBM could offer companies unfamiliar with setting up and operating computer systems. But IBM turned down his idea.

The decision didn't cause Perot to fall into a funk. He regards such "failures" as being like skinned knees, "painful but superficial." He quit IBM, took $1,000 from his modest savings and founded EDS, a one-man corporation.

Perot is five-foot-six, and his hair is as close-cropped as it was when he was a naval cadet at Annapolis. He can appear stern. Perot doesn't complain, explains only what he has to and doesn't flinch. Bullets could crease his eyebrows and he probably wouldn't blink.

So at age 32, he marched into the offices of executives and told them they should let him and the staff he was recruiting enter their premises, set up data-processing departments and operate them. In effect, Perot, the mighty mite of Texas, was telling these executives, most of whom were not knowledgeable in this emerging, bewildering world of high technology, "Let us take this headache away, and we'll run your data processing cheaper and more efficiently than you can."

Perot's determination and conviction won him business. By 1968, when he made his company public (and became a temporary billionaire in the process), he was employing 303 people. Today, it's 12,000, and he's still hiring.

"Capitalism works," he says, "it's better than any other system. Our company is strong and growing, and we put our financial resources into expansion.

"We mostly hire young people out of college, and their training is more and more specialized. We made it our highest priority to hire Vietnam veterans before that war was even over. We have several thousand of them now. If you go across the top of my company, you will find many Vietnam veterans, and they are among the finest executives in the computer industry."

So at a time when most executives are deep into cost-cutting measures and dreading the chore of laying off employees, Perot thinks about the new people needed to service the new business EDS is developing. In the past five years alone, EDS has increased its net income by 178 percent, its total revenue 242 percent.

EDS is no longer a spectacular new entrepreneurial success. In 20 years, it has become a mature company, and Perot was intelligent enough to realize it couldn't always be a one-man show. In 1979, he turned over much of his authority to Morton H. Meyerson, now EDS president, and oversees his company (he owns 53 percent of the stock) from the board chairman's position.

"We are in a highly competitive industry," Perot says. "We are constantly providing new computer service for our customers. We are currently developing software for the home-computer market. You know how that market is growing. That means more jobs."

The man really means it; he is not putting out rhetoric for the Tuesday luncheon of a civic club. Perot's record shows he does what he thinks is right and will take punishment for his action if need be.

Just before Christmas 1969, Perot chartered two 707s, loaded them full of Christmas dinners and went to Vietnam in hopes of serving this wonderful cargo to American prisoners of war in Hanoi. When that mission failed, he was scoffed at and made fun of.

The penalty came four months later when, in a single day, Perot lost $450 million as EDS stock plunged—an apparent reflection of a loss of confidence in the company run by the "Lone Star Santa Claus," as one headline called him.

That didn't shake him. Less than a year later, he was on Wall Street, pumping money into a brokerage firm in trouble, saving it (in a civic way, perhaps, because his rescue averted a panic).

Perot became an authentic legend because of another rescue operation, the one he directed in early 1979 in order to free his executives, held for an incredible bail of $12.5 million. He had recruited a 15-man "commando squad" from his own company and got an ex-Green Beret Colonel, Arthur "Bull" Simons, to direct the mission.

Perot used a forged passport to enter Iran and, luckily, arrived at the prison when an American State Department official was there inquiring about Perot's executives. Prison authorities thought Perot was also a U.S. official, so they let him go to the cell. The faces of his two men nearly turned sheet-white when they saw their boss.

He told them quietly that he was arranging a prison riot, that they should wait until the cell doors were open and the guards gone and then come to a car at a given location.

It all worked. The riot broke out, 12,000 prisoners ran out, and Perot's men escaped to the Turkish border. The success was due to the daring of Perot's commando team and to the rather large amounts of money Perot spread around to willing Iranians.

"De Toqueville said America is great because Americans are good," says Perot, reflecting on that success. "Patriotism is not some mindless flag-waving jingoism, as critics charge. Patriotism is doing what our people did on that mission. It is love of country.

"When the Carter administration tried to rescue the hostages and had that tragic failure, the same people who went with us to Iran came to me at 8:30 a.m. that morning and volunteered to go back if they could rescue those left in the desert. That shows the goodness of Americans—just marvelous.

"Our team was asked to consult with the federal government before that effort. But we had a strong difference of opinion with some of the military and with White House staffers. There was a lack of direction and go-go spirit at the White House. And Carter was so indecisive. In a situation like that, you put the right crew together and let them go. Let them size it up and minimize the casualties and carry out their mission. You don't treat them like robots."

Perot prefers "love of country" to the term, "patriotism." Supersalesman that he is, he is also shy and doesn't like being called a "patriot." He actually has a logic worked out about "love of country."

"It is important for people to have this feeling," he says, "so that they can continue to enjoy living in a self-governing country where people can make changes to fit the current need.

"You know, the Mormon Church requires its young people to give one year of service, and it's called a mission. Well, I endorse that, and our government should have the same requirement: Every young American should go on a mission of service to his or her country.

"At some time in your life, you should give a year or two to your country. I wouldn't call it 'conscription.' I would call it 'Service to Country.' Every 18-year-old could work on jobs like conservation projects, hospital service or helping older people. It would have to have substance and be well organized.

"That young person would come out with an understanding of service, of being less

selfish and of people. Finally, that young person would have worked around government and would therefore know what it can do and what its limitations are. That youngster would not be part of a future group urging the government to do everything. When we look to government to solve all our problems, government tends to spend huge amounts of money, and then it fails. The War on Poverty is a perfect example.

"The United States can be anything it wants to be. But we must teach our children that the freedom we take for granted can be fragile. We must teach that they have obligations to their country, that the country is not a magic box to serve them.

"We now expect life to be so extraordinarily good to us that we must be paid $20 an hour for a job that you could train a monkey to do—or we think the world is being unfair. The real lesson is that, if you give a lot to the world, the world will give a lot to you.

"I was taught this at home, at school and at the Naval Academy. I was taught that there is no other country like ours in all civilization. We were painstakingly taught the Declaration of Independence, the Constitution, the Bill of Rights. It is no accident that Texas children, taught about their state, are proud of it and their country.

"Communist children are taught communism and to love their country. They know more about their countries than our children do about ours today. It's no contest when a Russian or a Chinaman is having a dialogue with one of us—they have the encyclopedic knowledge of their country.

"This is partly because we've been through 25 years of fads in education—new math, new alphabet, new style of reading—whatever some professor could come up with. Out of that, we produced a generation of children who can't figure, can't read, can't spell.

"I am a great believer in creativity and innovation, but these people went wild with fads and trends. And our children have shied away from hard subjects. They want political history and art history and this and that, but they don't want anything hard, and they certainly don't want engineering.

"You walk into an engineering school today and you think you are in the Orient. Those aren't Japanese-Americans in those classes—those are Japanese, and they are flooding our schools. We've got to change that; we've got to get discipline and hard courses back for our children.

"The typical Russian student has an awesome amount of math. Our future economy is based on a technology requiring more math and discipline. We do our young people a disservice by encouraging them to take the easy path."

It was Perot's concern about young people taking the path to drugs that caused him to accept in 1979 then-Governor William Clements' request to head the state's antidrug program. Perot had already spoken out many times against drugs, using church and civic meetings for his pulpit.

Once appointed, Perot mustered some 700,000 volunteers—including parents, teachers and students—to join his antidrug crusade. The state PTA led this legion. And Perot showed the world once more that he meant business.

Instead of issuing the usual committee report and platitude-laden statements, Perot had hard-hitting speeches, did a cram course on drug abuse and financed a full-blown campaign against drugs out of his own pocket.

Finally, he came up with a legislative program, vigorously solicited the legislature and warned that the "drug lobby" would fight him and the "Texas War on Drugs."

By spring 1981, Perot had persuaded the legislature to pass a series of laws to stop the sale and flow of illicit drugs in Texas. Soon after, physicians were complaining that Perot made them run the risk of criminality, and some legislators griped that Perot ran roughshod over them. Whatever, today there are no tougher antidrug laws in the U.S. than those in Texas.

Ross Perot's real first name is "Henry," and he was born the son of a cotton broker in Texarkana, Texas, June 27, 1930. He was a newspaper carrier boy, broke in horses for his father, became an Eagle Scout and president of the student council at Junior College. In 1949, he got himself an appointment to the U.S. Naval Academy. He served eight years in the Navy, four of those years on an aircraft carrier. Somehow, he wound up as his ship's official greeter and one day met an IBM executive who was touring the ship.

Soon thereafter, Perot decided the Navy was too slow for him, so he resigned and joined IBM in 1957. By now, he had a strong interest in philosophy and, while he was out in the daily sales grind, mused over thoughts of the great. One was Henry David Thoreau, whose declaration, "The mass of men lead lives of quiet desperation," stuck in Perot's mind as he worked the Dallas business beat for IBM.

So on his 32nd birthday, Perot left IBM and incorporated EDS. Dallas, with its large banking and insurance industry, was a prime market for the computer services he offered. Perot plunged into his new work with a fervor that could only match that of a fundamentalist preacher. He hired young men who would adhere to his dress code: dark, conservative suits, white shirts, single-color ties, no beards or mustaches were allowed. They became known as the "warrior saints" of the "Dallas Crusader."

It is ironic that Perot's business boomed because of one of the great accomplishments of President Lyndon B. Johnson's "Great Society," the Medicaid and Medicare systems. These huge federal payment programs begged for computer services, and Perot's EDS supplied them.

EDS was so highly regarded by Wall Street that, when Perot went public with his company in 1968, he immediately became worth $1.5 billion on paper. The enormous publicity that gathered round him in those years caused him to draw inward and reflect even more on the meaning of life and his beliefs in God, country, his family and himself.

The media made him a star in sometimes unflattering terms. He was variously called "America's first welfare billionaire" . . . "The commando leader of the free enterprise system" . . . "A Promethean Patriot" . . . "Texas Titan" . . . and "Right-Wing Yippie."

"I ignore any kidding about my love of country," Perot says. "My interest in this country is deep, complex and very well thought out. Simply put, we just can't take from our country, we must also give. It is easy to criticize the dirty river. It's a challenge to clean it up.

"The media likes to deal in personalities. It sells newspapers and magazines and makes television. Right now, the media is going big on dramatic stories about a single person who is out of work. But that one person's plight doesn't have anything to do with the big picture. It is human, touching and heart rending. Therefore, it produces, on television, an audience share, ratings and higher advertising rates.

"I only wish that it became good business for the entertainment industry to go patriotic. The current trend in schools and elsewhere to feel apologetic for teaching the people the values of our country might change. Maybe even television comedians, with all their influence, might show some love of country."

Ross Perot really means what he says. In the top floor office suite at EDS, there hangs an authentic Gilbert Stuart painting of George Washington. He enthusiastically tells you about it. There is a "Spirit of '76" painting by Willard—the real McCoy. There is a bronze casting of Remington's "Bronco Buster"—the genuine article. There are Norman Rockwell signed paintings; Iwo Jima miniatures; an oil painting of an American POW in a North Vietnamese prison; and a photo of released POWs with the signatures of all those thanking Perot for his help in freeing them.

Perot is the man who gave each of the 52 hostages held in Khomeini's Iran an American flag he flew all 442 days they were held captive. Perot is the man who worked as hard as anyone did to settle the dispute over the "V"-shaped memorial to the Vietnam veterans so that a proper tribute would also be presented to them along with the controversial piece of sculpture in Washington.

More important than any of this, of course, is Perot's undying love of country and his unwavering belief that Americans will eventually be able to work out their problems.

"It's immature to think that the U.S. economy is going down, as some do today," he says of the doomsayers. "This is a country where people can *change* things. We have control over our destiny. You can't beat that!"

Then he looks you straight in the eye and declares: "The love of our country is very fundamental to the success of our great country. That's what every last one of us must keep in mind."●

MERIT PAY REFORM ACT OF 1983

HON. FRANK R. WOLF

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 2, 1983

● Mr. WOLF. Mr. Speaker, I am introducing legislation today to reform the current merit pay system as implemented under title 5 of the United States Code.

At present, Congress is being asked to consider many varied and far-reaching proposals which could impact on the civil service system. These are new initiatives. There are civil servants, though, who have been faced with an inequitable pay system and structure of increases since the imposition of the Civil Service Reform Act of 1978. These are the midlevel managers in grades 13 to 15 under merit pay. I feel it is imperative that we address the problems faced by these individuals.

Grades 13 through 15 are comprised of the Federal Government's senior managers and supervisors. These people are the backbone of the Federal Government. The success of government programs, the ability to keep government expenses down, and the implementation of important policies are among the responsibilities of this group of Federal employees who manage the work force.

Under the current merit pay system, however, these individuals receive only one-half of the comparability increase; no within grade increase; a merit pay increase, the size of which varies considerably based on the size of the "pool" of funds available, and a possible incentive award. During the first 3 years of this system, many of these managers have fallen sharply behind in pay increases compared to what their General Schedule counterparts and the employees they supervise have received. This represents an oversight and inequity which cannot be justified. In the interest of good government and in an effort to insure that the quality of government management does not deteriorate, I am submitting a 5-year experimental merit pay reform measure for supervisors and managers. The purpose of this legislation is to encourage and recognize high levels of performance, cut government costs, and increase the morale and productivity of employees affected by the merit pay system.

I believe it is important to set up this reform bill on an experimental basis. Under the Civil Service Reform Act of 1978, the idea of merit pay was conceived and subsequently implemented. In theory, I believe the concept was good; however, in practice, it has not worked and I do not believe that it can work. In drafting this legislation, I am convinced that this is the most equitable approach we can take in promoting merit at the crucial management levels of government. If we are wrong, I believe an experiment will bear this out. The Federal managers, under my bill, will not be forever wedded to a system that does not attain the goals it is designed to achieve.

The experiment will establish a standardized five-point system ranging from unsuccessful, marginally successful, to fully successful, highly successful, and outstanding. Those who rate fully successful or better will receive full comparability increases—a benefit which is standard in the General Schedule regardless of performance level—and within grade increases. Those failing to perform at these levels would receive neither of these increases.

At the beginning of each performance appraisal period, critical elements and standards—job description responsibilities—will be established between supervisors of employees covered by this system and the employees. I feel this is a necessary first step in removing some of the aspects of the performance appraisal system which have plagued its effectiveness.

Those performing at levels above the fully successful level will qualify to receive performance awards relative to their rating in this five-point scale. Regulations governing the levels, critical elements, and standards to be used in this assessment of performance and subsequent award will be prescribed by OPM. A performance award could not exceed 20 percent of base salary.

Currently, a merit pay employee receiving the maximum incentive award of $25,000 has the opportunity for an award which is 40 percent of base pay. I believe this figure should be brought down to a more reasonable level.

An agency's funding for performance awards could not exceed 1½ percent of total base salaries in the agency for those covered under this program—this figure reflects the current practices used in regulations made by the OPM in determining appropriate levels of agencies' awards.

Quality step increases are eliminated and funds which otherwise would have been provided under current merit pay and General Schedule pay systems would be redirected into the performance award funding mentioned above.

Innovative ideas and helpful suggestions in improving government's productivity and efficiency are oftentimes generated by these top supervisors and managers. Awards programs already in existence for merit pay and General Schedule employees designed to recognize and acknowledge this type of achievement would be continued.

I want to reiterate the most important feature of this legislation and how it differs from the current merit pay and General Schedule. I believe the critical feature of this bill is its ability to withhold comparability increases and within-grade increases for employees not performing in a fully successful manner. I believe this is an important first step in insuring a quality government work force which is motivated by strong management policies and performance practices.

MERIT PAY REFORM LEGISLATION

SECTION-BY-SECTION ANALYSIS

Title: Merit Pay Reform Experiment of 1983.

Second section, Amendments to Chapter 54 of Title 5, U.S. Code.

This section replaces the former Merit Pay System with a five year experimental performance recognition system for improving the performance of key supervisory and managerial personnel in Grades 13 through 15 of the General Schedule.

Under the former Merit Pay System, supervisory and non-supervisory management officials in Grade 13 through 15 of the General Schedule were eligible for base pay increases and cash awards based on performance. In addition, they received one-half of the annual comparability adjustment without regard to their performance. The new Merit Pay Reform system will cover only supervisors and managers with supervisory responsibility. It will continue to tie base pay increases to performance. Within grade increases and the annual comparability adjustment will be granted only for fully successful performance or better.

For less than fully successful performance, however, no within grade increases or annual comparability adjustment will be granted. Performance recognition and other incentive awards for special acts or achievements may be granted to recognize on-the-job performance or inventions, suggestions and other improvements to the Federal service. In no event, however, will agency funding for performance recognition awards exceed 1½ percent of the total base salaries of the supervisors and managers covered by this program.

At the end of the five-year period, a decision to continue or stop this experimental program will be made by Congress based on agency recommendations.

Section 5401. Sets forth the purpose of the Merit Pay Reform system. It shall provide performance-based pay recognition for high quality supervisory and managerial performance. Less than fully successful performers, however, will receive no pay increases. Within available funds, continuing training is to be provided to supervisors and managers to improve the accuracy and effectiveness of the Merit Pay Reform system.

Section 5402. Defines the coverage of the system. Any GS-13 through 15 employee who supervises at least one professional level employee will be included in the system. Office of Personnel Management classification standards for supervisors and managers will be used to provide coverage guidance instead of the current practice of using the labor relations definition of supervisor and management official codified in 5 U.S.C. 7103.

Section 5403. Establishes uniform performance rating levels for simplicity and equity. Ratings will be based on a 5-point scale ranging from unsuccessful, marginally successful to fully successful, highly successful, and outstanding.

In accordance with this 5-point scale, comparability increases and within grade increases would be granted only to those with a fully successful rating or better. For those rated below fully successful, no comparability increase or within grade increase would be provided.

At no time could such an award exceed 20 percent of basic pay. Such an award would not affect the base pay of an individual—rather it would be a lump sum payment.

Awards provided under Chapter 45 of Title 5 for inventions, helpful suggestions, achievements, and other special acts would be retained for these mid-level supervisors as well.

Funding for performance awards would not exceed 1½ percent of total base salaries of the agencies' supervisors and managers covered by this program.

Section 5404. Each year, OPM, in consultation with the agencies, shall submit a report on the operation of the experiment to the President and Congress evaluating the effectiveness of the Merit Pay Reform system.

Section 5405. This section outlines technical and conforming amendments.

Under the Merit Pay Reform experiment, supervisors of employees covered by this system will be required to discuss the critical elements and standards used to appraise

the performance of covered employees prior to the start of the appraisal period.

A five-level appraisal system is established. In addition, there will be no forced ratings distribution under the experiment.

This section delegates authority to OPM to issue implementing regulations and to prescribe any reporting requirements needed to set up and operate this experiment.

At the end of the 5-year experiment, within 60 days of the issuance of OPM's final report on the project, Congress must adopt a concurrent resolution to disapprove the continuation of the program.●

MIT JOINS CHORUS FOR PEACE

HON. FORTNEY H. (PETE) STARK

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 2, 1983

● Mr. STARK. Mr. Speaker, tomorrow members of my alma mater, the Massachusetts Institute of Technology, will present to this body an open letter signed by at least 3,228 members of the MIT community urging a halt to and reversal of the insane nuclear arms race.

This letter is important not only because it signals a broad and expanding awareness of the nuclear peril that threatens this world, but because it comes from an institution that holds a ranking position in the community of science and technology. The list of signatories is impressive and notable, and it includes a broad base of faculty, staff, and students who normally do not make concerted political statements.

Those who signed this letter urging a bilateral, mutually verifiable freeze along with a reduction of existing nuclear stockpiles, include the provost, 3 former presidents of MIT—two of whom were former presidential science advisers—4 academic deans, 15 institute professors, 4 Nobel laureates, 33 holders of endowed chairs, and, perhaps most impressive, all 11 scientists and engineers who are known to have participated in the development of the first atomic bombs at Los Alamos national laboratory 40 years ago, and who are now on the MIT faculty or professors emeriti.

The threat of a worldwide nuclear holocaust was in its embryonic stages when I graduated from MIT in 1953. It has since escalated into a terrifying reality, and never before has it been more important to ask whether we will continue down the road of nuclear escalation and possible human extermination, or whether we will say this insanity must come to a halt.

The nuclear freeze movement supported by millions of people and endorsed at the ballot box by several States last November, including my own of California, is not an effort to cripple America's defenses or expose this country to a blind and unverifiable agreement with the Soviets. As I have said to this body before, our people do not want to sacrifice our Nation's safety, but they also do not want to be incinerated so some Dr. Strangelove theorist can test his belief that nuclear war is winnable. It is not, and the list of those Americans who understand that grows daily.

Last year, the 97th Congress, by the slimmest of margins, rejected a nuclear freeze resolution that would have made great strides toward disassembling this structure of fear that holds America's future hostage. This year, the nuclear freeze resolution, which I have cosponsored, will once again come before Congress. The chorus of support for that resolution has grown louder, and now MIT has added its credible and informative voice to the chorus. I hope my colleagues will join me tomorrow in receiving the MIT letter and welcoming this mighty institution's support for peace over war.●

AMERICAN CONSERVATION CORPS ACT OF 1983

HON. EDWARD J. MARKEY

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 2, 1983

● Mr. MARKEY. Mr. Speaker, I would like to congratulate my colleagues on passing H.R. 999, the American Conservation Corps Act of 1983. The bill passed the House with a bipartisan vote of 301-97, with 187 cosponsors. This legislation will provide meaningful work and educational benefits for our Nation's young adults.

Participants in the American conservation program would receive academic credit from educational institutions whenever possible as well as training, skill certification, and placement services. This program will be one cost-effective way to offer our country's youth jobs and aid them with proper experience for future employment. Priority consideration will be afforded those individuals who are socially, economically, and educationally disadvantaged.

With unemployment among youth at a record high, this bill gives them a glimmer of hope in a time of economic gloom. I thank my colleagues on the Interior Committee and especially Mr. UDALL of Arizona and Mr. SEIBERLING of Ohio for their fine efforts in passing this bill.●

THE SCIENCE ESTABLISHMENT FLUNKS

HON. DONALD J. PEASE

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 2, 1983

● Mr. PEASE. Mr. Speaker, although I intend to vote for H.R. 1310, the Emergency Math and Science Education Act, I wanted to take this opportunity to place in the RECORD an article that appeared in the October 8, 1982, issue of the Wall Street Journal, which puts the current support for science education by the research community in proper perspective.

As a former member of the House Science and Technology Subcommittee on Science, Research and Technology, I am painfully familiar with the chronic neglect of science education by the research-dominated National Science Foundation. During the yearly NSF authorization process, I and my subcommittee colleagues worked to carve out a more substantial financial commitment to science education by NSF. Each year, we face the same foot-dragging and a diminishing share of the total NSF budget for science education.

As a Member of Congress with a particular interest in the Federal budget process—having prepared an alternative budget to President Reagan's in 1981 with a smaller deficit than the President's—I would like to note in supporting H.R. 1310 that the same objectives in this legislation could have been achieved without the increase in Federal spending if the university science and engineering community had cooperated within NSF to commit resources to science education prior to its cause celèbre status.

THE SCIENCE ESTABLISHMENT FLUNKS

(By Rustum Roy)

It has become fashionable—within the space of less than six months—for prominent leaders among scientists to be concerned with science education as distinct from research. On all sides we hear of the desperate straits of science education among the general American populace.

By and large, especially in relation to the developed nations, I believe that the U.S. citizenry and its leadership are indeed below the average elsewhere in a balanced understanding of science and technology and their impact on society. However, the main response of the science community to this situation is an appeal to government and to industry for more money. But nonscientist, politically astute observers detect a peculiar inconsistency in all this recently acquired concern for science education by this community.

How can it be, they reason, that the university science and engineering community should find itself in such desperate straits, when the Reagan administration has been relatively kind to science budgets? For two or three decades, science was well funded; indeed, the seeds of this problem were planted during the plush years of science's

growth. Surely money is not the only problem. Is it not in the values and priorities of the scientists themselves?

Have they shown a concern for the education in science of the general public? After all, the Public Understanding of Science program was judged by the science community itself for many years to be worth one-tenth of 1% of the budget of one agency (NSF) and zero in all others. Even the Reagan elimination of the National Science Foundation's science education directorate amounted to only 6% to 7% of the total NSF budget.

If, the critics argue, the science and engineering community felt so strongly about any of these aspects of science education, they could easily have shifted resources during the many fat years of science funding to establish the levels of activity that are their new targets.

In the 15 years that the total budget for academic research was growing steeply, the *percentage* of the NSF budget allocated to all science education had dropped from near 50% to nearer 5%. For all those—in Congress and the agency—partly responsible for this change to rediscover education is indeed a turnabout. For them to make the charge that this was due to the "unimaginative" nature of NSF's science education program is ingenous, to put it mildly.

I believe there is a most instructive lesson in our history of handling science education, and unless and until we in the science establishment radically change our own values (heal ourselves), we will be unfit and unable to mount a meaningful campaign to eradicate technological illiteracy and re-integrate science into the education of all Americans.

The lesson I draw from the facts about our neglect of science education of the general population is that the vast majority of the scientists who have made policy for this nation for the last two decades—as professors, deans, presidents, chairpersons or members of National Academy committees or the National Science Board—did not have any philosophical rationale for or against "science education" for the nonscientist. Most simply didn't think about it or care.

The wholeness of the educational fabric of a technologically advanced culture, from a citizen able to appreciate and criticize technology and science, to the support of esoteric astrophysics Ph.D.s, was not manifest in the science community's reductionist world view. "More money for research" was the single goal of most scientists and science-policymakers. And when it came to money for science education, even of scientists, it was a very poor relation indeed compared to more money for research.

Therefore, it is my opinion that giving a little ($100 million) more money for science education of the general public cannot possibly do any good if it is given through this same community. Its gut-level attitudes simply cannot change that fast. Perhaps a Solomonic test would be to ask NSF, NIH and the rest, in a zero-based budget exercise, to see what percentage they would be willing to give up out of research budgets for science education. The government should then match that amount with additional money for science education within that agency. This would provide a mind-focusing exercise and a cathartic self-healing via repentance for both the science community and the nation.

To improve a very bad situation, I believe the executive or the Congress can move fast via a different program in a different agency, and one which has an excellent antecedent. I note first that it is genuinely in line with the concept of the new (or old) federalism. A new initiative on nationwide technological literacy could be modeled on former Assistant Secretary of Commerce Herbert Hollomon's invention: the State Technical Services Act (STSA).

I propose that an analogous State Science Education Act (SSEA) be enacted with two components. One will provide (on the basis of a formula incorporating the number of school students, high-school graduates, two-year technical graduates and college degrees) a grant to be matched on a three-federal-dollars to one-state-dollar basis, for state-run programs designed to eradicate technological illiteracy and upgrade science education for the non-specialist at every level.

The second part, somewhat along the lines of the STSA, would provide federal grants with an even higher matching ratio to consortia, regional associations and national groups, for programs agreed upon as being of value to any group of states.

Such programs might involve, for example, development of course content and teaching materials for print or TV. Using block-funding mechanisms, perhaps a five-person federal bureaucracy could run the whole office out of the Commerce Department. Moreover, by having 50 states run the SSEA program, we would move the action away from the research-oriented Washington bureaucracy, toward the level of government that in any case has the responsibility for much of science and general education.

Due to the shortage of science teachers nationwide, the only mechanism for rapid improvement of the national posture is through the volunteer route. The vast majority of our school districts could find in local industry, community college or university, scientists and engineers who would give up several hours a week to teach science at the local school and help in other local cable TV, newspaper or other community programs. Such volunteer contributions would count as matching money in kind, to qualify for extra state grants. Moreover, this scheme would not disturb the basic structure of the existing science teachers' employment, while permitting a gradual expansion of the personnel capable of explaining and interpreting technology in the context of society.

The bottom line comes down to this: In an era of fixed intellectual and financial resources, can the high science research community be entrusted with the science education of the American people?●

IDAHO BUSINESSMAN HONORED BY TIME MAGAZINE

HON. GEORGE HANSEN

OF IDAHO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 2, 1983

● Mr. HANSEN of Idaho. Mr. Speaker, in these times of economic troubles it is heartwarming to see recognition of successful business practices combined with responsible service to the community. Idaho is proud to have a native son, Tom Smith, so honored by Time magazine's 1983 Quality Auto Dealer Award. The news announcement follows:

TIME MAGAZINE HONORS BLACKFOOT AUTO DEALER

LAS VEGAS, NV.—Time Magazine has named Tom B. Smith, president of Blackfoot Motor Supply Company, Inc., an Oldsmobile, Buick, Pontiac, GMC, AMC, Jeep and Renault dealership in Blackfoot, Idaho, as a recipient of the 1983 Time Magazine Quality Dealer Award (TMQDA). His selection was announced by Michael M. Carey, director of the TMQDA Program for Time at the National Automobile Dealers Association (NADA) Convention in Las Vegas on February 12th. Smith and the other recipients were honored at the opening business meeting of the NADA Convention which this year was attended by over 5,000 people involved in the automotive industry.

Smith, whose dealership is located at 369 W. Bridge Street in Blackfoot, is one of only 62 dealers in the entire nation nominated for the Time honor.

The TMQDA Program is sponsored by Time in cooperation with the NADA. Each year it honors outstanding new car dealers in America for "exceptional performance in their dealerships combined with distinguished community service." The recipients are chosen by a panel of judges from the University of Michigan Graduate School of Business Administration.

A native of Pocatello, Smith began his automotive career in 1945 as assistant manager of his family's dealership, Blackfoot Motor Company. The following year, upon the death of his father, he became president of the company.

Involved in automotive industry affairs, Mr. Smith was nominated for the Time award by the Idaho Automobile Dealers Association. A member of NADA, he served on the NADA 20 Group, is past president of the Blackfoot Auto Dealers Association and has served on several factory dealer councils.

Active in community affairs, Mr. Smith is past president of the Chamber of Commerce and Rotary Club, a former director of the United Way, the Boy Scouts Council and a member of the Masonic Lodge, Idaho Falls Country Club and the Elks Lodge. In addition, he annually supplies a car for the Idaho State University Gold Club.

Smith and his wife, Doris, have three children and live in Blackfoot.●

THE NATURAL GAS CONSUMER REGULATORY REFORM AMENDMENTS OF 1983

HON. TOM CORCORAN

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 2, 1983

● Mr. CORCORAN. Mr. Speaker, for the benefit of our colleagues, I would like to insert in the RECORD summary information about the Natural Gas Consumer Regulatory Reform Amendments of 1983, the administration's comprehensive natural gas reform legislation that I introduced with several cosponsors earlier today.

SUMMARY OF NATURAL GAS CONSUMER REGULATORY REFORM LEGISLATION

Consumer protection through elimination of automatic pass through of price increases by pipelines (PGA adjustments).

Gas price increases above inflation may not be passed through automatically by pipelines.

Process requires full public proceeding with appropriate standards.

Ceiling price for most gas becomes lesser of NGPA price or "average" new free market price ("gas cap").

Indefinite price escalators limited by "gas cap".

Free the parties to negotiate new contracts with incentives to do so at low prices.

All new and renegotiated contracts deregulated.

Either party may market-out on any contract not renegotiated by January 1, 1985.

Eliminate disincentives for use of low cost gas.

Increase competition through contract carriage at incentive rates.

Take-or-pay contracts may be reduced to 70 percent by purchaser.

Eliminate Fuel Use Act and incremental pricing.

(1) As of date of enactment, any new contract may be signed and may operate by its terms.

(2) Any contract may be renegotiated and may operate by its new terms.

(3) The volume-weighted average of the price for natural gas in all contracts under (1) and (2), for the most recent month with available data, is called the "gas cap."

(4) Pending renegotiation, prices for all gas (except Section 107) are the lower of the Natural Gas Policy Act (NGPA) price ceiling or the "gas cap."

(5) On January 1, 1985, for any contract that has not been renegotiated, either party may exercise a "market-out" (abrogate the contract). In that event, purchaser must carry gas for seller to any other purchaser at an incentive rate.

(6) All gas is decontrolled from the nonprice regulations of the Natural Gas Act (NGA) and the NGPA on January 1, 1985, or on renegotiation, if sooner.

(7) Section 122, which gives the President or Congress the power to reimpose controls, is repealed.

(8) Immediately repeal Fuel Use Act (forbidding some uses of natural gas) and Incremental Pricing.

(9) All buyers have equal access to offshore and interstate gas.

(10) Latest "gas cap" is considered a federally-approved rate for area rate clauses.

(11) Purchasers may reduce all "take-or-pay" contracts to 70 percent of deliverability (conservation exception for associated gas).

(12) If option is exercised, seller can resell elsewhere the amount of gas reduced. In that event, the buyer must transport the gas at an incentive rate.

(13) Option to reduce taxes expires on January 1, 1986.

(14) All escalator clauses of all types in pre-enactment contracts are limited by the "gas cap." This limitation continues until January 1, 1986.

(15) Through January 1, 1986, an interstate pipeline may not immediately pass-through purchased gas costs above its last pre-enactment level plus inflation. Any additional cost must be specifically approved by FERC after a public proceeding with appropriate standards.

(16) FERC, on application, can require a pipeline with available capacity to carry gas under contract between producer and purchaser at an incentive rate.

(17) No pipeline may take gas from its own production or from an affiliate at a rate higher than its rate of take for any less expensive gas.

(18) A ceiling is placed on the currently deregulated gas (Section 107—deep gas) until or unless the "gas cap" rises above the ceiling. Tight sands gas is capped at the maximum allowable price on the date of enactment.

EXECUTIVE SUMMARY—ANALYSIS OF NATURAL GAS CONSUMER REGULATORY REFORM LEGISLATION

BACKGROUND

If the wellhead price of natural gas were not regulated, market forces would affect natural gas prices as they do all other unregulated commodities. When deliverable supplies were high, as they are today, the price would fall; when deliverable supplies were reduced, the price would increase. If the price of the principal competing fuel (oil) were to drop, the price of natural gas also would drop in order to maintain a competitive position in the marketplace.

But the domestic gas market has been distorted by existing law. The Natural Gas Policy Act of 1978 (NGPA) currently is causing natural gas prices to rise despite an oversupply of deliverable gas, declining oil prices, and a low rate of inflation.

PROPOSAL

The legislative proposal provides a transition to a free market for natural gas that both protects consumers from the effects of market distortions on prices during the transition and provides strong incentives for producers and purchasers to renegotiate contracts to minimize costs. Key differences from the NGPA include the following:

Consumers are protected through a moratorium on automatic Purchased Gas Adjustment (PGA) increases above the level of inflation, with other increases requiring a full public proceeding by the Federal Energy Regulatory Commission (FERC).

All new and renegotiated contracts are deregulated, with the volume-weighted average price of these new contracts becoming a cap on prices that can be charged under old regulated contracts. Pipelines may reduce take-or-pay contract volumes to 70 percent.

On January 1, 1985, either party may opt out of any old (pre-enactment) contract, and transportation of gas from producers to new buyers is guaranteed.

MAJOR ASSUMPTIONS OF THE ANALYSIS

Oil price assumptions are critical to any analysis of natural gas pricing policies because the fuels substitute for and compete with each other over a broad range of uses. This analysis uses in its reference cases those oil prices developed for the fiscal year 1984 budget. These prices are relatively flat in real terms ranging from about $31 to $32 over the 1983-90 time period. A low oil price sensitivity case was run at the $23-to-$24-per-barrel level in real terms through 1985, with growth at 1 percent in each year through 1990.

Other key assumptions include the following:

GNP growth at 1.7 percent in 1983 with a recovery peaking in 1984-85 (4.5 percent). The average annual growth rate for the rest of the decade is 3.4 percent.

Excess deliverability of natural gas in 1982 averaging about 1.4 trillion cubic feet.

Conservative estimates of the number of producer/pipeline contract renegotiations before January 1, 1985.

RESULTS OF THE ANALYSIS.

Under current law, prices are projected to continue on a steady upward path, reflecting both the changes in mix (depleting supplies of old, low-priced gas and additions of more expensive gas) and some subsidization of drilling for more expensive gas. As prices currently are approaching market-clearing levels, the analysis does not show a sudden price increase when partial decontrol takes effect in 1985. But just what will happen to gas prices in 1985 will be strongly influenced by oil prices.

Under a low oil price scenario, prices under current law continue to rise until after the partial deregulation in 1985, as certain contract provisions cause the price ceilings under the NGPA to continue to act as floors that rise with the rate of inflation.

The legislative proposal shows a much different pattern in the near term. Under base case price assumptions, the average price of gas shows a decrease in the first year of 10 cents to 30 cents per thousand cubic feet. This is about 20 cents to 40 cents below projected NGPA prices. Prices under the proposal remain below those under current law (NGPA), with both rising to about 10 percent above 1982 prices by 1985, assuming no PGA restrictions as a worst case. If FERC disallows some purchased gas cost increases until 1986, residential prices will not rise by the full 10 percent.

Under a low oil price scenario, residential prices should drop by about 30 cents to 60 cents in the first year, about 40 cents to 70 cents below NGPA projections, and should remain well below 1982 levels until 1985. After 1985, the difference between current law and the proposal is very small, as low prices do not offer substantial incentives or subsidies to drill for expensive gas.

In terms of economic efficiency, the legislative proposal shows sizable gains as resources flow to their most efficient uses in a competitive market rather than to the less efficient uses caused by a distorted market. Under the base case oil price assumptions, the legislative proposal provides net national economic benefits over the period that are in the range of at least $1 billion to $2 billion. Such benefits to the economy also are very sensitive to oil prices; when oil prices increase, the free market will cause low-cost gas to be produced first—unlike the current situation with its distorted incentives to produce high-cost deep gas because of its deregulated status. Using the higher oil prices expected in the analysis of 1 year ago, economic efficiency gains are in the range of $25 billion.●

WILLIAM POTOKA, "GOOD WILL AMBASSADOR"

HON. JOSEPH M. GAYDOS

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 2, 1983

● Mr. GAYDOS. Mr. Speaker, on March 12 the residents of a community, whose very name conjures up the picture of small-town America, will gather to honor a man who has earned the title: Ambassador of Good Will.

The community is Mount Pleasant, Pa., and the gentleman singled out for recognition by Lodge 868, Benevolent and Protective Order of Elks, is its mayor—William Potoka, "Citizen of the Year."

It is expected more than 250 of Mayor Potoka's friends, neighbors and Brother Elks, will convene to pay tribute to the many civic services he has performed as a member and as an elected official of the community.

Mayor Potoka's present office, one which he has held for 14 years, is merely one of several positions he has held in Mount Pleasant. He has been a school director, serving as president of the last Mount Pleasant School Board and the first of the new Mount Pleasant Area jointure.

He has been a director of the Mount Pleasant Chamber of Commerce, chairman of the Bicentennial Committee and the leader of a citizen's group that organized a "Welcome Home" celebration for a town resident who had been an Iranian hostage.

Mayor Potoka also headed a committee to restore the community's tribute to veterans, a statue of a World War I "Doughboy" destroyed in an automobile accident in 1981. He is an avid supporter of programs for the youth and the elderly and last Christmas instituted a "Reach Out and Touch Someone" program to provide food baskets for the unemployed.

He is prone to "go on the road" to extol the advantages of living and working in Mount Pleasant, appearing on the banquet circuit as a speaker and in movies and video tapes.

In the interim, he somehow finds time to be the husband of his wife for the past 41 years, Florence Testa, the father of their children and the grandfather to five of their offspring. He also continues to run the business he built from a service station to the repair and rennovation of tractor-trailer trucks.

Mr. Speaker, I consider it a privilege to join the people of Mount Pleasant in honoring their "Ambassador of Good Will," Mayor William Potoka and express to him on behalf of my colleagues in the Congress of the United States our sincere admiration of his many years of dedicated service to the residents of his community.●

RICK VOORHIES

HON. DOUGLAS APPLEGATE

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 2, 1983

● Mr. APPLEGATE. Mr. Speaker, several days ago, our friend and colleague, the gentleman from Kentucky, Mr. HAROLD ROGERS, related to this House an incident of heroism that involved a constituent of his, Mr. Roy Wesley, who was pulled from a burning truck by Mr. Rick Voorhies, who happens to be a constituent of mine. I would like to take this opportunity to publicly commend Mr. Voorhies on his courageous efforts that may well have saved a human life.

It is rare, indeed, that we hear of such human-sacrificing acts. It is only fitting, therefore, that we recognize the people involved and thank them for their concern for fellow man.

Again, on behalf of this body, I congratulate Rick Voorhies on his courage and a job well done.●

CONSUMER DEBTOR BANKRUPTCY AMENDMENTS ACT

HON. MIKE SYNAR

OF OKLAHOMA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 2, 1983

● Mr. SYNAR. Mr. Speaker, today I am introducing legislation to curb unnecessary bankruptcies without denying bankruptcy relief to consumers who need the "fresh start" the bankruptcy system is designed to provide.

Personal bankruptcies have risen dramatically since the Bankruptcy Code became effective on October 1, 1979. Three years later bankruptcies continue to run at an annual rate of about 450,000, or 200 percent of the rate for the 12 years prior to enactment of the code. This rise is inexplicable, even when coupled with high interest rates, inflation, unemployment and increased public awareness of bankruptcy from lawyer advertising.

Economic conditions cannot account for the many debtors who have been counseled to discharge all of their debt in a straight chapter 7 bankruptcy when they might easily have completed repayment of such debts in a court supervised chapter 13 program.

Some experts believe that as much as $1 billion of the $6 billion scheduled in bankruptcy annually is unnecessarily discharged and can be paid by debtors without hardship. This $1 billion is being paid by other consumers through higher prices and limitations on credit availability.

There is a virtual consensus that help is needed. The only question is how. The legislation I am introducing today presents a firm middle ground between the two approaches already introduced in the 98th Congress: H.R. 1147 by Congressman PETER RODINO and H.R. 1169 by Congresswoman MARILYN LLOYD BOUQUARD. Both are good bills that address important problems facing the consumer credit industry; I believe my bill is a sound compromise that addresses these problems thoroughly while protecting the vast majority of consumer debtors who need and deserve bankruptcy relief. I am pleased that my Judiciary Committee colleagues Congressmen BARNEY FRANK, HAL SAWYER, and BILL MCCOLLUM have joined with me today as cosponsors, along with Congressmen GILLIS LONG, BUTLER DERRICK, DICK GEPHARDT, BILL GRAY, VIC FAZIO, TRENT LOTT, BILL EMERSON, and HAL DAUB.

Our legislation builds upon a hearing record formed in the 97th Congress. In 1981 a consumer bankruptcy reform bill was introduced which contained several provisions to modify the bankruptcy process. It contained a provision which would have allowed a creditor to challenge the eligibility of a consumer debtor to take chapter 7 relief based on an ability to pay test. I did not cosponsor that measure, believing another approach could curb unnecessary bankruptcies while better protecting the rights of deserving debtors.

Our legislation achieves this goal by following the suggestions of the final report of the National Bankruptcy Commission that consumer debtors seeking bankruptcy relief be counseled as to their options before selecting a chapter 7 straight bankruptcy or a chapter 13 repayment plan. I am keenly aware of the importance of credit in the daily lives of millions of consumers and believe that counseling debtors may prevent their jeopardizing their future ability to obtain credit. As the National Bankruptcy Commission, among others, has noted, debtors often find themselves in a straight bankruptcy without being aware of the repayment alternative.

Mr. Speaker, our bill also grants a court the authority, on its own motion and only on its own motion, to abstain from or dismiss a chapter 7 proceeding where to permit it to continue would constitute an abuse of the Bankruptcy Code. When this was first brought to my attention I was shocked to learn that courts cannot now stop a bankruptcy proceeding even when the judge is convinced the relief sought is unnecessary. This provision is an alternative to the highly criticized threshold test or future income test contained in other legislation. Our intention is to protect consumer debtors from routine harassment which some feared could result from the threshold test, which gave creditors a formal procedure by which to challenge chapter 7 proceedings, while at the same time helping to curb abuse of chapter 7 relief.

Our bill gives creditors no formal procedure. Rather, the court alone decides. If a creditor does seek to raise the issue at any point in the proceeding, the bankruptcy judge is under no obligation to hear or consider the creditor's motion or petition. It may be dismissed without comment or consideration and the creditor has no right to appeal. Therefore, the creditor has no means of bringing any pressure on the judge to exercise his discretion and no means of putting any pressure on the debtor not to pursue a chapter 7 straight bankruptcy. Further, creditors who do seek to harass debtors by filing superfluous motions or petitions would be subject to all the

sanctions now available to a judge to deal with creditor harassment, including citations for contempt of court.

Additionally, this bill would strengthen congressional oversight of the bankruptcy system by providing for the collection of statistical data to enable the Congress to better measure the effectiveness of the Bankruptcy Code. During the 97th Congress we experienced a great deal of uncertainty over the facts of the matter during our debate. I am hopeful this data will help future Congresses insure that the Bankruptcy Code is responsive to national needs.

Other principal provisions of this bill address the problems of "loading up" by some debtors in anticipation of bankruptcy, create standards for courts to follow in confirming repayment plans, abolish the discharge hearing, and eliminate other costly and cumbersome procedures which prevent the efficient handling of bankruptcy cases. Congressman RODINO's bill addresses the "loading up" and confirmation standards problems.

And finally, our bill addresses the special and unique problems of farmers caused by the court's inability to move quickly to distribute crops to farmers who have merely stored grain in grain elevators without transferring title to the grain elevator operator. Our bill imposes a 120-day time limit on the bankruptcy judge to determine grain ownership; requires bankruptcy courts to accept valid warehouse receipts and scale tickets as proof of ownership; provides that all holders of valid warehouse receipts shall share in the distribution of assets and those not holding receipts shall share in the second tier distribution; and allows farmers to demand reclamation of crops up to 20 days after the filing of the bankruptcy petition and requires that written requests for reclamation which are denied by the court shall be secured with a lien.

The 97th Congress provided sound legislative history for many of these proposals. On March 23 and 25, 1982, hearings were held by the House Judiciary Committee Subcommittee on Monopolies and Commercial Law focusing on unnecessary discharge of debts. On April 23, 1982, hearings were held focusing on reaffirmation, discharge hearings and the desirability of a bankruptcy judge convening the meeting of the creditors. In June of 1982, further hearings were held focusing on the avoidance of liens on household goods and the dischargeability of debts incurred within 90 days before taking bankruptcy. These hearings provide the foundation for the legislation that we are introducing today.

Mr. Speaker, I am confident this bill will provide the vehicle to curb abuses of the bankruptcy system without injuring deserving debtors and denying the "fresh start" that so many need. I know that Congressman RODINO, author of H.R. 1147 and chairman of both the full Judiciary Committee and the Subcommittee on Monopolies and Commercial Law, shares my interest in enacting needed remedial legislation. I look forward to working with him and other members of our committee toward solving these problems.●

UKRAINIAN INDEPENDENCE

HON. JOE MOAKLEY

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 2, 1983

● Mr. MOAKLEY. Mr. Speaker, history illustrates for us the struggle and perseverance of those suppressed people who have sought to be free of the tyrannic and repressive rule imposed on them. Perhaps one of the best examples of such a longstanding and desired fight for freedom is in the 50 million Ukrainians, held hostage as a nation, within the Union of Soviet Socialist Republics. Therefore, it is with a deep sense of concern and admiration for these people that I address the Congress today on the necessity of Ukrainian independence.

The fall of Russian czardom in the spring of 1917 was the starting point for the Ukrainian national revolution which saw the establishment of a Ukrainian National Republic on November 20 of that year. On January 22, 1919, all people of Ukrainian ethnicity were united into one sovereign state of the Ukraine. Pledging a commitment to live in peace and friendship with all neighbors of the Ukraine, the nation enjoyed 3 years of free existence before succumbing to the expansive and imperialist forces of the Soviet Union.

The years following Soviet annexation have been hard and harsh ones for the Ukrainian people. Through deportations, executions, collectivization, and starvation, millions of innocent men, women, and children have lost their lives as their Communist overlords have attempted to tighten their grip on the country. Today, 45 percent of the political prisoners in the Soviet Union are Ukrainians although in total, the people of the Ukraine account for only 20 percent of the total population. The people of the Ukrainian S.S.R. suffer untold hardship and national persecution, famine holocausts, suppression of Ukrainian culture, religious persecution, economic exploitation, the wanton destruction of the Ukrainian Orthodox and Catholic Churches, and numerous violations of national and human rights. Most admirable and encouraging is the fact that, despite these deliberate attempts to destroy the Ukrainian people, their spirit of freedom, lust for liberty, and sense of national pride is as strong as it was 65 years ago when they declared their independence. Such fervent desires and feelings express for us today the emotions and wishes our Founding Fathers had 200 years ago. As we were helped in achieving our goals and wants, should not we recognize and help those others who thirst and long for freedom?

The attempts for independence within other Soviet bloc countries show that the artificially forged unity of the Communist bloc is vulnerable to the smoldering desires of nationalism. As a nation concerned with human rights, it should be our obligation to monitor the events and occurrences within the Ukraine so as to exert pressure on the Soviet Union while revitalizing and supporting those who have the courage to dissent. And it should be our new goal to push for and promote the principles of freedom in those countries like the Ukraine where the desire for them is there but government repression stands in their way. The determination and perseverance, the suffering, and the sacrifice of the Ukrainian people have been great; let it not be in vain.●

WOMEN'S HISTORY WEEK

HON. RICHARD L. OTTINGER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 2, 1983

● Mr. OTTINGER. Mr. Speaker, I would like to take this opportunity to voice my support for House Joint Resolution 70. This resolution as introduced by my colleague, BARBARA MIKULSKI of Maryland, calls on President Reagan to declare the week of March 6, 1983 as "Women's History Week."

The history of our great Nation is no less the history of American women. The contributions made by American women are notable, as part of an historical record, while providing role models that are worthy of imitation.

As this great Nation of ours has experienced good times and bad times, American women because of their sacrifices and contributions deserve as much recognition as a heartfelt nation can offer.

Mr. Speaker, I urge all my colleagues to join Ms. MIKULSKI and me in requesting President Reagan to declare the week of March 6, 1983 as "Women's History Week."●

THE INTRODUCTION OF LEGISLATION TO ENCOURAGE RESEARCH AND DEVELOPMENT IN THE UNITED STATES

HON. CECIL (CEC) HEFTEL

OF HAWAII

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 2, 1983

● Mr. HEFTEL of Hawaii. Mr. Speaker, today I am joined by 21 of my colleagues on the House Ways and Means Committee in introducing an important bill to permanently rectify a provision of the Internal Revenue Code that discourages research and development activities in the United States. This legislation will also bring our Tax Code into line with the international treatment of domestic research and development expenses, and will help to restore our competitive position in the international marketplace.

In 1977 the Internal Revenue Service promulgated regulation 1.861-8, under which a complex formula must be used to allocate to foreign-source income a portion of overhead and other expenses associated with research and development activities conducted in the United States. This allocation process thus precludes U.S. companies from deducting this allocated share of research and development expenses from their taxable U.S. source income. However, this procedure effectively denies any deduction for this portion of the company's research and development expenses, as no foreign country recognizes deductions against its income or other taxes for research and development activities conducted outside its national boundaries.

Regulation 1.861-8 thus imposes a substantial additional economic cost on the performance of research and development activities in the United States. The effect of this regulation is to deny U.S. corporations a full deduction against U.S. income for purely domestic research and development expenses. In other words, this regulation acts as a significant incentive for U.S. companies to shift their research and development activities to foreign countries. No matter what the tax arguments may be for this allocation methodology, we clearly should not be encouraging the exportation of our most valuable resource, research and development, in these or in any economic times.

Mr. Speaker, in 1981 we recognized the problems created for U.S. research and development by this regulation when we enacted a provision in the Economic Recovery Tax Act to impose a 2-year moratorium on the allocation requirements of section 1.861-8 of the Income Tax Regulations. This moratorium is scheduled to expire on December 31, 1983. Therefore, the time is upon us to take permanent action to resolve this problem once and for all.

The bill I have introduced will require that expenses related to research and development activities conducted in the United States be allocated to U.S. source income. Thus, there will be no question as to how deductions for research and development expenses should be treated for U.S. income tax purposes. Moreover, this legislation goes far beyond a simple extension of the existing moratorium and provides a permanent solution to this problem.

In 1981, we also required the Treasury Department to conduct a thorough study of the implications of this tax treatment of domestic research and development expenses. This study was to have been completed in February of 1982. It still has not been transmitted to Congress for our review.

It is clearly up to Congress to take action on this critical problem. We are not going to get guidance from the administration or the Treasury Department, as is indicated by the inordinate delays experienced in the development of the study that we required in the 1981 Tax Act. Last month the 1-year anniversary of the due date for this study came and went, and still we have not seen the study.

In the meantime, the U.S. companies affected by this regulation decided to take action on their own and commissioned Arthur Andersen & Co. to conduct a similar study of major research and development spenders in the United States. Among other things, this study, which was released in January of this year, found that the United States is the only Nation in the world requiring the allocation of domestic research and development expenses to foreign-source income. In fact, many other developed countries are working hard to attract and stimulate research and development activities within their borders. Moreover, U.S. company research and development investment is growing faster in foreign markets than in the United States, and many of the companies responding to the survey indicated that regulation 1.861-8 is a significant factor in their decisions to locate research and development activities abroad.

Mr. Speaker, when we export research and development, we not only export jobs; we also export our national productivity and only serve to further weaken our competitive standing in the international marketplace. If we are going to return this Nation to its status as a vital producer of goods that the world needs, then research and development must lead the way.

As if we needed proof of the importance of research and development to our national economy, Japan, our favorite example and scapegoat of late, provides a greater number of research and development incentives to industry and individuals than any other country. Where at one time "Made in Japan" was synonymous with poor quality and cheap imitations of U.S. goods, Japan now leads the world in developing and producing high-quality, innovative, high-technology products that Americans and citizens of other nations are lining up to purchase.

It is time this Government and this country recognized the important steps that must be taken to restore industrial productivity and to regain our position in the industrialized world. Enacting a permanent solution to the problem created by regulation 1.861-8 is but one of the steps that we should be taking to realize these vital goals, but it is a very important step. We must move quickly to eliminate this significant disincentive to domestic research and development activities once and for all.●

MEDAL OF HONOR PROPOSED FOR ERNEST L. WRENTMORE

HON. NORMAN D. SHUMWAY

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 2, 1983

● Mr. SHUMWAY. Mr. Speaker, today I am introducing legislation to authorize the President of the United States, in the name of Congress, to award the Medal of Honor to Ernest L. Wrentmore of Penn Valley, Calif.

Mr. Wrentmore, at the age of 13, was the youngest man to have served in the American Expeditionary Forces in France during World War I. Even at such a young age, Mr. Wrentmore exhibited great bravery and valor during his tour of duty. While serving with the Expeditionary Forces in France, he was gassed and wounded while carrying messages across a bullet-swept field to another unit of U.S. troops, thus allowing his company to advance. His commanding officer, Maj. E. C. Allworth, cited Mr. Wrentmore's entire tour of combat as "above and beyond the call of duty."

Mr. Wrentmore was awarded a battle star citation in October 1918 as well as the Purple Heart in May 1933 by the War Department for his heroic actions in World War I. He also received an appointment to study at West Point Military Academy and a recommendation for the Distinguished Service Cross by his commanding officer, Major Allworth.

Due to a fire which destroyed the headquarters of Mr. Wrentmore's company and all recommendations and paperwork regarding his tour of service, Mr. Wrentmore did not receive the proper recognition for his distinguished service. I feel that Congress should seize the opportunity to show

our Nation's appreciation, no matter how belated, for the extraordinary valor and courage demonstrated by Mr. Wrentmore during World War I. Mr. Wrentmore should not be denied any longer the recognition he deserves.

The text of the bill is as follows:

Notwithstanding any provision of section 3744 of title 10, United States Code, the President of the United States is authorized to award, in the name of Congress, the Medal of Honor to Ernest L. Wrentmore, formerly a private, Company I, Sixtieth Regiment, United States Infantry, in recognition of his great courage on October 14, 1918, when he was dispatched by his company commander to carry messages across a bullet-swept field to another unit of our troops, thus permitting his company to advance.●

CHRONICLING THE GROWTH OF SEESSEL'S SUPERMARKETS

HON. HAROLD E. FORD

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 2, 1983

● Mr. FORD of Tennessee. Mr. Speaker, Mr. Speaker, it is with great pleasure that I rise today to draw the attention of my fellow colleagues in the Congress to the outstanding accomplishments of a Memphis based, family owned grocery store chain. Today, Seessel's Supermarkets mark the beginning of 125 years of business and service to our community.

In Memphis, Seessel's has become a household word representing the highest standards in retail merchandising. Since 1858, the Seessel family has operated the type of quality, innovative business which has become the hallmark of this country's true success stories.

I would like to share with you the following article which appeared in the Memphis Commercial Appeal on February 27, 1983, chronicling the growth of Seessel's Supermarkets along with the history of the city of Memphis.

The article follows:

SEESSEL'S CELEBRATING CHAIN OF 125 YEARS

(By Emmett Maum)

What began 125 years ago as a downtown butcher shop owned by a German immigrant has evolved into a grocery store chain with seven locations. Some services have changed, others have been added, but through it all a Seessel has lead the way.

Founder Henry Seessel opened The Central Market on Main in 1858. On Wednesday his family's fifth generation will start a celebration that will last the rest of the year.

Seessel's Supermarkets, a privately owned company, is one of the oldest firms in the Mid-South. The chain has introduced several innovations in the Memphis market, said Arthur N. Seessel III, 44, company president. They include:

Selling frozen foods and generic foods.

Air-conditioning grocery stores.

Scanning at checkout counters.

Providing a playground for children whose parents were shopping at the store on Union. The playground existed in the 1950s.

Delivering groceries "in a big way." The service ended in 1962.

Being the first of larger food stores to charge groceries, and it still has credit accounts with some customers.

Its executive positions have passed through five generations and present executives hope their children will enter into the business. The president's brother, Jerry, 41, is executive vice president, and their cousin, Richard, 35, is vice president of food services. Arthur N. Seessel Jr., who retired five years ago at age 65, and his brother, Sam Seessel, who retired three years ago at 63, are cochairmen.

Sales volume has more than doubled since 1980, said the company president. During that period, Seessel's doubled the size of its store at Poplar and Perkins and opened stores at Quince and Ridgeway roads, and in Southaven.

This year Seessel's may construct its largest supermarket—a 40,000-square-foot store at Germantown Road and Farmington Road in Germantown.

If built, it will be the dominant store in a shopping center planned by Memphis-based Malone & Hyde, Inc., one of the nation's leading food distributors, said Seessel. Plans for the store were approved by the Germantown Design and Review Committee, and will be presented to the Germantown mayor and Board of Aldermen.

Because the chain is privately held, Seessel did not reveal sales and profits. "Our profit margin is in the neighborhood of 1 percent, about average for the supermarket industry," he said. Seessel's and other supermarket chains get their net income from the sales volume, rather than a big margin.

Seessel's retains the same basic attitude it had 125 years ago, he said.

"Our attitude is that we are Memphians. We like Memphis and its people and enjoy serving them. And want to continue to benefit the community and those with whom we work. We feel service, quality and good prices equal values. That creed was passed on by Seessel's predecessors, and will go to the next generation of Seessels involved in the business."

That attitude, coupled with its "family of employes," has been responsible for Seessel's continued success, Arthur N. Seessel III said. "Employes make a business. You can build the finest facilities, but without good employes the company won't succeed too well."

Seessel's philosophy is to do something constructive that will have an impact on the community, he said. It attempts to include company employes, "by far our greatest asset," said Seessel. Seessel's Supermarkets believes in business, civic and cultural contributions, he said.

Arthur N. Seessel III has a son and a daughter; Jerry Seessel, a son and two daughters, and Richard Seessel, a son. They would like to see as many of their children as possible join the firm later. Seessel's has refuted periodic rumors that it would sell out to others. Malone & Hyde, owner of Giant Foods of America and Pic-Pac Food Stores, and developer of and supplier to Big Star Stores, has been most prominently mentioned as a possible buyer.

"We buy our groceries from Malone & Hyde, an excellent firm. We think highly of J. R. Hyde III, its chairman and president. However, we have no intention of selling to Malone & Hyde or anyone else," Arthur Seessel III said.

The chain kicked off its 125th anniversary celebration last Sunday with a party for its 635 employes, half of whom are part-time workers, at the White Station High School Auditorium. The event gave employes a peek into special events that the city's oldest grocery chain has in store for its birthday.

They were told the company will bankroll an annual $5,000 four-year college scholarship for a Seessel's employe or dependent. A 10 per cent discount on grocery purchases will be given to employes working for the chain 10 years or more. Ninety employes—or 30 per cent of full-time workers—have been with Seessel's a decade or more.

Poster and memorabilia contests are scheduled in March. Theme of the poster competition for students in grades 4-6 and 7-9 will be "The Supermarket of the Future." The contest has been approved by city, county and many private schools, said Seessel. The poster contest is designed to encourage students to combine factual information with their creative concepts about the future, and to apply the ideas to an institution they know—the family supermarket. The other aim is to expose the public to children's visualization of one aspect of the future. Grand prize for each division will be an Atari video computer system.

Of the memorabilia contest, Seessel says, "Search your attic, drag out your scrapbook, as your grandmother. Seessel's wants to find interesting material related to our history of the grocery business in Memphis. We are looking for items dating from the opening of our original Main store in 1858 to the opening of our Union store in 1941."

Competition will be in four categories—advertising, documents, merchandising and grocery products and/or packaging. The grand prize for the best overall entry from any category will be a $500 gift certificate from Seessel's.

In March a multimedia advertising campaign will start, focusing on the anniversary.

The company's founder moved and changed the names of his businesses frequently. Nine years after starting his meat shop Henry Seessel opened A. Seessel and Sons, a stall in the City Market in Old Market Square. Two years later, he started A. Seessel and Sons Dry Goods. In 1872—during the decade that saw yellow fever ravage Memphis and bankrupt the city—Henry Seessel opened his second store called The Central Market.

The Memphis Appeal, a forerunner of The Commercial Appeal, chronicled that opening: "At No. 72 Jefferson, corner of Third, opposite the European Hotel, not far from the theater, and in full view of the Exposition Building, stands the new Central Market, owned by H. Seessel Sr., the great butcher of Memphis. It will be opened tomorrow (Oct. 14, 1872) with a great display of the finest beef, mutton, hog and venison in the state. The Central Market will be found very convenient to all that part of town lying between Poplar and Beale Street markets."

In 1900, The Central Market moved to 15 South Second, and the name changed to Arthur N. Seessel's Market. In 1917, it moved to 18 North Second. In that move, Arthur N. Seessel incorporated the best of Clarence Saunders' ideas into his store. Saunders' self-service Piggly Wiggly stores

were forerunners of the modern supermarket. The concept's enormous popularity made Saunders a multimillionaire until he lost his fortune in a stock battle on Wall Street.

During those days, Seessel's used a horse-drawn wagon for deliveries, and in years afterward used early vintage trucks.

In 1926, Seessel's Market, including a bakery, opened at 1117 Union. The firm says it remained the only Mid-South grocery store offering a bakery department until the 1950s. Seessel's started a store at 1761 Union in 1941. A supermarket opened in 1962 at Poplar and Perkins. In 1969, Seessel's Bakery opened in Whitehaven, along with its third supermarket. A Raleigh store was established in 1972, one in Germantown in 1975, the Quince and Ridgeway store in Balmoral in 1979, and one in Southaven last year.●

IDES OF MARCH FOR THE UNEMPLOYED

HON. ED BETHUNE

OF ARKANSAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 2, 1983

● Mr. BETHUNE. Mr. Speaker, in Rome the oracles warned Julius Ceasar of the Ides of March. Four weeks ago, the administration and the Department of Labor warned the House leadership and Appropriation Committee that money for unemployment benefits would be depleted by March 15, 1983, and requested an urgent supplemental. Nevertheless, instead of working expeditiously, the House leadership chose to sit on the administration's request and pursue other political goals.

As you know, Mr. Speaker, the Congress is poised to consider a so-called jobs bill. Several weeks ago we expected a bipartisan employment initiative but it has been retooled and now is no longer clear cut. Who suffers from the delay? The unemployed who hope for new job opportunities. But, Mr. Speaker, there is a second group of victims—the people who are depending on their unemployment benefit checks. Why? Because the House leadership held up the President's request for unemployment benefit funding so that it could later be included in the jobs bill to make this bill more palatable.

This delay was premeditated and borders on blackmail. Playing political games at the expense of the unemployed is inexcusable. I have written a letter to Chairman WHITTEN of the House Appropriations Committee requesting that supplemental unemployment appropriations be considered quickly and separately. I am sure the Senate would welcome this responsible action. Hopefully, the Ides of March will not be a woeful day for the unemployed.●

HEALTH INSURANCE FOR THE UNEMPLOYED AND THEIR FAMILIES

HON. DOUG WALGREN

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 2, 1983

● Mr. WALGREN. Mr. Speaker, all the jobs and emergency assistance legislation for the unemployed unfortunately seem to ignore one of the most tragic consequences of this economic depression—the brutal fact that millions of Americans are deprived of basic health care because they lose their group coverage when they lose their jobs.

Today I am introducing legislation to establish both an emergency program and a permanent program providing health insurance at affordable rates for up to 18 months after an individual loses his or her job. This bill is the House companion to S. 307 introduced by Senator DONALD RIEGLE of Michigan.

There is a desperate need for quick action in this area. At a recent hearing before the Health and Environment Subcommittee on which I serve, Congressional Budget Office Director Alice Rivlin testified that of the 12 million Americans out of work, 7.4 million had been laid off. Including dependents, this leaves some 10.7 million persons lacking health insurance coverage because of job loss. More are losing coverage every day.

This is a tragedy for both the unemployed workers and their families and the entire health care system in America.

Even though many private company health plans offer conversion options for unemployed workers, the premiums—usually about $200 a month—are out of reach for the worker who must also pay his mortgage, heat a home, and feed a family on an average $700-a-month unemployment check. These workers face two unacceptable options—either delaying and neglecting needed health care or losing their homes and life savings to huge medical bills.

There can be no more tragic a comment on us as a society than the fact that in the State with the highest unemployment, where 400,000 workers lost their health insurance, the infant mortality rate rose for the first time since World War II. Study after study shows that increased unemployment means increased deaths from heart disease, cirrhosis of the liver, and other stress-linked disorders.

Unemployment tremendously strains our health care system. Because unemployed workers postpone treatment until conditions need major, expensive attention, they turn to hospital emergency rooms for treatment. Most cannot pay for this care and the hospital must absorb the cost, adding about $30 a day to the cost for other insured patients.

The Public Health Hospital in Mobile, Ala., has recently shut its door on weekends to everyone because it can no longer afford to treat uninsured patients. Dr. Richard Thompkins of the Seattle Public Health Hospital testified before our Health Subcommittee that "economic realities soon may force us to either turn away people who desperately need our help . . . or close our doors permanently." He warned that we are moving closer to an "unequal two-tiered health care system"—one for those who can pay and another for the elderly, the poor, and the uninsured unemployed.

Mr. Speaker, I believe we are a far better and more decent society than one which would tolerate such a system. My bill establishes a combined Federal, State, and private effort to provide a permanent program of up to 18 months of health insurance coverage for those who are laid off because of economic conditions in the future. In addition, this bill establishes a temporary program to provide up to a year of coverage for those currently unemployed.

This is a modest program—voluntary for the worker and requiring some financial contribution on his part. Yet it is an affordable contribution for someone collecting unemployment and would entitle the unemployed worker and his family to the Federal minimum standard for benefits which would be comparable to those offered under medicare, including comprehensive medical and hospital protection.

The permanent program consists of two parts. First, all employers must continue health insurance coverage for their unemployed workers—under existing payment ratios—for at least 6 months following an involuntary severance. In addition, the employer must participate in a State insurance pool which would provide another year of protection. In the pool, the worker would pay 20 percent of the premium cost—about $20 to $30 a month for family coverage. Workers would be eligible either for pool insurance coverage for up to 12 months after their own coverage expires or for 60 days after they become gainfully employed, whichever comes first. An employed worker would be eligible to participate in this program only if the individual were not eligible for other health insurance protection, such as spousal or paternal insurance, medicare, or medicaid.

The State insurance pools would be regulated by the States, not by the Federal Government. In order to provide additional financing during periods of sustained high unemployment, the legislation provides for Federal contributions to State pools when the

national unemployment rate exceeds 7.5 percent and the State's unemployment rate is 110 percent of the national rate for the previous 6 months.

The emergency insurance program would cover those who have been laid off since June 1, 1981, and who are not eligible for the permanent program. Under this program, the Secretary of Health and Human Services would enroll all eligible individuals on an expedited basis. All individuals eligible for participation in this program would receive benefits equal to the Federal minimum medicare benefits and would pay no more than 20 percent of the premium.

As soon as an insurance pool is established within the unemployed person's State, the administration of the program would shift to the State pool. The individual would continue to pay 20 percent of the insurance premium and, unlike the long-term program, the Federal Government would contribute the remaining 80 percent. The temporary program would be completely phased out as soon as the permanent program is in place.

Mr. Speaker, I favor this approach because it creates no new major Federal programs and utilizes the existing private sector mechanisms for dealing with this critical problem. Because the permanent program is financed by a large number of active employers and employees and benefits a strictly limited population, the cost promises to be manageable.

I am pleased that we have begun to hold hearings on this problem, and am hopeful that the Congress will act quickly before there is further damage and suffering.●

PROMOTING PUBLIC UNDERSTANDING OF SCIENCE

HON. NORMAN Y. MINETA

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 2, 1983

● Mr. MINETA. Mr. Speaker, if we are to reach to the roots of the problem of scientific and technological literacy in America, we must focus on those methods readily available which are both efficient and cost effective. One of these methods is public television programing, which is now available to well over 90 percent of the U.S. population. The public understanding of science program (PUOS) at the National Science Foundation is vital to accomplishing this goal. The language of H.R. 1310, the Emergency Mathematics and Science Education Act, establishes a renewed priority for such programs. In the past, the PUOS has been responsible for programs such as "Nova" and "3-2-1 Contact", the science series for 8- to 12-year-olds.

But while both these programs have attracted wide audiences, they have been unable to secure significant financial support through corporate underwriting. Less than one-fifth of the cost of "Nova" is financed by underwriters; thus, without funding from the PUOS, over four-fifths of the $5 million program must be financed by local public television stations. For "3-2-1 Contact," there is a similar story. Only a single underwriter was available for the first series and there is no underwriting money for the second series, now in production.

The public television station in San Jose, Calif.—KTEH—has faced exactly the same problem in its effort to produce two promising new public television programs, a weekly series "Tommorrow/Today" and 2-hour special entitled "A Quarter Century in Space," designed to air nationwide in conjunction with the 25th anniversary of the creation of NASA next fall. "Tommorrow/Today" was originally produced as a local 13 part series and carried on public television stations in 23 markets. The staff of the Institute of Electrical & Electronic Engineers (IEEE) magazine Spectrum serves as consultants and the IEEE's board has formally endorsed the program and its fundraising initiatives. Unfortunately, after an 18-month effort, the corporate underwriting necessary to produce a new series for nationwide distribution is unavailable. Yet this is exactly the kind of program which could significantly increase our understanding of new technological developments and their impact on our society. The first program of the series addressed ultrasound, medical imaging systems that substitute for X-rays; the history of microelectronics from the transistor to today's tiny silicon integrated circuits, and recombinant DNA. Other programs focused on subjects ranging from computer crime and solar cells to regulations which encourage dumping rather than recycling of hazardous chemicals.

"A Quarter Century in Space" is also being developed in conjunction with the IEEE Spectrum staff. And, like "Tomorrow/Today," it has been unable to attract corporate underwriting. Since it is timed to coincide with the NASA anniversary next fall, it will probably not be produced at all unless corporate support can be found within the next month.

The value of this kind of programing is not limited to viewers at home. Both "Nova" and "3-2-1 Contact" have been widely used in our elementary and secondary schools. With sufficient funding, WNET in New York will join KTEH to develop the instructional packages for in-school use of both programs.

With a revitalized public understanding of science program, programing like this has a renewed chance of actually getting on the air rather than simply gathering dust on the shelves as at present.●

THE DEMOCRATS' CAMPAIGN RHETORIC

HON. JAMES G. MARTIN

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 2, 1983

● Mr. MARTIN of North Carolina. Mr. Speaker, already, four Democrats have declared their candidacies for President, almost 2 years before the election. With the long campaign and an endless river of rhetoric stretching out before us, we would do well to remember these words of Oliver Goldsmith: "The true use of speech is not so much to express our wants as to conceal them." Political speeches in particular must be read with care to find the gulf that divides profession from practice.

Thus, Mr. Mondale told us last week in announcing his candidacy how much he cares about the downtrodden and the unemployed. But he supports domestic content legislation, which would protect jobs of auto workers by taking away the jobs of people in shipping, trade, and other industries, including farming if it triggers a real trade war; and would also force consumers to pay higher auto prices. The Congressional Budget Office has estimated that this legislation would result in a net loss of 66,000 jobs and would raise car prices by an estimated $333 per vehicle. Is that pro-jobs and pro-consumer?

He also talked about the vital importance of education. That is just great; but he refuses to support competency testing for teachers, which would go a long way toward improving the quality of instruction in the Nation's classrooms and the quality of learning.

Jimmy Carter's Vice President confidently declared, "I know how to defend this country." It must be a top-secret plan. All we know about it is that he calls for cutting defense spending, which has had to be accelerated by President Reagan largely because of the neglect of the Carter-Mondale administration. Presumably, we will be stronger and more secure with less. He says he stands behind the Camp David accords, one of President Carter's major achievements, but he denounces President Reagan's Middle East peace plan of last September, which is completely consistent with the accords.

Mr. Mondale was the Vice President of an administration that became synonymous with retreat abroad, inflation and rising taxes at home, and disarray everywhere. He ought to be the candidate of the amnesiacs * * * lest we forget.

I wish to insert in the RECORD a critique of the economic policy paper published by the House Democratic Caucus last autumn. It, too, is an interesting example of political rhetoric. I, for one, intend to make it very clear to the voters during the next 2 years which party, by deeds and not words, is the true friend of the poor, the jobless, the elderly, and of peace.

[From the Washington Times, Nov. 1, 1982]

DEMOCRATS AND THE ECONOMY: AMBITION SEARCHING FOR IDEAS

(By Spencer Warren)

Democratic candidates across the country have found a fertile source of campaign positions in a recent publication of the House Democratic Caucus: Rebuilding the Road to Opportunity: A Democratic Direction for the 1980s. It consists of task force reports on the economy and six other issues. If, as many expect, the Democrats score major gains tomorrow, the economy report in particular will likely serve as the Democratic alternative in the next Congress and as a policy catalogue for the party's presidential aspirants.

Unfortunately, the citizen searching for persuasive alternatives to Reaganomics will not find them here. Nor would he expect to, after reading Caucus Chairman Rep. Gillis W. Long's preface to the reports. Rep. Long, D-La., asked the task forces to "develop from the many philosophies and interests in our party, general consensus positions on the most important national issues." Now, it follows that policies designed to appeal to the "general consensus" will amount to little more than bland nostrums, chosen not on merit, but to avoid giving offense. And that is exactly what the Democrats deliver.

Of course, these cliches and panaceas must be dressed in garb suitable to the ambitions of a great party, one trying to shed its 1980 appearance of being shopworn and out-of-date by conveying a new image of imagination and vitality. Thus, public works spending becomes "Rebuilding the public infrastructure." More social welfare spending is "human investment." And further government interference in the marketplace is the "politics of cooperation," as opposed to the present "politics of confrontation."

The Democrates prescribe a cure for our steady economic decline in terms that paraphrase countless statements of President Reagan, Rep. Kemp and other supply-siders. Thus, "Investment is the key to future economic growth," which is the "cornerstone" of progress. The party's task is "to rekindle the entrepreneurial spirit in America, to encourage the investment and risk taking—in private industry and in the public sector." (The latter is a contradiction—there is no risk where the government has an unlimited resource in taxpayers' dollars; this is one of the Democrats' few new ideas.)

President Reagan was elected on his pledge to stimulate economic growth by reinvigorating investment in the private sector. How do the Democrats now propose to restore the economy's long term capacity to produce? Poking through their lofty phrases, one finally discovers the answer: By increasing government spending. Because they know this would raise too many eyebrows, they call it "investment."

The economy task force, headed by Rep. Timothy E. Wirth, D.-Col., abounds in new plans for extending government direction of the economy. Washington will help "restructure and revitalize our basic manufacturing industries", "expand our high technology growth industries"; "invest in long-term basic research" and "disseminate the benefits of new technologies" (the moribund Synthetic Fuels Corporation comes to mind).

The government will also increase aid to education; renovate the "public infrastructure"; manage the transition of workers from manufacturing to high technology industries; and it will have a new bureaucracy, the "Economic Cooperation Council" for "gathering the facts" and "anticipating problems." All this will restore "the pioneer spirit."

These Democrats have little to say about how they will finance their ambitious ideas to save our country. Budget and tax policy do not interest them very much, occupying only several paragraphs of the report. One of the few statements, on public infrastructure investment, tells us. "The question of how best to finance these programs will have to be resolved in the future." The Democrats' estimates from the Congressional Budget Office amount to $35 to 40 billion a year.

Yet they also say they believe a balanced budget is "very important" and that we must "control federal spending." But one can search page after page of the report without finding a clue as to what, if any programs they would cut, except, perhaps, defense. About all we are told is that "decisions must be made in our spending priorities" and "we must strengthen our congressional budget process and constantly review existing government spending and tax programs."

Thus, the bold new "Direction for the 1980's" will require either a huge tax increase or will result in even worse deficits than those now projected. The Democrats' answer to the crisis of private investment is more government spending. Behind the rhetorical mask of investment and productivity lies a policy of more of the same; a policy whose professed aim is to reduce unemployment and inflation, but whose past short term successes led in the long run to higher unemployment and inflation—and the election of President Reagan.

Are the Democrats the party of the workingman and the hard pressed middle class, as they claim to be? Of the elderly? Are they the party of compassion? In pondering the gulf between their rhetoric and their policies, we should take note of Gibbon's comment on Caesar. "By declaring himself the protector of the people, he had subverted the constitution of his country."●

SENATE COMMITTEE MEETINGS

Title IV of Senate Resolution 4, agreed to by the Senate on February 4, 1977, calls for establishment of a system for a computerized schedule of all meetings and hearings of Senate committees, subcommittees, joint committees, and committees of conference. This title requires all such committees to notify the Office of the Senate Daily Digest—designated by the Rules Committee—of the time, place, and purpose of the meetings, when scheduled, and any cancellations or changes in the meetings as they occur.

As an additional procedure along with the computerization of this information, the Office of the Senate Daily Digest will prepare this information for printing in the Extensions of Remarks section of the CONGRESSIONAL RECORD on Monday and Wednesday of each week.

Any changes in committee scheduling will be indicated by placement of an asterisk to the left of the name of the unit conducting such meetings.

Meetings scheduled for Thursday, March 3, 1983, may be found in the Daily Digest of today's RECORD.

MEETINGS SCHEDULED

MARCH 4

9:30 a.m.
Energy and Natural Resources
Energy Research and Development Subcommittee
To resume hearings on the President's budget request for fiscal year 1984 for the Department of Energy's research and development programs, focusing on nuclear energy programs (other than breeder reactor programs).
SD-366

Joint Economic
To hold hearings on the employment-unemployment situation for the month of February.
SD-628

10:00 a.m.
Finance
To hold hearings on the administration's federalism proposals.
SD-215

Judiciary
To hold hearings on S. 216, proposed Federal Anti-Tampering Act.
SD-226

2:00 p.m.
Appropriations
*Interior and Related Agencies Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1984 for the Economic Regulatory Administration, Energy Information Administration, and the Office of Hearings and Appeals, all of the Department of Energy.
SD-192

MARCH 7

8:30 a.m.
*Appropriations
Labor, Health and Human Services, Education, and Related Agencies Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1984 for the Department of Education.
SD-116

9:00 a.m.
*Judiciary
Constitution Subcommittee
To resume hearings on the legal ramifications of constitutional amendment proposals, including Senate Joint Resolution 3, with the specific goal of reversing the Supreme Court's decision in Roe against Wade, relating to the right to abortion.
SD-226

9:30 a.m.
*Energy and Natural Resources
To hold oversight hearings on the implementation of the Energy Emergency Preparedness Act (Public Law 97-229).
SD-366

10:00 a.m.
Appropriations
Foreign Operations Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1983 for the U.S. Representative to the United Nations, and voluntary contributions to international organizations and programs of the United Nations.
SD-192

Budget
To resume hearings in preparation for reporting the first concurrent resolution on the fiscal year 1984 Congressional Budget.
SD-608

Judiciary
Immigration and Refugee Policy Subcommittee
To resume hearings on S. 529, to revise and reform the Nation's immigration laws.
SR-418

2:00 p.m.
*Appropriations
Business meeting, to consider proposed legislation appropriating funds for job assistance programs, committee report to the Budget Committee, and budget deferrals of the Economic Development Administration of the Department of Commerce, and the Department of Agriculture.
SD-192

MARCH 8

8:30 a.m.
Energy and Natural Resources
Energy Conservation and Supply Subcommittee
To hold hearings to review the President's budget request for fiscal year 1984 for the Department of Energy's conservation and supply programs.
SD-366

9:30 a.m.
Banking, Housing, and Urban Affairs
Housing and Urban Affairs Subcommittee
To hold hearings on proposed legislation authorizing funds for programs of the Department of Housing and Urban Development.
SD-538

Commerce, Science, and Transportation
Science, Technology, and Space Subcommittee
To hold closed hearings on proposed legislation authorizing funds for the National Aeronautics and Space Administration.
SR-253

Energy and Natural Resources
Energy Conservation and Supply Subcommittee
To hold hearings on S. 589, authorizing funds for fiscal year 1984 for capital improvement projects on Guam.
SD-366

10:00 a.m.
Appropriations
Foreign Operations Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1984 for the Export-Import Bank of the United States.
S-126, Capitol

Appropriations
Transportation and Related Agencies Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1984 for the U.S. Railway Association, and Conrail.
SD-138

Environment and Public Works
Environmental Pollution Subcommittee
To hold hearings on S. 431, authorizing funds for fiscal years 1983 through 1987 for clean water programs, and S. 432, extending the 1984 compliance date for certain requirements of the Clean Water Act.
SD-406

Foreign Relations
To hold hearings on the Treaty of Friendship with Tuvalu (Ex. W, 96th Cong., 1st sess.), Treaty of Friendship with the Republic of Kiribati (Ex. A, 96th Cong., 2d sess.), Treaty with Cook Islands on Friendship and Delimitation of the Maritime Boundary (Ex. P, 96th Cong., 2d sess.), and the Treaty with New Zealand on the Delimitation of the Maritime Boundary between the United States and Tokelau (Treaty Doc. 97-5).
SD-419

Labor and Human Resources
Education, Arts, and Humanities Subcommittee
To hold hearings on the proposed Education for Economic Security Act, and to review math and science education programs in elementary and secondary schools.
SD-430

Select on Intelligence
Budget Authorization Subcommittee
To resume closed hearings on proposed legislation authorizing funds for fiscal year 1984 for the intelligence community.
S-407, Capitol

Joint Economic
To resume hearings to examine the impact of the President's new federalism program on State and local government.
2212 Rayburn Building

11:30 a.m.
Veterans Affairs
To hold hearings to receive legislative recommendations for fiscal year 1984 from the Veterans of Foreign Wars.
SR-325

2:00 p.m.
Appropriations
Interior and Related Agencies Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1984 for the Holocaust Memorial Council, and the National Endowment for the Arts.
SD-192

Appropriations
Energy and Water Development Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1984 for energy research and environment programs of the Department of Energy.
SD-192

Foreign Relations
African Affairs Subcommittee
To hold hearings on United States/African relations.
SD-419

Small Business
To hold oversight hearings on the implementation of the Federal minority business development program of the Small Business Administration.
SR-428A

Select on Intelligence
Budget Authorization Subcommittee
To continue closed hearings on proposed legislation authorizing funds for fiscal year 1984 for the intelligence community.
S-407, Capitol

MARCH 9

8:30 a.m.
*Appropriations
Labor, Health and Human Services, Education, and Related Agencies Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1984 for elementary and secondary education, education block grant, and impact aid.
SD-116

9:00 a.m.
Commerce, Science, and Transportation
Communications Subcommittee
To hold hearings on S. 607, authorizing funds for fiscal years 1984 and 1985 for the Federal Communications Commission.
SR-232A

9:30 a.m.
Agriculture, Nutrition, and Forestry
Soil and Water Conservation Subcommittee
To hold hearings on proposed legislation providing for soil and water conservation programs.
SR-328A

Commerce, Science, and Transportation
Science, Technology, and Space Subcommittee
To continue hearings on proposed legislation authorizing funds for the National Aeronautics and Space Administration.
SR-253

Energy and Natural Resources
To hold hearings on S. 615, providing for a free market to establish long-term incentives to produce and market ample natural gas supplies at a reasonable cost, and related measures, including S. 60, S. 239, S. 291, S. 293, and S. 370.
SD-366

Governmental Affairs
Permanent Subcommittee on Investigations
To hold closed hearings to investigate alleged involvement of organized crime and mismanagement of funds in the hotel and restaurant workers union (HEREIU).
SD-342

10:00 a.m.
Appropriations
Foreign Operations Subcommittee
To hold hearings to review the current status of the multilateral development banks of the Department of the Treasury.
SD-192

Appropriations
Transportation and Related Agencies Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1984 for the Architectural and Transportation Barriers Compliance Board, and the Office of the Inspector General and the Office of the Secretary, Department of Transportation.
SD-138

Banking, Housing, and Urban Affairs
Housing and Urban Affairs Subcommittee
To continue hearings on proposed legislation authorizing funds for programs of the Department of Housing and Urban Development.
SD-538

Environment and Public Works
Environmental Pollution Subcommittee
To continue hearings on S. 431, authorizing funds for fiscal years 1983 through 1987 for clean water programs, and S. 432, extending the 1984 compliance date for certain requirements of the Clean Water Act.
SD-406

Foreign Relations
To hold hearings on proposed authorizations for the Department of State, and the U.S. Arms Control and Disarmament Agency.
SD-419

Judiciary
Security and Terrorism Subcommittee
To hold oversight hearings on the U.S. Attorney General's domestic security investigative guidelines.
SD-226

Labor and Human Resources
Education, Arts, and Humanities Subcommittee
To continue hearings on the proposed Education for Economic Security Act, and to review math and science education programs in elementary and secondary schools.
SD-430

Veterans' Affairs
To hold hearings on proposed legislation providing for veterans' health care services.
SR-418

1:30 p.m.
Commerce, Science, and Transportation
Science, Technology, and Space Subcommittee
To resume hearings on proposed legislation authorizing funds for the National Science Foundation.
SR-253

2:00 p.m.
Appropriations
Interior and Related Agencies Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1984 for the National Park Service of the Department of the Interior.
SD-192

Foreign Relations
European Affairs Subcommittee
To hold hearings on U.S./European relations.
SD-419

Judiciary
To hold hearings on pending nominations.
SD-226

Small Business
Business meeting, to mark up S. 499, to require the usage of tax-exempt financing in connection with the Small Business Administration's section 503 Certified Development Company program.
SR-428A

MARCH 10

8:30 a.m.
*Appropriations
Labor, Health and Human Services, Education, and Related Agencies Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1984 for vocational and adult education, education for the handicapped, and rehabilitation services and handicapped research.
SD-116

9:00 a.m.
Commerce, Science, and Transportation
To resume hearings on proposed legislation authorizing funds for fiscal year 1984 for the National Oceanic and Atmospheric Administration, Department of Commerce, focusing on fisheries programs.
SR-253

9:30 a.m.
Appropriations
Commerce, Justice, State, the Judiciary, and Related Agencies Subcommittee
To hold hearings to receive testimony from the Secretary of Commerce on the overall budget for the Department of Commerce, and on proposed budget estimates for fiscal year 1984 for general administration, Economic Development Administration, International Trade Administration, U.S. Travel and Tourism Administration, Patent and Trademark Office, National Telecommunications and Information Administration, National Bureau of Standards, Minority Business Development Administration, Economic and Statistical Analysis, and the Bureau of the Census.

SENATE—*Thursday, March 3, 1983*

(Legislative day of Wednesday, February 23, 1983)

The Senate met at 10:30 a.m., on the expiration of the recess, and was called to order by the President pro tempore (Mr. THURMOND).

The PRESIDENT pro tempore. Our opening prayer this morning will be offered by the Rev. Richard C. Halverson, Jr., son of the Senate Chaplain.

PRAYER

The Rev. Richard C. Halverson, Jr., Arlington, Va., offered the following prayer:

Our Father which art in Heaven, as the grateful son of one who serves this Senate and with the conviction that everything we accomplish here rests ultimately upon the foundation of the family, I pray You will turn the hearts of the parents in this place to their children and the hearts of the children to their parents. For You have taught that where our heart is, there will be our treasure also.

We ask this favor in the name of Jesus Christ who, far from making it on His own, chose rather to identify himself summarily as the Son of God, the Son of Man. Amen.

RECOGNITION OF THE ACTING MAJORITY LEADER

The PRESIDENT pro tempore. The acting majority leader is recognized.

THE JOURNAL

Mr. STEVENS. Mr. President, I ask unanimous consent that the Journal of the proceedings of the Senate to date be approved.

The PRESIDENT pro tempore. Without objection, it is so ordered.

ORDER OF PROCEDURE

Mr. STEVENS. Mr. President, it is my understanding that at 12 noon, the Senate will go into executive session for the purpose of considering the Executive Calendar Order No. 3, the amendment to the 1972 protocol to the 1982 convention concerning international expositions and that treaty will be considered under a 20-minute time limitation. Is that correct?

The PRESIDENT pro tempore. The Senator is correct.

ORDER FOR PERIOD FOR TRANSACTION OF ROUTINE MORNING BUSINESS

Mr. STEVENS. Mr. President, I ask unanimous consent that following the recognition of the two leaders under the standing order and the special orders for Senators BYRD, SARBANES, PELL, BIDEN, and myself, there be a period for the transaction of routine morning business not to extend beyond the hour of 12 noon, in which Senators may make speeches therein for not more than 3 minutes each.

The PRESIDENT pro tempore. Without objection, it is so ordered.

(Mr. WARNER assumed the chair).

SENATE SCHEDULE

Mr. STEVENS. Mr. President, after the disposition of the treaty that is already scheduled, the Senate will be asked to consider nominations on the calendar that have been cleared for floor action. We do expect rollcall votes today.

When the Senate adjourns today to reconvene Monday, March 7, by order of the Senate, debate will occur on the Montreal Protocol Aviation Treaty and the nomination of Lewis Arthur Tambs to be Ambassador to Colombia. Votes on these two items will occur on Tuesday.

The Senate may also be expected to take up the supplemental/jobs bill during the course of next week. It will be marked up in the Appropriations Committee starting tomorrow morning.

There are a number of other items that will need to receive consideration prior to the Easter recess. The majority leader has announced that he wishes to complete the supplemental jobs bill, the social security reform bill, and the budget resolution before recessing for Easter. I believe all Senators must be on notice that during consideration of any of those items, there may be a late night, and Saturday sessions are possible. There will be no normal schedule in the evenings.

Mr. President, there may be late nights each night that any of those three items is on the floor, because we are committed to ccmpleting action on those three if at all possible prior to the time for the Easter recess.

REOPENING ALASKA LANDS TO HUNTING

Mr. STEVENS. Mr. President, I would like to take just a moment to discuss a matter of great importance to Alaska. Senator MURKOWSKI and I have introduced Senate bill 49, which would reclassify 12 million acres of national park in Alaska to national park preserve. The only difference between national parks and national park preserves is that hunting under State law is permitted in national park preserves.

The purpose of this bill is to restore to hunting, lands that were closed by the Alaska National Interest Lands Conservation Act of 1980. There are those who do not understand the issues involved in this bill. I would like to take just a moment of the Senate to clarify the situation.

This bill is of great concern to a large number of Alaskans and to hunters all over the country. ANILCA closed over 24 million acres of Alaska land to sports hunting or hunting under Alaska law. Those areas had historically been prime hunting areas. When ANILCA was passed, however, subsistence hunting was allowed to continue in the new national parks in Alaska.

Subsistence hunting is not defined by need but rather by where a person lives. What this means is that the person in Glenallen may hunt in one of the new national parks, but a person residing in Anchorage or Fairbanks would be denied that same privilege. The inequity has understandably made many Alaskans extremely upset.

But the issue is also one of national concern. Many hunting organizations viewed the Alaska lands bill as a statement by Congress opposing hunting. Their reaction is understandable. We closed millions of acres of prime hunting grounds to hunting under Alaska law without any good reason.

I say without any good reason because, as I said before, hunting is taking place. Subsistence hunters are allowed to hunt on these park lands. They must hunt on these park lands, because there is no other meat supply. The areas that our bill would open are literally miles from any tourist spot. Use by hunters would not conflict with the use of the park by others.

Hunting does not pose a threat to the wildlife populations. To the contrary. The Alaska fishing and wildlife agencies keep a constant watch on wildlife populations to insure that they are able to maintain the species and to have the normal rate of reproduction. Hunting is required in many of the areas of our State to bring about proper wildlife management and balance.

It is not often that Congress is presented legislation in which it is clear that the benefits of the bill far out-

weigh negative aspects of it. Our bill is such a bill. By reopening these lands to hunting, by recognizing the interests of sportsmen in Alaska and across the country, we literally will not harm anyone but will right a wrong that was done when ANILCA was passed.

Recently, a number of publications around the country have come out in support of our bill. I ask unanimous consent that these editorials that are representative of the support in the country be printed in the RECORD at this point. I call specific attention to an editorial in favor of our bill that appeared in the San Francisco Chronicle; another one that appeared in the American Hunter magazine; and another that was printed in the Dallas Morning News.

There being no objection, the editorials were ordered to be printed in the RECORD, as follows:

[From the San Francisco Chronicle, Feb. 14, 1983]

EDITORIAL: HUNTING IN ALASKA'S WILDS

Alaska's congressional delegation is pushing for enactment of legislation that will open up 12 million acres in the rugged remoteness of this spectacular state's national parks to hunting and trapping. At first impression, this is the kind of thing that invokes the indrawn breath of exasperation and displeasure that is standard reaction to any increased killing of wild animals. Closer inspection, however, demonstrates considerable validity to the Alaskans' action.

It is important to note that the change would affect only remote areas which were traditionally hunted until withdrawn by the Carter administration in 1978, and are still being hunted by natives of this wild region for subsistence purposes. The Alaska lands act, which became law in 1980, established more than 43 million acres of new national parks and monuments, 24 million of which were closed to sport hunting. Hunting is not permitted in national parks, but is allowed in park preserves. The legislation introduced by Senators Ted Stevens and Frank Murkowski and Representative Don Young would change the designation of the acreage in question to allow hunting.

Murkowski, a vigorous, articulate senator with clear devotion to the special qualities that his state has in abundance, emphasizes that the measure will allow Alaska to manage the wildlife resources there "for the benefit of the species and use by Alaska's hunters." How does it benefit a species to allow it to become possible prey to the hunter's rifle and the trapper's snare?

Well, pro-hunting groups maintain that hunters are active and dependable conservationists who practice their sport in compliance with state regulations and do not impair the wildlife resource. They are not like those dreadful ivory pirates who kill elephants in Africa for outlaw profits. The International Association of Fish and Wildlife Agencies, which is an association of state government wildlife agencies, maintains that hunting is "an absolute necessity for the proper management and well-being of many wildlife populations."

Sportsmen's license fees and excise taxes on sporting equipment provide the financial base for conservation programs, habitat acquisition, research and other wildlife programs throughout the United States—to the tune of $500 million a year.

What this legislation does is to preserve hunting patterns that have been traditional in Alaska. As Congressman Young put it: "We are doing nothing new here, only trying to put back in the rights of people to hunt where they have always."

In a state like Alaska, where it takes an accomplished and dedicated outdoorsman to get out to the hunting grounds, that can hardly be a great transgression. And because the hunting season does not begin until the fall, there will be little conflict between hunters and other recreational users like backpackers who tend to visit the areas in the summer.

This legislation will affect only 35 percent of the current national parklands in Alaska. The remaining 20 million acres will be closed to sport hunting. So this is no carte blanche for men and women with guns and traps. There will still be an outright ban in many sections of the state. And an important way of life that supports realistic conservation in this state will be preserved. That would seem solid reason to look on what the Alaskan delegation is doing with a sympathetic eye.

[From the American Hunter, February 1983]

EDITORIAL

Three years ago, American hunters and trappers suffered a major setback when Congress passed the Alaska National Interest Lands Conservation Act of 1980. This act designated some 25 million acres of federally owned game lands as national parks or monuments and closed them to hunting and trapping.

This year, American sportsmen could win back hunting rights on almost half the lands locked away back in 1980. Proposed legislation that would reopen nearly 12 million acres of prime big game habitat is to be introduced during the 98th Congress. Called the Alaska National Hunting Bill, the legislation will be introduced in the Senate by two Alaska Republicans—Assistant Majority Leader Ted Stevens and Sen. Frank Murkowski—and in the House by Rep. Don Young (R-Alaska). Committee action on the bill is expected in March and April.

If the bill is signed into law, hunting would again be allowed in some of the key big game regions in the state. Hunting is allowed in national park preserves but not in national parks or national monuments, so the single purpose of the Alaska National Hunting Bill is to reclassify these game-rich areas as national park preserves.

The Wildlife Legislative Fund of America (WLFA) is spearheading lobbying and media efforts in support of the bill, but the bill has won widespread backing from other important hunting and conservation organizations. Along with the NRA, the Foundation for North American Wild Sheep, Game Conservation International, The International Association of Fish and Wildlife Agencies, Fur Takers of America, and Mzuri Safari are working to win public and congressional support of the Alaska National Hunting Bill.

But even with the endorsement of these national lobbying groups, the bill probably won't pass unless it has *your* support. Many hunters may never be able to afford a big game hunt in Alaska and may believe, therefore, that this bill has no immediate effect on them or their hunting rights. But the consequences of this legislation extend well beyond the reopening of several Alaska game lands.

In effect, when a congressman votes on the Alaska National Hunting Bill, he will be saying "yes" or "no" to sport hunting in the United States. A "yes" vote will be an endorsement of sport hunting as a valuable recreational activity and wildlife management tool. A "no" vote will be a slap in the face to America's 20 million hunters and will set a dangerous precedent for the future.

As Daniel M. Galbreath, WLFA Board Chairman, has put it, "The outcome (of the bill) will determine the status of hunters in Congress for at least the next decade and will be a factor in every hunting-related bill that comes before Congress, and state legislatures, thereafter."

It's easy to see that the Alaska National Hunting Bill may be the most important hunting-related legislation in decades. A victory for the anti-hunters will no doubt strengthen their crusade to wipe out hunting and trapping.

But if sportsmen band together now, we can win back some of what has been lost to the anti-hunters, and we can ensure that in the future our voices will be heard above theirs.

You can help protect your right to continue to hunt by writing your senators and representatives. Urge them to vote "yes" on the Alaska National Hunting Bill. If you don't know your congressmen's names, just call or write NRA's Institute for Legislative Action. We'll let you know the outcome of the vote in a future issue.

[From Petersens' Hunting, December 1982]

EDITORIAL

Since many of our editorials seem to deal with "doom and gloom" subjects, once in a while it is nice to be able to relate a little good news. And such appears to be the case with legislation that has been introduced in the Senate and House of Representatives by the Alaska Congressional delegation.

The net effect of this legislation would be to open up approximately 12 million acres in remote areas of Alaska's national parks to sport hunting. This legislation would affect only remote areas, which traditionally were hunted until the Carter administration's infamous "land grab" of 1978. These lands are still hunted today, but only for subsistence purposes.

As we can all too well remember, the Alaska lands act became law in 1980, establishing more than 43 million acres of new national parks and monuments in Alaska, 24 million acres of which were closed to sport hunting. This, by the way was in addition to about 7.5 million acres of parks and monuments that existed prior to 1980. Sport hunting is not permitted in national parks and monuments, but is permitted in national park preserves.

The legislation introduced by Senators Ted Stevens and Frank Murkowski as S. 2836 and by Congressman Don Young as H.R. 6977 would change the designation of about 12 million acres from park to park preserve.

"We're not suggesting opening areas such as old McKinley Park, where hunting has not been permitted for years and the number of visitors is high," Stevens said. "We foresee little or no conflict between hunters and other recreational users. Most backpackers and other non-hunters visit these areas in the summer, whereas most hunting does not begin until the fall."

Murkowski said the bill would not allow any other use of the proposed park pre-

serves or make any changes in the protection granted to the remaining park lands. "Today's action affects 35 percent of the current national park lands in Alaska. The remaining 20 million acres will continue to be closed to sport hunting," he said. "This bill would enable the state of Alaska to manage the wildlife resources for the benefit of the species and use by Alaska's hunters."

A companion bill to both the House and Senate measures would compensate sport-hunting guides for loss of income as a result of hunting restrictions imposed in the Alaska lands act. At last count, nearly 100 guides were hurt by the federal designation of lands as non-hunting areas.

The limitations on hunting in Alaska, according to Senator Stevens, were motivated by two factors: "Anti-hunting sentiment, and a belief that park visitation and sport hunting are two uses which conflict." Stevens says very few backpackers and other non-hunting visitors ever venture into remote Alaska. "It is patently inequitable that a handful of visitors to these parks are effectively granted the exclusive right to use vast, multimillion-acre areas purportedly set aside for the benefit of all Americans."

While both the Senate and House bills have been referred to committee, the acreages to be reopened as specified in the present bills are: Katmai—brown bear, moose, caribou, lynx, beaver, wolf, and wolverine; Gate of the Arctic—Dall sheep, grizzly bear, moose, caribou, wolf, wolverine, marten, and lynx; Lake Clark—moose, caribou, Dall sheep, and brown (Kodiak) bear; Wrangell-Saint Elias—Dall sheep, moose, grizzly bear, mountain goat, bison, lynx, beaver, wolf, and wolverine; Denali—Dall sheep, grizzly bear, moose, black bear, caribou, beaver, wolverine, wolf, mink, marten, and lynx; Kenai Fjords—mountain goat, black bear, and brown bear; Glacier Bay—mountain goat and brown bear; Aniakchak—brown bear and moose.

While legislation such as this is certainly needed, we hunters are not assured of its passage unless all of us in the lower 48 states become active and get involved quickly. Congress will certainly be subject to a lot of heavy lobbying from the anti-hunting interests. We muct not continue to remain along the sidelines. We much let our Representatives and Senators know that we support the moving of these bills out of committee and passage by the full Congress. Thousands of letters are needed immediately! In addition, the Wildlife Legislative Fund of America (WLFA) is organizing a million-dollar national lobbying campaign in support of this legislation. Contributions should be sent to the WLFA National Headquarters, 50 W. Broad St., Columbus, OH 43215.

[From the Dallas Morning News, Feb. 14, 1983]

HUNTING BILL MORE THAN PERSONAL

(By Andy Anderson)

For some, the attempt to restore hunting privileges on millions of acres of Alaskan wilderness is very real and very personal.

But for the majority, the fight will be symbolic.

Those from the "lower 48" who hunt or would like to hunt Alaska, and those Alaskans who make their living from hunting, know that the bills being introduced in the U.S. House and Senate will affect them personally. Personally, for many, means in the pocketbook.

Others, who may never set foot in Alaska but hunt or have hunting and pro-firearms sympathies, realize that the anti-hunting forces consider the Carter administration's Alaska Lands Act of 1980 one of their greatest victories.

Thus, the 1983 "Alaska National Hunting Bill"—it is H.R. 900 but not yet introduced in the Senate—may be the most significant hunting issue since Daniel Boone's era. It is certainly one that hunters will want to watch and about which they'll want to communicate with their U.S. senators and representatives.

"I want to emphasize that this bill we are introducing provides for hunting and trapping only—no drilling, mining, timber cutting or access roads," said Senator Frank Murkowski, who with Senator Ted Stevens and Congressman Don Young (all of Alaska) is introducing the bill. "The bill must be clear. If it comes out with amendments on it, it is not going to go anywhere. We will advise our colleagues to kill it on the floor."

Murkowski, touring Dallas, Houston and other points drumming up support for the bill, is being accompanied by a representative of the Wildlife Legislative Fund of America, a strong sportsmen's lobbying organization. The bill, the senator points out, opens no new territory in Alaska, but would restore some 12 million acres of the 25 million declared off-limits to hunting and trapping by the sweeping act in 1980. Technically, it would convert the acreage from "parks," in which there is no hunting, to "park preserves," where hunting is permitted.

"At the time of the 1980 act, I was not in the Senate," Murkowski said. "But committee members (he is on the Energy and Natural Resources Committee) indicate to me that the intention was to restore hunting to much of the land that the D-2 bill (Carter administration) set aside as National Parks.

"But late in the session with the entire bill in danger (all of the land would have reverted to non-wilderness status had Congress adjourned without taking some action) and time running out, it was decided that more amendments would kill it.

"We came back with the bill to restore hunting on some of the land last year, but again time ran out. This is the very same bill.

As Murkowski points out, hunting and fishing have never ceased in the areas that the 1980 Act put into National Park sanctuaries. Subsistence hunting is allowed. Contrary to popular belief, subsistence recipients are certified by the size of the towns and villages in which they live, not by native origin.

"The point is that hunting is not being managed properly, if at all. These areas are under the National Park Service now, and they don't have the expertise or personnel to manage and regulate the hunting in them.

"The point we want to make," Murkowski continued, "is that by opening up 12 million acres of the 25 million that was open prior to 1980, we can better manage the fish and game. It will take some of the pressure from surrounding areas that are getting too much pressure and distribute it more equally. We think there are sound biological reasons for this type of legislation."

The senator points out that in an area one-fifth the size of the lower United States, there are 32 million acres exempt from any hunting. In all the rest of the United States, there are but 30 million acres exempt from hunting.

The sponsors, anticipating the attacks from environmentalists and the anti-hunting forces, are stressing that hunting in Alaska is not an environmental issue and conflicts only slightly with other outdoor activities, including backpacking. The sites designated in the bill are remote and many miles from visitor centers and hiking trails.

"And the major hunting seasons in Alaska do not begin until the fall, when the bulk of the tourist season is over," Murkowski said.

Alaskans, who with state forces have done a far better and more balanced job of game and fish management since statehood than the U.S. did before, generally approve the restoration of the hunting areas. Numerous outfitters, guides and resorters were put out of business by the 1980 ban.

The battle won't be easy. It is a symbolic issue with anti-hunters. Danial M. Galbreath, board chairman of the Wildlife Legislative Fund of America, has no doubt about what it all means.

"Closing some of the best hunting and trapping land in the world for no rational purpose stands as a permanent monument to the success of the antihunting movement. It bitterly rankles sportsmen in every corner of the country, most of whom will never set foot in Alaska. Reopening the areas to hunting and trapping is of interest to American sportsmen universally."

There are many in Dallas and North Texas who were properly rankled by the measure in 1980 and who have not rested in their efforts to repeal all or part of the measure.

They, as individuals and as members of hunting and conservation organizations, will be writing, calling and wiring their elected representatives in Washington.

Murkowski hopes many more Texans will join them.

Mr. STEVENS. Mr. President, I intend to offer similar comments about this bill at later times.

I yield to the distinguished President pro tempore.

Mr. THURMOND. Mr. President, I thank the distinguished Senator from Alaska.

THE INDEX OF LEADING ECONOMIC INDICATORS

Mr. THURMOND. Mr. President, there is some particularly good news circulating around Washington this morning about the economy: The long recession, which has robbed so many Americans of their jobs and dreams, is apparently over.

The "Index of Leading Economic Indicators," the gage most economists use in determining the health of our economy, showed its strongest 1-month gain in the last 33 years. Public and private economists hailed the new statistics as a firm indication that our economy is improving and that the recession is at an end.

Mr. President, this is undeniable evidence that President Reagan's economic recovery program is working. When we embarked on the project of strengthening the economy 2 years ago, we knew that real and lasting recovery would take time. Problems still remain, such as unemployment, but

the "Index of Leading Economic Indicators" shows that there is indeed light at the end of the tunnel.

I commend the President for hanging tough in his fight to turn the economy around. I know that he remains committed to further lowering of interest rates and the Federal deficit and insuring that the recovery is sustained.

An article in this morning's edition of the Washington Times provides more information about the recovery, and I ask unanimous consent that it be printed in the RECORD at this point.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

[From the Washington Times, Mar. 3, 1983]

ECONOMIC RECOVERY SEEN STRONGER THAN EXPECTED

The recession is over, the government and analysts agree.

The Commerce Department's Index of Leading Economic Indicators surged 3.6 percent in January, the strongest one-month gain in nearly 33 years, spurring government officials and private economists to proclaim with an air of certainty that the economy is on the mend.

President Reagan called the news "a bright green light for recovery (and) compelling new evidence that the economy is rapidly gaining strength."

And Martin Feldstein, chairman of the President's Council of Economic Advisers, said that the report "confirms that January was the turning point."

In terms of overall economic performance, Feldstein called January one of the strongest months in the past decade.

In other favorable economic news:

The Dow Jones Average placed the stock market at a record high of 1,135.06.

Sales of new homes in January increased 10 percent from December (Story on page 4B).

Consumer confidence, a highly reliable indicator of future economic events registered a solid gain in February (Story on page 5B).

The value of new construction contracts, while declining slightly in January, remained close to the three-year high reported a month earlier (Story on page 4B).

The index of leading indicators, which tends to predict future movements in the economy, increased 3.6 percent to 146.3 percent of its 1967 average, the Commerce Department reported.

In addition, the coincident index, a measure of the current state of the economy, also turned upward, by 0.6 percent in January following a 0.2 percent decline in the December.

The index of leading indicators is an average of 10 separate economic reports including length of the average workweek, new manufacturing orders, money supply and stock prices.

In interpreting the report, Commerce Secretary Malcolm Baldrige cautioned that the size of the increase should not be taken "as a sign of a coming economic boom."

Nearly one fourth of the overall rise in the leading index was caused by M2—the money supply as measured by currency and checking account balances—which increased by 2.3 percent in January. Most of the M2 bulge was the result of recently introduced new money market accounts at banks and savings and loan associations.

Analysts also attributed much of the January increase to unusually mild weather that month.

Nevertheless, most economists were encouraged that improvement in the index was broad based with only one of the 10 components—orders for new plant and equipment—showing a decline.

Even if the numbers project a stronger signal than is actually justified, "still it is a healthy increase," said Donald Straszheim, senior vice president of Wharton Econometric Forecasting Associates in Philadelphia.

He added, "Any doubts that the economy will continue to turn upward have been erased by the prospect of lower oil prices."

David Ernst, vice president of Evans Economics Inc. in Washington, said, "The recession is over and recovery has definitely begun."

But he cautioned that the strength of the recovery had moderated in January and warned against expecting a "full-fledged boom."

Donald Maude, a senior economist for Merrill Lynch, Pierce, Fenner & Smith, the New York brokerage house, said the report gives no indication of the strength of the upturn now in progress.

Official government forecasts call for a weak-to-moderate economic recovery with unemployment remaining high throughout 1983. But lately, a number of economists in and out of government have said the economic expansion will be more robust than originally anticipated.

Mr. STEVENS. Mr. President, if there is any time remaining, we yield it back.

RECOGNITION OF THE MINORITY LEADER

The PRESIDING OFFICER. The minority leader is recognized.

Mr. BYRD. Mr. President, I thank the Chair.

The distinguished acting Republican leader characteristically offered me more time, and I am grateful to him. I think I will have sufficient time.

I have 15 minutes, I believe, do I not, as a special order?

The PRESIDING OFFICER. In addition to the leadership time, there is a special order for the Senator from West Virginia.

Mr. BYRD. Mr. President, I ask for recognition on my order. I reserve such time from my standing order as I may need in addition to the 15 minutes, and I shall yield back the remainder.

RECOGNITION OF SENATOR BYRD

The PRESIDING OFFICER. Under the previous order, the Senator from West Virginia (Mr. BYRD) is recognized.

ARMS SALES TO THIRD WORLD COUNTRIES

Mr. BYRD. Mr. President, fiscal year 1982 marked the first full year of the administration's conventional arms transfer policy. During this period, the United States sold 21.5 billion dollars' worth of arms abroad, of which $15 billion was sold to countries other than NATO, Japan, New Zealand, and Australia. The administration has established new records in arms sales abroad in terms of dollar volume, levels of sophistication of weapons being transferred, and the customers gaining access to high-technology arms. During the same period of time, the Soviet Union transferred an estimated $9 billion in arms to so-called developing nations.

Judging from the administration's preliminary estimates for arms sales during fiscal year 1984, it appears that next year also will set records for the transfer of U.S. arms abroad. The fiscal year 1984 request for foreign military sales credits and grant military aid will amount to $600 million more than current levels.

The staff of the Senate Democratic Policy Committee has completed a study of the administration's arms sale policy. Included in that analysis is a case study of the F-16 program. This case study of the F-16 discusses several serious problems associated with a policy which is aimed at transferring top-of-the-line U.S. military equipment to countries who may not share common security goals with our own Government.

The case study focuses particularly on the sale of 40 F-16's to Pakistan. The administration justified the sale of F-16's and a sophisticated air defense system to Pakistan on the gounds of the Soviet threat, particularly the threat emanating from Afghanistan. Yet, 80 percent of Pakistan's army is located at, or near the Indian border, where it also maintains its air bases. Continuing Pakistani research on nuclear weapons development contravenes official U.S. policy, and raises questions about the sale of an aircraft that can be used as a nuclear delivery platform, such as the F-16.

The security of U.S. equipment is a concern which should be shared by all in our Government. The Pentagon shares this security concern, particularly as it relates to the F-16 sales to Pakistan. Last November, a dispute erupted between the United States and Pakistani Governments over the avionics configuration of the F-16's Pakistan had purchased. The Pakistanis believed they were purchasing the standard U.S. Air Force F-16 and refused delivery of the first six when they found out they would not receive state-of-the-art electronic equipment for detecting enemy ground and airborne radar. The New York Times reported on November 30, 1982, that U.S. Air Force officials "did not want to provide the advanced equipment because of the need to protect its security."

However, the administration overruled these objections and agreed to provide the most sophisticated version of the F-16 to Pakistan. This turn of events precipitated concern on the part of the Congress that the original FMS notification submitted by the administration did not indicate that Pakistan would receive state-of-the-art U.S. avionics equipment.

In addition, the Congress approved the Pakistan sale on the basis that the bulk of the $1.1 billion in financing would be provided by Saudi Arabia. However, on November 30, 1982, the administration submitted a reprogramming notice to the Congress for FMS credits in the amount of $150 million for Pakistan. Of that amount, $120 million was to be used for payments on the six F-16's due in Pakistan in mid-December.

Because the Saudis were not forthcoming in financing the first six F-16's, their participation in the funding of the program has been called into question. Since it is apparent that Pakistan will not be able to repay the FMS loans made available for the F-16 program due to its already burgeoning debt, the burden may and will likely fall on the U.S. taxpayer.

Finally, the delivery of the first six F-16's on an accelerated basis resulted in a diversion from Dutch and Belgian inventories in order to repay the United States for the six delivered from our inventory. Since the administration has agreed to an accelerated delivery schedule for the entire Pakistan program, further diversions are likely.

The F-16 case study also discusses the fact that the sales require that uniformed armed services personnel and private American contractors be sent to recipient countries to provide technical support and assistance because the purchasers do not have the skilled manpower to service this equipment themselves. There is also reason to believe that private contractors are hiring technicians away from the U.S. Air Force to assist in supporting these overseas sales. Therefore, our own military is not recouping the cost of the extensive training these technicians must receive. This may impact upon the ability of the Air Force to maintain a sufficiently skilled manpower base to service our own defense requirements. The administration has not reported to the Congress the full impact of these practices on our own combat readiness.

Mr. President, before we approve the administration's request for arms sales during fiscal year 1984, I am convinced that it is time for Congress to devote close scrutiny to this program. We must ask ourselves whether the sales of our top-of-the-line equipment to developing countries serves to enhance or jeopardize basic U.S. defense and security interests. We must question seriously the effects of such major increases in taxpayer-financed lending for foreign government arms purchases on future liabilities being incurred by the U.S. Government, particularly as they relate to the already onerous debt burdens of many developing countries.

For these reasons, the distinguished ranking member of the Committee on Foreign Relations (Mr. PELL) and the distinguished Senators from Delaware (Mr. BIDEN) and Maryland (Mr. SARBANES) will be joining me to introduce a series of amendments to the Arms Export Control Act aimed at remedying these problems.

Mr. President, we urge our colleagues to give careful attention to this study. We believe it serves as a sound basis for a more intensive congressional scrutiny of our arms sale policy.

In conclusion, I want to express my personal appreciation to the three distinguished members of the Committee on Foreign Relations (Mr. PELL, Mr. BIDEN, and Mr. SARBANES) for their participation in the release of this study.

I ask unanimous consent that the F-16 case study be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

F-16 SALES ABROAD: A CASE STUDY

(By Kevin Nealer and Dick McCall)

The Reagan Administration's $21.5 billion foreign military sales program for FY 1982 is the largest arms transfer package in U.S. history. It sets new records for total dollar volumes, kinds of customers receiving weapons, and levels of sophistication of defense materials being sold. In light of the Falkland Islands War, even Great Britain is rethinking its arms sale practices, having sold Argentina $200 million in military hardware prior to the outbreak of the conflict.

Administration spokesmen continue to stress the commitment to a growing and aggressive U.S. arms sales policy. Despite the lessons of the Falklands and recent Mideast fighting, they still hold fast to the so-called Nixon (Guam) Doctrine: that U.S. surrogates with high technology weapons will police our interests in the developing world.

The centerpiece for the Administration's policy in the Third World appears to be the F-16, the ultimate stamp of approval for developing country customers. The U.S. Air Force's highly advanced fighter is one of the most maneuverable, versatile tactical aircraft in the world today. Its sophisticated fly-by-wire flight controls, high "g" cockpit, and powerful afterburning turbofan engine incorporate the latest electronic and engineering advances. It can carry nuclear or conventional air-to-surface ordnance, and can utilize the all-aspect AIM-9L "Sidewinder" missile for air-to-air combat superiority. The F-16 may soon be equipped with even more sophisticated conventional weapons and defense systems.

The Carter Administration first introduced the sale of F-16s abroad on a restrict basis, limited to select NATO countries, Israel, and Egypt. Now the Reagan Administration has added Pakistan, Venezuela, and South Korea to the list of buyers. Of these, only the Korean sale will follow a normal delivery schedule. The other sales are to be made on an accelerated basis, contrary to the timetable that USAF officials have described in testimony and planning documents as being necessary to avoid critical U.S. inventory shortages. Democratic Policy Committee staff review of unclassified Air Force internal documents reveals the following:

OVER-EXTENDED MARKETING

In June of 1981, the former Director of Political-Military Affairs of the State Department, Richard Burt, wrote to Richard Adams, Vice President of General Dynamics (GD), to solicit information on the availability of F-16s for increasing export marketing. Adams responded that aircraft could be provided on an accelerated basis of 24 months. This contradicted the USAF Master Plan projection of 42 months lead time. However, Adams emphasized the 24-month lead time delivery schedule could be met only if the government agreed "to accept pre-contract costs and obligations incurred by General Dynamics and its subcontractors." DOD memos verify that this General Dynamics proposal "allows [the] contractor to obligate U.S. funds in anticipation of an FMS agreement (which violates Public Law)." Under the Arms Export Control Act, major arms transfers and extension of FMS credits cannot occur until the Congress determines that a given sale should not be disapproved.

Moreover, Air Force readiness projections warn that "the historical record says there will be impacts" on U.S. forces, despite GD assurances to the contrary. Because "GD is competing with Northrop's F-5G [F-20] for a portion of the potential export market," DOD analysts caution that General Dynamics is getting ahead of itself in committing to an accelerated production schedule which it cannot sustain without cutbacks to the U.S. and NATO inventories. (Note: DOD and State Department officials have engaged in aggressive marketing of a plane never designed for general export. State's program has been undertaken without reference to established USAF inventory requirements, of the FX export program option.)

U.S. INVENTORY DEPLETION

General Dynamics and DOD delivery schedules document the draw-down on service inventories. From the second quarter of 1982 to the last quarter of 1984, 40 aircraft will be diverted from the USAF for Egypt alone. Six planes have already been diverted from NATO purchasers for Pakistan, and others must follow to fill that contract for a total of forty F-16s. Current projections do not take into account future sales proposals which may include Indonesia, the Philippines, Jordan, and others. Nor do they anticipate the effect of sales of the "J79" export model of the F-16. Those planes incorporate a less powerful engine, but will necessitate pulling standard F-16 fuselages off the production line and out of projected inventories. DOD planners report that FMS programs to date "have required the diversion of USAF production aircraft and logistic assets at the expense of USAF readiness." Continued acceleration of the F-16 sales program can only result in a further deterioration of USAF readiness.

The FMS-induced shortage goes beyond the problem of diversion of completed F-16s from our own inventories and those of our allies. The crucial areas of maintenance and

support also have been affected by the FMS program. Accelerated sales have reduced already low parts inventories, especially for systems with long lead times. The avionics packages, ejection seats, F-100 engine spares, and engine accessories cannot be acquired on an accelerated basis from subcontractors due to their complexity and the limited production capabilities. Air Force and DOD reports document the fact that "diversion of USAF spares will have a particularly dramatic impact on our F-16 support posture" leaving the Air Force "critically short of spare parts to support our own peacetime and wartime commitments."

USAF program reports describe the Venezuela sale as "a contractual and administrative nightmare." They note that the only source of spares will be USAF inventories, and that such "borrowing" will be "costly and difficult to manage". They also point out that the "drastic acceleration" of the Pakistan sale "has had, and will continue to have, significant impact on USAF management activity and support."

Only 67 percent of the nearly 470 USAF F-16s were operational during the first part of 1982. Air Force spokesmen acknowledge that 1983 readiness will be even lower as parts and maintenance support are spread thinner. The full impact has not been reported to Congress, as required by the Arms Export Control Act.

MANPOWER DRAIN

As costly and debilitating as aircraft and spare part diversions have been, a greater threat to U.S. force structure may result from the manpower drain caused by the need for technically trained personnel to support the FMS program abroad. Air Force staffing justifications describe the "extensive training" of some two years which is necessary to bring the skills of maintenance personnel to a competent level in the complex and essential jobs of providing logistical support for the F-16s. Advanced avionics such as communications, navigation, radar, and weapons systems require skilled electronic technicians with "comprehensive training plus operating experience" to assure combat readiness and absolute reliability. But Air Force officials acknowledge serious retention problems in these categories of specialists, placing the service in the position of being unable to comply with DOD Directive 1130.2 which requires "self sufficiency in maintaining and operating new systems" within twelve months of introduction. Former Air Force Secretary Hans Mark was blunt about this problem when he told the Wall Street Journal that "Airplanes don't fly because we don't have maintenance people."

Congressional action to provide special reenlistment bonuses for key technical positions within the armed services has improved the trend line, but 1981 figures reveal that only about one-third of the new technicians sign up for a second tour. Moreover, Air Force officials are concerned that General Dynamics incentive bonuses may be an attractive lure for Air Force-trained technicians, thereby undercutting the congressionally-initiated bonus system.

DOD officials point to the accelerating FMS program as the principle cause of this manpower drain. They warn that sales to developing countries that have little technical infrastructure create a demand for skilled personnel which private contractors satisfy by hiring away new USAF specialists. In fact, Air Force internal assessments of the foreign sales programs describe "heavy dependence" on private contractors. For the Egyptian sale alone, 130 technicians will be needed. General Dynamics has told DOD officials that part of that force will be made up of personnel acquired from Air Force ranks. One DOD report concludes that "GD will undoubtedly backfill the vacant flightline personnel positions with recruits from the USAF with F-16 experience. The faster the pace of the F-16 FMS case, the faster the F-16 base maintenance capability will be degraded."

As a result of the F-16 FMS sales program, the Air Force finds its manpower needs compromised in several ways. Most importantly, the USAF ability to maintain our own force capability is reduced because some Air Force technicians must be sent overseas to train and assist private contractors and locals in servicing foreign-owned aircraft: this at the expense of U.S. readiness. In addition, government investment in new trainees is not being recouped and attempts to build a corps of experienced personnel are frustrated when private contractors hire away recruits for services which the government must then rent back at the contractors' price, causing "turmoil in the USAF personnel system."

Finally, the service loses control over uniformed personnel. An independent study conducted for DOD warns that "continuing reliance on civilian technicians means that maintenance skills are not being successfully transferred from the producers to the ultimate users of the systems" i.e., the USAF. Moreover, the study points out that "the Military Departments do not have statutory authority to compel [contractors] to perform any function in support of forces engaged in conflict." This poses a danger to U.S. military capability during wartime.

Along with endangering U.S. readiness, F-16 sales to developing countries raise special problems. A recent Congressional Research Service White Paper characterized the sale of high-technology weapons systems as "increas(ing) the likelihood of the Soviet Union obtaining them, or information about them, and performing reverse engineering or developing counter-measures." This is especially true of the F-16s and the advanced missile systems which they will carry. Our experience in Iran where news reports allege that the Soviets gained access to F-14s and the U.S. air-to-air Phoenix missile is the most recent example of the compromise of U.S. technology vital to our ability to maintain a qualitative edge over the Soviets.

The security risk is particularly evident when the purchasers do not share U.S. goals or perceptions of the security threat. For example, the Administration has justified the sale of F-16s and a sophisticated air defense system to Pakistan on the grounds of the Soviet threat, particularly the threat emanating from Afghanistan. Yet 80 percent of Pakistan's army is located at, or near the Indian border, where it also maintains its air bases. Continuing Pakistani research on nuclear weapons development contravenes official U.S. policy, and raises questions about the sale of an aircraft that can be used as a nuclear delivery platform, such as the F-16.

The Pentagon shares the security concern associated with the F-16 sales to Pakistan. On November 29, 1982, a dispute erupted between the U.S. and Pakistani governments over the avionics configuration of the F-16s Pakistan had purchased. The Pakistanis believed they were purchasing the standard U.S. Air Force F-16, and refused delivery of the first six when they found out they would not receive state-of-the-art electronic equipment for detecting enemy ground and airborne radar. The New York Times reported on November 30, 1982, that U.S. Air Force officials "did not want to provide the advanced equipment because of the need to protect its security. The Pakistanis were being offered a less advanced system."

However, the Administration overruled these USAF objections and agreed to provide the most sophisticated version of the F-16 to Pakistan. This turn of events precipitated concern on the part of the Congress that the original FMS notification submitted by the Administration did not indicate that Pakistan would receive state-of-the-art U.S. avionics equipment.

Venezuela is another example of potential differences between the U.S. and a recipient as to perception of security threats. Venezuela is embroiled in border disputes with Colombia and Guyana. Its declaration of a role as "regional protector" following announcement of the purchase of F-16s represents a quantum leap in the regional arms race beyond the capabilities of the MiG-23s in Cuba which U.S. officials used to justify the sale. The net effect of sales such as these is a diminution of U.S. combat readiness in favor of building foreign arsenals over which we do not have control, and which may harm our own security and that of the region.

THE PAKISTAN SALE

In many ways, the sale of 40 F-16s to Pakistan is the classic example of an arms sale "gone wrong." The elements are as follows:

First, the Congress approved the sale on the basis that the bulk of the $1.1 billion in financing would be provided by Saudi Arabia. However, on November 30, 1982, the Administration submitted a reprogramming notice to the Congress for FMS credits in the amount of $150 million for Pakistan. Of that amount, $120 million was to be used for payments on the six F-16s due in Pakistan in mid-December. In the reprogramming request, the Administration did not state from what country, or countries, FMS credits would be reallocated.

Because the Saudis were not forthcoming in financing the first six F-16s, their participation in future funding of the program has been called into question. Since it is apparent that Pakistan will not be able to repay the FMS loans made available for the F-16 program due to its already burgeoning external debt, the burden may fall on the U.S. taxpayer. Potential U.S. taxpayer exposure for the Pakistan program could be $1.1 billion.

Second, the delivery of the first six F-16s on an accelerated basis resulted in a diversion from Dutch and Belgian inventories in order to repay the United States for the six delivered from our inventory. Since the Administration has agreed to an accelerated delivery schedule for the entire Pakistan program, further diversions are likely.

Third, in light of the growing manpower problems in the USAF to service our own F-16 requirements, the Congress should be concerned over the issue of U.S. technical support for the Pakistan program.

Fourth, despite the Administration's justification of the sale on the basis of the Soviet threat to Pakistan, it should be obvious that President Zia remains concerned primarily about the traditional rivalry with India. Recent news accounts alleging that the Indian military may be considering the option of a preemptive strike against Pakistan's nuclear facilities reinforces the view

that the long standing enmity dominates the perceptions of both countries.

Fifth, the fact that the USAF was concerned over providing state-of-the-art avionics equipment to Pakistan for fear it would be compromised, only to have these concerns brushed aside by the Administration, should not be taken lightly. Legitimate Pentagon concerns were overridden by an Administration which determined the necessity to make a "symbolic gesture" to Pakistan—a gesture which may prove to be contrary to U.S. interests.

And finally, from the very beginning, Pakistan dictated the nature of the F-16 program for that country. It dictated the time of delivery, terms of the sale, the financing arrangements, and the kind of equipment which was to be provided. Every essential element of a legal contract was dictated by the Pakistan government.

CONCLUSIONS

The proliferating sales of top-of-the-line U.S. military technology to developing countries raise many issues even beyond those discussed in this study of the F-16 program. Arms sales are an important tool of foreign policy. However, they are tools which require discrimination on the part of the United States as a supplier. Bending to foreign demands before meeting our own legitimate security requirements only jeopardizes the national consensus which now exists regarding defense spending. As the fighting last summer in Lebanon between Israeli and Syrian forces demonstrated, the U.S. maintains as significant qualitative edge over some quantitative advantages enjoyed by the Soviet Union in their weapons systems. Yet the Administration has allowed itself to be maneuvered into a position of jeopardizing this qualitative edge by succumbing to the demands of Third World countries such as Pakistan.

The political advantage the Administration perceives in allowing a country such as Pakistan to dictate the nature of the technology we make available has to be weighed against what should be paramount in U.S. arms policy—the protection of this technology against compromise. The F-16s being provided Pakistan contain state-of-the-art U.S. Air Force technology. Soviet AWACS and fighter interceptor capabilities are hampered by the current lack of this technology. If a decision is made to provide the Pakistanis with either the AIM-9L or AIM-9M air-to-air missile for their F-16s, the Soviets would have an even greater incentive to obtain technology we are making available to President Zia's government. The AIM-9L and the more sophisticated AIM-9M, now being developed, have an all-aspect capability. In other words, interceptor aircraft do not need to maneuver behind a hostile aircraft to score a kill. The Soviets have not yet been able to develop this capability which is vital to offsetting larger numbers of enemy aircraft.

The Soviets have been careful as to which weapons systems, particularly aircraft, they make available for export. An advanced Soviet export fighter is the MiG-23 Flogger, which is of 1967 vintage. However, the export version contains less sophisticated avionics equipment than those MiG-23s in the Soviet inventory. The more sophisticated Soviet fighters are not available for export at this time.

It is ironic that an Administration which has pressed our NATO allies to control the types and flow of high technology items to the Soviet Union would engage in an aggressive arms export policy which put top-of-the-line U.S. military equipment advances at risk. Earlier this year, the Senate Governmental Affairs Permanent Subcommittee on Investigations issued a report warning that the Soviet Union dedicated "substantial resources to highly focused attempts to secure American technology and was increasingly adept at acquiring this technology."

The pressure the Administration has exerted on our allies regarding the technology transfer issue has placed additional strains on the alliance. However, the Administration's credibility in this matter is strained considerably when it pursues a policy resulting in the global proliferation of high technology military equipment, such as the F-16s, over which we lose direct control once it is sold to another country.

Along with the Administration's aggressive policy of transferring high technology weapons into the Third World, there also has emerged a new arms sale lexicon. In the case of the AWACS sale to Saudi Arabia it became a "litmus test" of our relationship with that country. And as the Pakistanis maintain, the F-16 sale to their country is a "symbolic gesture." Neither the "litmus test" nor the "symbolic gesture" are criteria to be found in the Arms Export Control Act. Yet this terminology used to justify high-technology sales to countries such as Pakistan and Saudi Arabia is irrefutable evidence of a policy which is clearly "the tail wagging the dog." Recipient countries are now dictating the terms of major U.S. arms sales. Meeting U.S. defense requirements and protecting the qualitative edge we enjoy over our major adversary in the world—the Soviet Union—should be the paramount national security concern of our government. However, in the name of "litmus tests" and "symbolic gestures" the Administration has placed this technological edge in jeopardy. What concerns our military personnel above all else is having to face a potential enemy that has comparable avionics and missile capabilities to our own. They know the potential enemy has an edge in numbers which can be offset only by superior U.S. technology and the qualitative advantage it confers.

It is incumbent upon the Congress to reevaluate completely our arms sale practices and the legal underpinnings which support them in light of the developments outlined in this study. The reevaluation would, of necessity, involve review of the present adequacy of procedures contained in the Arms Export Control Act which has historically defined congressional involvement in this critical area of foreign policy.

Mr. BYRD. Mr. President, I reserve the remainder of my time.

I see that Senators PELL, BIDEN, and SARBANES are in the Chamber. I yield the floor, but I reserve the remainder of my time.

The PRESIDING OFFICER. The Senator from Rhode Island.

Mr. PELL. Mr. President, I support the distinguished Democratic leader and express my agreement with the arguments he has put forth, the points he has made.

I wish to express my deep concern over our administration's conventional arms transfer policy. I do so because this administration's arms sales policy is excessive and contradicts this Nation's historical commitment to restraint in the arms trade; 50 years ago, the exploding growth in the arms trade and the rise of militarism in Europe generated a widespread criticism in this country similar to today's public concern over the proliferation of nuclear weapons.

Following the "Report on the Munitions Industry," or the Nye commission report as it was more popularly known, Congress responded in 1935 with a bipartisan effort which led to the enactment of the first in a series of major laws regulating military transfers.

World War II and the period of reconstruction saw the emergence of a policy designed to strengthen U.S. security by providing our close allies with weapons sufficient to combat aggression and protect our shared interests. Gradually, as the economic condition of our allies improved, grants under the military assistance program—MAP—were replaced by sales for the same carefully limited purpose.

In 1968, Congress passed the Foreign Military Sales Act in order to provide a framework for weapons transfers as a policy instrument. That legislation discouraged U.S. sales to countries demonstrating a poor record of promoting democratic traditions. The new law also restricted weapons transfers solely to purposes of self-defense and denied sales to countries where scarce resources were better directed toward economic development.

Unfortunately, despite these constraints, the United States became caught up in the global arms spiral that resulted in a quadrupling of the world's dollar volume of arms trade between 1965 and 1975. But once again the Congress acted in a spirit of concern. In a bipartisan effort to restrict the trend and to make arms transfers an integrated part of overall U.S. foreign policy, Congress enacted the Arms Export Control Act of 1976. As that title clearly, states, the act represented a change in emphasis from sales to control. In the new law's opening paragraphs, Congress directed that:

It shall be the policy of the United States to exert leadership in the world community to bring about arrangements for reducing the international trade in implements of war and to lessen the danger of outbreak of regional conflict and the burdens of armaments. United States programs for, or procedures governing the export, sale, and grant of defense articles and defense services to foreign countries and international organizations shall be administered in a manner which will carry out this policy.

To achieve that goal, the Arms Export Control Act provided for major changes in the way arms sales were to be determined. In particular, the act established extensive reporting requirements to reflect the strong congressional desire for increased participation in the formulation of military assistance sales policies and programs.

In addition, the act directed that the executive branch weigh certain issues in making any transfer. These included consideration of the following:

Possible third-party transfers and the associated risks;

A recipient country's policy relating to terrorism;

A recipient country's record in human rights;

The ability of the recipient country to shoulder the significant financial costs of such arms transfers from the United States.

Regrettably, in its push to sell an increasing number of our most sophisticated weapons to a growing list of developing countries, the current administration has cast aside the historical American commitment to restraint. Indeed, as the study compiled by the staff of the Democratic Policy Committee points out, the tenets of the Reagan administration's policy directly conflict with the guidelines established in the Arms Export Control Act. Specifically, an aggressive program of arms sale promotion undermines the guiding principle that the United States should exert leadership in the world community to bring about arrangements for reducing the international trade in the implements of war. In application, the administration's policy has undermined the act in the following ways:

By discarding previous guidelines in favor of a wholly flexible, case-by-case determination for each proposed sale. This has led to inconsistencies in a program where the only predictable elements are steady increases in both the quality and quantity of weapons sold.

By depleting U.S. service inventories, and those of our allies, through accelerated sales of high-technology items to Third World customers.

By jeopardizing the pool of trained technicians available to the U.S. Armed Forces by creating conditions under which private contractors hire service personnel to provide support for weapons systems transferred abroad.

By ignoring the relationship between conventional arms transfers and nuclear proliferation, as in the case of Pakistan.

By failing to fulfill the mandate of Congress that the United States exercise leadership in seeking multilateral controls on global arms trade.

And by exposing the American taxpayer to billions of dollars in potential future bailouts for Third World countries which have purchased lavishly expensive weapons but which may be unable to meet payments on already onerous debt burdens.

Mr. President, I congratulate the distinguished Democratic leader for having commissioned this study. I think the release comes at a particularly opportune time, and I join him in pressing for legislative remedies to get the United States back into the business of arms control. rather than in the business of arms proliferation.

Mr. SARBANES. Mr. President, I am pleased to join the distinguished minority leader and the ranking member of the Foreign Relations Committee, the Senator from Rhode Island (Mr. PELL), and my committee colleague, the Senator from Delaware (Mr. BIDEN) in addressing this issue, which has been of longstanding concern to many of us, both inside this body and outside, and in pointing out the dangers inherent in the administration's arms sales policy.

It is clear, I believe, that the President's program has gone far beyond the intent of the Arms Exports Control Act of 1976. The President has characterized his program as flexible, but I think it would be more accurate to describe it as an aggressive policy of arms sales promotion around the world, particularly with respect to the developing nations, a policy with uncertain and unpredictable consequences for U.S. security and foreign policy.

I want to look at this policy for a moment in broad terms. I have been increasingly concerned by what has appeared to be a trend but is now obviously a focused policy of this administration to militarize our foreign policy.

Recent testimony before the Foreign Relations Committee on the administration's budget submission indicated that the administration is continuing to increase significantly the military assistance portion of the international security assistance programs.

I will take a moment or two to talk specifically about that part—the military assistance portion of the international security program. That does not touch on the cash arms sales taking place, which represent a much larger amount, somewhere in the range now of $15 billion.

I wish to look for a moment, though, at the more limited area of the security assistance programs where the United States provides assistance through the Federal budget to other nations both in the military and in the economic area.

In fiscal 1981, the security assistance programs in total were $5.3 billion, of which $3.2 billion were military—FMS sales, MAP, (the military grant program) and IMET (military education and training program).

In fiscal 1982, the first budget of this administration, the figure for security assistance jumped from $5.3 billion to $7.2 billion, of which $4.1 billion was military.

In fiscal 1983, the administration sought to go to $8.8 billion, of which $5.9 billion would have been military. In acting on this request Congress in the continuing resolution for fiscal 1983 provided $7.8 billion for all of the programs, of which $5.1 billion was for the military programs. The fiscal 1984 request of the administration has now jumped from that $7.8 billion figure appropriated by Congress in the continuing resolution to $9.2 billion (an 18-percent increase) of which $6.2 billion will be military.

So between fiscal 1982 and fiscal 1984, the administration has expanded the program by $2 billion, and all of that is on the military side. These figures are summarized in the following table:

U.S. SECURITY ASSISTANCE PROGRAM

[In billions of dollars]

	Fiscal year				
	1981 (actual)	1982 (actual)	1983 (request)	1983 (continuing resolution)	1984 (request)
Military [1]	3.2	4.1	5.9	5.1	6.2
Economic	2.1	3.1	2.9	2.7	3.0
Total	5.3	7.2	8.8	7.8	9.2

[1] Includes FMS sales, MAP, IMET.

In addition to this sharp increase in the military components of our security assistance program, the administration has now begun to include a great many more nations in the MAP, which is a grant program. In fact, the increase in the amount for that program is 157 percent from last year's continuing resolution to the request for this year. Of course, this only underscores the point made by both of my colleagues that the financial burden we are throwing on many countries by our arms policy is creating a serious economic problem, raising the question of whether they will able to repay the loans.

In effect, the administration is now acknowledging that increasing problem by moving to shift the program from loans to grants. This trend counters the concerted effort, in part at the direction of Congress, to reduce the number of countries receiving military grants; an effort which had succeeded in reducing that number to just a handful.

The administration in the budget submitted for this year proposes to give grant military aid to more than 20 countries.

Within the security assistance requests in the budget, the administration request for fiscal 1984 represents a 21-percent increase over the amount appropriated for the current fiscal year in the foreign military sales, military grant and IMET programs.

This request for a 21-percent increase comes at a time when Congress is forced by the economic circumstances confronting this country to deal with a budget which on the domestic side provides for cuts or hardly any increases, and with respect to our own defense budget calls for a 15-per-

cent increase. I might note that the question of whether a 15-percent increase is called for in our own defense budget is now an issue of much debate in Congress.

That issue, which has drawn so much attention and comment, should be contrasted with the fact that in the foreign military sales and grant programs, the administration is asking for an increase of 21-percent, almost half again as much of a percentage increase.

I am not sure this is fully appreciated. But the fact of the matter is as we deal here with these difficult budget questions—the amount by which our own defense budget should increase, the amount by which the domestic budget should be cut—we should recall that the administration is asking for a 21-percent increase with respect to military assistance programs for other countries.

The administration's request for development assistance reflects only a 4-percent increase while the request for economic support aid reflects an 11-percent increase. While both exceed what is being done with respect to many domestic programs the contract with the 21-percent increase in foreign military aid is sharp.

In short, all of the items in the administrations budget requests, taking them all across the board—the domestic programs, our own defense budget, our efforts to provide development assistance abroad, our efforts to provide economic assistance abroad—the item that most looms out of proportion is the proposed 21.2 percent increase in the military assistance programs, with respect to other countries.

This is a dramatic demonstration of the shift in our policy abroad toward military assistance and away from economic support, one of the problems discussed in this very fine staff study by the Democratic Policy Committee.

Further, I am deeply concerned that the administration has not been able to articulate a strong rationale for this fundamental and accelerating shift in policy that places a greater share of our resources in military aid abroad, nor has the administration offered a rationale for allowing such an enormous increase in this component of the budget at the same time that we face restraint and austerity with respect to the other parts of the budget.

Mr. President, there is one point I particularly want to note. When the F-16 sale to Pakistan was considered, in our minority report on that sale questions were raised about the transfer of top-of-the-line U.S. technology to countries where the security of that equipment could be compromised. The distinguished minority leader was touched on this point, and it is contained in the current report. I think it is an extremely important point. We enjoy a technological advantage in advanced weapons systems, and should that technology be compromised by gaining access to this equipment and by reverse engineering it obviously allows others to develop countermeasures to deal effectively with our systems. It is a matter which should and must be of very deep concern.

Mr. President, the legislation that is being prepared for introduction by those participating in this discussion addresses many of the concerns which have been outlined well in the staff study. These steps would include congressional approval for all major arms sales over $200 million. The number of those sales has jumped in a disturbing fashion in the last several years, and we really have a situation in which U.S. arms sales policy appears to be out of control.

This is a very important issue, with very serious implications for our foreign policy, and our national security policy. Clearly it is relevant to the whole debate over priorities which is now dividing the country, and I frankly find it difficult to understand how the administration can be seeking increases in the military assistance programs significantly in excess of the increases they are seeking in our own defense budget, leaving aside the contrast between the increases they are seeking in those military assistance programs with what they are doing to a whole range of domestic programs in this country, programs vital to the health and the education and the well-being of our people.

I want to commend the minority leader for the leadership he has taken with respect to this issue, acknowledge the contribution of those who prepared the staff report, and say that I hope this will begin to focus attention on an issue which certainly deserves action by this Congress and the country.

I yield the floor and reserve the balance of my time.

RECOGNITION OF SENATOR BIDEN

The PRESIDING OFFICER (Mr. PRESSLER). Under the previous order, the Senator from Delaware is recognized for not to exceed 15 minutes.

THE FINANCIAL IMPLICATIONS OF THE ADMINISTRATION'S FOREIGN MILITARY SALES PROGRAM

Mr. BIDEN. Mr. President, let me begin by apologizing for my voice. I have had difficulty speaking this morning, which gave a number of my colleagues a sense of solace but I will attempt to speak very briefly to the issue that the Democratic leader and the Democratic leader of the Foreign Relations Committee have addressed from a slightly different perspective.

Let me say at the outset that I would like to associate myself with the remarks made by my three colleagues who have spoken on the subject already and I would like to compliment highly the Democratic Policy Committee for what I believe to be one of the best reports I have been associated with in a long time. It was a piece of good work and scholarship and I commend it to my colleagues.

I also would like to thank the members of the Foreign Relations Committee staff, particularly John Ritch, for the efforts and expertise he has brought to bear in helping me particularly both to understand and to become associated with this issue.

Mr. President, my colleagues have pointed out the need to return to an arms export policy of restraint rather than one of proliferation as has been the case under this administration. Let me address, if I may, another dimension of the administration's program which demonstrates a cavalier disregard for the American taxpayer.

The administration's arms proliferation policy has failed to take into account the financial impact of unrestrained arms sales on the economies of the developing countries, not merely our economy.

In our joint statement, we raised the issue of the impact of these sales on the already burgeoning debt problems of Third World countries. For example, Pakistan alone spends 29 percent of its budget on debt service. Yet, we have sold them $1.1 billion worth of F-16's and associated support services. At the time this sale was sent to Congress, we were assured that our good friend Saudi Arabia would provide the bulk of the financing. Yet, when it came time for the first six F-16's to be delivered to Pakistan, the administration had to reprogram—that is a fancy word for "come up with money"—had to reprogram $120 million in U.S. funds to pay for the aircraft. In other words, the Saudis were going to come up with the money for the Pakistanis, since they do not have the money, but then in order to make our sale to the Pakistanis go through, we had to go into the American Treasury in effect to pay for the sale we were about to make to the Pakistanis, and to the tune of $120 million.

Since it should be obvious to everyone that there is not any way Pakistan can repay these loans, at least nothing that I am aware of in terms of the future and immediate economic future of Pakistan—I wish them well, but the fact of the matter is they, like many Third World countries, have been very badly damaged by the state of the world economy and their economy was already in trouble before the world went into a recession—the American taxpayer likely, in my view, could be stuck with a $1.1 billion bailout if the

Saudi performance thus far is any gage of what we can expect from them. Obviously the Saudis can change their tune. If we take a look at oil prices today I do not imagine that the Saudis are going to find it easy, particularly if the oil price continues to drop, to pick up the $1.1 billion tab to pay to the United States for aircraft we are transporting and selling to Pakistan.

Other countries are already in default on foreign military sales loans, and further rescheduling of payments is anticipated.

For those in the public at large who will read this statement or be aware of it, "rescheduling" is another way for us to say that American taxpayers, we the people who pay the taxes, may ultimately have to pay for this.

Turkey, for example, has not paid its foreign military sales debts since 1978. I am not suggesting that Turkey is a bad country or that Turkey is trying to bilk us. I merely want to point out Turkey is incapable, because of her serious economic situation, to carry the burden of their obligations. There have been four reschedulings of over $400 million in loans to that nation since 1978.

According to the General Accounting Office, U.S. officials have admitted that Turkey's debt service payments will climb after 1983 and will create continuing difficulties for that country in its ability to repay us and its other creditors. Despite these facts, the administration is seeking a near doubling of U.S. military assistance to Turkey for fiscal year 1984.

According to the GAO, there are 12 other countries on the FMS danger list, in addition to Turkey.

Yet, while FMS loans are increasing under this administration, the FMS guaranty reserve fund, for which Congress provides appropriations to cover potential loan defaults is now at a new low. OMB officials admit that the available reserves may go below the statutory trigger of $750 million later this year. As a matter of fact, OMB projects that a total of $785 million is expected to be paid out of these FMS reserves for fiscal years 1984 through 1987 to cover projected loan reschedulings.

If we were operating a bank, and the bank examiners came in and examined many of these FMS loans, they would declare that these loans, in fact, were in default and they would declare that they are bad loans and not likely to be repaid, and we would, as bankers be required to respond accordingly.

But we are not faced with that realization, that coming up against the truth like that such as a commercial banker would be. The administration plans to continue the policy, which we are able to do under the law, of bailing out these FMS reserves for fiscal years 1984 through 1987 to cover these projected loan reschedulings.

In addition, a request for appropriations of $250 million will be required for fiscal year 1988 to cover projected defaults during that year. Despite this fact, the administration has not—I emphasize "has not"—sought appropriations to increase the reserve, thereby confronting the Congress with the possibility of an emergency request to keep the fund in compliance with the statutory trigger. I think it is time we alert the American taxpayers to the fact that they may find themselves called upon to cover the costs of arms purchased by developing nations around the world. It is a bitter irony that we should be called upon by this administration to pay the costs of these loans while domestic loan programs for higher education, small business, and a host of other important domestic needs are being cut by this administration.

I have been impressed with the fact that we spend a great deal of the Senate's time debating the relative merits of particular weapons systems to be procured for our own Armed Forces. I think it is appropriate and necessary that we do so. However, I want to suggest that we should apply the same criteria to the kinds of equipment that we sell—not merely that we purchase for ourselves, but that we sell abroad. In particular, we ought to weigh the contribution that foreign military sales make to our own defense and security, and that we must consider the real costs of these sales. I do not believe the administration has given even the remotest consideration to these issues in pursuing its current policy. The 1984 budget request offers little hope of improvement.

Therefore, it is incumbent upon the Congress to address these issues and develop the necessary remedies to a policy which is obviously out of control. That is why I join my distinguished colleagues in recommending the Policy Committee's study to you as making an important contribution to the critical issue of arms sales abroad.

In conclusion, Mr. President, it really comes down, basically, to a truth-in-lending policy. I think if the administration feels these arms transfers are so vital and so important to our security interests that it should come right up front and acknowledge the low probability of repayment.

We spend here, I say to my friend from West Virginia, hours and hours debating about students who do not pay back loans of $2,000 and should we have ever given it to them in the first place; was it reasonable to expect that they would pay it back? We offer that as a justification for curtailing a program to allow people access to higher education. We argue and argue about that.

Why can we not have the same sense of forthrightness and honesty about the loans we make to the other countries? It may be, but I doubt it, personally, that American security is so involved in arms transfer policies that we conclude, (a) that it is necessary to transfer x millions of dollars' worth of arms to that country and, (b) to acknowledge that the American taxpayers are going to pay for that. If that is the case, let us face it directly.

If we do not face this problem now, we are going to be facing it 2, 3, 4, and 5 years down the road and the ticket price is going to be awfully high. We are going to be faced with little alternative but to raise the dollars and the American public is, once again, going to think, "What in God's name was that Congress doing while all of this was happening? Why didn't they know?"

One of the purposes of the report that the Democratic leader has introduced today and the legislation that will follow is that we are putting the American public and our colleagues on notice: The bill is going to have to be paid. We had better look at any future commitments and we had better be prepared to ante up for commitments already made. People should know that.

I thank my colleagues for yielding me this time. I hope the remainder of colleagues look very closely at what is at issue.

Mr. President, I yield the floor.

Mr. BYRD. Mr. President, I thank my colleagues, Messrs. PELL, SARBANES, and BIDEN for their statements, for the salient points that they have made, and for joining with me in this endeavor.

I think, in summation, what the report is saying is that we are transferring top-of-the-line items, in many instances, to countries that do not have the technicians and the capabilities of dealing with that kind of equipment.

Second, we are draining off our own reserves and the reserves of our allies, and in doing so we are selling ourselves short. We are not contributing to stability in the other parts of the world and we are not contributing to our own national security.

As Mr. SARBANES, Mr. PELL, and Mr. BIDEN each pointed out, in the final analysis the American taxpayers are going to pay the bill on many of the loans that are made. I think it is time for the American people to know this. I think Mr. BIDEN and Mr. SARBANES were both right in their references to the debates that are occurring with regard to our own defense spending and the domestic programs that are being cut in America and yet the fact that there is this hemorrhage of arms flow, in many instances to underdeveloped countries, which the taxpayers of America eventually will have to pay. I

think these are important points and I compliment those Senators, and Senator PELL, on the study that they have given to this subject.

I compliment the Democratic Policy Committee staff, under the leadership of Mr. Liberatore, which has put this report together. I hope it will be read by our colleagues and by the press.

Mr. President, I previously had asked unanimous consent, and it had been granted, that a portion of the report which dealt with "F-16 Sales Abroad: A Case Study" be printed in the RECORD. I ask unanimous consent, instead, that the entire report be printed in the RECORD. I express the hope that our colleagues will read it carefully.

There being no objection, the report was ordered to be printed in the RECORD, as follows:

AN UNCONVENTIONAL ARMS POLICY: SELLING OURSELVES SHORT

UNITED STATES SENATE,
DEMOCRATIC POLICY COMMITTEE.

In the first full year of the Reagan Administration's promotional arms policy, the United States sold $21.5 billion worth of arms worldwide. These sales have set records for total dollar volume, levels of sophistication, and the kinds of customers involved. There is some evidence that these sales of high technology weapons could be creating serious draw-downs on United States armed forces inventories, while increasing the risk that sensitive technologies will be compromised and used against us or our allies. At the same time, their policies are undermining the ability of developing countries to deal with their growing debt burden and encouraging a new militarism in their foreign policy.

This report was initiated by Richard McCall, Deputy Staff Director and foreign policy professional for the Senate Democratic Policy Committee, and prepared principally by Kevin Nealer. It discloses the dimensions of these problems, and recommends congressional approval of major sales, along with increased oversight of arms policy formulation. It calls for recognition of the economic consequences of sales for recipients and suppliers, and for negotiations to limit sales, beginning with NATO allies. While these recommendations are not the official position of the Democratic Policy Committee, we hope they will serve as a starting point for a dialog on this issue. I encourage you to read and consider this important study.

ROBERT C. BYRD,
Senate Democratic Leader.

EXECUTIVE SUMMARY

Arms transfers play a critical role in the conduct of U.S. foreign policy. Historically, the utilization of this policy tool often has been marked by controversy between the executive and legislative branches of government. As a consequence, the role of Congress in the decision-making process governing arms transfers abroad has been institutionalized through bipartisan legislation reaching back over forty years. The most recent congressional initiative in this area is the Arms Export Control Act of 1976 which established policy guidelines aimed at creating a regime of restraint and selectivity.

However, the transfer of conventional arms through the foreign military sales (FMS) program of the U.S. government and through commercial channels (requiring the issuance of export licenses by the executive branch) has reached major proportions under the current Administration. The Administration's $21.5 billion program of arms sales has departed from the criteria established in the Arms Export Control Act, setting a new and possibly dangerous direction for U.S. policy which could be detrimental to our own security interests.

The Administration's approach ignores the lessons of recent events in the South Atlantic, the Persian Gulf, and the Middle East by encouraging an increasing number of developing countries to acquire sophisticated weapons systems. There also is a body of evidence that American munitions manufacturers are, in many instances, whetting the appetites of Third World nations for our most advanced weapons, and that acquiring these weapons has become a status symbol in nearly all regions of the world.

The Administration's arms transfer policy is built on two related misconceptions:

The global increase in the arms trade is seen through the lens of bipolar world politics as another opportunity for U.S.-Soviet competition. This view ignores the reality of a growing market in which the U.S. and the U.S.S.R. lead a long list of competing suppliers, particularly our Western European allies.

Arms sales are pictured as guaranteeing influence and extending U.S. security abroad. U.S. experience, with Iran and others argues against this theory, as does the Soviet record of failure with such major customers as China, Egypt, Indonesia, Iraq, and Sudan. While sales to NATO and other close allies who share a common security concern can enhance U.S. interests, arms transfers to the Third World do not create automatically such shared interests. This is particularly true when the perceptions of the threat on the part of the seller and recipient are not congruent. The transfer of forty F-16s to Pakistan is a case in point.

The tenets of the Administration policy directly conflict with the guidelines established in the Arms Export Control Act. Specifically, an aggressive program of arms sale promotion undermines the guiding principle that the U.S. should "exert leadership in the world community to bring about arrangements for reducing the international trade in implements of war." In application, the Administration's policy has undermined the Act in the following ways:

By discarding previous guidelines in favor of a wholly "flexible, case-by-case" determination for each proposed sale. This has led to inconsistencies and a program where the only predictable elements are increases in both the quality and quantity of weapons sold.

By depleting U.S. service inventories through accelerated sales of high technology items to Third World customers.

By reducing the pool of trained technicians available to U.S. armed forces, due to private contractors who may be hiring service personnel away to support foreign sales.

By ignoring the relationship between conventional arms transfers and nuclear proliferation.

By failing to fulfill the mandate issued by Congress for the U.S. to exercise leadership in seeking multilateral controls on global arms trade.

By exposing the American taxpayer to billions of dollars in potential future "bailouts" for Third World countries with whom we have signed arms transfer agreements and whose ability to meet payments on already onerous debt burdens is in doubt.

EFFECTS OF THE ADMINISTRATION POLICY ON DEVELOPING COUNTRIES

The new policy of arms promotion abroad affects developing country recipients in three ways:

The level of sophistication of arms being transferred is increasing dramatically, raising the danger of regional arms races and increasing the risk that U.S. technology will be compromised or used against us or our allies.

The inability of developing countries to absorb high-cost, sophisticated military hardware, undermining economic growth and siphoning precious material and human resources away from the already burgeoning social needs of their populations.

The quantity and quality of weapons being transferred to developing countries has the potential for creating greater instability and increasing the likelihood that the recipients will respond to political problems with military solutions.

RECOMMENDATIONS

There are several responses possible within the context of the Arms Export Control Act. The procedures for congressional involvement in arms transfer policy require changes along the following lines:

1. The sales of major weapons systems should require affirmative congressional approval. This would serve to strengthen the current veto process.

2. Congress must participate in the long-term planning and policymaking objectives of the Arms Export Control Act, assuring that legitimate security and developmental needs of Third World buyers are met within the bounds of U.S. policy and economic realities. This would include automatic submission to the Congress of Defense Requirement Surveys since it appears many arms requests flow from these studies.

3. The Administration should heed the admonition in the Arms Export Control Act by seeking negotiations to impose multilateral restraint over the transfer of arms around the world. The first step should be consultations with NATO and other allies to review markets, the levels of sophistication of arms being transferred, and the impact these sales may have on regional stability.

INTRODUCTION

First in Western Europe and now in the U.S., concern over nuclear arms proliferation has caught the public imagination. Hundreds of thousands took that concern into the streets of Amsterdam, Bonn, and New York. Public pressure brought the issue to the floor of the United Nations, the U.S. Congress, State legislatures, and even town councils. It forced the Reagan Administration to begin promised arms reduction talks with the Soviets. The broad spectrum of public interest and the sense of urgency shown by so many led to fundamental change in Administration policy.[1] If good faith is maintained on both sides, this change could translate into meaningful controls and an eventual reduction of nuclear weapons stockpiles.

But the threats to peace and international security are not posed by nuclear weapons alone. Few believe that a regional conflict would start with an exchange of nuclear salvos, and many experts reject the massive surprise attack as a likely scenario for a su-

---

Footnotes at end of article.

perpower showdown. Instead, the greatest threat is portrayed as a local brushfire war that expands to nuclear conflagration. Wherever it originates, the kindling for such a nuclear fire is likely to be conventional weapons. As the level of sophistication and destructive potential of these weapons has increased, so has availability. The recent tragedies of war in the South Atlantic and Middle East demonstrate that the introduction of high technology nonnuclear weapons into Third World arsenals has challenged our assumptions about conventional warfare.[2] A new generation of laser, camera, and radar guided "smart" missiles, high performance aircraft, and battlefield rocketry increases instability and the likelihood of conflict in those parts of the world already dangerously close to the flashpoint.[3]

Against this background the Reagan Administration has announced its intention to embark on the most ambitious promotion of arms sales in U.S. history. It has rejected previous guidelines and, in derogation of statutes and established practice, set out to make the trade in conventional weapons the centerpiece of its foreign policy management.[4] While conventional arms transfers can make an important contribution as a tool of foreign policy, their role has long been subordinate to notions of promoting security and the national interest in a well-crafted policy framework. In abolishing criteria are moving to a "flexible" approach to transfers, the Administration has ushered in a new era in the history of the arms race. This program has prompted Senator Proxmire to observe that the Reagan foreign policy "more than [that of] any Administration in American history, is based on a single strategic factor: arms sales. . . . We will now sell arms to anyone, anywhere, for any reason."[5]

The effort here will be to provide an overview of this policy and what it means for global security. We will need to look at the legacy of U.S. arms export policy, recent trends, underlying assumptions of this Administration, and the direction in which its policies are moving us, and others.

I. A COMMITMENT TO RESTRAINT

A. The legislative response

Fifty years ago, the growth in the arms trade and the rise of militarism in Europe generated popular criticism of weapons proliferation similar to the reaction to nuclear issues today. The 1934 publication of Engelbrecht and Hanighen's *Merchants of Death*[6] helped focus attention on the need for statutory guidelines for U.S. arms transfers. Following the work of the Nye Commission, Congress responded in 1935 with a bipartisan effort, addressing this issue by enacting the first in a series of major laws regulating military transfers.[7] World War II and the period of reconstruction saw the emergence of a policy designed to strengthen U.S. security by providing our close allies with weapons sufficient to combat aggression and protect our shared interests. As time went on and the economic conditions of our allies improved, the Military Assistance Program (MAP) grants were replaced by sales, and the European arms industry began to recover and expand. In 1968, Congress passed the Foreign Military Sales Act[8] to provide a framework for weapons transfers as a policy instrument. The legislation discouraged sales to countries demonstrating a poor record of promoting democratic traditions,[9] restricted weapons transfers to self-defense use only,[10] and denied arms sales to countries where scarce resources were better directed toward economic development.[11]

Despite these constraints, the U.S. became caught up in the global arms spiral that saw a quadrupling of the world's dollar volume of arms trade between 1965 and 1975.[12] The culmination of a bipartisan congressional effort to cope with that trend and make arms transfers an integrated part of overall foreign policy came in the Arms Export Control Act of 1976 (AECA).[13] As the title indicates, the Act represented a change in emphasis from sales to control. In the opening paragraphs, Congress directed that:

"It shall be the policy of the United States to exert leadership in the world community to bring about arrangements for reducing the international trade in implements of war and to lessen the danger of outbreak of regional conflict and the burdens of armaments. United States programs for or procedures governing the export, sale, and grant of defense articles and defense services to foreign countries and international organizations shall be administered in a manner which will carry out this policy."[14]

To achieve that goal, the Act provides for major changes in the way sales are to be determined.

In particular, the AECA established extensive reporting requirements which the legislative history tells us were included because of the "strong desire to provide for increased congressional participation in the formulation of military assistance sales policies and programs."[15]

In addition, the Act mandates that the Administration weigh certain issues in making any transfer. These include consideration of:

Possible third party transfers and the associated security risks;

Recipient country's policy relating to terrorists;

Recipient's exclusionary policies which would discriminate against U.S. nationals on the basis of race, religion, national origin, or sex; and,

Recipient's record on human rights.

This policy guidance, in conjunction with the information requirements and the emphasis on government-to-government sales, was designed to guarantee a stronger congressional role in the arms transfer process. To assure that objective, the Act includes provision for congressional vetos of major sales.[16] While it has not yet been invoked and remains politically contentious, the legislative veto has proven a useful tool in shaping arms transfer policy.[17]

B. The Carter criteria

In an effort to supplement the policy guidance of the AECA, President Carter set forth a list of objectives for arms export policy. In his statement of May 19, 1977, Carter announced that arms transfer would continue to be an important element of U.S. policy, but would be regarded as "exceptional." Transfers which promoted U.S. security and that of our close allies would continue unchanged; NATO countries, Japan, Australia, and New Zealand were exempted from the new criteria. But sales to other parts of the world would come under special scrutiny and, for any new sales, "the burden of persuasion will be on those who favor a particular arms sale, rather than those who oppose it.[18] This standard was to respect traditional security arrangements while reflecting a new caution in transfer involving less-developed countries (LDCs).

Specifics of the Carter policy were aptly summarized in the 1981 Congressional Research Service (CRS) report to the House Committee on Foreign Affairs entitled "Changing Perspectives on U.S. Arms Transfer Policy."[19] The main points included reduction in the dollar volume of Foreign Military Sales (FMS) and MAP programs, with qualitative restrictions on weapons transfers. This meant a prohibition on introduction of new technologies into a region, development of export-only systems, or sales of systems not yet operationally deployed with U.S. forces. It also entailed tight restrictions on coproduction agreements and third party transfer of U.S. weapons. U.S. embassies would require prior approval from the State Department before assisting U.S. arms firms in marketing overseas.

Obviously ambitious, the Carter plan was unable to live up to many of the expectations it engendered. The CRS 1981 report concludes that the Carter Administration failed to make arms transfers an "exceptional" tool of foreign policy. Almost $40 billion in new arms agreements with LDCs were made during the Carter years. The Carter approach to unilateral restraint came at a time when Soviet and Western European suppliers were increasing their market shares. Moreover, the uneven application of restrictions gave rise to uncertainties about U.S. arms export policy. Exceptions to the qualitative guidelines included agreements for coproduction, and introduction of the FX as an export model fighter to fill the performance gap between the F-5E and the first-line F-15 and F-16 aircraft.

But the Carter guidelines represented a serious Executive initiative in attempting to restrain sales and bring them into the mainstream of foreign policy. The CRS report notes that:

"The Carter arms transfer policy established a more precise and systematic decisionmaking process and more specific guidelines for those in the arms sales chain. . . . This framework increased the prospect that significant proposed sales would have to go through a rigorous review."[20]

The report continued by noting that the requirement for State Department approval prior to sales promotions,

". . . increased the prospect that foreign policy makers could and *would* be able to evaluate the potential ramifications for American policy interests *before* being confronted with a formal request for a sale resulting in premature promotional actions by U.S. arms sellers."[21]

Defense analyst Andrew Pierre characterized the effect of the Carter policy in writing that it "provided a framework for an important aspect of American foreign relations."[22]

This review process led to over $1 billion in refused requests during the Carter presidency, affecting more than sixty countries. Many of these rejections prevented acquisition of inapposite high technology weapons by LDCs. The CRS report cites refusals of requests by Guatemala for F-5Es, Pakistan for A-7s, Taiwan for F-4s, and Iran for F-4Gs, as instances in which purchases of equivalent systems from alternate suppliers were not made. But the absence of multilateral controls did result in alternate purchases following U.S. refusals of aircraft sales to Argentina, Ecuador, and India. In each of those cases, a European-built product was substituted, giving weight to arguments for allied cooperation in restrictions of the market.

While Carter did begin to follow through on the AECA mandate for multilateral con-

trol talks, he failed to seek participation of suppliers other than the Soviets. These conventional arms talks (CAT) collapsed after a year as a result of what participants described as "deteriorating U.S./Soviet relations, a volatile Middle East, and an increasingly difficult political situation for the Carter Administration at home, along with bureaucratic confusion, personal rivalries, and tactical errors."[23] It was questionable whether such talks could have produced any meaningful agreement when France and the other major producers were not parties to the process.

The legacy of the Carter arms transfer policy is then a melange of successes and failures. By offering "an institutionalized framework in which hard policy decisions can be made,"[24] the Carter program moved toward integrating arms sales into the fabric of foreign policy management. Perhaps a greater commitment to multilateral controls and the requisite political will would have done more to lend predictability and credence to weapons export policy and the conduct of foreign affairs as a whole.

Despite valid criticism that Carter "stepped in front of a moving train" on arms control, his Administration did offer "a set of criteria designed to insure that a grant or sale of defense articles will be in the national interests of the United States,"[25] as envisioned by the AECA. The importance of such guidelines becomes clear when looking at recent trends and the current policy.

II. THE CURRENT CRISIS

A. Trends and methods examined

An understanding of the current Administration's policies and where they may be leading requires a look at recent developments and the assumptions derived from them. The facts are sometimes hard to come by, but an accurate reading of the situation is essential to any judgment about the direction of U.S. arms export policy.

In considering statistics on U.S. arms transfers, several caveats should be kept in mind. First, arms transfers and support services have several different forms. Most important are the FMS program sales, including loans and direct credits. These are complemented by private commercial sales, training programs (chiefly, IMET), MAP grants, leasing and use of military equipment and facilities, the excess defense articles program (EDA) and other formal and informal arrangement.[26] This last catch-all category includes programs that do not appear in conventional accountings of sales and support costs. Like some private sales and classified programs, these costs are elusive. Moreover, the costs of the FMS program itself may be understated with respect to administrative expenses and potential liabilities.[27]

Second, comparisons between U.S. exports and those of other countries also suffer form creative accounting practices which skew totals. One proposal would distill the costs of "nonlethal" supports (e.g., training and military construction) out of U.S. arms transfer totals.[28] The Administration has endorsed this device, along with the practice of comparing U.S. and Soviet transactions in isolation. Many analysts criticize this approach as disingenuous, insisting that the more accurate accounting would juxtapose Western allied transfers with those of the Eastern bloc.[29] Comparisons also suffer from "loss in translation" problems in evaluating data from other countries. Predictable barriers of secrecy and the difficulties of valuing goods and services from planned economies confound East/West comparisons. The Director of the Defense Security Assistance Agency has testified that, in Eastern bloc countries, "the whole financial structure can be artificial . . . the whole matter of pricing the equipment."[30] These murky waters have spawned very different estimates of the market.

The Administration's comparisons announced by Under Secretary Buckley at an August 2, 1982, press conference are but the latest expression of the controversy.[31] They rekindle the debate over reliance on numbers of weapons transfers as against dollar volume in measuring market shares. The Department of State report upon which Mr. Buckley's remarks were based notes that, "Each [method] has shortcomings and neither is a true measure of military capability."[32] However, the Congressional Research Service's updated analysis recognizes that "the basic utility of the dollar value of arms transfer agreements is in indicating *long-range trends* in sales activity by arms suppliers."[33] This CRS report draws upon the same sources as were available to the State Department, and combines dollar totals with a tally of systems transfers to provide a balanced view. Several important trends emerge from this latest CRS study, and other public sources.

In the first full year of its promotional arms sale policy (FY 1982), the Reagan Administration sold an all-time high of $21.5 billion worth of arms worldwide. This is more than double the previous year's total, and well above the amount the State Department had indicated to Congress at the beginning of FY 1982.

The U.S. and Western European allies continue to dominate the world arms trade in many categories of weapons systems and in total dollar volume of sales values and deliveries.[34]

Arms deliveries to Third World countries from all sources are increasing geometrically, from more than $7 billion in 1974 to more than $23 billion in 1981.[35]

Soviet arms sales are now at record levels, and Soviet transfers to the Third World accounted for about one-quarter of all arms agreements with that market in 1981.[36]

Non-traditional LDC purchasers have entered the high technology market and world arsenals are growing both in quantity and quality. Supersonic aircraft and new families of missiles are becoming standard equipment in LDC weapons inventories.[37]

B. The Reagan assumptions

The Reagan Administration has drawn some alarming conclusions from these trends. It has inflicted its bipolar view of global politics on the facts of increased arms sales and declared another arena for U.S./Soviet competition. By viewing regional problems through an East/West optic, there is a likelihood that the Administration has misread and misrepresented the potential dangers of unbridled trade in sophisticated weapons.[38]

In testimony before the Senate Foreign Relations Committee, Under Secretary of State James Buckley relied on controversial Administration totals in concluding the Soviet arms deliveries to the Third World for the period 1977 to 1980 exceeded U.S. shipments by 20%.[39] Figures from the 1981 CRS report and other sources substantiate an *increase* in Soviet deliveries of only 14%; $23.6 billion for the U.S., as against $26.9 billion for the Soviets.[40] More importantly, the CRS analysis points out that U.S. arms *agreements* with the Third World for that period exceed Soviet deals by over $3 billion.[41] (Agreements can be a better gauge of trends, since they represent commitments for future deliveries.) The State Department Special Report released by Mr. Buckley acknowledges that U.S. sales to LDCs exceeded Soviet transfers by "roughly two to one" in total dollar volume for the entire sample period.[42] The new CRS study confirms that between 1974 and 1981, "the U.S. made Third World sales in nominal terms that exceeded those of the U.S.S.R. by about $9.1 billion."[43]

The CRS report of August 1982 places these figures in perspective, recognizing the limitations of dollar estimates and systems counting. It criticizes the Administration practice of excluding $15.5 billion in FMS construction cost between FY 1974 and FY 1981, and sounds a note of caution about Administration methodology that led Mr. Buckley to say the Soviets were "clearly" in first place.[44] While the U.S. "has not matched the Soviets in terms of sheer numbers delivered in the recent four-year period," the study warns that those numbers do not "provide any indication of the capabilities of the recipient nations" because they cannot show levels of sophistication of weapons or quality of training received.[45] As one observer notes, the advent of the Reagan policy is "less evident in the costs of the arms the new Administration transferred than in their sophistication and the list of buyers."[46]

Of equal significance are the CRS conclusions concerning the role of other suppliers in the market. An economic analysis of the arms market shows it to be a fairly strict oligopoly, with high barriers to entry for the production of advanced systems, and a global clientele. The system is very much demand-driven.[47] Leading producers are the U.S., U.S.S.R., France, and other Western European countries. A recent report in the *Congressional Quarterly* noted that, "The nation that fills a void when the U.S. refuses a sale is just as likely to be U.S. allies, France or Britain"[48] as the Soviet Union. The 1982 CRS study shows that Western European exporting countries led in deliveries to the Latin American market in more categories of systems than did the U.S. or the U.S.S.R. It concluded that "(T)he major Western European suppliers have become, in the recent period, serious competitors for arms markets in every region of the Third World. . . ."[49]

Proportionally more Western European production is geared to export than is the case for either the U.S. or the U.S.S.R. France, the third largest arms producer, exports more than one-third of its production, while the U.S. and U.S.S.R. each export less than one quarter of their production.[50] While the Soviets enjoy a strong and growing market share, it no longer makes sense to cast the arms sale competition as a U.S./Soviet horse race. The Administration's insistence on that characterization ignores the other competitors and presumes that, in a larger sense, there can be a winner.

This win/lose approach is predicted on a second misconception about arms transfers: that they guarantee influence and control over the recipients. The hard lessons of recent history provide evidence for the opposite conclusion, and show the Administration's concern over "who's on first" in volume of sales to be a mistake in emphasis. The Falklands crisis found the British confronted by Argentine forces equipped with British weapons systems. That bitter irony prompted one cartoonist to depict British soldiers peering into the sky and asking, "Is

it one of ours . . . or one of ours?" The U.K. sold Argentina warships and electronics valued at $200 million over the past three years, according to a recent Washington Post article by Anthony Sampson, author of "The Arms Bazaar."[51] Sampson notes that one-fourth of the Excocet missile components are manufactured in Britain.

Whitehall's sense of embarrassment was well understood in Washington and Moscow. The U.S. has seen two of the largest infusions of its arms in the past decade—purchases by Iran and Vietnam—fail to reinforce U.S. interests or prevent regional instability. Even in the case of Israel, the U.S. learned that it exports control and the ability to influence end use along with U.S. weapons.[52] Constraints on spare parts and extra ordnance shipments are post facto remedies at best, and seldom used. Neither device offers any guarantees of behavior acceptable to the U.S.

As costly and painful as these lessons have been for the U.S., the Soviet record is even worse. With the exception of the captive clients of the Warsaw Pact, virtually every major Soviet arms customer since World War II has bitten the hand that feeds it. China, Egypt, Somalia, and the Sudan have turned their backs on the Soviets, and the policy interests which their arms transfers were supposed to secure. So too, Indonesia, Ghana, Guinea, Iraq, and India have moved away from Moscow's infuence, taking their Soviet-made weapons with them.[53]

President Ford's national security advisor, Lt. General Brent Scowcroft, argues that the issue is more complicated than influence. If you mean we are buying influence by selling arms . . . the answer is clearly no."[54] The AWACS sale offers a recent example of this dilemma, where U.S. interest and influence are not necessarily enhanced by the transfer, but would be vitiated by a refusal. Former Deputy Director of the Arms Control and Disarmament Agency (ACDA), Barry Blechman, noted that "(t)his Administration exaggerates tremendously the influence arms sales bring. It's really negative. Turning down a sale hurts your influence."[55] The "negative influence" also applies to the leverage a sale is supposed to bestow on the seller once it is made. The practical effect is that the buyer, not the seller, garners greater leverage from a completed sale, because buyers can raise questions about the supplier's reliability as an ally and source. This provides even a small purchaser with some power over the oligopoly, since political pressure can be brought to bear to play suppliers off against one another. As the Center for Defense Information observed, "The good will generated by an arms sale, if any, may only last until the next request for weapons comes along."[56]

The most important point to be made is that arms transfers are not, of themselves, the cement of influence by sellers over buyers. Common interests and shared perception of security may be enhanced by sales, as is surely the case among NATO allies. Where those shared goals and policies are not already in place, weapons transfers can create shifting dependencies and "negative" leverage. And there is nothing to suggest that they change the local perception of local conflicts; that a border dispute or factional rivalry assumes an East/West dimension for the recipients. U.S. interests are not necessarily aggrandized, nor security concerns shared, when U.S. weapons systems move abroad.

Moreover, it is unhelpful to translate comparative market standing into relative defense strength, as if contrasting the U.S. domestic arsenal with that of the U.S.S.R. The CRS report points up this direction in Administration policy; a harkening back to the Nixon (Guam) Doctrine that nations with U.S. weapons are surrogates, projecting U.S. influence.[57] Under Secretary Buckley mirrored that thinking in testifying that:

"The marginal U.S. dollar loaned under FMS to the Turkish Army or to the Thai or Pakistan Air Force is a dollar that we otherwise would have to spend outright on our own forces to do a job that the Turks and Thais and Pakistanis can do better and at less cost."[58]

While the dollars are fungible, policy interests and ideologies may not be. U.S. supremacy in arms sales to LDCs is no more a guarantor that U.S. security is being served than was the case when the Romans hired and equipped mercenaries to guard the outposts of their empire. A strong U.S. market posture only means a larger relative share for U.S. arms manufacturers in a market where each new sale by the competing supplier nations diminishes their ability to control events in the buyers' part of the world. These transfers of sophisticated arms are giving Third World regimes options which had been the exclusive currency of the more technologically advanced countries. As with any currency, its proliferation debases its value—and the influence it supposedly represents.

III. THE REAGAN ADMINISTRATION POLICY IN APPLICATION

We've seen that current arms transfer policy is built on two related assumptions: (a) the conventional weapons market is another species of U.S./Soviet arms race in which the U.S. is behind; and (b) arms sales mean influence. Carrying these assumptions into the execution of its polices, the Reagan Administration has discarded established tenets of restraint in U.S. arm transfers, and the dictates of statute. These have been supplanted by a policy without guidelines, where the only predictable outcome is an increase in quality and quantity of sales.

A. Exit the AECA

The Reagan Administration policy has been explained through two vehicles. The first expression came in the Presidential Policy Directive of July 8, 1981. Beyond that document, there has been a series of statements and testimony by Under Secretary Buckley and other Administration spokesmen which sheds light on the Directive. These sources clarify the Administration's position on the objectives announced by Congress in the Arms Export Control Act.

The CRS 1981 report concludes that, "(t)he President Directive of July 8, 1981, does not present a balanced and comprehensive reflection of the policy directions of the AECA."[59] In fact, the Directive and follow-up statements raise serious doubts about the Administration's compliance with the letter and spirit of the Act. Reviewing the most important areas, the following inconsistencies emerge:

1. Promotion, Not Control

The thrust of the AECA is to provide a framework for arms transfer policy and controls. Section 1 of the Act requires that U.S. policy aim at "reducing the international trade in implements of war."[60] The Reagan Directive announces the Administration's intention to "enhance United States defense production capabilities and efficiencies." Similarly, National Security Advisor William Clark, in a May, 1982 speech to the Georgetown Center for Strategic and International Studies remarked that, "Not only does security assistance offer a cost-effective way of enhancing our secuity worldwide, but it also strenthens our economy in general and our defense production base in particular."[61] The CRS 1981 Report notes that:

"(T)he Act does not suggest that arms sales should serve as a positive force in maintaining a strong American defense industry. This notion is somewhat contrary to the balanced objectives expressed in the AECA which recognize legitimate national security needs for arms transfers while also promoting controls and restraints so that the sales do not accelerate out of control, fueled by domestic financial factors."[62]

In the name of promoting the interests of U.S. manfacturers and serving their arguments for economies of scale, the Administration has set its course in opposition to Congress and its efforts at control. Arguments that filling the LDC demand reduces unit costs and benefits the domestic economy are both questionable ecomonics and dangerous in the implications they hold for the growth in LDC sales.[63] Such arguments fail to acknowledge that export orders are uncertain and vary greatly from year to year, making it difficult to depend on economies of scale from foreign purchases when the cost effectiveness of new weapons production is being judged. Also, the available evidence suggests that the reduction in unit cost that results from foeign orders does not provide extraordinary savings to the government in the case of most systems being produced for the domestic market.[64] Certainly marginal economies should not justify a policy of weapons proliferation inimical to U.S. interests, and an unwillingness by the Administration to comport with the basic direction of the Act should not be excused by any economic rationale.

2. Failure of Leadership: The Obligation to Negotiate

The Act specifies that "it shall be the U.S. policy to exert leadership in the world community" in limiting arms transfers. Further, it was the sense of Congress that the President should "seek to initiate multilateral discussions" and "work actively with all nations to check and control the international sale and distribution of conventional weapons of death and destruction."[65] The Reagan Administration has abdicated this leadership role. Mr. Buckley testified that he would "remain prepared to examine ways" to achieve arms control, but would not "go it alone." This mirrors the Policy Directive language that the U.S. will "retain a genuine interest" in the proposals of others.

Neither the language of the Act nor its legislative history contains a call for unilateral restraints. To the contrary, the President is obliged to seek cooperative arrangements that would lead to controls. This is not a passive posture. It requires that the President exercise traditional U.S. leadership rather than a wait-and-see approach. The law calls upon the President for something more than being receptive to another country's initiatives.

3. No Place for Human Rights

Section 301 of the AECA amends Section 502B of the Foreign Assistance Act and declares the policy of the U.S. to be to "promote and encourage increased respect for fundamental human rights and freedoms."[66] It specifically prohibits security assistance to any country "engaged in consistent patterns of gross violations of inter-

nationally recognized human rights." The State Department is unable to quantify arms sale refusals made on human rights grounds in either the Carter or Reagan Administration, but the difference in directions is clear.[67] This Administration has supported lifting arms sales prohibitions against the regimes in Argentina and Pakistan, and has increased military assistance to El Salvador and Guatemala.[68]

Beyond these actions, the Administration has sent an unmistakable message around the world that human rights issues are of less concern in current decisions on proposed arms sales. There is no mention whatsoever of human rights—either directly or by implication—in the Presidential Directive on arms sales. In his remarks before the Foreign Relations Committee, Mr. Buckley enumerated the Administration's priorities on arms sales, noting the statutory obligation to consider human rights.[69] But Administration statements elsewhere raise doubts about his commitment to those principles.[70]

4. Feeding Nuclear Proliferation

Section 305 of the Act amends Section 669 of the Foreign Assistance Act,[71] linking conventional weapons transfers to the recipient country's policies on developing nuclear weapons. The Glenn/Symington amendments banned security assistance to countries engaged in the production of nuclear material outside of international controls. That restriction has not inhibited the Reagan Administration's sale of forty F-16 aircraft and support systems to Pakistan, though it was unable to obtain firm assurance that Pakistan has stopped nuclear weapons development. Likewise, the Administration has permitted Brazil to purchase fuel from other suppliers without requiring penalties in its contract with the U.S. and has allowed a token military training program in that country.[72] Computerized process controls were sold to Argentina for use in unsafeguarded reprocessing operations, while U.S. brokers have been permitted to assist South Africa in circumventing the U.S. embargo of fuel to that country.[73] The signal to these recipients and others is a lack of U.S. interest in nuclear proliferation among LDCs.

5. Jeopardizing U.S. Service Inventories

The AECA also restricts sales which "could have significant adverse effect on the combat readiness of the Armed Forces of the United States" to an "absolute minimum." Section 21(i)(1) requires that the President report and justify any such proposed transfers to appropriate committees of the Senate and to the House. This portion of the Act reflects the long-standing U.S. policy against draw-downs on scarce items in the domestic inventories for the sake of exports. Despite lip service to this objective, the Reagan Administration practice appears to be at variance with it.

The Administration has disregarded the advice of its own experts in promoting high technology sales. Lt. General Kelly Burke, (USAF Deputy Chief of Staff for Research, Development, and Acquisition) testified in March, 1981 before the Senate Armed Services Committee that proposed sales of F-16s would not undercut U.S. needs "providing the sales are negotiated with the normal lead time requirements. . . . Specifically, a forty-two month lead time is required."[74] Later, Under Secretary Buckley told the House Foreign Affairs Committee that those same sales of the most advanced fighter plane in the world would be carried out on an accelerated basis.

Air Force internal documents substantiate the effect of these accelerated sales. They note that the sales "will have a particularly dramatic impact on our F-16 support posture," compromising already low parts inventories and the Administration's goal of preparedness.[75] Those sources also criticize the effect of the sales on production planning. Thus far, accelerated transfers have resulted in preempting delivery of six aircraft to Belgium and the Netherlands in an effort to cover U.S. inventory shortages.

Departure from its own timetable raises questions about the Administration's ability to assess and meet the needs of U.S. and NATO forces. Despite the recognized uncertainties surrounding the F-16 sales, the Administration has not reported their impact and has continued to make *pro forma* guarantees which contradict documented Air Force findings.[76] A special case study on the F-16 appears as Appendix C of this report.

B. Inconsistency institutionalized

Beyond the legal requirements and policy directions established by the AECA, the Administration has signalled confusion and unpredictability in implementing a policy without guidelines. The Presidential Directive recites a litany of goals to be pursued, but reveals more about its basic policies by what it omits. The Center for Defense information observes that the Administration has departed from prior practice by:

Abolishing the "ceiling" on the total dollar value of U.S. arms transfers authorized each year;

Dropping the prohibition on developing a weapon system solely for export;

Dropping the prohibition against introducing a newly developed, advanced weapon system creating a significantly higher combat capability in a region;

Dropping the prohibition against making foreign sales prior to operational deployment with U.S. forces; and

Rescinding Carter's so-called "leprosy letter" which instructed U.S. overseas officials not to assist private American businessmen seeking to promote arms sales.[77]

Statements made to support this approach rely heavily on one word: "flexibility". The Reagan Directive and testimony by Administration officials repeatedly call for flexibility and a "case-by-case" review of arms transfers.[78] A recent *Congressional Quarterly* report characterized this elusive standard by noting that:

"The Reagan policy contains no guidelines. Instead, all foreign requests to buy U.S. arms are to be examined 'case-by-case'. . . . In essence, if another nation is deemed to need the weapon in question, and the sale is thought to serve U.S. interests, the sale is to be made."[79]

Consistency was the much-advertised yardstick by which the incoming Reagan Administration measured the deficiencies of Carter foreign policy. That same measure applied to the totally subjective "flexible" Administration approach to arms transfers leaves this Administration far more open to criticism than its predecessor. Even *Aviation Week* has seen fit to register concern about this trend noting that "the Reagan guidelines are more a repeal of Carter human rights doctrinarism [sic] than the adoption of a new policy."[80] Without meaningful guidelines, the only predictable aspect of the Reagan program is growth—in sheer numbers of sales and, more importantly, in sophistication of the weapons systems sold.

C. Discarding fiscal restraint

Recent General Accounting Office (GAO) studies raise questions about irregularities in the FMS program, and suggest a need for caution in assessing the extent of U.S. economic commitments. In particular, a recent GAO report cites DOD for "inaccurate and incomplete estimates" of administrative costs.[81] This has occurred when the Defense Security Assistance Agency (DSAA) "directed the military services to exclude certain valid costs from their budget submissions." With "no assurance that the 3% surcharge" is covering administrative costs and DOD failure to "make an adequate and meaningful analysis" of those costs, GAO found that:

"Although GAO could not determine the total amount by which the military sales appropriations are subsidizing the foreign military sales program, the amount is known to be in the millions of dollars."

This has led GAO attorneys to issue an opinion which characterized DSAA practices as "legally improper" under the Arms Export Control Act.[82]

Of much greater importance is the liability exposure created by the FMS loan program. GAO has identified thirteen countries as being in default on interest payments.[83] This increase, up from two defaults in 1978, occurs as the reserve fund to cover such shortages has declined from $1.71 billion in 1980 to the present level of $860 million. Several countries unable to service their past debt are nonetheless objects of Administration requests for additional loans (e.g., Sudan and El Salvador). The absence of meaningful eligibility standards also generates concern as this indebtedness mounts. The manager of the Treasury's Federal Financing Bank (FFB) which oversees the guaranteed loans told the *Washington Post* that:

"I don't believe there are any requirements that the President or anyone find a country creditworthy. If the Department of Defense comes to us and says it will guarantee a loan, there's no reason for us to say no."[84]

This paractice is in conflict with the basic requirement of the Act that sales be "to friendly countries having sufficient wealth to maintain and equip their own military forces at adequate strength, or to assume progressively larger shares of the cost."

While some debts are being rescheduled, the Administration is seeking to have repayment of $950 million for FY 1983 forgiven through the direct credit program. That proposal includes loan forgiveness of $50 million for Sudan, adding it to the list of countries qualifying for what is essentially grant assistance. The Administration also proposed including 19 additional countries to the concessional repayment plan for FY 1983.

Congress has mandated that guaranteed loans at near market rates of interest continue as the primary vehicle for financing military assistance. But current practices lead critics to conclude that FMS loans are being used to fill the void left by MAP grants, which are being phased out. Administration proposals for new concessional FMS loans give added weight to these charges. So too, reliance on "cash flow" financing, which permits countries to incur obligations on U.S. arms purchases without sufficient reserves, undermines the FMS program. The effect is to paint an unrealistic picture of FMS obligations and create the potential that liabilities ultimately may

fall on the U.S. Treasury, undercutting the economic advantages these sales are supposed to confer on the U.S. economy.

IV. A MORE DANGEROUS WORLD

The effect of the Administration's arms policy can best be understood by looking at its regional application, projecting current trends through key recipients and neighboring countries. The Middle East is by far the largest recipient of all arms transfers,[85] but other areas with a history of instability are seeing tensions increase as regional arsenals grow. Africa, the Caribbean, and South Asia offer revealing case studies.

Such examples need to be prefaced by a few general observations on LDC weapons transfers. First, the current volume of transfers to the Third World is, of itself, a highly destabilizing force. The recent Iran/Iraq war is a graphic example of the scope and character of a regional dispute exacerbated by the presence of large amounts of sophisticated hardware on both sides. The introduction of high technology weapons into a region can contribute substantially to localized arms races, raising the likelihood that political problems will be answered by military solutions. William E. Jackson (former executive director of the General Advisory Committee on Arms Control and Disarmament) cautions that, by introducing high-tech arms, "Far from preventing war, you may be increasing its severity or making it more likely by making a country confident enough to push its interests. Once the political fabric is torn suficiently, war breaks out."[86] Of course the rivalries and tensions exist with or without advanced weapons systems, but the availability of those weapons raises the level of conflict and the extent of destruction.

Second, there is the related issue of qualitative increases in LDC weapons purchases. A review of delivery dates for LDC arms transfers reveals that the gap between state-of-the-art systems and LDC acquisitions has closed dramatically in recent years.[87] In an article in *Foreign Affairs Quarterly,* Andrew Pierre observed:

"Prior to the 1970s most arms sales (especially to the developing countries) were the surplus and obsolete weapons of the major powers, which they wanted to eliminate from their inventories (often as military assistance grants) so as to make room for new, more advanced weapons. Even in the early 1960s the aircraft transferred to the developing world more often than not were ten year old F-86 and Soviet MiG-17 fighters. . . ."[88]

Developing countries are no longer interested in hand-me-downs. Sophisticated weapons have become as much a status symbol as a national airline, with the added advantage of satisfying real and perceived security needs.

Increased sophistication of LDC arsenals is consonant with the announced goals of the Reagan program. Under Secretary Buckley has said:

"What we do expect to see, as our policy is applied, is a qualitative shift in the kinds of countries with which we will be concluding sales. They will include a large number of developing countries . . . with which we will want to develop a cooperative relationship. . . ."[89]

This statement and others confer legitimacy on what has elsewhere been viewed as a potentially dangerous increase in coproduction agreements with non-NATO countries, whereby LDCs acquire technical information to manufacture advanced weapons through licensing and joint venture agreements.[90] Coproduction is the most problematic aspect of increased LDC weapons sophistication, with the net result of losses to the U.S. on three fronts: (a) more sophisticated weapons in the hands of LDCs with a concomitant reduction in U.S. influence and security; (b) the attenuating of U.S. technological advances through their acquisition by LDCs; and (c) the loss of U.S. jobs and creation of an LDC competitive base. Why these disadvantages are being institutionalized in U.S. policy is difficult to understand, beyond recognizing the boost they provide to the short-term earnings of arms manufacturers.[91]

Finally, LDC arms acquisitions must be viewed against the backdrop of the recipients' economies. With LDCs buying arms at an estimated average increase in value of 25% per year, the opportunity costs to many struggling economies are formidable.[92] Each new weapons system bought can translate into social services and developmental goals forgone.[93] A recent Wall Street Journal article points out that African arms imports are eleven times the level of a decade ago, and Latin American purchases have increased by 608%.[94] Such policies receive a tacit blessing from an Administration which offered an FY 1983 foreign assistance budget request for a 44% increase in defense spending, as against an 8% increase in developmental aid.[95]

The prevailing attitude in the Administration is that the very poverty of most LDCs would act as an effective control on their arms spending. Under Secretary Buckley has said that:

"The enormous cost of modern weapons and the state of the world economy provide their own restraints on the capacity and appetite of would-be purchasers."[96]

Reliance on this economic braking system does not seem realistic, given that the Administration has encouraged greater LDC borrowing through debt forgiveness, rescheduling subsidies, "cash flow financing", and proposals for a new concessional loan window. Moreover, the military regimes that rule or exert strong influence over most LDCs have a vested interest in allocating substantial portions of their national budgets for defense purchases. Without due regard for the absorptive capacities of the recipients, the Administration's vigorous arms sale policy is helping to drive LDCs even deeper into debt.[97] Turning to regional profiles, we can see the effects of U.S. policies and those of other suppliers.

A. Sub-Saharan Africa

While the Middle East is by far the largest regional recipient of arms transfers, Sub-Saharan Africa is the fastest growing market.[98] The region is the product of colonial rule, from which some of its countries have only recently emerged. Despite some oil and mineral resources, Africa remains one of the least developed areas in the world. Economic instability and poverty are leitmotifs of African politics. So too is tribalism, a divisive feature that continues to complicate emergence of national identities. More recent sources of conflict which thread through regional issues have been the different external threats from Soviet adventurism and an isolated, powerful South Africa.

The Soviets have dominated the African arms market, with France and the U.S. following at a distance.[99] This clear lead has done little to assure Soviet hegemony in the region, as noted in Section II. While they maintain strong client relations with several states, the Soviets have failed to develop a more conventional economic and diplomatic presence.[100] The Soviet-backed Cuban forces in Angola are regarded with suspicion and concern in neighboring countries. Cuban troops in the Congo cause anxiety in Gabon, which depends upon Brazzaville's cooperation to transport strategic minerals to their markets. Most important, Soviet arms shipments to Libya have destabilized the Sahel and all of Africa, resulting in open warfare in Chad and disturbances in Sudan. The list of Soviet customers includes Angola, Equatorial Guinea, Ethiopia, Guinea, Guinea-Bissau, Mali, Mozambique, Sudan, and Uganda.[101] In the period 1974-1981, the Soviets have sent some 4,885 pieces of artillery, 1,555 tanks, and 340 supersonic aircraft to the region, along with other hardware and advisory support.[102]

The Allied share of this market has been far more modest, but still significant.[103] Western European transfers tend to follow colonial lines, with Francophobe African nations relying on the French, and former English colonies continuing military ties with Britain. The U.S. has sought to create special relationships to facilitate plans for Rapid Deployment Force capacity through the region. To that end, the Administration has proposed $165 million in FMS credits for Sudan, Kenya, and Somalia. This is part of an increased arms transfer program which anticipates a quadrupling of FMS credits from the 1981 totals of $126 million to proposed 1983 levels of $474 million.[104] As mentioned earlier, forgiveness of indebtedness incurred by Sudan and new low interest loans for six other African countries are part of this package. A parallel increase in U.S. commercial sales is predicted, from 1981 exports of less than $6 million to the region, to a 1983 estimate of $17 million.[105] The increase in volume of U.S., Western European, and Soviet arms transfers has been accompanied by qualitative increases. Few African arsenals will boast of the most sophisticated weapons systems, but recent trends show the region to be one step away from latest-generation acquisitions.[106]

This occurs against a backdrop of growing instability, largely caused by the endemic problems discussed above, but interpreted by the major powers as having East/West dimensions. Continued fighting in the Horn is a prime example. The Soviets are supporting Ethiopian leader Mengitsu in his efforts to destabilize the regime of Somali President Siad Barre, who receives U.S. backing. Factional groups in both countries create internal friction and complicate the picture. The U.S. faces the dilemma of supporting the Somali government without encouraging further incursions into Ethiopia based on Somalia's irredentist claims in the region. Another layer of complexity results from Somalia's long-time rivalry with neighboring Kenya, which is also a U.S. customer and ally. The recent coup attempt in Kenya emphasizes the uncertainty of the political situation in that country, and the persistence of tribal rivalries.[107] Factionalism and tribalism also threaten the new regime in Zimbabwe[108] and play a role in the frustrated efforts to reach a settlement in Namibia.[109]

Perhaps most important, growing domestic strife and the enmity of Black African states makes the position of Africa's largest military power, South Africa, more untenable. Friction with the border countries of Botswana, Lesotho, and Swaziland portends future violence. A Reagan Administration initiative seeking to remove prohibitions against sales of nonlethal equipment to

South African police raises questions about U.S. policies there.

The continuing upheaval throughout the region and the relatively low level of arms sophistication suggest the need for restraint by suppliers. But the quantity and quality of weapons transfers to Africa are increasing and the opportunity for imposing those controls is slipping away.

B. The Caribbean[110]

The Caribbean region, like Africa, has not been a traditional customer for sophisticated weapons. But, as in Africas, that situation is changing rapidly as the major powers introduce more arms with greater destructive potential.

The Caribbean islands and littoral states of Central and South America are politically diverse. Some of the islands remain protectorates (Guadeloupe, Virgin Islands, Puerto Rico). Others are sovereign, and retain small police *cum* military establishments which play a part in internal politics, but do not exercise a major defense role in the region (Jamaica, Barbados, Dominican Republic). The obvious exceptions are Cuba and a new regional *bete noir*, Grenada. Soviet military shipments to Cuba have increased to their highest levels since 1962,[111] and the construction of a military installation and a large airport on Grenada contribute to regional uncertainties.

Traditional border disputes among Central American neighbors continue, especially between Guatemala and Belize, Honduras and Nicaragua. But more important to the area are pervasive economic and social problems, including land reform movements and the demands for more pluralistic societies.[112] A provocative government in Nicaragua and continued Cuban intervention feed those fears. Border disputes also disrupt relations on the South American coast, where oil-rich Venezuela claims 65% of Guyana.[113] Tensions beteeen Venezuela and Colombia over illegal immigration and maritime boundaries also continue to grow.[114]

The major arms supplying nations have begun to capitalize on the demand generated by this instability. The French have concluded sales agreements with Nicaragua of $13 million worth of helicopters, missile-firing patrol boats, air-to-ground missiles, and rocket launchers.[115] This move occurs as the U.S. Administration is seeking additional arms assistance for El Salvador, including more helicopters and support services. Recent Soviet shipments to Cuba include MiG-23 aircraft, which the Administration perceives as helping to raise the regional ante.

The U.S. has interpreted regional developments, especially the growing Cuban presence on Grenada, as sufficient provocation to contract with Venezuela for the sale of twenty-four F-16 fighters, at a total cost of $615.3 million. This agreement undermines Paragraph 9 of the Declaration of Ayacucho of 1974, in which Venezuela joined with seven other Andean nations to seek to limit the introduction of offensive weapons into the region.[116] The proposed sale brought a formal protest from Guyana, and Colombia's president-elect has also expressed concern.[117] It remains to be seen whether the sale itself and Venezuelan statements proclaiming a role as regional protector will seriously damage strong U.S. ties with Colombia, including cooperation in controlling illicit drug traffic.

In the wake of the Venezuelan agreement, Peru made overtures concerning the F-16/J79; another species of export fighter which resembles the F-16, but has a more modest power plant. State Department officials privately expressed doubt about Peru's ability to finance such a purchase, and about the effect the sale would have on that country's development. As could be predicted, the F-16 sale to Venezuela has served to "break the tacit threshold on sophisticated weapons in Latin America", and make it "more difficult for Washington to turn down other nations which request the F-1."[118]

Administration spokesmen have championed the Venezuelan sale as protecting an important oil-supplying friend without overburdening its economy. A joint statement by Assistant Secretaries of State Enders and Burt recites Administation concern about the Cuban threat and again offers the argument that the sale would have gone to another supplier if the U.S. had not reacted first.[119] But former Under Secretary of State Matthew Nimetz told the Senate Foreign Relations Committee that "If Cuba gets into fighting people by air, the U.S. is going to be involved; we are not going to count on Venezuela to have an air war with Cuba."[120] Given the proximity to the U.S. and the level of conflict that an air war would represent, Nimetz's thesis seems well founded.

More important, the Administration's "us or them" posture begs the question of whether or not such weapons should be sold by anyone. Professor Pierre has underscored both the need and the opportunity for arms limitations in the whole of Latin America:

"The potential for conflict with Latin America appears to have increased in recent years, underscoring the significance of the need for restraint. The rising cost of arms and of efforts to modernize the armed forces provides another incentive. Moreover, the establishment of some qualitative ceilings on the type of arms that might be introduced into the region may be feasible, given the still relatively low level of military technology in the inventories. Latin America would also be an especially appropriate region for consultation among the suppliers. No nation has a dominant share of the arms market that it would be asked to give up. The essentially commercial competition that exists at present among the suppliers could therefore be regulated so as to ensure that political objectives, such as regional stability, are best met."[121]

Since the publication of Pierre's book earlier this year, the arithmetic of sales to the region has altered, making localized and global arms restraint policies more critical, if serious confrontations are to be avoided.

C. South Asia

In contrast to Africa and the Caribbean, the Asian subcontinent has been a major arms recipient since World War II. The U.S. provided a large volume of surplus weapons to Pakistan and lesser amounts to India as part of its post-war communist containment policy. Between 1954 and 1965, the U.S. gave $674 million in military grant assistance to Pakistan, and $95 million to India.[122] These U.S. transfers accounted for some 80% of Pakistan's armaments during that period and made the country into a "serious military power."[123] The buildup led to an arms race with India, and eventually contributed to three regional wars. The 1965 fighting over Kashmir resulted in U.S. curtailment of arms transfers to both countries. While sales later resumed, a restrictive policy remained in effect until 1975.

When Soviet troops invaded Afghanistan in December of 1979, the Carter Administration sought to accelerate security assistance to Pakistan and rebuild relations which had further deteriorated in November of that year when radicals burned the U.S. embassy in Islamabad, killing several American employees. But uncertainty about the depth of U.S. commitment led General Zia ul-Haq to reject a $400 million assistance offer as "peanuts."[124] His reticence was traceable to the fact that Carter earlier had invoked the Symington amendment denying military assistance when it became clear that Pakistan was developing a nuclear weapons capability. Nonetheless, the Carter Administration managed to rekindle bilateral security discussions with the Pakistani regime.

The Reagan Administration advanced those discussions and took them in a new direction. The result was an agreement to sell Pakistan an integrated air defense system which includes forty F-16 fighters at a cost of more than $1 billion. It generally is agreed that the purchase is supported by financing from Saudi Arabia, since Pakistan would not be able to undertake such a commitment alone. The State Department estimates Pakistan's GNP for 1981 to have been about $24.5 billion. Its balance of trade deficit runs nearly two to one: $4.7 billion of imports versus $2.4 billion in exports.[125] A recent *Wall Street Journal* article notes that the sale represents a serious burden on a Pakistani economy where 20 percent of the country's budget is spent in servicing existing debt. The article also points up the opportunity cost to a developing country such as Pakistan, where the annual per capita income is below $250.[126] More than three-quarters of the population is illiterate, and two-thirds in mud houses. In a country where only one village in five has electricity, the Secretary for Economic Affairs complains of the drain that manning and servicing F-16s will have on the small pool of educated young men.[127] Pakistan currently spends more than ten times as much on defense as on all social services combined, and Pakistani officials admit that such a misallocation is unresponsive to the felt needs of their people and creates the potential for internal problems.[128]

But the Pakistanis are unable to register any discontent at the ballot box. The Zia government promised elections within ninety days after seizing power five years ago.[129] Instead, Zia's predecessor, Zulfiqar Ali Bhutto, was executed and Zia's opponents charge that 2300 political prisoners were jailed.[130] General Zia gives no indications that elections will occur any time soon, and U.S. officials privately admit no orderly transfer of power is likely in the foreseeable future. These facts cast doubt on Reagan Administration claims that the F-16 sales will provide leverage on human rights issues, and suggest parallels with the failed U.S. policies in Iran.

More importantly, the events within Pakistan challenge the notion that U.S. arms shipments will create a relationship which will encourage Zia's government to forego its research on nuclear weapons. To date, this Administration has not made serious efforts to discourage continued Pakistani research along these lines, short of signaling U.S. disapproval of a nuclear detonation by Pakistan. The sale of aircraft which, with very minor alterations, are themselves capable of delivering a nuclear warhead is hardly tailored to achieve restraint.

Reagan Administration policies with respect to South Asia follow in the tradition of misunderstanding that has characterized the U.S. approach to security needs to the region since World War II.[131] While U.S.

policy makers have focused on the Soviet threat, both India and Pakistan are obsessed with regional issues and a pervasive mutual distrust. Time and resources have permitted India to emerge as the dominant area power, with nearly four-to-one air superiority and a domestic defense industry which employs 250,000.[132] But India has had difficulty coming to terms with its new leadership role. Old hostilities and suspicions still shape its policies. The announcement of the Pakistan sale prompted India to buy Mirage 2000s from France and begin negotiations with the Soviets for new MiGs to add to its existing inventories of French, Soviet, British, and Indian-built fighters.[133] Prime Minister Gandhi's visit to Washington was the occasion for President Reagan to offer an olive branch for U.S./India relations in the incongruous form of a proposed $1 billion artillery sale.[134] This development places the U.S. back in the uncomfortable position it was in before 1965—supplying arms to both parties.

Administration spokesmen point to the 85,000 Soviet troops caught in the Vietnam-style guerrilla war in Afghanistan as the real threat to regional security. But some U.S. officials and area observers admit that a major Soviet threat to the region is unlikely. The Pakistani government seems to share that perception; or at least to be less concerned about the possibility of a confrontation with the Soviets than with traditional rivalries. This is evident from the fact that approximately 80% of Pakistan's army is concentrated along the border with India. Pakistani air bases are also established in the east, rather than along its borders with the Soviet Union and Afghanistan. Thus, it seems more likely that current policies will feed old tensions and generate new instability in a region where a delicate equilibrium might otherwise prevail.

V. RETROSPECT AND RECOMMENDATIONS

We have seen that the transfers of sophisticated weapons to Third World countries have increased markely over the past decade. The result of these qualitative and quantitative changes is that LDCs now have unparalleled political and military options. Recently, such options have been exercised in the South Atlantic and Middle East. The potential for more and even greater instability exists in other parts of the world, and we have reviewed some regions which are shaping up as grim "coming attractions." In the face of these challenges, U.S. policy has departed from the congressional mandate of restraint. In its stead, the Reagan program of arms promotion abandons guidelines to pursue a U.S./Soviet arms sale race, where LDC buyers become surrogates for the sellers, policing seller interests with high technology weapons. Developmental goals and concern for regional stability are minimized by this policy which purports to "deal with the world as it is, rather than as we would like it to be." [135]

But "the world as it is" turns out to be a complicated, multi-polar place; a product of divers economic and political conditions. As General Wallace Nutting (Commander-in-Chief, U.S. Southern Command) noted in his testimony on El Salvador, "conditions, not communists," cause instability. Pursuit of successful foreign policy demands attention "on all fronts simultaneously: economic, political, social, and military." [136] While competition from a belligerent and powerful Soviet Union must be a central theme in U.S. relations with the developing world, there is every reason to believe that U.S. interests are poorly served when that competition is expressed in large transfers of sophisticated weapons. That course can result in a lessening of U.S. influence and freedom of action, regional instability, and misallocation of recipient country resources. It may also compromise U.S. security needs through drawdowns on scarce items in our service inventory and an increased risk of reverse engineering and countermeasure development.[137]

The alternative is to require that arms transfers be assigned a realistic role in the conduct of our foreign policy. This means recognizing the very important contribution they make as one element of a balanced approach to the security and developmental needs of key recipients, and of whole regions. It also demands that some basic multilateral restraints be applied to the trade in sophisticated weapons to developing countries, so that the collective security of suppliers and recipients will not be undermined further by competition for the market. The Arms Export Control Act provides the U.S. with a framework for initiatives on both fronts.

A. The Congressional role

The Congress determined it would play a larger role in the formulation of arms transfer policy when it passed the AECA. The legislative history noted that "Too often in the past decisions have been made with respect to security assistance without the knowledge or concurrence of Congress."[138] To "insure congressional oversight of arms transfers," the AECA incorporated requirements for annual estimates (Sec. 25), expanded quarterly reports (Sec. 36(a)), and reporting on important offers to sell (Sec. 36(b)). The 36(b) reports of major sales incorporate a notice period of thirty days. An additional twenty day informal notice prior to such submissions was agreed upon as a "tickler" system for important sales. Subsequent amendments consolidated and expanded the Sec. 25 reports, along lines envisioned by Senator Javits in amendments he had proposed.[139] Other changes have made defense requirements surveys (Sec. 26) and price and availability requests (Sec. 28) accessible to Congress.

Despite better information, it is apparent that Congress has not become a full partner to the process. Informal reviews of 36(b) submissions show that many of these sales were not included in the quarterly estimates required by Sec. 28 as price and availability requests. Most omissions seem to be uncontroversial and not prejudicial to the congressional role. But breaches of the formal and informal notice process weaken congressional oversight and the opportunity to participate in comprehensive planning. Moreover, they create the risk of an AWACS scenario in which, as Senator Robert C. Byrd noted, "a simple survey of Saudi defense requirements escalated into a major foreign policy issue for the United States without a great deal of high level attention along the way." [140]

Congress may also find that DOD and the Administration have created a "Catch 22" situation for the legislative branch through the use of the "cash flow" method of financing. This permits credits to be extended to countries which have only enough monies to meet current fiscal year cash requirements of a sale, rather than the usual demand that they set aside the total cost of the purchase at the time the order is placed. By permitting this practice, GAO warns that Congress has allowed the Defense Department to make "a deeper commitment without congressional approval for future support." [141] Congress may one day soon find itself obligated to make sales to countries when such transfers may run counter to U.S. interests.

More fundamentally, the information that Congress receives does not lend itself to use in long-term planning.[142] Staff members of the responsible committees argue that sales are presented in isolation, and Congress is asked to approve without knowing the context of the transfer. This differs dramatically from the extensive justifications which accompany bilateral and multilateral development programs. Those programs use a country plan approach to report and evaluate all aspects of recipient economies. U.S. aid levels are reviewed in terms of genuine needs and participation by other countries and international organizations.

While additional data on arms sales are available to Congress under the extended reporting provisions of Sec. 36(b), that clause has seldom been invoked, and does not include full economic analysis. Likewise, the Sec. 25 report has not been adequate for economic planning. The economic considerations embodied in Sec. 35, which would declare ineligible a country diverting development resources to "unnecessary military expenditures", have never been called into play.

The solution may be as simple as requiring that the Departments of State and Defense share with the appropriate committees the products of the military/economic reviews undertaken at the mission level. The 1978 amendments to the AECA requiring that the Administration share defense requirement surveys with the concerned committees have met with DOD resistance on the single instance when invoked: a request relating to El Salvador. Accordingly, the surveys have no systematic role in the congressional review process.[143] It may be desirable that country reports be provided through the vehicle of the regional subcommittees, in some established way. Certainly an "economic impact statement" of some kind would be a small burden; no more onerous than the one AID and IDCA now carry on developmental programs. And it would allow for a programmatic, informed approach to FMS and commercial license proposals.

Consideration should also be given to charging one staff member on each committee with responsibility for LDC arms export policies and for following the programs more carefully than is now done. The size of the programs and the security issues at stake clearly justify some full-time attention, and long-term congressional participation.

Finally, Congress would guarantee a more positive role for itself by requiring that major sales be approved, rather than relying on a resolution of disapproval, as is now the case. Senator Robert C. Byrd recommended this approach in 1977 for sales in excess of $200 million for any one country.[144] The effect would be to involve Congress in important country policy decisions without intruding into the more routine transactions that are properly left within the jurisdiction of the Executive agencies. Again, this would help to assure continuity and a longer view of U.S. policies.

B. U.S. leadership

The AECA obligation to seek multilateral controls should become an urgent priority. If the Administration genuinely is "prepared to examine ways" to control the spread of high technology conventional

weapons, the time is now. The failure of the 1977 CAT meetings with the Soviets offers some important lessons, and suggests alternatives which are more likely to meet with success.

The first step necessarily would be multilateral discussions with NATO members. Those who participated in the original CAT meetings urge that Western producers come to terms with a program for restraint and market sharing before trying to reach consensus with the Soviets.[145] Professor Pierre concurs, noting that:

"It is remarkable, in fact, that systematic foreign policy consultations among the major Western powers on developments in the Third World do not already take place, given the importance to the First World countries of what happens in some of the more volatile parts of the world."[146]

The issue has become too important to allow the objection that such discussions are beyond the ambit of European security and thus exceed the NATO mandate. The current competition among allied producers undercuts shared policy goals and prevents a unified approach. Allied nations share many objectives in other regions. That common ground ought to be explored as part of the existing collective security arrangement.

The economic interests of Western countries will, of course, be the barrier to a consensus on restraint; especially among European nations whose economies rely more on exports. But market division along geographic or product lines could offer solutions that would be economically attractive to the producers. Experiments with regional cooperative schemes may lead to an acceptable formula for the global market.

Only when the Allies can agree among themselves on a program of restraint will a serious approach to the Soviets be possible. Professor Pierre characterizes this step as an attempt to establish "rules of the game."[147] There is no doubt that the Soviets see negotiations as an opportunity to limit Western transfers and garner a better market position. But the Soviets share Western interests in limiting the number of sophisticated weapons and the diffusion of influence that occurs. Those interests might find expression in a willingness to abide by regional restrictions on categories of high technology weapons. We have seen that Africa and the Caribbean may be good starting points for this restrictive treatment.

Other channels for pursuing restraint have been suggested. The Palme Commission recommends regional agreements and supplier/recipient guidelines for conventional transfers.[148] Here again, a unified allied approach may offer the best chance of success in achieving enforceable agreements. But the suggestion that recipients be included in the process is important, and becomes more so as LDCs develop their own arms production capabilities. An orderly system for meeting their security needs in appropriate ways requires developing country participation and commitment. The U.S. has the choice of encouraging this process, or hoping to ride out the storm of growing instability that is gathering.

[17] An analysis and history of the AECA legislative veto is contained in "The Legislative Veto and U.S. Arms Sales," an unpublished CRS White Paper by Dr. Richard Grimmett (September 24, 1979). The broader issue of the constitutionality of the legislative veto is treated in John B. Henry's "The Legislative Veto: In Search of Constitutional Limits," 16 *Harv. J. Legis.* 735 (1979). The Supreme Court is scheduled to deal with this issue in two cases to be considered in the coming term: *Chadha v. Immigration & Naturalization Serv.*, 634 F.2d 408 (9th Cir. 1980); *Consumer Energy Council of America v. Federal Energy Regulatory Commission*, 673 F.2d 425 (D.C. Cir. 1982). Both cases deal with the issue of one house legislative vetoes.

[47] Pierre, *Global Politics*, p. 131.

[48] "Arms Sales: Part 1," *Congressional Quarterly*, April 3, 1982, p. 723.

[49] CRS Update (1982), p. 11.

[50] Congressional Research Service analysis places U.S. exports at less than 24% of total arms production while the U.K. exports about 26%, France over 30%, and Italy 31%. In *Global Politics of Arms Sales*, Andrew Pierre puts the French total at 41% in 1980 (p. 85). Pierre notes the difficulty of assessing Soviet percentages, but acknowledges that export pressure is lower (p. 80). CRS sources estimate Soviet exports to be about 18% of total production. CRS calculations are based on five year averages derived from Arms Control and Disarmament Agency (ACDA) figures and other unclassified sources.

[76] Section 206 of the AECA amends Section 21 of the Foreign Military Sales Act (22 U.S.C. 2761 (h)(i)) to require a written statement accompanying any proposal to sell defense articles or services which "could have a significant adverse effect" on U.S. service inventories. Authorities report that no such statement has ever been submitted by this Administration. The 36(b) submissions contain boilerplate assurances that sales will not harm materially U.S. readiness. Likewise, no detailed reports under Sec. 812 of the DOD Appropriations Act of 1976 (Pub. L. 94-106) have been submitted by this Administration.

Italy	410	1,040	360	980	1,390	340	2,870	370
Other free world	760	890	1,380	1,280	320	2,560	3,580	3,765

TABLE 1.—ARMS TRANSFER AGREEMENTS WITH THE 3D WORLD, BY SUPPLIER [1]—Continued

[In millions of current U.S. dollars]

	1974	1975	1976 [2]	1977	1978	1979	1980	1981
Communist	6,940	4,430	7,815	10,680	3,890	10,310	16,270	13,900
Of which:								
U.S.S.R	5,970	3,670	6,600	9,750	2,920	8,880	14,770	6,630
Other Communist	970	760	1,215	930	970	1,430	1,500	7,270
Dollar inflation index (1974=100) [3]	100	109	117	125	134	144	160	181

[1] U.S. data are for fiscal year given (and cover the period from July 1, 1973, through Sept. 30, 1981). Foreign data are for the calendar year given. Statistics shown for foreign countries are based upon estimated selling prices. All prices given include the values of weapons, spare parts, construction, all associated services, military assistance, and training programs. U.S. commercial sales contract values are excluded, as are values of the military assistance service funded account (MASF) which provided grant funding for South Vietnam, Laos, Philippines, Thailand, and South Korea. MASF for fiscal year 1974 was $840,000,000; for fiscal year 1975 $544,000,000. Related grant transfers to South Korea and Thailand, also excluded, were $11,000,000 in fiscal year 1979; $132,000,000 in fiscal year 1980; and $100,000,000 for fiscal year 1981. All data are current as of Jan. 1, 1982, and reflect termination of all sales contracts. The value of Iranian contracts canceled but not included in the U.S. data above are as follows: Fiscal year 1974 ($390,000,000); fiscal year 1975 ($1,157,000,000); fiscal year 1976 and transitional quarter ($236,000,000; fiscal year 1977 ($2,953,000,000); fiscal year 1978 ($1,673,000,000); fiscal year 1979 ($6,000,000); fiscal year 1980 (0); fiscal year 1981 (0). 3d World category excludes Warsaw Pact nations, NATO nations, Europe, Japan, Australia, and New Zealand.
[2] U.S. data for fiscal year 1976 includes the transitional quarter (fiscal year 197T).
[3] Based on Department of Defense price deflator (minus pension funds).

Source: U.S. Government.

TABLE 1A.—ARMS TRANSFER AGREEMENTS VALUES AVERAGES, TO 3D WORLD BY SUPPLIER, 1974–77 [1]

[In millions of current U.S. dollars]

	1974	1975	1976 [2]	1977	Average (1974–77)

Dollar inflation index (1974=100) [3]	100	109	117	125	

[1] U.S. data are for fiscal year given (and cover the period from July 1, 1973, through Sept. 30, 1977). Foreign data are for the calendar year given. Statistics shown for foreign countries are based upon estimated selling prices. All prices given include the values of weapons, spare parts, construction, all associated services, military assistance, and training programs. U.S. commercial sales contract values are excluded, as are values of the military assistance service funded account (MASF) which provided grant funding for South Vietnam, Laos, Philippines, Thailand, and South Korea. MASF for fiscal year 1974 was $840,000,000; for fiscal year 1975 $544,000,000. All data are current as of Jan. 1, 1982, and reflect termination of all sales contracts. The value of Iranian contracts canceled but not included in the U.S. data above are as follows: fiscal year 1974 ($390,000,000); fiscal year 1975 ($1,157,000,000); fiscal year 1976 and transitional quarter ($236,000,000); fiscal year 1977 ($2,953,000,000). 3d World category excludes Warsaw Pact nations, NATO nations, Europe, Japan, Australia, and New Zealand.
[2] U.S. data for fiscal year 1976 includes the transitional quarter (fiscal year 197T).
[3] Based on Department of Defense price deflator (minus pension funds).

DESCRIPTION OF ITEMS COUNTED IN WEAPONS CATEGORIES, 1974–1981

Tanks and Self-propelled Guns: Light, medium and heavy tanks; Self-propelled artillery; Self-propelled assault guns.

Artillery: Field and air defense artillery, mortars, rocket launchers, and recoilless rifles—100 mm. and over; FROG launchers—100 mm. and over.

Armored Personnel Carrier (APCs) and Armored Cars: Personnel carriers, armored and amphibious; Armored infantry fighting vehicles; Armored reconnaissance and command vehicles.

Major Surface Combatants: Aircraft carriers, cruisers, destroyers, frigates.

Minor Surface Combatants: Minesweepers, subchasers, motor torpedo boats; Patrol craft, motor gunboats.

Submarines: All submarines, including midget submarines.

Guided Missile Patrol Boats: All boats in this class.

Supersonic Combat Aircraft: All fighters and bombers designed to function operationally at speeds above Mach 1.

Subsonic Combat Aircraft: All fighters and bombers, including propeller driven, designed to function operationally at speeds below Mach 1.

Other Aircraft: All other fixed-wing aircraft, including trainers, transports, reconnaissance aircraft, and communications/utility aircraft.

Helicopters: All helicopters, including combat and transport.

Surface-to-air Missiles (SAMs): All air defense missiles, excluding those which are shoulder-fired.

NATIONS IN REGIONS IDENTIFIED IN ARMS DELIVERY TABLES AND CHARTS

East Asia and Pacific: Australia; Brunei; Burma; China; Fiji; French Polynesia; Gilbert Islands; Hong Kong; Indonesia; Japan; Kampuchea (Cambodia); North Korea; North Vietnam; Laos; Macao; Malaysia; Nauru; New Caledonia; New Hebrides; New Zealand; Norfolk Islands; Papua New Guinea; Philippines; Pitcairn; Singapore; Solomon Islands; South Korea; South Vietnam; Taiwan; Thailand; Western Somoa.

Near East and South Asia: Afghanistan; Algeria; Bahrain; Bangladesh; Egypt; India; Iran; Iraq; Israel; Jordan; Kuwait; Lebanon; Libya; Morocco; Nepal; North Yemen (Sana); Oman; Pakistan; Qatar; Saudi Arabia; South Yemen (Aden); Sri Lanka; Syria; Tunisia; United Arab Emirates.

Europe: Albania; Austria; Bulgaria; Belgium; Canada; Czechoslovakia; Cyprus; Denmark; Finland; France; Germany, Democratic Republic; Germany, Federal Republic; Greece; Hungary; Iceland; Ireland; Italy; Liechtenstein; Luxembourg; Malta; Netherlands; Norway; Poland; Portugal; Romania; Spain; Sweden; Switzerland; Turkey; United Kingdom; U.S.S.R.; Yugoslavia.

Africa (Sub-Saharan): Angola; Benin; Botswana; Burundi; Cameroon; Cape Verde; Central African Empire/Republic; Chad; Congo; Djibouti; Equatorial Guinea; Ethiopia; Gabon; Gambia; Ghana; Guinea; Guinea-Bissau; Ivory Coast; Kenya; Lesotho; Liberia; Madagascar; Malawi; Mali; Mauritania; Mauritius; Mozambique; Niger; Nigeria; Reunion; Rwanda; Senegal; Seychelles; Sierra Leone; Somalia; South Africa; St. Helena; Sudan; Swaziland; Tanzania; Togo; Uganda; Upper Volta; Zaire; Zanbia; Zimbabwe.

Latin America: Antigua; Argentina; Bahamas; Barbados; Belize; Bermuda; Bolivia; Brazil; British Virgin Islands; Cayman Islands; Chile; Colombia; Costa Rica; Cuba; Dominica; Dominican Republic; Ecuador; El Salvador; Falkland Islands; French Guiana; Grenada; Guadeloupe; Guatemala; Guyana; Haiti; Honduras; Jamaica; Martinique; Mexico; Monteserrat; Netherlands Antilles; Nicaragua; Panama; Paraguay; Peru; St. Christ-Nevis; St. Lucia; St. Pierre and Miquelon; St. Vincent; Suriname; Trinidad-Tobago; Turks and Caicos; Uruguay; Venezuela.

APPENDIX B—U.S. ARMS TRANSFERS TO THE THIRD WORLD: THE IMPLICATIONS OF SOPHISTICATION

(By Caleb S. Rossiter)

IMPLICATIONS FOR U.S. SECURITY INTERESTS

The implications of sophisticated arms transfers are discussed under four headings: regional stability; Soviet reverse engineering and countermeasure capabilities; recipient threat to NATO countries; and levels of U.S. training and maintenance personnel.

REGIONAL STABILITY

Third World conflicts are not only destructive and costly to the participants, but they also can damage U.S. economic and security interests. Some have the potential to place the United States and the Soviet Union in direct confrontation as supporters of the participants. For these and other reasons, the U.S. has adopted a policy of considering the impact of its arms transfers on regional stability.

Assessments of the potential role of sophisticated arms in preserving regional stability can only be made on a case-by-case basis. No general rule appears to arise from recent history. In some cases, possession of sophisticated arms may encourage a country to carry out military operations which it may have otherwise foregone. The scope of Israel's operations and goals in its invasion of Lebanon and Argentina's seizure of the Falklands/Malvinas may have been influenced by the possession of sophisticated weapons. In other cases, possession of sophisticated arms may serve, as U.S. policy intends, to deter a potential adversary. American transfers to South Korea would seem to be a successful case of such deterrence. Finally, the primary motives for some transfers of sophisticated arms may be to bolster U.S. security and political relationships and the recipient's prestige rather than to enhance actual combat capability. However, the purchase of sophisticated arms may in itself create a threat to the internal stability of poorer countries by retarding their economic growth.

If a conflict does occur, however, the presence of sophisticated weapons may tend to make it more destructive and costly than would have otherwise been the case. The high costs of reconstruction in Lebanon and of replacing British and Argentinian equipment lost or damaged in the South Atlantic are recent examples of this tendency. The longer range of the new weapons also tends to extend the battlefield from the front lines into populated rear areas.

SOVIET REVERSE ENGINEERING AND COUNTERMEASURE CAPABILITY

By observing a weapon in action or by obtaining damaged or undamaged versions of it, technologically advanced countries may be able to perform "reverse engineering"—that is, deduce its construction and build a similar weapon. Alternately, they may be able to devise effective counter-measures to the weapon.

Israel's recent successes against MIG fighters and SAM sites in its Lebanese operations were attributable in part to countermeasures developed from observations of these weapons in the 1973 Arab-Israeli war. The Soviet Union has also demonstrated strong reverse engineering and countermeasure capabilities. Some technical analysts feel that Soviet engineers used the U.S. Hawk, Franco-German Roland, and British Rapier surface-to-air missiles, respectively, as their "goal models" in developing the SAM-6, SAM-8, and SAM-13. Exporting sophisticated U.S. weapons increases the likelihood of the Soviet Union obtaining them, or information about them, and performing reverse engineering or developing counter-measures.

THREAT TO NATO COUNTRIES

As noted above, there are a large and increasing number of countries in possession of weapons which could seriously threaten NATO operations. Most Middle Eastern, South American and Asian countries are included in this group. However, the suppliers of these weapons are often NATO countries themselves, and most Third World recipients rely on their suppliers for long-term training and maintenance assistance and resupply during a conflict.

Some analysts argue that this dependence tends to lessen the chances of a recipient using its armed forces offensively against the wishes of NATO countries or against NATO countries themselves. However, Iran's apparent ability to obtain spare parts from other countries for its U.S. equipment and reports of major discrepancies in Saudi Arabian weapons inventories illustrate a particular problem. Once NATO countries export spare parts and weapons, covert re-export—banned by most arms transfer agreements—may be difficult to control. As more Third World countries become co-producers of weapons with NATO countries or establish independent arms manufacturing capability, the ability of the NATO countries to discourage their Third World customers from offensive operations may be a significantly weakened.

LEVELS OF U.S. TRAINING AND MAINTENANCE PERSONNEL

Sophisticated weapons require longer and more intensive training and maintenance activities on the part of the supplier than other weapons. In most cases in the Third World, a sale of sophisticated weapons implies a strong and on-going relationship between the supplying and receiving governments. The number of U.S. personnel operating overseas in support of weapons transfers has been rising recently, and much of this rise can be traced to sophisticated weapons.

According to recent Defense Department reports, 7,640 U.S. Government and contract personnel are implementing U.S. military sales in-country, 25 percent more than there were two years ago. Saudi Arabia accounts for 60 percent of these personnel. Over 1,000 more Defense Department personnel are in-country as managers of arms transfer programs. In addition, a substantial portion of U.S. military training of foreign soldiers—both in the United States and in-country with Mobile Training Teams—under the International Military Education and Training (IMET) and FMS programs is related to transfers of U.S. weapons.

It can be argued that high levels of U.S. personnel are in American interests because recipients may find it difficult to use them to carry out offensive operations without the cooperation of the U.S. Government. However, it should be noted that there are substantial risks involved in high levels of personnel. The presence of a U.S. contingent may serve as an unintended "trip-wire" for the involvement of the United States in a regional conflict. In the event of an attack on the recipient of U.S. arms, the United States may be forced into a choice of cooperation or non-cooperation with the recipient in directly supporting military operations. For diplomatic reasons, such a choice may be difficult and costly. Finally, the United States may find itself the primary

supplier of contending forces in a conflict, a situation in which the choice of cooperation and non-cooperation would be even more difficult.

THE CONGRESSIONAL ROLE IN SOPHISTICATED ARMS TRANSFERS

This paper has raised a number of issues which should be considered when decisions are being made on the transfer of sophisticated U.S. arms. Congress is an integral part of such decisions at present. It authorizes FMS credit financing and debt forgiveness annually, and has the authority to veto major administration transfer recommendations, although the President may void a veto on national security grounds. Some in Congress, however, feel that involvement in arms transfer decisions comes at too late a date in the process of negotiation between the Administration and the potential recipient.

The Administration is required by a number of sections of the Arms Export Control Act to provide Congress with advance notification of inquiries of and negotiations with foreign countries which could lead to a formal letter of offer. For example, Section 25 requires projections of potential offers for the upcoming fiscal year; section 28 requires a listing of countries which have inquired about the price and availability of specific items during a fiscal quarter; and section 36(a) requires a quarterly projection of all likely upcoming offers, which is published in the Congressional Record with reference to the region, rather than the country, in which a major sale may occur.

In some cases, though, advance notification does not occur, and Congress is unable to express an opinion to the Administration on a potential transfer until the proposal is made public with the transmittal of a 36(b) report to Congress. At this point, Congressional resistance to a proposal may be more damaging to foreign policy interests than it might have been while the proposal was still informal, classified and unpublicized. Nonetheless, Congress has thirty calendar days in which to pass a concurrent resolution of disapproval of a proposed arms sale.

An informal notification mechanism has evolved over the past few years, through which the Administration informs the Senate Foreign Relations and House Foreign Affairs committees of the contents of 36(b) reports at least 20 days prior to their formal transmittal. While this mechanism has somewhat alleviated the problem of late notification on particular sales, it still appears that it is difficult for Congress to oversee U.S. arms transfer programs and their implications on a world-wide and regional basis.

APPENDIX C—F-16 SALES ABROAD: A CASE STUDY

(By Kevin Nealer and Dick McCall)

The Reagan Administration's $21.5 billion foreign military sales program for FY 1982 is the largest arms transfer package in U.S. history. It sets new records for total dollar volumes, kinds of customers receiving weapons, and levels of sophistication of defense materials being sold. In light of the Falkland Islands War, even Great Britain is rethinking its arms sale practices, having sold Argentina $200 million in military hardware prior to the outbreak of the conflict.

Administration spokesmen continue to stress the commitment to a growing and aggressive U.S. arms sales policy. Despite the lessons of the Falklands and recent Mideast fighting, they still hold fast to the so-called Nixon (Guam) Doctrine: that U.S. surrogates with high-technology weapons will police our interests in the developing world.

The centerpiece for the Administration's policy in the Third World appears to be the F-16, the ultimate stamp of approval for developing country customers. The U.S. Air Force's highly advanced fighter is one of the most maneuverable, versatile tactical aircraft in the world today. Its sophisticated fly-by-wire flight controls, high "g" cockpit, and powerful afterburning turbofan engine incorporate the latest electronic and engineering advances. It can carry nuclear or conventional air-to-surface ordnance, and can utilize the all-aspect AIM-9L "Sidewinder" missile for air-to-air combat superiority. The F-16 may soon be equipped with even more sophisticated conventional weapons and defense systems.

The Carter Administration first introduced the sale of F-16s abroad on a restricted basis, limited to select NATO countries, Israel, and Egypt. Now the Reagan Administration has added Pakistan, Venezuela, and South Korea to the list of buyers. Of these, only the Korean sale will follow a normal delivery schedule. The other sales are to be made on an accelerated basis, contrary to the timetable that USAF officials have described in testimony and planning documents as being necessary to avoid critical U.S. inventory shortages. Democratic Policy Committee staff review of unclassified Air Force internal documents reveals the following:

OVER-EXTENDING MARKETING

In June of 1981, the former Director of Political-Military Affairs of the State Department, Richard Burt, wrote to Richard Adams, Vice President of General Dynamics (GD), to solicit information on the availability of F-16s for increasing export marketing. Adams responded that aircraft could be provided on an accelerated basis of 24 months. This contradicted the USAF Master Plan projection of 42 months lead time. However, Adams emphasized the 24-month lead time delivery schedule could be met only if the government agreed "to accept pre-contract costs and obligations incurred by General Dynamics and its subcontractors." DOD memos verify that this General Dynamics proposal "allows [the] contractor to obligate U.S. funds in anticipation of an FMS agreement (which violates Public Law)." Under the Arms Export Control Act, major arms transfers and extension of FMS credits cannot occur until the Congress determines that a given sale should not be disapproved.

Moreover, Air Force readiness projections warn that "the historical record says there will be impacts" on U.S. forces, despite GD assurances to the contrary. Because "GD is competing with Northrop's F-5G [F-20] for a portion of the potential export market," DOD analysts caution that General Dynamics is getting ahead of itself in committing to an accelerated production schedule which it cannot sustain without cutbacks to the U.S. and NATO inventories. (Note: DOD and State Department officials have engaged in aggressive marketing of a plane never designed for general export. State's program has been undertaken without reference to establish USAF inventory requirements, or the FX export program option.)

U.S. INVENTORY DEPLETION

General Dynamics and DOD delivery schedules document the draw-down on service inventories. From the second quarter of 1982 to the last quarter of 1984, 40 aircraft will be diverted from the USAF for Egypt alone. Six planes have already been diverted from NATO purchasers for Pakistan, and others must follow to fill that contract for a total of forty F-16s. Current projections do not take into account future sales proposals which may include Indonesia, the Philippines, Jordan, and others. Nor do they anticipate the effect of sales of the "J79" export model of the F-16. Those planes incorporate a less powerful engine, but will necessitate pulling standard F-16 fuselages off the production line and out of projected inventories. DOD planners report that FMS programs to date "have required the diversion of USAF production aircraft and logistic assets at the expense of USAF readiness." Continued acceleration of the F-16 sales program can only result in a further deterioration of USAF readiness.

The FMS-induced shortage goes beyond the problem of diversion of completed F-16s from our own inventories and those of our allies. The crucial areas of maintenance and support also have been affected by the FMS program. Accelerated sales have reduced already low parts inventories, especially for systems with long lead times. The avionics packages, ejection seats, F100 engine spares, and engine accessories cannot be acquired on an accelerated basis from subcontractors due to their complexity and the limited production capabilities. Air Force and DOD reports document the fact that "diversion of USAF spares will have a particularly dramatic impact on our F-16 support posture" leaving the Air Force "critically short of spare parts to support our own peacetime and wartime commitments."

USAF program reports describe the Venezuela sale as a "a contractual and administrative nightmare." They note that the only source of spares will be USAF inventories, and that such "borrowing" will be "costly and difficult to manage". They also point out that the "drastic acceleration" of the Pakistan sale "has had, and will continue to have, significant impact on USAF management activity and support."

Only 67 percent of the nearly 470 USAF F-16s were operational during the first part of 1982. Air Force spokesmen acknowledge that 1983 readiness will be even lower as parts and maintenance support are spread thinner. The full impact has not been reported to Congress, as required by the Arms Export Control Act.

MANPOWER DRAIN

As costly and debilitating as aircraft and spare part diversions have been, a greater threat to U.S. force structure may result from the manpower drain caused by the need for technically trained personnel to support the FMS program abroad. Air Force staffing justifications describe the "extensive training" of some two years which is necessary to bring the skills of maintenance personnel to a competent level in the complex and essential jobs of providing logistical support for the F-16s. Advanced avionics such as communications, navigation, radar, and weapons systems require skilled electronic technicians with "comprehensive training plus operating experience" to assure combat readiness and absolute reliability. But Air Force officials acknowledge serious retention problems in these categories of specialists, placing the service in the position of being unable to comply with DOD Directive 1130.2 which requires "self sufficiency in maintaining and operating new systems" within twelve months of introduction. Former Air Force Secretary

Hans Mark was blunt about this problem when he told The Wall Street Journal that "Airplanes don't fly because we don't have maintenance people."

Congressional action to provide special reenlistment bonuses for key technical positions within the armed services has improved the trend line, but 1981 figures reveal that only about one-third of the new technicians sign up for a second tour. Moreover, Air Force officials are concerned that General Dynamics incentive bonuses may be an attractive lure for Air Force-trained technicians, thereby undercutting the congressionally-initiated bonus system.

DOD officials point to the accelerating FMS program as the principle cause of this manpower drain. They warn that sales to developing countries that have little technical infrastructure create a demand for skilled personnel which private contractors satisfy by hiring away new USAF specialists. In fact, Air Force internal assessments of the foreign sales programs describe "heavy dependence" on private contractors. For the Egyptian sale alone, 130 technicians will be needed. General Dynamics has told DOD officials that part of that force will be made up of personnel acquired from Air Force ranks. One DOD report concludes that "GD will undoubtedly backfill the vacant flightline personnel positions with recruits from the USAF with F-16 experience. The faster the pace of the F-16 FMS case, the faster the F-16 base maintenance capability will be degraded."

As a result of the F-16 FMS sales program, the Air Force finds its manpower needs compromised in several ways. Most importantly, the USAF ability to maintain our own force capability is reduced because some Air Force technicians must be sent overseas to train and assist private contractors and locals in servicing foreign-owned aircraft: this at the expense of U.S. readiness. In addition, government investment in new trainees is not being recouped and attempts to build a corps of experienced personnel are frustrated when private contractors hire away recruits for services which the government must then rent back at the contractors' price, causing "turmoil in the USAF personnel system."

Finally, the service loses control over uniformed personnel. An independent study conducted for DOD warns that "continuing reliance on civilian technicians means that maintenance skills are not being successfully transferred from the producers to the ultimate users of the systems" i.e., the USAF. Moreover, the study points out that "the Military Departments do not have statutory authority to compel [contractors] to perform any function in support of forces engaged in conflict." This poses a danger to U.S. military capability during wartime.

SECURITY CONCERNS

Along with endangering U.S. readiness, F-16 sales to developing countries raise special problems. A recent Congressional Research Service White Paper characterized the sale of high-technology weapons systems as "increas[ing] the likelihood of the Soviet Union obtaining them, or information about them, and performing reverse engineering or developing counter-measures." This is especially true of the F-16s and the advanced missile systems which they will carry. Our experience in Iran where news reports allege that the Soviets gained access to F-14s and the U.S. air-to-air Phoenix missile is the most recent example of the compromise of U.S. technology vital to our ability to maintain a qualitative edge over the Soviets.

The security risk is particularly evident when the purchasers do not share U.S. goals or perceptions of the security threat. For example, the Administration has justified the sale of F-16s and a sophisticated air defense system to Pakistan on the grounds of the Soviet threat, particularly the threat emanating from Afghanistan. Yet 80 percent of Pakistan's army is located at, or near the Indian border, where is also maintains its air bases. Continuing Pakistani research on nuclear weapons development contravenes official U.S. policy, and raises questions about the sale of an aircraft that can be used as a nuclear delivery platform, such as the F-16.

The Pentagon shares the security concern associated with the F-16 sales to Pakistan. On November 29, 1982, a dispute erupted between the U.S. and Pakistani governments over the avionics configuration of the F-16s Pakistan had purchased. The Pakistanis believed they were purchasing the standard U.S. Air Force F-16, and refused delivery of the first six when they found out they would not receive state-of-the-art electronic equipment for detecting enemy ground and airborne radar. *The New York Times* reported on November 30, 1982, that U.S. Air Force officials "dis not want to provide the advanced equipment because of the need to protect its security. The Pakistanis were being offered a less advanced system."

However, the Administration overruled these USAF objections and agreed to provide the most sophisticated version of the F-16 to Pakistan. This turn of events precipitated concern on the part of the Congress that the original FMS notification submitted by the Administration did not indicate that Pakistan would receive state-of-the-art U.S. avionics equipment.

Venezuela is another example of potential differences between the U.S. and a recipient as to perception of security threats. Venezuela is embroiled in border disputes with Columbia and Guyana. Its declaration of a role as "regional protector" following announcement of the purchase of F-16s represents a quantum leap in the regional arms race beyond the capabilities of the MIG-23s in Cuba which U.S. officials used to justify the sale. The net effect of sales such as these is a diminution of U.S. combat readiness in favor of building foreign arsenals over which we do not have control, and which may harm our own security and that of the region.

THE PAKISTAN SALE

In many ways, the sale of 40 F-16s to Pakistan is the classic example of an arms sale "gone wrong." The elements are as follows:

First, the Congress approved the sale on the basis that the bulk of the $1.1 billion in financing would be provided by Saudi Arabia. However, on November 30, 1982, the Administration submitted a reprogramming notice to the Congress for FMS credits in the amount of $150 million for Pakistan. Of that amount, $120 million was to be used for payments on the six F-16s due in Pakistan in mid-December. In that reprogramming request, the Administration did not state from what country, or countries, FMS credits would be reallocated.

Because the Saudis were not forthcoming in financing the first six F-16s, their participation in future funding of the program has been called into question. Since it is apparent that Pakistan will not be able to repay the FMS loans made available for the F-16 program due to its already burgeoning external debt, the burden may fall on the U.S. taxpayer. Potential U.S. taxpayer exposure for the Pakistan program could be $1.1 billion.

Second, the delivery of the first six F-16s on an accelerated basis resulted in a diversion from Dutch and Belgian inventories in order to repay the United States for the six delivered from our inventory. Since the Administration has agreed to an accelerated delivery schedule for the entire Pakistan program, further diversions are likely.

Third, in light of the growing manpower problems in the USAF to service our own F-16 requirements, the Congress should be concerned over the issue of U.S. technical support for the Pakistan program.

Fourth, despite the Administration's justification of the sale on the basis of the Soviet threat to Pakistan, it should be obvious that President Zia remains concerned primarily about the traditional rivalry with India. Recent news accounts alleging that the Indian military may be considering the option of a preemptive strike against Pakistan's nuclear facilities reinforces the view that the long standing enmity dominates the perceptions of both countries.

Fifth, the fact that the USAF was concerned over providing state-of-the-art avionics equipment to Pakistan for fear it would be compromised, only to have these concerns brushed aside by the Administration, should not be taken lightly. Legitimate Pentagon concerns were overridden by an Administration which determined the necessity to make a "symbolic gesture" to Pakistan—a gesture which may prove to be contrary to U.S. interests.

And finally, from the very beginning, Pakistan dictated the nature of the F-16 program for that country. It dictated the time of delivery, terms of the sale, the financing arrangements, and the kind of equipment which was to be provided. Every essential element of a legal contract was dictated by the Pakistan government.

CONCLUSIONS

The proliferating sales of top-of-the-line U.S. military technology to developing countries raise many issues even beyond those discussed in this study of the F-16 program. Arms sales are an important tool of foreign policy. However, they are tools which require discrimination on the part of the United States as a supplier. Bending to foreign demands before meeting our own legitimate security requirements only jeopardizes the national consensus which now exists regarding defense spending. As the fighting last summer in Lebanon between Israeli and Syrian forces demonstrated, the U.S. maintains a significant qualitative edge over some quantitative advantages enjoyed by the Soviet Union in their weapons systems. Yet the Administration has allowed itself to be maneuvered into a position of jeopardizing this qualitative edge by succumbing to the demands of Third World countries such as Pakistan.

The political advantage the Administration perceives in allowing a country such as Pakistan to dictate the nature of the technology we make available has to be weighed against what should be paramount in U.S. arms policy—the protection of this technology against compromise. The F-16s being provided Pakistan contain state-of-the-art U.S. Air Force technology. Soviet AWACS and fighter interceptor capabilities are hampered by the current lack of this technology. If a decision is made to provide the Pakistanis with either the AIM-9L or AIM-9M air-to-air missile for their F-16s, the Soviets

would have an even greater incentive to obtain technology we are making available to President Zia's government. The AIM 9L and the more sophisticated AIM-9M, now being developed, have an all-aspect capability. In other words, interceptor aircraft do not need to maneuver behind a hostile aircraft to score a kill. The Soviets have not yet been able to develop this capability which is vital to offsetting larger numbers of enemy aircraft.

The Soviets have been careful as to which weapons systems, particularly aircraft, they make available for export. An advanced Soviet export fighter is the MiG-23 Flogger, which is of 1967 vintage. However, the export version contains less sophisticated avionics equipment than those MiG-23s in the Soviet inventory. The more sophisticated Soviet fighters are not available for export at this time.

It is ironic that an Administration which has pressed our NATO allies to control the types and flow of high technology items to the Soviet Union would engage in an aggressive arms export policy which puts top-of-the-line U.S. military equipment advances at risk. Earlier this year, the Senate Governmental Affairs Permanent Subcommittee on Investigations issued a report warning that the Soviet Union dedicated "substantial resources to highly focused attempts to secure American technology and was increasingly adept at acquiring this technology."

The pressure the Administration has exerted on our allies regarding the technology transfer issue has placed additional strains on the alliance. However, the Administration's credibility in this matter is strained considerably when it pursues a policy resulting in the global proliferation of high technology military equipment, such as the F-16s, over which we lose direct control once it is sold to another country.

Along with the Administration's aggressive policy of transferring high technology weapons into the Third World, there also has emerged a new arms sale lexicon. In the case of the AWACS sale to Saudi Arabia it became a "litmus test" of our relationship with that country. And as the Pakistanis maintain, the F-16 sale to their country is a "symbolic gesture." Neither the "litmus test" nor the "symbolic gesture" are criteria to be found in the Arms Export Control Act. Yet this terminology used to justify high-technology sales to countries such as Pakistan and Saudi Arabia is irrefutable evidence of a policy which is clearly "the tail wagging the dog." Recipient countries are now dictating the terms of major U.S. arms sales. Meeting U.S. defense requirements and protecting the qualitative edge we enjoy over our major adversary in the world—the Soviet Union—should be the paramount national security concern of our government. However, in the name of "litmus tests" and "symbolic gestures" the Administration has placed this technological edge in jeopardy. What concerns our military personnel above all else is having to face a potential enemy that has comparable avionics and missile capabilities to our own. They know the potential enemy has an edge in numbers which can be offset only by superior U.S. technology and the qualitative advantage it confers.

It is incumbent upon the Congress to reevaluate completely our arms sale practices and the legal underpinnings which support them in light of the developments outlined in this study. The reevaluation would, of necessity, involve review of the present adequacy of procedures contained in the Arms Export Control Act, which has historically defined congressional involvement in this critical area of foreign policy.

Mr. BYRD. Again, I thank our colleagues, Mr. SARBANES, Mr. BIDEN, and Mr. PELL. This is not the last we will hear about this, I am sure.

Mr. President, I yield the floor.

ROUTINE MORNING BUSINESS

The PRESIDING OFFICER. Under the previous order, there will now be a period for the transaction of routine morning business, not to extend beyond 12 noon, during which Senators may speak for 3 minutes each.

The Senator from Arizona.

Mr. GOLDWATER. Mr. President, I ask unanimous consent that my 3 minutes may be expanded to twice that length of time.

The PRESIDING OFFICER. Without objection, it is so ordered.

TACTICAL WARFARE

Mr. GOLDWATER. Mr. President, I would like to call my colleague's attention to the cover story in this week's Time magazine. It is entitled "The Winds of Reform" and it is one of the most remarkable articles I have ever read. It is remarkable not for its subject matter on "military reform"—for there is precious little in the article that has not already been published in other, less distinguished journals—but rather it is remarkable for what it implies about Time magazine and our system of government.

Over the years, few institutions have better served this Nation than has the "free press." It is perhaps the essential ingredient of a democracy. But there appears to be a growing trend in this country, among even the more reputable publications as well as the major networks, toward seeking out the one-sided, sensational story at the expense of the balanced and intellectually honest presentation. The implications of this trend are alarming.

Now, this would not be a matter of any great concern if it were not for this disturbing fact: We are becoming increasingly a nation whose thinking is shaped almost entirely by powerful media figures and influential journals—none of whom bear any real accountability to the public.

Such considerable influence should not be faulted where facts are reported accurately and both sides of a controversy are fairly presented. Under such circumstances, the public is faithfully served. But where accuracy and objectivity are sacrificed for the sake of sensationalism, and where editorial opinions are allowed to masquerade as news, the public is shamefully deceived. Under these circumstances, only the selfish purposes of those who perpetrate the deceit are served. In my opinion, the cover story in this week's Time magazine is such a story.

The story is rife with factual errors. It is obvious that little or no effort was made to verify any of the factual assertions made by the authors. Consider the following examples:

First, the article says that the Navy is budgeting for only six new ships this year. The truth is that the Navy has budgeted for 14 new ships in 1983 and 17 in 1984.

Second, the article says that three M-60-A3 tanks may be purchased for the price of one M-1. The truth is that an M-60-A3 costs about $1.3 million each while the M-1 costs $1.8 million per tank.

Third, the article alleges that high technology has made our modern fighters unreliable. In fact, in 1982 the full mission capable (FMC) rate of the Air Force's most sophisticated fighter, the F-15, actually exceeded the FMC rate of the least sophisticated fighter, the F-5. The rates were: F-15, 64.6; and F-5, 62.3.

Even more numerous than the factual errors were the unsubstantiated assertions of the authors. Some of these were quite remarkable. For instance, the article claimed:

First, "The availability rate of the battle-ready fighters will decline in the next 5 years." Yet not a shred of evidence was offered to back up this statement. The truth is that, for the Navy alone, there has been a 16-percent increase in combat aircraft readiness rates since 1980 and the trend is predicted to continue upward over the next 5 years. The Air Force is predicting rates even higher than the Navy's.

Second, the article stated that the Pentagon promotes program managers "for pushing a major project to completion, whatever the price." Not a single example was offered to support this insulting statement. Yet to refute this allegation, there are numerous examples from the past 2 years of program managers who were in fact relieved because of cost problems in their programs.

There were also examples of misleading or perhaps downright dishonest implications. Consider these two:

First, the article implied that the Viper antitank missile had once been expected to penetrate the frontal armor of modern Soviet tanks. It said, "Worse yet, the scaled-down warhead could no longer penetrate the frontal armor of modern battle tanks nor stop Soviet tanks head-on." The truth is that the Viper was never expected to penetrate the frontal armor of modern Soviet tanks. It was designed to penetrate the frontal armor of older Soviet tanks such as the T-62. The specifications required it be able to penetrate 14 inches of steel—in fact, it will penetrate 19 inches.

Second, using a familiar and very deceptive comparison of constant dollars and out-year dollars the article stated that the cost of the F/A-18 had tripled. In fact if one compares the current cost for the F/A-18 and the development estimate in constant dollars, the costs are: Development estimate, in 1975 dollars; $9.9 million per aircraft; and current estimate, in 1975 dollars; $10.28 million per aircraft.

That represents less than 5 percent real growth in the unit cost of the aircraft.

Finally, the authors were apparently given license to express their personal opinions as if they were making statements of uncontested fact. For example:

First, "* * * clear thinking like Boyd's was rare in the Air Force bureaucracy."

Second, "Most important, the Joint Chiefs of Staff must be reformed."

Third, "Indeed, weapons often seem to dictate strategy, rather than the reverse."

These are just a few of the many journalistic flaws which pervade the article. It is inexcusable that a magazine that enjoys the credibility that Time does should tolerate this sort of shoddy journalism. It may be troublesome to insure that all facts are scrupulously verified, but a journal concerned about its professional standards will demand it. It may be an additional burden to insure that editorial comments are confined to editorial pages, but a reputable journal will accept nothing less.

Mr. President, it is my opinion that Time magazine was seduced. They listened unquestioningly to the arguments of a small but vocal minority, decided they had the makings of a sensational story, then published that story without the slightest effort to verify the facts or balance what is a strikingly unbalanced presentation.

It is worth noting that the so-called reformist themes which dominated the Time story are not new themes. They are concepts which have been thoroughly debated in various committees of Congress and, almost without exception, have been rejected. But the authors of "The Winds of Reform" write about these ideas with such beguiling freshness, resurrecting such long-discredited statements as the 3-to-1 cost ratio of the M-1 tank to M-60-A3, that one would think they have just uncovered the great scandal of the 1980's. It is, in fact, nothing more than "hype".

Time was quick to embrace the predictions of a young Pentagon analyst, Chuck Spinney, who appeared last week before the Armed Services Committee. Mr. Spinney's work represents a rather severe indictment of the previous administration's ability to accurately predict weapons costs. But Time found unworthy of mention the fact that there is now hard evidence—not merely an analyst's projection—that the efforts of this administration to control Pentagon cost growth have been successful. Consider these two facts: The total cost growth among the Army's 13 major weapons programs from December 1981 to December 1982 was less than one-half of 1 percent. For the Air Force the total costs actually declined six-tenths of 1 percent. It is also worth noting that the Washington Post, hardly a supporter of this administration's defense efforts, found the Spinney hearing so unremarkable it was relegated to page 5.

Mr. President, the effects of an article like this are easy to predict. A large segment of the public will accept at face value the factual errors, unsubstantiated assertions, and blatant editorial opinions that appear throughout this article. They will be outraged by what they read and we will hear about it here in Congress.

I am afraid, Mr. President, that we have neither the time for the resources to fully undo the damage that is done by an article such as this. Some of my colleagues, I suspect, may find it easier to join with the critics who bask in the favor of the press, rather than resist these repeated efforts to discredit our armed services.

We in Congress have available to us all the information necessary to weigh the alternatives and reach the right conclusions. But I wonder whether we will decide objectively and wisely if the public—to whom we are accountable—is goaded by a press which places a greater premium on sensationalism than on balanced reporting?

Perhaps, ultimately the question is this: Who really governs this Nation, the elected representatives of the people or the unelected media figures and journalists upon whom the public relies for information? I, for one, am beginning to wonder.

Mr. STEVENS. Will the Senator yield, Mr. President?

Mr. GOLDWATER. Yes.

Mr. STEVENS. Mr. President, I thank the distinguished Senator from Arizona for taking the time to make this statement. As chairman of the appropriations subcommittee dealing with defense, I can say we have already been barraged with inquiries about the accuracy of this Time article that the Senator from Arizona has mentioned. I would say that my good friend, with his many years' experience in the defense field and being internationally known for his devotion to accuracy and the truth, has done us all a service. I ask my friend if he would consent to having that statement he just made reproduced so we can send it out from the Defense Committee to those people who inquire about that Time article. Would the Senator give us that permission?

Mr. GOLDWATER. I would be very honored if the Senator would ask for that. I thank my friend from Alaska, who puts so much time and effort into our defense needs.

Mr. President, this is a very, very serious matter with me. I am a great defender of the freedom of the press, but I am becoming increasingly offended by a press that violates the sanctity under which they operate under our Constitution.

One only has to listen to the nightly television shows, the weekly television shows, and read some of our newspapers to understand that there must be a dedicated group among these individuals who are working against our form of government and particularly the need to defend this country.

I will have more to say on this in the future because it is something that bothers me. As a man who is growing older, I do not intend to keep my mouth shut about it.

I thank the Chair.

Mr. STEVENS. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. STEVENS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. GORTON). Without objection, it is so ordered.

SECRETARY WATT SHOULD REVERSE HIS PRELIMINARY DECISION ON KUWAIT

Mr. BRADLEY. Mr. President, I rise to urge Secretary James Watt to reverse his preliminary decision that the Government of Kuwait may invest in mineral leases on the public lands of the United States. A careful examination of the legislative history of the Mineral Leasing Act of 1920 clearly shows that the Secretary's preliminary decision is directly contrary to both the letter and intent of that act.

Section 1 of the Mineral Leasing Act, 30 U.S.C. § 181, provides that:

> [C]itizens of another country, the laws, customs, or regulations of which deny similar or like privileges to citizens or corporations of this country, shall not by stock ownership, stock holding, or stock control, own any interest in any lease acquired under the provisions of this Act.

In other words, a citizen of a foreign country may not own an interest in a mineral lease on U.S. public lands if the foreign government denies "similar or like privileges" to citizens of the United States regarding investment in the minerals of that foreign country. This provision has become known as the reciprocity provision.

On December 29, 1982, Secretary Watt rendered a preliminary decision that Kuwait is a reciprocal nation

under the 1920 act. He rendered that decision despite the fact that mineral development within Kuwait is limited to the Kuwait Oil Co., which is 100 percent owned by the Government of Kuwait. There is absolutely no opportunity for an American citizen or corporation to invest in mineral development within Kuwait.

On January 21, Secretary Watt formally suspended the preliminary decision on the grounds that "it has come to our attention that additional information may exist which should be considered before a final decision is rendered." I am unaware of any additional information, but I urge the Secretary to take this opportunity to reconsider the legality of the preliminary decision that Kuwait is reciprocal.

At a February 2 hearing before the Committee on Energy and Natural Resources, I asked Secretary Watt how he could conceivably find Kuwait to be reciprocal under the provisions of the 1920 act. He replied that the 1920 act has been interpreted for many years to mean only that a foreign government may not discriminate between its own citizens and American citizens. In other words, if a foreign government nationalized its minerals industry, it could be said to be granting "similar or like privileges"—that is, no privileges—to both its own citizens and American citizens.

Secretary Watt himself described this interpretation as the "contorted reasoning of a lawyer." I could not agree more. Unfortunately, Secretary Watt's own Solicitor appears to have adopted it. A February 2, 1982, memorandum to the Secretary from his Associate Solicitor for Energy and Resources states that:

> If a country imposes national treatment of its mineral industry or a portion thereof, and does not discriminate against United States holdings, the [1974] Deputy Solicitor's memorandum concluded that such treatment might not be a denial of "like or similar" privileges. . . . While we have not reanalyzed that memorandum in detail, we have no reason to doubt its continuing validity. At your request, we will review that memorandum. Memorandum at 10.

I suggest that the Secretary direct his Solicitor to review the 1974 memorandum. More importantly, I strongly urge the Secretary to review the legislative history of the 1920 act.

The 1920 act was debated and passed in the immediate aftermath of World War I. As a result, Congress was sharply aware of the importance of access to oil, and was anxious to protect domestic sources from foreign control. The bill reported by the Senate Committee on Public Lands prohibited an alien from owning an interest in a lease issued under the act. The chairman of the Committee, Senator Smoot, explained that, "the control of oil produced in this country is of such great importance that the committee decided that some legislation must be had in order to give that control to our government." 58 CONGRESSIONAL RECORD 4160 (1919) (remarks of Senator Smoot).

However, concern was expressed on the Senate floor that an absolute ban on alien ownership might provoke retaliatory legislation by other countries.

> Americans have oil fields in Mexico, in Colombia, in Cuba, in Panama, and in many other countries. We should proceed with the utmost caution in legislating now to establish no precedent that could be utilized justly by other nations to make a drive against the possessions and ownership of Americans in other countries, and I am afraid that this legislation, unless it is very carefully drawn and very carefully phrased, will be seized upon as an excuse, particularly by Mexico, to confiscate the holdings of Americans in that Republic. Id. at 4161 (remarks of Senator King).

Because of this concern, the Senate adopted a compromise provision on the floor. Aliens would be allowed to own an interest in U.S. mineral leases, but the President would be authorized to take over and operate such leases, and the Secretary of the Interior would be authorized to require that the products of such leases be sold for consumption within the United States. Id. at 4160, 4171. As amended, the bill passed the Senate and was referred to the House Committee on Public Lands.

The House committee felt that the Senate provision did not sufficiently protect against the possibility of retaliation. The committee replaced the Senate provision with the reciprocity provision that eventually became law, and gave the following explanation in its report:

> The House amendment . . . seeks to avoid retaliatory action against American investors in foreign countries and provides that no citizen of any foreign country shall, by stock ownership, stock holdings, or stock control, own any interest in any lease acquired under the provisions of this act where such foreign country, by its laws, customs, or regulations, denies similar or like privileges to citizens or corporations of this country. The main argument for the Senate draft was that foreign control of domestic corporations operating a lease under the act would result in large exportations of oil, coal, and other minerals covered by the act, and thereby deplete the domestic supply. Under the House reciprocal clause above mentioned it is obvious that the citizens of the United States could largely offset such a result by their own operations in foreign countries, or, if an acute situation ever developed, a general embargo against exportation would be a sufficient remedy. H.R. Rep. No. 398, 66th Cong., 1st Sess. 11.

Clearly, the House committee was saying to foreign governments, "we'll allow you to invest in our minerals if you allow us to invest in your minerals."

On the House floor, the reciprocity provision was explained in unmistakable terms.

> The House provision provides [for] . . . a reciprocal arrangement by which any foreign country, where Americans are permitted to the full extent in the way of production, the same privilege shall be granted to the nationals of those countries in this country. 58 Cong. Rec. at 7514 (remarks of Rep. Elston).
>
> [T]he bill says that a citizen of a country that does not permit mineral ownership by an American citizen cannot own stock in a corporation of the United States that applies for a lease. *Id.* at 7528 (remarks of Rep. Raker).

In conference, the House reciprocity provision was accepted. The conference report was then adopted by both Houses without further debate.

There can be no doubt that Congress did not intend to allow investment in U.S. minerals by a foreign government, such as Kuwait, that provides no opportunity for American investment in its minerals. I urge Secretary Watt to reverse his preliminary decision that Kuwait may invest in mineral leases on the public lands of the United States. If the Secretary believes that the law should be changed, I invite him to suggest legislation. In the meantime, he should enforce the law.

THE 30TH INFANTRY DIVISION

Mr. THURMOND. Mr. President, I rise to call to the attention of the Senate, a prestigious award recently conferred upon the 30th Infantry Division, better known as the Old Hickory Division. The division, named in honor of Andrew Jackson was recently awarded the Resistance Memorial Cross of the Netherlands. This award is a tribute to the men of the National Guard from South Carolina, North Carolina, Georgia, and Tennessee who comprised the 30th Infantry Division.

I know many men and members of their families from my State who served with honor and distinction when they were called to active duty as well as those returning after the war to civilian life.

Much is owed to the Old Hickory Division, and their families for their sacrifices and lasting contributions on behalf of this Nation and free men everywhere.

The 30th Infantry Division was activated in August 1917 at Camp Sevier, S.C., and was composed of National Guard units from North and South Carolina and Tennessee. The division served overseas during World War I, distinguishing itself in the Somme offensive by breaking through the famed impregnable Hindenburg line and in the battles of La Selle, St. Mihiel, and in the Meuse-Argonne. After World War I the 30th Division was deactivated from Federal service and reverted back to its National Guard role in its respective States.

On September 16, 1940, the 30th Infantry Division was one of the first

four National Guard divisions called to active duty. Composed of the National Guards of North and South Carolina, Tennessee, and Georgia, the division was inducted into Federal service at Fort Jackson, S.C. The division, with its sectional and National Guard character was soon flooded with an influx of selectees, Reserve officers, Regular Army personnel, and OCS graduates from all sections of the country. The infantry division at that time consisted of the 117th Infantry Regiment, 119th Infantry Regiment, 120th Infantry Regiment, 30th Reconnaissance Troop, 105th Engineer Battalion and attached was the 823d Tank Destroyer Battalion, 743d Tank Battalion, and the 531st Antiaircraft Artillery (AW) Battalion. The division's artillery consisted of the 113th Field Artillery Battalion, the 118th Field Artillery Battalion, 197th Field Artillery Battalion, and the 203d Field Artillery Battalion in addition to the 30th Quartermaster Company, 730th Ordnance Company, 30th Signal Company, and the 105th Medical Battalion.

After training for several years at Fort Jackson, S.C.; Camp Blanding, Fla.; Camp Forrest, Tenn.; and Camp Atterbury, Ind., the division went overseas in February 1944 under the command of Maj. Gen. Leland S. Hobbs, a classmate of General Eisenhower and Gen. Omar Bradley. After being trained and prepared for the greatest invasion of all time, the 30th Infantry Division went into France on the 10th of June (D plus 4) and was immediately committed to action against the German Army, participating in the liberation of France, receiving the Croix de Guerre with Palm in 1958.

The division participated in five major campaigns, receiving five battle stars. Its 2d Battalion, 120th Infantry, plus attached units, became known as the Lost Battalion of World War II when, on August 8–14, 1944, surrounded by elements of the German Army, including Hitler's elite 1st SS Division on Hill 314 in Mortain, France, it refused to surrender and held out until relieved. In the battle of Mortain the 30th Division took something out of the German Army which it never regained. Three top German generals, Jodl, Keitel, and Von Kesselring, interviewed after the war, stated that the Mortain engagement was one of the critical operations leading to the defeat of Germany and that the 30th Infantry Division was considered the best fighting division in the European Theater, a fact corroborated by our own American military historians, as evidenced by the "S.L.A. Marshall Letter."

The division spearheaded the Allied breakout from Normandy at St. Lo and was the first American force to enter and liberate Belgium, receiving the Belgian Fouragere, first in Holland with the encirclement of Aachen and first to cross the Rhine River.

During the Battle of the Bulge the 30th again faced the reorganized Hitler's elite 1st SS Division. During the great Ardennes offensive in the winter of 1944–45 the 30th Infantry Division defeated this elite German division so badly that it never returned to combat. Our Assistant Division Commander, Gen. William K. Harrison's task force blocked General Von Rundstedt in his attempt to split the American and Allied forces.

During combat, the 30th was known as the workhorse of the Western Front, so named by Correspondent Wes Gallagher. It was also known as Roosevelt's SS Troops so named by the German high command because of the consistent vigor and pressure it brought to bear on the German Army.

On March 23, 1945, the 30th made an assault crossing of the Rhine River and pursued the enemy across Germany, mopping up enemy pockets of resistance until contact was made with the Russians at Magdeburg on the Elbe River. After a short occupation period the 30th was returned to the United States, arriving home August 19, 1945.

Two additional tributes expressing the commendations of commanders in the field, a part of its glorious history, were in a letter from Lt. Gen. William H. Simpson, the 9th Army Commander, on March 15, to General Hobbs:

It was a distinct pleasure for me last October when I learned that the 30th Infantry Division was being assigned to the Ninth Army, a pleasure all the more keenly felt because of the fact of my previous association as one-time commander of the Division. I have been happy to share with you the pride of accomplishment that has characterized the history of your Division since the initiation of operations on the Continent.

The operation just concluded again furnished your Division with an opportunity to distinguish itself. I scarcely need point out that this opportunity was accepted and completely exploited by the Division, thereby adding another glowing chapter to the record.

Particularly gratifying to me was the surprise which was achieved in your crossing the Roer River at an unsuitable site, and the ingenuity with which your organization overcame the difficulties of building up a bridgehead despite meager access and egress roads. Your expeditious clearing of the Hambach Forest and the firm protection which you furnished the Army right flank, materially assisted the Army to successfully execute the maneuver by which the enemy was turned out of his positions and driven to retreat across his own line of communication.

It was characteristic of your Division that, with the original mission accomplished, you were ready and waiting to execute another mission—that of further securing the Army's right flank and facilitating the capture of the key strongpoint of Neuss.

It is with great personal pleasure that I acknowledge the splendid job performed by the 30th Infantry Division and express my commendation of the individual contribution made by every officer and man.

Maj. Gen. Raymond S. McLain, the XIX Corps commander, in forwarding General Simpson's letter, noted the division's "thorough and rapid action by which the blow never lost its momentum and the enemy moves to check the advance were overrun before they got underway."

Final tribute to the work of the 30th had previously been paid by the four States from which the division had entered Federal service in 1940 and by Gen. Jacob L. Devers, Commanding General of Army Ground Forces. The Governors of Georgia, North and South Carolina, and Tennessee joined in proclaiming October 30 "Old Hickory Day" within their States, and marked the occasion with appropriate ceremonies at the State capitals and with a special radio program. General Devers, in a letter to the 30th's commanding general dated September 21, stated:

The inactivation of the 30th Infantry Division brings to a close a brilliant chapter in American history. The officers and men of the Old Hickory Division, which was formed from National Guard units of North Carolina, South Carolina, Georgia, and Tennessee, have maintained the highest standards of our infantry from the federalization of the unit on September 16, 1940 to the present.

Your Division landed in France in June, 1944 and during the rest of the war performed, often spectacularly, in an efficient, destructive manner. After spearheading the memorable St. Lo breakthrough, your troops were called upon to repel the German attempt to split the American First and Third Armies at Avranches. In one of the most destructive battles of the war, the 30th crushed the enemy assault and held open the vital corridor to the south.

At Aachen, through Belgium, Holland and on into Germany, you continued the offense. As a result of the terrific mauling you gave to some of the Wehrmacht's best troops, the enemy dubbed you "Roosevelt's SS Troops." The final weeks of the war found your men engaged in the drive which encircles the Ruhr and bagged thousands of German prisoners.

Your Division is now being inactivated, but many of your men must remain in the service, while the national security demands their retention. Until they can be released, I am sure they will continue to carry out their assignments with loyalty and vigor.

The 30th has fought courageously and relentlessly, in keeping with the finest traditions of our country. I am proud of that, on behalf of your fellow countrymen, I have this opportunity to commend your officers and men for their devotion and self-sacrifice in the victory over tyranny."

After deactivation, the 30th Infantry Division Association continued in existence and the 30th Armored Division became the National Guard of Tennessee and the 30th Infantry Brigade became the National Guard of North Carolina.

Many 30th men remained on active duty, including the former Assistant Division Commander, Brig. Gen. Wil-

liam K. Harrison, Jr., who, as Lt. Gen. William K. Harrison, Jr., was the chief United Nations peace negotiator at Panmunjom when the treaty ending the Korean war was signed. The Honorable Ralph E. Becker deserves high praise as a former member of the division for his diligent advocacy on behalf of the Old Hickory Division.

Mr. President, I ask unanimous consent that a copy of the Royal Netherlands Decree, Awards Ceremony Agenda, and the letter from Col. S.L.A. Marshall be included in the RECORD at the conclusion of my remarks.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

ROYAL DECREE OF 29 December 1980, Number 104

We Beatrix, By the Grace of God, Queen of The Netherlands, Princess of Orange-Nassau, Etc., Etc., Etc.,

Upon the recommendation of Our Minister of Internal Affairs, Directorate General of Civil Service, Department Cabinet Affairs, of 23 December 1980, No. BK8/Uss17; together in the name of Our Ministers of Defense; of Culture, Recreation and Social Work;

Considering, that it is desireable to introduce a decoration on the occasion of the 35th anniversary of the liberation for those who participated in the resistance during the Second World War against the occupation of the Territory of the Kingdom;

Have Consented and Authorized:

ARTICLE 1.

A medal of decoration is introduced that shall carry the name of Resistance Memorial Cross.

ARTICLE 2.

1. The Resistance Memorial Cross is awarded to:

a. Each who belonged to a recognized resistance group as named in the Royal Decree of 5 September 1944 Stb. E62 or another recognized resistance group known to the Extraordinary Pensions Council or the 1940-1945 Foundation.

b. Each who, according to a decree of the Extraordinary Pensions Council, is or would be recognized as a participant in the resistance in the sense of the Extraordinary Pensions Act of 1940-1945, irrespective of whether he/she enjoys or does not enjoy a pension by virtue of this act.

c. Each who has been recognized to have spent time under arms in conformity with the application of the Amendment to the Statute on the Legal Status of Servicemen in Resistance (Act of 20 January 1976, Stb. 19)

d. The servicemen who belonged to The Netherlands Forces of the Interior in occupied territory (in pursuance to Article 2, Paragraph 5 of the Amendment to the Statute on the Legal Status of Servicemen in the Resistance).

e. Each who has participated in manifest actions of resistance against the enemy in the judgement of the concerned committee, as intended by Article 4, during the Second World War in East Asia on Japanese occupied territory or Japanese territory.

f. Each who can also be considered a participant in the resistance according to the judgement of the committee as intended in Article 4, but not falling under the provisions of a through * * *.

2. The award will not be made to those whose conduct during the occupation of the Kingdom is considered, from the point of view of The Netherlands as a nation, to have been dishonorable.

ARTICLE 3.

The award can be made posthumously.

ARTICLE 4.

The award takes place under the responsibility of a committee considered representative of the former resistance, of which the composition and working procedures are determined by a ministerial decree of Our Ministers of Internal Affairs, of Defense, and of Culture, Recreation and Social Work.

ARTICLE 5.

The shape of the decoration, as referred to by Article 1, and the related ribbon will, upon further consideration, be determined by us.

ARTICLE 6.

1. It is permitted to the recipient to wear by itself either the Cross or the ribbon.

2. It it permitted, for those who are eligible to wear the Resistance Memorial Resistance Cross, to wear a miniature model of the Cross.

3. The Cross or ribbon may be worn on a military uniform.

With the award of the Resistance Memorial Cross, the recipient receives a certificate in the designated name.

This decree goes into effect on 31 December 1980. Our Ministers of Internal Affairs, of Defense, and of Culture, Recreation and Social Work are, each in his own capacity, responsible for the execution of this decree that will be placed in the official registry and whereof copies will be sent to the Chancellor of The Netherlands' Order.

Lage Vuursche, 29 December 1980,
BEATRIX.

The Minister of Home Affairs,
H. WIEGEL.

AGENDA FOR THE PRESENTATION OF THE NETHERLANDS' RESISTANCE MEDALS, OCTOBER 1, 1982, DAV HEADQUARTERS, WASHINGTON, D.C.

Welcoming remarks and introduction of DAV staff and dignitaries—by National Commander Galian

Denvel D. Adams—National Adjutant

Norman B. Hartnett—National Director of Services and Staff of National Service and Legislative Hdqts and National Headquarters

Dr. J. H. Lubbers, Netherlands Ambassador to the United States

Mr. G. H. J. M. Peijnenburg, Secretary-General Ministry of Defense

Secretary of the Army, John O. Marsh, Jr.

Director of Army Staff Lt. Gen. James Lee

Mr. Michael Barry—State Department

Commander Galian will introduce Mr. van Lanschot who will give a brief background on the Resistance Medal before presenting same to the following:

Maj. Gen. Jack H. King and Sgt. Maj. Bobby J. Fletcher, 104th Division (Training)

Brig. Gen. James D. Smith Major, 82d Airborne Division

Brig. Gen. William M. Ingram and Sgt. 1st Class Carl Marlowe, 30th Infantry Brigade

Brig. Gen. Patrick W. Harrison and Sgt. 1st Class James L. Taylor, 30th Armored Brigade

Col. (P) William H. Harrison and Sgt. Maj. Jack L. Siggers, 101st Airborne Division (Air Assault)

Col. Phillip Mallory and Sgt. Maj. Earl D. Ferguson, 2d Armored Division

The Netherlands Resistance Medal will also be given to the following Associations:

Mr. Lawrence Cabot, The 2nd Armored Division Association, c/o J. Ramsey Reese, Inc., 555 White Plains Road, Tarrytown, NY 10591.

Mr. Ken Danielson and General William A. Knowlton, 7th Armored Division Association, 4307 Palm Springs Drive, East Point, GA 30344.

Lt. Col. Saul Solow and Lt. Colonel John B. Carbin, 30th Infantry Division Association, 13645 Whippet Way, East, Del Ray Beach, FL 33445.

Mr. James V. Rodier, Chairman, WDC Chapter, 82nd Airborne Division Association, 1806 Beulah Road, Vienna, VA 22180.

Lt. General Harry W. O. Kinnard, 101st Airborne Division Association, c/o George M. Rosie, P.O. Box 101 AB, Court Station, Kalamazoo, MI 49005.

Mr. Howard S. Bedney, National Timberwolf Association, 104th Infantry Division, 721 Byron Avenue, Franklin Square, NY 11010.

Mr. Frank P. Juliano, Allied Airborne Association, 117 Willow St., Staten Island, NY 10306.

Mrs. S. Tipton Randolph, World War II Glider Pilots Association, 136 W. Main Street, Freehold, NJ 07728.

---

16 MARCH 1946.

DEAR GENERAL HOBBS: Now that I am leaving the service, I thought it might be well to give you the following information for whatever satisfaction you might derive therefrom.

I was historian of the ETO. Toward the end of last fall, for the purpose of breaking the log-jam of paper concerning division presidential unit citations, General Eisenhower instructed me to draw up a rating sheet on the divisions. This entailed in the actual processing that we had to go over the total work of all the more experienced divisions, infantry and armor, and report back to him which divisions were considered had performed the most efficient and consistent battle service. We so did, and we named certain infantry divisons in the first category and same with armor, and we placed others in a second category and yet others in a third. The 30th was among five divisions in the first category.

However, we picked the 30th Division No. 1 on the list of first category divisions. It was the combined judgment of the approximately 35 historical officers who had worked on the records and in the field that the 30th had merited this distinction. It was our finding that the 30th had been outstanding in three operations and that we could consistently recommend it for citation on any one of these three occasions. It was further found that it had in no single instance performed discreditably or weakly when considered against the averages of the Theatre and that in no single operation had it carried less than its share of the burden or looked bad when compared with the forces on its flanks. We were especially impressed with the fact that it had consistently achieved results without undue wastage of its men. I do not know whether further honors will come to the 30th. I hope they do. For we had to keep looking at the balance of things always and we felt that the 30th was the outstanding infantry division of the ETO.

Respectfully yours,

/s/S.L.A. MARSHALL.

Colonel S.L.A. Marshall, GSC, Historian of ETO.

U.S.S.R. MAY OPEN CIVILIAN A-PLANTS TO U.N. TEAMS

Mr. PROXMIRE. Mr. President, on February 15 Bernard Nossiter reported for the New York Times that the Soviet Union may open civilian atomic plants to United Nations teams. Nossiter reports that specialists warn this does not mean they will permit onsite verification of nuclear arms agreement. But, Mr. President, this could be a vital step in the right direction. I ask unanimous consent that the article by Mr. Nossiter in the New York Times be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the New York Times, Feb. 15, 1983]

SOVIET MAY OPEN CIVILIAN A-PLANTS TO U.N. TEAMS

(By Bernard D. Nossiter)

UNITED NATIONS, N.Y., Feb. 11.—In a move that could have a major impact on arms agreements, the Soviet Union has said it wants to start talks this spring on opening some Soviet civilian nuclear plants to United Nations inspectors.

Moscow's move was announced in Vienna by the International Atomic Energy Agency, a United Nations body. The agency's Director General, Hans Blix of Sweden, said negotiations would begin in May or June "on a safeguards agreement with the agency."

Disarmament specialists here said this was the first time Moscow had taken a step toward allowing foreign monitors inside Soviet borders. They would be restricted to nuclear plants with peaceful uses.

But the experts said the precedent could ultimately lead to a Soviet willingness to permit on-site inspection of weapons in an accord with the United States. The United States has for years said arms agreements are best verified on the ground. The Soviet Union has insisted that ground monitoring is a breach of sovereignty.

Moscow's decision was foreshadowed last June when Foreign Minister Andrei A. Gromyko told a special United Nations session on disarmament that the Soviet Union was willing to open some plants to the nuclear agency. He made clear that only some civilian plants would be subject to inspection, and the latest Soviet message reiterates this.

Three nations that produce nuclear weapons, the United States, Britain and France, have already signed agreements with the Vienna-based agency. At first glance this seems redundant. The agency's inspection is designed largely to insure against cheating by nations that have agreed by treaty not to produce nuclear weapons. The monitors examine plants to determine whether any plutonium, which can be used for arms, has been hidden or diverted.

The United States said publicly that it would welcome inspection of some civilian plants by the agency to encourage more nations to sign the treaty against the spread of nuclear arms and to assure them that they would not lose any commercial advantage by opening up their installations.

Experts, however, said this was a secondary motive. The primary reason was the hope that the Soviet Union would some day follow suit. This, it was reasoned, could be the opening wedge that might eventually lead to on-site verification of arms accords. From the agency's standpoint, inspection of plants in a country that produces nuclear weapons has a practical use. Officials said the agency learns about the advanced technology and is better able to examine installations in nations that have foresworn nuclear arms.

The Soviet negotiations this spring are expected to center on which plants the agency will examine and on how to insure that Moscow does not have to accept unwanted inspectors. The experts could not predict how long the talks would take, but they seemed confident they would end in agreement.

One specialist suggested that it would be a relatively modest step from agreeing to agency monitors for selected plants to accepting agency inspection of the amount of plutonium produced. But limiting plutonium production is not an issue in any Soviet-American talks now.

The specialists warned that Soviet willingness to permit inspection of some civilian plants, no matter how inportant, was still a long way from accepting on-site verification of arms agreements. That would entail Moscow's permitting outsiders to look at its production and deployment of weapons.

PRESIDENT REAGAN'S NATURAL GAS DECONTROL PROPOSAL

Mr. MITCHELL. Mr. President, I commend President Reagan for his initiative in proposing a plan to deal with a serious national problem: The unintended effects on the natural gas pricing structure that have resulted from the combination of the 1978 price control law and the subsequent boom-and-bust in oil prices.

No one could have anticipated such a price roller coaster when the natural gas-pricing bill was enacted 4 years ago. But the unanticipated did, in fact, occur, and consumers today are faced with the situation that natural gas prices continue to rise, even in the face of general stability and decline in other energy costs.

I have not yet reviewed in detail every element of the President's program. It is a complex proposal designed to minimize disruption to supplies and prices during a transition period before price controls finally expire. The discovery and delivery of natural gas—and the existing price structure—must deal with both developers and pipelines. It has necessarily been a complex price control effort, and has resulted in unintended price differentials which do nothing to enhance efficiency or rational planning in the energy market.

I intend to review the proposal in detail, therefore, before making a final decision on its component parts or its overall impact. It is entirely possible that Congress will act to change some elements and modify others.

I am particularly concerned about the failure to include in the proposal provisions for a windfall profit tax or assistance to low-income families who may be hard hit if prices rise even more as a result of this proposal. But, as the President himself has said, the proposal does not represent the final word, nor does it contain all the answers. Like President Reagan, I doubt that any one proposal could contain all the answers.

But because this energy source is so vital to millions of American consumers and companies, it is clearly time that a serious effort is launched to rationalize its pricing structure and to introduce the element of predictability into those gas prices, an element without which neither households nor companies can budget.

I recognize that to certain regions which are particularly dependent on natural gas for energy, any proposal to change the current situation presents them with the dangers of the unknowable future. But in this instance, it seems to me that the disadvantages and hardships of the known present are at least as serious as the future danger of another major disruption in energy prices.

Any proposal in this area was bound to be controversial, and that has turned out to be the case, as we all know. It is particularly commendable, therefore, that President Reagan chose to disregard the inevitable criticism and to take the initiative of proposing a plan.

Our Nation has suffered from much unpredictable energy price surges in the past decade, and from the interaction of those price changes with our efforts to shield consumers from their worst effects. The continuing congressional effort in the low-income energy assistance program remains a primary tool with which the very poor have been aided to overcome the immediate threat of price surges. Congress has maintained that program in place and it has served our people well. The pricing structures that have been imposed on various energy sources have, necessarily, been complex and difficult to administer. And those carefully balanced proposals have, naturally, been vulnerable to distortions from sudden price swings.

Price surges that made natural gas exploration more attractive have induced the investment of millions of dollars in deep-well drilling. Those efforts have made a major contribution to the overall energy supply future of the country, as these new sources were tapped.

At the same time, in a market where the price of gas' major competing fuel, oil, is falling, the costs of those deeply drilled wells become far more onerous than in a climate of rising prices. And the industry itself has made substantial changes in its operating methods to respond to the threats of supply dis-

ruptions and price instability over the past several years.

None of these actions were intended to result in the unsatisfactory and irrational price outcomes that the consuming public now confronts. Consumers are naturally disturbed that in a time of stable and declining energy prices, the cost of their natural gas is rising. But consumers, along with the industry and the Congress, must recognize that the situation we face today is the outcome of forces and events that could not have been anticipated; they are not the result of some conspiracy or plot. The industry must acknowledge that consumer anger is justifiable. And the Congress should recognize that cooperative work and rational alternative proposals are the best way to overcome the problem, not out-of-hand rejection of the only plan that has been proposed.

This will undoubtedly be one of the most controversial debates the Congress will face this session. I believe we should acknowledge the President's leadership in presenting us with a proposal, and work to make that debate constructive, rather than acrimonious.

CHICAGO'S SALUTE TO BABIES

Mr. PERCY. Mr. President, recently some distressing and saddening statistics were brought to my attention which I wanted to share with my Senate colleagues. Despite all the gains we have made in this country, we still experience high rates of infant illness and death.

More than 250,000 babies are born each year with physical or mental damage. Another 500,000 pregnancies end in miscarriage or stillbirths. About 1.2 million infants, children, and adults are hospitalized annually for treatment of birth defects. And some 60,000 Americans die every year as a result of birth defects.

In urban areas, such as Chicago, there is a concentration of these problems. The infant mortality rate, for example, is 20.6 in Chicago for every 1,000 live births, far higher than the national rate of 11.7.

Mr. President, while I am saddened by these figures, I am equally encouraged by efforts around the country to respond to these problems. In particular, the Metropolitan Chicago chapter of the March of Dimes will stage a Salute to Babies banquet on April 7 to focus attention on the health of the Nation's children. Their goal is to gather together the resources needed to develop new and better programs which will reduce infant illness and death.

Specifically, the private funds raised by the Salute will be used to expand and extend perinatal health care, intensify efforts to assure total health care for infants during their first year of life, particularly in high risk or underserved areas, and to promote activities that will insure the orderly growth and development of all children as they mature.

These efforts will include education at all levels, from potential and expectant parents to parents and families, health workers in all fields and the general public; service through funding of pilot projects and development of prenatal infant intensive care units; and last, research to prevent preterm births, low birth weight, and specific birth defects.

All those associated with the Salute are to be commended, but none more so than the general chairman, Dr. Effie O. Ellis, a renowned advocate for the improvement of maternal and infant health care and the quality of family life.

Dr. Ellis, a graduate of Spellman College in Atlanta, Ga., has served as chief of the department of pediatrics at the University of Illinois Medical School and Center. She held the coveted residency in pediatrics at Massachusetts General Hospital. She was the first black woman to be named a teaching fellow of the Harvard Medical School where she made significant contributions to the speciality of pediatrics. Johns Hopkins School of Medicine awarded Dr. Ellis a fellowship in cardiology where she distinguished herself for research and treatment of the blue baby syndrome with Dr. Helen Taussig. Today, newborn babies rarely die from that birth defect.

Dr. Ellis has also served as director of medical education at Provident Hospital in Baltimore, Md.

Public service has played a large part in her long career. Dr. Ellis served as director of maternal and child health for the State of Ohio. On the Federal level, she has served as the medical director for the U.S. Children's Bureau, region 5, and as the regional commissioner for the social rehabilitation service.

In 1970, President Nixon appointed Dr. Ellis to the White House Conference on Children and the White House Conference on Nutrition. Most recently, in Illinois, Governor Jim Thompson chose her for his Task Force on Children and Youth.

Active in the March of Dimes for many years, Dr. Ellis served as the consultant to the March's Birth Defects Foundation and helped launch the parenting education program which was introduced in 22 States across the Nation.

Mr. President, the Chicago Salute to Babies promises to be a most successful event and I am proud to highlight it here on the floor of the Senate, along with the fine work of the Metropolitan Chicago chapter of the March of Dimes Birth Defects Foundation.

LEARNING FROM "THE WINDS OF WAR"

Mr. PROXMIRE. Mr. President, recently 140 million Americans watched the 18-hour presentation "The Winds of War." This television series is an adaptation of Herman Wouk's best-selling novel of the same name. Although a number of historical events during World War II are depicted, the persecution of the Jews is one of the dominating concerns of both the series and its author, who is a devout Orthodox Jew.

In one particularly horrifying scene, black-costumed Nazi special-action squads herd dozens of Russian Jews into a large grave, where they are shot. This is only one of the numerous methods of massacre which occurred during the time of Adolph Hitler. Ultimately, 6 million people lost their lives, a frightful number still difficult to imagine.

Although the television series could not possibly portray the enormous magnitude of this crime, it served an important purpose. Once again, millions of Americans were reminded of the torture and human destruction the Jews were forced to endure. Once again, millions of Americans were also convinced that the nations of the world must take immediate steps to prevent future instances of such atrocities.

Mr. President, over 80 nations have taken an important first step by ratifying the Genocide Convention. They are on record as opposing the elimination of a national, racial, ethnical, or religious group. They are also on record as declaring this act an international crime. Although the United States has signed this treaty, I am sorry to say that we have yet to ratify it. As a nation which has advocated basic human rights for over 200 years, the United States can only strengthen its position by ratifying this treaty. Therefore, I strongly urge my colleagues to ratify the Genocide Convention without further delay.

MESSAGE FROM THE HOUSE

At 10:41 a.m., a message from the House of Representatives, delivered by Mr. Berry, one of its reading clerks, announced that pursuant to the provisions of 2 United States Code 123b, the Speaker appoints as members of the Committee on the House Recording Studio the following members: Mr. ROSE, Mrs. BOGGS, and Mr. BADHAM.

The message also announced that the House has passed the following bill, in which it requests the concurrence of the Senate:

H.R. 999. An act to provide for the conservation, rehabilitation, and improvement of natural and cultural resources located on public or Indian lands, and for other purposes.

HOUSE BILL REFERRED

The following bill was read the first and second times by unanimous consent, and referred as indicated:

H.R. 999. An act to provide for the conservation, rehabilitation, and improvement of natural and cultural resources located on public or Indian lands, and for other purposes; to the Committee on Energy and Natural Resources.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. JEPSEN, from the Joint Economic Committee:

Special Report entitled "The 1983 Joint Economic Report" (Rept. No. 98-15).

By Mr. McCLURE, from the Committee on Energy and Natural Resources, with an amendment:

S. 96. A bill to establish the Lee Metcalf Wilderness and Management Area in the State of Montana, and for other purposes (Rept. No. 98-16).

EXECUTIVE REPORTS OF COMMITTEES

The following executive reports of committees were submitted:

By Mr. PERCY, from the Committee on Foreign Relations:

Morton I. Abramowitz, of Massachusetts, a Career Member of the Senior Foreign Service, Class of Career Minister, for the rank of Ambassador during the tenure of his service as the Representative of the United States for Mutual and Balanced Force Reductions Negotiations.

Contributions are to be reported for the period beginning on the first day of the fourth calendar year preceding the calendar year of the nomination and ending on the date of the nomination.

Nominee: Morton I. Abramowitz
Post: U.S. Representative to MBFR
Contributions, amount, date, donee.
1. Self, None.
2. Spouse, $50, 1981, George Mitchell; $75, 1982, Marie Ridder; $100, 1982, Michael Barnes.
3. Children and Spouses: Names: Sheppie G. Abramowitz (wife); Michael Abramowitz (son); Rachel Abramowitz (daughter).

Manfred Eimer, of Maryland, to be an Assistant Director of the United States Arms Control and Disarmament Agency.

(The above nominations were reported from the Committee on Foreign Relations with the recommendation that they be confirmed, subject to the nominees' commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

By Mr. ROTH, from the Committee on Governmental Affairs:

Barbara Jean Mahone, of New York, to be a Member of the Federal Labor Relations Authority for a term of five years expiring July 29, 1987; and

John Carl Miller, of Ohio, to be General Counsel of the Federal Labor Relations Authority for a term of five years.

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second time by unanimous consent, and referred as indicated:

By Mr. PERCY (by request):

S. 659. A bill to authorize the Board for International Broadcasting to provide Federal funding for radio broadcasting to Cuba; to the Committee on Foreign Relations.

S. 660. A bill to authorize appropriations for fiscal years 1984 and 1985 for the Department of State; to the Committee on Foreign Relations.

By Mr. GARN:

S. 661. A bill for the relief of Braun Green; to the Committee on the Judiciary.

By Mr. ARMSTRONG:

S. 662. A bill to provide for confirmation of the repayment contract of the Dallas Creek participating project of the Upper Colorado storage project; to the Committee on Energy and Natural Resources.

By Mr. ARMSTRONG (for himself, Mr. LUGAR, Mr. HATCH, Mr. BAUCUS, Mr. BUMPERS, Mrs. HAWKINS, Mr. ZORINSKY, Mr. CHAFEE, Mr. McCLURE, Mr. HART, Mr. NICKLES, Mr. PRESSLER, Mr. LEVIN, Mrs. KASSEBAUM, Mr. KASTEN, Mr. GRASSLEY, Mr. HATFIELD, Mr. JEPSEN, Mr. WARNER, Mr. QUAYLE, and Mr. DOMENICI):

S. 663. A bill to prohibit the payment of certain agriculture incentives to persons who produce certain agricultural commodities on highly erodible land; to the Committee on Agriculture, Nutrition, and Forestry.

By Mr. SIMPSON (by request):

S. 664. A bill to amend title 38, United States Code, to extend the authority of the Administrator of Veterans' Affairs to provide certain contract hospital care and medical services in Puerto Rico, the Virgin Islands, and other territories; to the Committee on Veterans' Affairs.

S. 665. A bill to amend title 38, United States Code, to terminate the authority of the Administrator of Veterans' Affairs to make advance payments of education and subsistence allowances, and for other purposes; to the Committee on Veterans' Affairs.

S. 666. A bill to amend title 38, United States Code, to repeal the authority for eligible veterans and eligible spouses to pursue correspondence training, and for other purposes; to the Committee on Veterans' Affairs.

By Mr. SIMPSON:

S. 667. A bill to enhance the benefits available under the contributory education program and to eliminate the termination date for the GI bill education program, and for other purposes; to the Committee on Veterans' Affairs.

By Mr. KENNEDY (for himself, Mr. BIDEN, Mr. THURMOND, Mr. LAXALT, Mr. BAUCUS, Mr. HATCH, Mr. ABDNOR, Mrs. HAWKINS, Mr. LEAHY, Mr. COHEN, Mr. D'AMATO, Mr. CHILES, Mr. GLENN, Mr. SPECTER, Mr. HUDDLESTON, Mr. LUGAR, Mr. DeCONCINI, Mr. ZORINSKY, Mr. MOYNIHAN, Mr. METZENBAUM, Mr. SASSER, Mr. SIMPSON, and Mr. STEVENS):

S. 668. A bill to reform Federal criminal sentencing procedures; to the Committee on the Judiciary.

By Mr. HATFIELD (for himself, Mr. PACKWOOD, Mr. GORTON, Mr. JACKSON, Mr. BAUCUS, Mr. MELCHER, and Mr. McCLURE):

S. 669. A bill to authorize the construction of a project for navigation at the Bonneville lock and dam, Oregon and Washington; to the Committee on Environment and Public Works.

By Mr. PELL (for himself and Mr. STAFFORD):

S. 670. A bill to establish a New England Regional Power Planning and Distribution Authority, and for other purposes; to the Committee on Energy and Natural Resources.

By Mr. McCLURE (for himself and Mr. DeCONCINI):

S. 671. A bill to authorize a national program to encourage dam safety; to the Committee on Environment and Public Works.

By Mr. McCLURE (for himself, Mr. GOLDWATER, and Mr. WALLOP):

S. 672. A bill to amend the Reclamation Safety of Dams Act of 1978 to authorize additional appropriations, and for other purposes; to the Committee on Energy and Natural Resources.

By Mr. McCLURE:

S. 673. A bill to amend the Internal Revenue Code of 1954 to provide for the establishment of, and the credit against tax for contributions to, individual housing accounts; to the Committee on Finance.

By Mr. SPECTER:

S. 674. A bill to authorize implementation of a project for flood damage prevention at Milton, Pa.; to the Committee on Environment and Public Works.

By Mr. TOWER (by request):

S. 675. A bill to authorize appropriations for fiscal year 1984 for the Armed Forces for procurement, for research, development, test, and evaluation, and for operation and maintenance, to prescribe personnel strengths for such fiscal year for the Armed Forces and for civilian employees of the Department of Defense, and for other purposes; to the Committee on Armed Services.

By Mr. SASSER (for himself, Mr. TSONGAS, Mr. PRYOR, Mr. RIEGLE, Mr. RANDOLPH, Mr. FORD, and Mr. BAUCUS):

S. 676. A bill to provide for capital assistance to State and local governments; to the Committee on Finance.

By Mr. HEFLIN:

S. 677. A bill to amend the Federal Rules of Civil Procedure with respect to the examination of prospective jurors; to the Committee on the Judiciary.

By Mr. QUAYLE (for himself and Mr. LEVIN):

S. 678. A bill making emergency supplemental appropriations for the fiscal year 1983; to the Committee on Appropriations.

By Mr. PERCY:

S. 679. A bill to establish a program to provide funds to States for the purpose of job opportunities and business stimulation, and for other purposes; to the Committee on Governmental Affairs.

By Mr. SARBANES (for himself and Mr. MATHIAS):

S. 680. A bill entitled the Gladys Noon Spellman Parkway; to the Committee on Energy and Natural Resources.

By Mr. EXON:

S. 681. A bill to authorize the Secretary of the Interior to engage in a feasibility study of water resource development and for other purposes in the Central Platte Valley, Nebr.; to the Committee on Energy and Natural Resources.

By Mr. BUMPERS:

S. 682. A bill to amend the Agricultural Act of 1949 to modify the acreage base to be used for a farm under the acreage limitation programs for the 1983 crops of wheat, feed grains, and rice; to the Committee on Agriculture, Nutrition, and Forestry.

By Mr. BUMPERS (for himself and Mr. PRYOR):

S. 683. A bill to modify the special payment-in-kind land conservation program, and for other purposes; to the Committee on Agriculture, Nutrition, and Forestry.

By Mr. ABDNOR (for himself and Mr. MOYNIHAN):

S. 684. A bill to authorize an ongoing program of water resources research; to the Committee on Environment and Public Works.

By Mr. QUAYLE:

S. 685. A bill to provide savings in the Federal Employees Compensation Act, and for other purposes; to the Committee on Labor and Human Resources.

S. 686. A bill to amend the Age Discrimination in Employment Act of 1967 to eliminate the upper age limitation of 70 years of age, to make procedural reforms, and reinstate the tenured faculty exemption, and for other purposes; to the Committee on Labor and Human Resources.

By Mr. HEINZ (for himself, Mr. DIXON, Mr. BYRD, Mr. SPECTER, Mr. PERCY, Mr. LEVIN, Mr. RIEGLE, Mr. RANDOLPH, Mr. SARBANES, Mr. PELL, and Mr. GLENN):

S. 687. A bill to amend the Federal Supplemental Compensation Act of 1982 to increase the number of weeks of compensation; to the Committee on Finance.

By Mr. HATFIELD:

S. 688. A bill to provide that, unless the Government of El Salvador actively participates in negotiations with all major parties to the conflict which are willing to participate unconditionally in negotiations for the purpose of achieving a cease fire and an equitable political solution to hostilities, U.S. military support for El Salvador shall be terminated, with military assistance funds to be transferred for use for development and humanitarian assistance; to the Committee on Foreign Relations.

By Mr. HEINZ:

S. 689. A bill entitled the Natural Gas Policy Act Amendments of 1983; to the Committee on Energy and Natural Resources.

By Mrs. HAWKINS:

S.J. Res. 47. Joint resolution authorizing and requesting the President to proclaim "National Disabled Veterans Week"; to the Committee on the Judiciary.

By Mr. MCCLURE (for himself and Mr. MATTINGLY):

S.J. Res. 48. Joint resolution to amend the Constitution of the United States to limit budget outlays for a fiscal year to not more than 20 per centum of gross national product for such fiscal year; to the Committee on the Judiciary.

By Mr. PERCY (for himself, Mr. PELL, Mr. BYRD, Mr. DOMENICI, Mr. PRESSLER, Mr. HOLLINGS, Mr. LUGAR, Mr. INOUYE, Mr. JACKSON, Mr. DODD, Mr. SARBANES, Mr. PROXMIRE, Mr. ZORINSKY, Mr. CHAFEE, Mr. BOSCHWITZ, Mr. HUDDLESTON, Mr. MOYNIHAN, Mr. CHILES, Mr. BIDEN, Mr. DIXON, Mr. LEVIN, Mr. HART, Mr. KENNEDY, Mr. SASSER, Mr. DANFORTH, Mr. COHEN, Mr. MATHIAS, Mr. MITCHELL, and Mr. STEVENS):

S.J. Res. 49. Joint resolution to authorize and request the President to proclaim the week of April 10-16, 1983, as "A Week of Remembrance for the 40th Anniversary of the Warsaw Ghetto Uprising"; to the Committee on the Judiciary.

By Mr. LEVIN (for himself, Mr. BAUCUS, Mr. CHAFEE, Mr. GLENN, Mrs. HAWKINS, Mr. HOLLINGS, Mr. RIEGLE, and Mr. ZORINSKY):

S.J. Res. 50. Joint resolution designating the week beginning September 25, 1983, as "National Adult Day Care Center Week"; to the Committee on the Judiciary.

By Mr. DOLE (for himself and Mr. MOYNIHAN):

S.J. Res. 51. Joint resolution designating May 21, 1983, as "Andrei Sakharov Day"; to the Committee on the Judiciary.

By Mr. QUAYLE (for himself, Mr. INOUYE, Mr. HATCH, Mr. SPECTER, Mr. D'AMATO, Mr. WEICKER, Mr. HOLLINGS, Mr. BAUCUS, Mr. KENNEDY, Mr. BURDICK, Mr. RIEGLE, Mr. COCHRAN, Mr. DECONCINI, Mr. STENNIS, Mr. STEVENS, Mr. ANDREWS, Mr. LUGAR, Mr. STAFFORD, Mrs. HAWKINS, Mr. RANDOLPH, Mr. METZENBAUM, and Mr. DODD):

S.J. Res. 52. Joint resolution to authorize and request the President to designate the week of April 10, 1983, through April 16, 1983, as "National Mental Health Week"; to the Committee on the Judiciary.

SUBMISSION OF CONCURRENT AND SENATE RESOLUTIONS

The following concurrent resolutions and Senate resolutions were read, and referred (or acted upon), as indicated:

By Mr. STEVENS (for Mr. THURMOND) (for himself, Mr. STEVENS and Mr. LAXALT):

S. Res. 79. Resolution to commend the value of the Health Fair Program; considered and agreed to.

By Mr. BYRD:

S. Res. 80. Resolution to amend rule XV to provide a procedure to require that amendments to a bill or resolution be germane after a vote by three fifths of all Senators; to the Committee on Rules and Administration.

By Mr. STEVENS (for Mr. BAKER) (for himself and Mr. BYRD):

S. Res. 81 Resolution to direct the Senate Legal Counsel to represent Senator MOYNIHAN and Senator D'AMATO in the case of *Municipal Electric Utilities Association of New York State* v *Ronald W. Reagan, et al.* Civil Action No. 83-0595; considered and agreed to.

By Mr. MOYNIHAN (for himself and Mr. HART):

S. Con. Res. 13. Concurrent resolution to achieve economic growth through coordination of monetary and fiscal policy; to the Committee on Banking, Housing, and Urban Affairs.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. PERCY (by request):

S. 659. A bill to authorize the Board for International Broadcasting to provide Federal funding for radio broadcasting to Cuba; to the Committee on Foreign Relations.

RADIO BROADCASTING TO CUBA ACT

Mr. PERCY. Mr. President, by request, I introduce for appropriate reference a bill to provide Federal funding for radio broadcasting to Cuba.

This legislation has been requested by the Department of State and I am introducing the proposed legislation in order that there may be a specific bill to which Members of the Senate and the public may direct their attention and comments.

I reserve my right to support or oppose this bill, as well as any suggested amendments to it, when the matter is considered by the Committee on Foreign Relations.

I ask unanimous consent that the bill be printed in the RECORD at this point, together with a legislative analysis, and the letter from the Assistant Secretary of State for Congressional Relations to the President of the Senate dated February 24, 1983, requesting this legislation.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 659

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SHORT TITLE

SECTION 1. This Act may be cited as the "Radio Broadcasting to Cuba Act".

DECLARATION OF ADDITIONAL PURPOSES

SEC. 2. Section 2 of the Board for International Broadcasting Act of 1973 (22 U.S.C. 2871) is amended—

(1) by inserting "(a)" immediately after "Sec. 2."; and

(2) by adding at the end of the section the following:

"(b) The Congress further finds and declares—

"(1) that, consonant with the policy set out in subsections (a) (1) and (2), radio broadcasting to Cuba may be effective in furthering the open communication of accurate information and ideas to the people of Cuba, in particular information about Cuba; and

"(2) that such broadcasting to Cuba, operated in a manner not inconsistent with the broad foreign policy of the United States and in accordance with high professional standards, would be in the national interest."

ADDITIONAL FUNCTIONS OF THE BOARD

SEC. 3. Section 4 of the Board for International Broadcasting Act of 1973 (22 U.S.C 2873) is amended by adding at the end thereof the following:

"(c) In order to further carry out the purposes set forth in section 2 of this Act, the Board is authorized to provide for the open communication of information and ideas through the use of radio broadcasting to Cuba. The Board may carry out this subsection by means of grants, leases or contracts (subject to the availability of appropriations), or such other means as the Board determines will most effectively carry out the purposes set forth in section 2. With respect to grants to or leases or contracts with a separate entity or other means of carrying out broadcasting to Cuba, the Board shall have the same authorities as those detailed in subsection (a) of this section.

"(d) Radio broadcasting to Cuba under this Act shall serve as a consistently reliable

and authoritative source of accurate, objective and comprehensive news.

"(e) Any broadcasting to Cuba in accordance with subsections (c) and (d) on the AM band (535 kHz to 1605 kHz), other than that conducted by means of leasing time on commercial or non-commercial educational radio broadcasting stations, shall be limited to the frequency used by the Voice of America for its broadcasts from the facilities located at Marathon, Florida. In the event that broadcasting is conducted on the frequency used by the Voice of America, the Voice of America broadcasting facilities located at Marathon, Florida, may also be used for the purposes of this Act."

ASSISTANCE FROM OTHER GOVERNMENT AGENCIES

SEC. 4. The Board for International Broadcasting Act of 1973 is amended by adding at the end thereof the following:

"ASSISTANCE FROM OTHER GOVERNMENT AGENCIES

"SEC. 12. In order to assist the Board in carrying out the purposes set forth in section 2 of this Act, any agency or instrumentality of the United States may sell, loan, lease, or grant property (including interests therein) and may perform administrative and technical support and services at the request of the Board. Support and services shall be provided on a reimbursable basis, which reimbursement shall be credited to the appropriation from which the property, support, or service was derived."

MERGER OF BOARDS OF DIRECTORS

SEC. 5. (a) Section 11 of the Board for International Broadcasting Act of 1973 is amended by adding at the end thereof the following:

"(c) No grant may be made under this Act to Radio Broadcasting to Cuba, Incorporated, or any other corporation established to provide radio broadcasting to Cuba, unless such corporation provides in its certificate of incorporation that—

"(1) the Board of Directors of such corporation shall consist of the members of the Board for International Broadcasting and no other members; and

"(2) such Board of Directors shall make all major policy determinations governing the operation of such corporation and shall appoint and fix the compensation of such managerial officers and employees of such corporation as it deems necessary to carry out the purposes of this Act.

Compliance with the requirements of this subsection shall not be construed to make such corporation a Federal agency or instrumentality."

(b) The section heading for Section 11 of the Board for International Broadcasting Act of 1973 is amended to read as follows: "MERGER OF BOARDS OF DIRECTORS".

U.S. DEPARTMENT OF STATE,
Washington, D.C., February 24, 1983.

Hon. GEORGE BUSH,
President of the Senate.

DEAR MR. PRESIDENT: I have the honor to submit for the consideration of the Congress a bill that would authorize the Board for International Broadcasting to provide federal funding for radio broadcasting to Cuba.

I urge that the Congress give this proposal its early and favorable consideration.

The Office of Management and Budget has advised that there is no objection to the presentation of this proposal to the Congress and that its enactment would be in accord with the program of the President.

Sincerely,

POWELL A. MOORE,
Assistant Secretary for Congressional Relations.

LEGISLATIVE ANALYSIS: RADIO BROADCASTING TO CUBA ACT

BACKGROUND

On September 22, 1981, the President issued Executive Order 12323 creating the Presidential Commission on Broadcasting to Cuba. The Commission's Final Report strongly urged the early establishment of radio broadcasting to Cuba, to provide the people of Cuba with a source of accurate and objective information, particularly about Cuba. The Commission recommended that such broadcasting be conducted along the same lines as Radio Free Europe and Radio Liberty. During the last session of Congress, the Administration sent to the Congress proposed legislation authorizing funding for radio broadcasting to Cuba. H.R. 5427, as amended, passed the House on August 10, 1982 and, as further amended, was favorably reported by the Senate Foreign Relations Committee on September 9, 1982; however, one bill was never voted on by the full Senate.

This legislation, which amends the Board for International Braodcasting Act of 1973, 22 U.S.C. 2871 et seq., is in several respects similar to H.R. 5427. It authorizes the Board for International Broadcasting to provide for federally funded broadcasting to Cuba, in much the same way that the Board now oversees federal grants to Radio Free Europe and Radio Liberty.

DETAILED ANALYSIS BY SECTION

Section 2

Section 2 contains the congressional findings and policy statement with respect to radio broadcasting to Cuba. It declares that the policy already enunciated in Section 2 of the Board for International Broadcasting Act of 1973, 22 U.S.C. 2871—promoting open communication of information and ideas and supporting the right to receive such information and ideas through any media and regardless of frontiers—may be furthered by radio broadcasting to Cuba. Subparagraph (b)(2) links such broadcasting, operated in accordance with high professional standards and not inconsistently with U.S. foreign policy, to the national interest in general.

Section 3

Section 3, amending the authority under which the Board for International Broadcasting now makes and supervises grants to Radio Free Europe and Radio Liberty, 22 U.S.C. 2873, establishes the basic authority for the Board for International Broadcasting to provide for radio broadcasting to Cuba. Subsection (c) incorporates the relevant authorities the Board for International Broadcasting already possesses with respect to Radio Free Europe and Radio Liberty, and in general allows broad flexibility to the Board to provide for broadcasting to Cuba through grants, leases, contracts or other means the Board deems appropriate.

Subsection (e), however, limits any broadcasting on the AM band (535 kHz to 1605 kHz) to the leasing of time from other stations or to the frequency now used by the Voice of America for its broadcasts from Marathon, Florida. In the event that the latter option is used, it is contemplated that the Board for International Broadcasting will consult with the U.S. Information Agency in determining an appropriate allocation of time between broadcasting to Cuba under this Act and the broadcasts of the Voice of America. This subsection (e) was included to respond to concerns of broadcasters over possible increased Cuban interference on the present commercial portion of the AM band.

Subsection (d) provides that, in accordance with the distinguished tradition of Radio Free Europe and Radio Liberty, radio broadcasting to Cuba shall serve as a consistently reliable source of accurate and objective information.

Section 4

Section 4 adds a new Section 12 to the Board for International Broadcasting Act to provide specific authority for the Board to receive, on a reimbursable basis, a wide range of assistance from other other government agencies, including making property and support services available. Reimbursement in amounts appropriate for such interagency transfers would be credited to appropriations available for use by the agency furnishing the assistance.

Section 5

Section 5 amends Section 11 of the Board for International Broadcasting Act of 1973, 22 U.S.C. 2880, to make its substance applicable to broadcasting to Cuba. Section 11, added in 1982 by Section 403 of P.L. 97-241, requires that in order for RFE/RL, Incorporated (Radio Free Europe/Radio Liberty) to receive federal support under the Act, its Board of Directors must consist, only of the members of the Board for International Broadcasting. Section 11 also requires that the Board have actual control over the operations and management of RFE/RL, Incorporated and specifies that the requirements of that section are not to be construed to render RFE/RL, Incorporated a Federal agency or instrumentality. Section 5 of the Radio Broadcasting to Cuba Act applies these provisions of Section 11 of the Board for International Broadcasting Act to any corporation similar to RFE/RL, Incorporated (such as the already-existing but nonoperational Radio Broadcasting to Cuba, Incorporated) to which the Board for International Broadcasting might provide support under this Act for purposes of broadcasting to Cuba.

By Mr. PERCY (by request):

S. 660. A bill to authorize appropriations for fiscal years 1984 and 1985 for the Department of State; to the Committee on Foreign Relations.

DEPARTMENT OF STATE AUTHORIZATION ACT, FISCAL YEARS 1984 AND 1985

Mr. PERCY. Mr. President, by request, I introduce for appropriate reference a bill authorizing appropriations for fiscal years 1984 and 1985 for the Department of State.

This legislation has been requested by the State Department and I am introducing the proposed legislation in order that there may be a specific bill to which Members of the Senate and the public may direct their attention and comments.

I reserve my right to support or oppose this bill, as well as any suggested amendments to it, when the matter is considered by the Committee on Foreign Relations.

I ask unanimous consent that the bill be printed in the RECORD at this point, together with a section-by-section analysis, and the letter from the Assistant Secretary of State for Congressional Relations to the President of the Senate dated March 1 requesting this legislation.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 660

Be it enacted by the Senate and House of representatives of the United States of America in Congress assembled,

TITLE I—DEPARTMENT OF STATE

SHORT TITLE

SEC. 101. This title may be cited as the "Department of State Authorization Act, Fiscal Years 1984 and 1985."

AUTHORIZATIONS OF APPROPRIATIONS

SEC. 102. The following amounts are authorized to be appropriated for the Department of State to carry out the authorities, functions, duties, and responsibilities in the conduct of the foreign affairs of the United States and other purposes authorized by law:

(1) For "Administration of Foreign Affairs," $1,473,713,000 for the fiscal year 1984 and $1,574,520,000 for the fiscal year 1985.

(2) For "International Organizations and Conferences," $602,343,000 for the fiscal year 1984 and $645,978,000 for the fiscal year 1985.

(3) For "International Commissions," $23,207,000 for the fiscal year 1984 and $27,329,000 for the fiscal year 1985.

(4) For "Migration and Refugee Assistance and Other Activities," $346,200,000 for the fiscal year 1984 and $328,100,000 for the fiscal year 1985.

WORLD INTELLECTUAL PROPERTY ORGANIZATION

SEC. 103. Subsection (b) of P.L. 92-511 (22 U.S.C. 269f) is amended to read as follows: "(b) Such sums as may be required for the payment by the United States of its proportionate share of the expenses of said international bureau for any year after 1981 as determined under Article 16 (4) of the Paris Convention for the Protection of Industrial Property, as revised."

CONTRIBUTIONS FOR INTERNATIONAL PEACEKEEPING (CIPA)

SEC. 104. P.L. 94-37 (89 Stat. 216) is amended by deleting the words "in the Middle East" after "peacekeeping forces."

ALLOCATION AUTHORITY

SEC. 105. Section 8 of the State Department Basic Authorities Act of 1956 (22 U.S.C. 2680) is amended to read as follows: "The Secretary of State may allocate or transfer to any department, agency, or independent establishment of the United States Government, with the consent of the head thereof, any funds appropriated to the Department of State, for direct expenditure by such department, agency or independent establishment for the purposes for which the funds were appropriated in accordance with authority granted in this Act or under authority governing the activities of the agencies of the United States Government to which such funds are allocated or transferred."

ELIMINATION AND MODIFICATION OF REPORTS

SEC. 106. The following provisions of the following acts are repealed or modified:

(a) Section 126(c) of P.L. 95-426 (22 U.S.C. 2691 note; 92 Stat. 972).

(b) Section 405(b) of P.L. 95-426 (22 U.S.C. 1048 note; 92 Stat. 979).

(c) Section 12(d) of P.L. 96-8 (22 U.S.C. 3311 note; 93 Stat. 20).

(d) Section 4 of P.L. 96-110 (22 U.S.C. 2601 note; 93 Stat. 844).

(e) Section 109(a)(7) of P.L. 95-105 (22 U.S.C. 2384 note; 91 Stat. 847).

(f) Section 411 of the International Development Cooperation Act of 1979, P.L. 96-53 (22 U.S.C. 3511; 93 Stat. 376).

(g) Section 703(f) of P.L. 96-465 (22 U.S.C. 4023; 94 Stat. 2100).

(h) Section 503(b) of P.L. 95-426 (22 U.S.C. 2656 (c); 92 Stat. 983).

(i) Section 156 of the Clean Air Act as amended, P.L. 85-177 (42 U.S.C. 7456; 91 Stat. 729) is amended by striking out "and shall report to the Congress periodically on efforts to arrive at such agreements" in the last sentence.

(j) Subsection 204(b)(4) of the Fishery Conservation and Management Act of 1976, P.L. 94-265 (16 U.S.C. 1824(4)(c); 90 Stat. 342-45) is amended by striking out "; and" after subparagraph (B), substituting a period, and striking subparagraph (C).

(k) Section 412(b)(1)(B) of the Immigration and Nationality Act as amended (8 U.S.C. 1522(b)(1)(B) is amended by striking out the first sentence, and by striking out "after such study" in the second sentence.

DEPARTMENT OF STATE,
Washington, D.C., March 1, 1983.

DEAR MR. PRESIDENT: In accordance with Section 15 of the Act of August 1, 1956, as amended (22 U.S.C. 2680), there is transmitted herewith proposed legislation to authorize appropriations for the Department of State to carry out its authorities and responsibilities in the conduct of foreign affairs during the fiscal years 1984 and 1985 and for other purposes contained in this bill.

The primary purpose of the bill is to provide authorization of appropriations for (1) "Administration of Foreign Affairs," which supports the operation of the United States diplomatic and consular posts abroad and the Department of State in the United States; (2) "International Organizations and Conferences," which includes contributions to meet obligations pursuant to treaties, conventions or specific acts of Congress; (3) "International Commissions," which enables the United States to fulfill treaty and other international obligations; (4) "Migration and Refugee Assistance and other Activities," which funds various refugee assistance programs, including the United States annual contribution to the International Committee of the Red Cross, and which covers Bilateral Science and Technology Agreements. In addition, this bill would eliminate or modify certain requirements for the Department of State reports to Congress which have either been fulfilled or are unnecessary. A section-by-section analysis further explaining the proposed legislation is also enclosed.

The Department has been informed by the Office of Management and Budget that there is no objection to the presentation of this proposed legislation to the Congress and that its enactment would be in accord with the program of the President.

Sincerely,

POWELL A. MOORE,
Assistant Secretary,
for Congressional Relations.

Enclosures:
1. Proposed Legislation.
2. Section-by-Section Analysis.

SECTION-BY-SECTION ANALYSIS

SEC. 101—SHORT TITLE

This title may be cited as the "Department of State Authorization Act, Fiscal Years 1984 and 1985."

SEC. 102—AUTHORIZATION OF APPROPRIATIONS

Subsection (a)—This subsection provides an authorization of appropriations for the Department of State in accordance with the provisions of Section 15(a) of the State Department Basic Authorities Act of 1956 (22 U.S.C. 2680) as amended. This proposed Act authorizes funds to be appropriated under this legislation for the fiscal years 1984 and 1985 by category.

Category (1)—Authorizes appropriations under the heading "Administration of Foreign Affairs" for fiscal years 1984 and 1985. This catergory provides the necessary funds for the salaries, expenses and allowances of the officers and employees of the Department, both in the United States and abroad. It includes funds for executive direction and policy formulation, conduct of diplomatic relations with international organizations, domestic public information activities, central program services, and administrative and staff activities. This category also provides for representational expenses in accordance with Section 905 of the Foreign Service Act of 1980. Further, it provides funds for such activities as the acquisition, operation and maintenance of office space and living quarters for American staff abroad; funds for relief and repartriation loans to United States citizens abroad and for other emergencies of the Department; a buying power maintenance appropriation; and payments to the Foreign Service Retirement and Disability Fund and the American Institute in Taiwan.

Category (2)—Authorizes appropriations for fiscal years 1984 and 1985 under the heading "International Organizations and Conferences". This category provides the necessary funds for United States contributions of its assessed share of the expenses of the United Nations and other international organizations of which the United States is a member. In addition, provision is made for funding of official United States Government participation in regularly scheduled or planned multilateral intergovernmental conferences, meetings and related activities, and for contributions to international peacekeeping activities in accordance with international multilateral agreements.

Category (3)—Authorizes appropriations for fiscal years 1984 and 1985 under the heading "International Commissions." This category provides funds necessary to enable the United States to meet its obligations as a participant in international commissions and includes expenses of the American Sections (U.S. and Canada), the International Boundary and Water Commission (U.S. and Mexico) and the International Fisheries Commissions.

Category (4)—Authorizes appropriations for fiscal years 1984 and 1985 under the heading "Migration and Refugee Assistance and Other Activities." This category primarily enables the Secretary of State to provide assistance to migrants and refugees, both on a multilateral basis, through contributions to organizations such as the Intergovernmental Committee for Migration and the United Nations High Commissioner for Refugees, as authorized by law. In addition, provision is made for U.S. Bilateral Science and Technology Agreements.

SEC. 103—WORLD INTELLECTUAL PROPERTY ORGANIZATION (WIPO)

At the meetings of the Governing Bodies of WIPO in Geneva, Switzerland, November 16-24, 1981, action was taken by the Assembly of the Paris Union to increase the percentage contribution of Class I countries such as the United States from 4.50 percent to 4.57 percent.

Subsection (b) of P.L. 511 (22 U.S.C. 269f) currently limits the United States annual contribution to the Paris Union for the Protection of Industrial Property of the World Intellectual Property Organization to a maximum of 4.5 percent of the total expenses apportioned among member countries.

This amendment eliminates the legal limitation of 4.5 percent now placed on the United States contribution to the Paris Union so that the United States can continue to participate fully as a member of the Paris Union.

SEC. 104—CONTRIBUTIONS FOR INTERNATIONAL PEACEKEEPING (CIPA)

Public Law 94-37 authorizes the Department of State to pay U.S. assessments for U.N. peacekeeping forces in the Middle East. However, it is possible that future U.N. peacekeeping forces may have to be established in other areas of the world. This amendment will make it possible for the United States to respond quickly to each peacekeeping effort without the time-consuming necessity of seeking special legislative authority.

SEC. 105—ALLOCATION AUTHORITY

This amendment would provide general authority for the Secretary of State to allocate or transfer funds to other Federal Government Agencies for the performance of work otherwise authorized by law and for the purposes for which funds are appropriated, when those agencies can execute the activities more efficiently than the Department itself.

Currently, the Department requires a specific provision in an appropriation act or other law to make such an allocation or transfer. In the absence of such a specific provision, a significant additional administrative burden has resulted for the Department and the cooperating agencies. This amendment is solely to expedite the public business. Funds so allocated or transferred will only be used for the purposes for which appropriated. In addition, the amendment would provide expenditure authority like that under Section 632(a) of the Foreign Assistance Act.

SEC. 106—ELIMINATION AND MODIFICATION OF REPORTS

(a) Deletes the legislative requirement to transmit annual reports to Congress for three years, beginning January 20, 1979, on domestic travel restrictions being imposed by the U.S. Government on citizens of other countries and vice versa, and efforts to eliminate these restrictions, because the requirement has been fulfilled.

(b) Deletes the legislative requirement to transmit a report to Congress on orientation and language training programs for family members of U.S. Government employees assigned abroad, because the requirement has been fulfilled.

(c) Deletes the legislation requirement to transmit a report to Congress every six months during the two years beginning on April 10, 1979, describing and reviewing economic relations between the United States and Taiwan, because the requirement has been fulfilled.

(d) Deletes the legislative requirement to transmit to Congress within 60 days of November 13, 1979, a report showing the estimated total costs to the U.S. Government during FY '80 and FY '81 of domestic and foreign assistance to refugees under all programs of the U.S. Government and the estimated costs of such programs to state and local governments, because the requirement has been fulfilled.

(e) Deletes the legislative requirement to transmit to Congress by January 31, 1978, a report on the Office of the Assistant Secretary for Human Rights and Humanitarian Affairs, including the current mandate and operations and proposals for reorganization that would strengthen human rights in U.S. foreign policy, because the requirement has been fulfilled.

(f) Deletes the requirement for a complete and detailed report of the Institute for Scientific and Technical Cooperation's operations. Since the ISTC has never been funded, it has never been established. No report is therefore possible, and this requirement should be eliminated.

(g) Deletes an annual report by five agencies (State, USIA, AID, Agriculture and Commerce) on the status of professional development in the Foreign Service. The reports require substantial preparatory effort. Because other mechanisms exist for interagency coordination, the reporting requirement provides little benefit or information for the management of the five agencies. No congressional interest has been elicited from previous reports.

(h) Deletes the requirement for the President to report annually in international science and technology activities, which is largely duplicated in the international affairs section of the President's Annual Science and Technology Report to the Congress required by the National Science and Technology Policy, Organization, and Priorities Act of 1976.

(i) Deletes the requirement to report periodically on efforts to arrive at international agreements to develop standards and regulations which protect the stratosphere. If and when such international agreements are reached, they will be reported to the Congress under other legislation.

(j) Deletes the requirement that every vessel application for fishery permits be sent to three Congressional committees. The information supplied by this requirement is not in a useful form; the same information, when needed, is readily retrievable from the Commerce computer system. Since the costs of labor, duplication, and mailing required to comply with this law are high, the requirement should be eliminated.

(k) Deletes the requirement to transmit to Congress no later than March 1, 1981, a study of which agency is best able to administer the refugee resettlement program, since the requirement has been fulfilled.

By Mr. ARMSTRONG:

S. 662. A bill to provide for confirmation of the repayment contract of the Dallas Creek participating project of the Upper Colorado storage project; to the Committee on Energy and Natural Resources.

REPAYMENT CONTRACT OF DALLAS CREEK PROJECT

● Mr. ARMSTRONG. Mr. President, in 1968, Congress authorized the construction of the Dallas Creek project, Colorado River Basin Project Act, Public Law 90-537. In November 1976, the definite plan report for the project was completed. The repayment contract was approved in late 1976 at an election of the residents of the Tri-County Water Conservancy District, the contracting and marketing local governmental agency for the project. In January 1977, the contract was signed by the Department of Interior and the Conservancy District. In September 1977, the Commissioner of Reclamation authorized the start of construction.

Thus, final designs and specifications for stage I were not completed until mid-1979.

Due to dam safety design considerations prompted by the Teton Dam failure, the Bureau of Reclamation decided to proceed with construction in two phases. Invitations for bids on the first phase were not issued until August 1979. In turn, a contract was not awarded to the successful bidder until December 1979, the Bureau having obtained an extension of time from the bidders for the awarding of the contract. As soon as the contract was awarded, the contractor commenced work on the first phase and has proceeded on schedule to date. Construction on the first phase is scheduled for completion later in 1981.

At the time the repayment contract was signed, the estimated costs allocable to municipal and industrial water supply were $27,966,000 based on January 1976 prices and the interest rate provided for fiscal year 1976. As of June 1981, the Bureau of Reclamation estimates that the costs allocable to municipal and industrial water supply will be approximately $69 million. Approximately 60 percent of the increase from $28 million to $69 million has resulted from increases in construction costs caused by design changes, state of the art considerations, dam safety considerations, and added instrumentation, all of which were unanticipated at the time the repayment contract was negotiated. The remaining 40 percent of the cost increase is attributable to inflation.

The repayment contract does not obligate the Conservancy District to renegotiate, or make any other adjustments in its contractual obligation should the costs allocable to municipal and industrial water supply exceed $38 million. To the contrary, the $38 million figure is an absolute ceiling.

This provision stands in marked contrast to the terms of all other repayment contracts, which typically provide for ceilings that must be increased to cover the costs allocable to municipal and industrial water supply should such costs prove to be in excess of those contemplated at the time of the execution of a contract. The lack of this renegotiation provision in the repayment contract executed by the Conservancy District indicates, and

the record reflects, that the matter of a renegotiation provision was specifically discussed during the contract negotiations. The Federal Government agreed with the Conservancy District's position during the negotiations that there should be no renegotiation clause in the repayment contract, the $38 million being a fixed amount. This clearly indicates that the United States has obligated itself, pursuant to a binding contractural agreement, to complete the construction of the Dallas Creek project and provide the 28,100 acre-feet of municipal and industrial water supply therefrom at a cost to the conservancy district not exceeding the $38 million ceiling provided for in the repayment contract.

It would not benefit the Federal Government or the affected water users to halt construction of the project. Stage I of the project is nearing completion, and the overall project is 50 percent completed. Contracts have been consummated for the sale of all the project water. Municipal and industrial needs, including future energy development, are dependent on water from the storage project.

For these reasons, Mr. President, I am today introducing a bill to reaffirm the terms of the original contract. This measure would neither add to nor detract from the bargain struck between local water users and the Federal Government; it would, however, preserve the specific legal content of that bargain and eliminate the confusion and speculation that has surrounded it for several years now.

My bill is identical to the one I introduced in the last Congress; it was reported to the full Senate by the Energy and Natural Resources Committee by a large margin, which I take as an indication of its reasonableness. I am hopeful that we will be able to solve this problem in the current session and I would commend this measure to the attention of my colleagues.●

By Mr. ARMSTRONG (for himself, Mr. LUGAR, Mr. HATCH, Mr. BAUCUS, Mr. BUMPERS, Mrs. HAWKINS, Mr. ZORINSKY, Mr. CHAFEE, Mr. MCCLURE, Mr. HART, Mr. NICKLES, Mr. PRESSLER, Mr. LEVIN, Mrs. KASSEBAUM, Mr. KASTEN, Mr. GRASSLEY, Mr. HATFIELD, Mr. JEPSEN, Mr. WARNER, and Mr. QUAYLE):

S. 663. A bill to prohibit the payment of certain agriculture incentives to persons who produce certain agricultural commodities on highly erodible land; to the Committee on Agriculture, Nutrition, and Forestry.

PROHIBITING PAYMENTS FOR COMMODITIES PRODUCED ON HIGHLY ERODIBLE LAND

● Mr. ARMSTRONG. Mr. President, I am introducing a measure designed to lessen the growing threat of another dust bowl like the one that severely damaged our agriculture system in the 1930's. It seems hard to believe that we would fail to take the steps necessary to avoid such severe erosion, especially in light of dramatically increased knowledge and technology that enables us to conserve our soil better than ever before.

But we are losing more topsoil to wind and water erosion today than at any time in the 1930's. The Soil Conservation Service of the Department of Agriculture estimates that we are losing more than 5 billion tons of our best crop-producing topsoil each year. Some 40,000 tons of this topsoil floats down the Mississippi River every hour, hour after hour, day after day, week after week, month after month, year after year.

National Association of Conservation Districts, executive vice president Neil Sampson, in the excellent book "Farmland or Wasteland," estimates that every day 26 square miles of American topsoil wash and blow away. For each acre of corn an Iowa farmer grows each year, up to 15 tons of topsoil are lost; for each acre of wheat, up to 20 tons of soil will vanish.

In spite of the overwhelming surpluses of many agricultural commodities, surpluses which are choking our system, depressing prices, and making it increasingly difficult for farmers to eke out a living, the plows continue to add more land to our already over-expanded base. And increasingly, the plows are turning under the kind of land that should be left alone: Fragile grasslands, highly erodible land that is simply not suitable to sustained cultivation. In many areas of the arid West, the natural cover of sod that took centuries to develop is destroyed in hours, and the damage is virtually permanent and irreversible.

Incredible as it seems, the Federal Government is encouraging this plowing. At a time when we are already producing so much food that we cannot give away some of these surpluses, we are encouraging the additional plowing that expands production. Our price support system was intended to insure that our farmers could make a living, while assuring consumers of a stable price for food products. But the same system is encouraging this destructive plowing because it gives no consideration to the importance of conservation.

The first Chief of the U.S. Soil Conservation Service, Hugh Hammond Bennett, made it clear that:

> Conservation is possible only if we use every acre according to its capability, and treat every acre according to its need. You can't farm a flat Indiana field like you would a rolling Georgia slope, or a Vermont mountainside like a Texas river bottom. It's that simple, and that complex.

Government price supports, crop insurance, disaster payments, farm storage facility loans, and other incentives being made available to all crops grown on this newly plowed, marginal land amounts to using the Public Treasury to destroy our soil resources. I am not arguing here for any major reforms in that price support system, though good arguments can be made. I am simply arguing that this system should not encourage new plowing of bad farmland that will add to our erosion problem.

The bill I am introducing will not stop erosion. It will not end all plowing of bad lands. And it will not solve the economic problem confronting our Nation's farmers. But it will get the Government out of the business of subsidizing soil erosion. I do not believe Government should tell farmers what they can and cannot do on their own land. But I do believe that we should stop asking the taxpayers to support a practice clearly not in the best interests of the United States.

This bill is very simple. It uses existing definitions for highly erodible land, written long ago by the Soil Conservation Service. These are classifications already understood by the Nation's farmers and conservation officers, and they are readily accepted because they were based on a local decisionmaking process in the first place, when most of the Nation's private lands were classified.

The bill provides simply that if a farmer plows land that has not been farmed during the last 10 years, and it is classified as highly erodible land, he cannot be eligible for Government assistance for crops grown on that land. Recognizing that all lands are not the same, I know that there are certain areas—though not very many—where such land can be carefully cultivated without causing severe soil erosion. In such areas, the local soil conservation district could monitor the situation and determine that the bill does not apply if a soil conservation system can solve the problem. In the highly erodible classes of land addressed by this bill, there are few such instances. But where they exist, the local conservation districts can make appropriate exceptions to deal with them. There are nearly 3,000 conservation districts, one in almost every county in the United States. They are established by State law, and they are made up entirely of local people who understand local problems.

This bill will stop the payment of price supports, FmHA loans, farm storage facility loans, disaster payments, and crop insurance for crops grown on newly plowed highly erodible land. This legislation is supported by nearly every farm and conservation group in America, as well as the administration, and has received a great deal of favorable attention.

Mr. President, I first introduced a measure similar to this bill as an

amendment to the 1981 farm bill. I said at that time that we were creating the conditions under which another dust bowl could occur, and that we needed to act to stop subsidizing such erosion before it was too late. It is not too late, but we are losing valuable time and valuable topsoil. While my bill was pending in the Agriculture Committee during the 97th Congress, more than 100,000 acres of fragile lands were put to the plow in my State of Colorado alone, bringing the total of such highly erodible lands which have already been plowed in Colorado to nearly 5 million.

The measure pending before the Agriculture Committee was, at first, a very limited bill. It applied to lands west of 100th meridian, which roughly bisects Dodge City, Kans. But a number of organizations involved in early discussions made it clear that this is a national problem, not a Western one. The administration, the Farm Bureau, the National Association of Conservation Districts, and a number of others told me that the bill should apply to the entire country. This improved version does, because the problem we seek to correct is national.

Nationwide, more than 40 million acres of these fragile lands have been plowed under—nearly 10 percent of our entire farm base. But there are another 250 million acres of marginal lands waiting to be plowed. If all these acres, representing half again as much as our entire cultivated land base, were plowed, our farm system and a great deal of the world's food supply could be severely damaged.

The American farmer is by far the world's most productive. Each one of them produces enough food for himself and 78 other people. Our agriculture system has produced for many years the world's most abundant, low-cost food supply. The system generates about 20 percent of the Nation's gross national product and employs, directly or indirectly, over 20 percent of the labor force—23 million people. More people work in American agriculture, and the industries that depend on it, than in any other industry in this country, or anywhere in the world. We cannot afford Government policies that encourage erosion of this critical asset.

We must remember that despite all man's accomplishments, we owe our very existence to a thin layer of topsoil and the fact that it sometimes rains. It is long past time to stop encouraging the destruction of that topsoil. I ask unanimous consent that the bill, and some supporting material, be included in the RECORD at this point, and I urge speedy adoption. In the race for the soil and against time, literally, we are losing ground.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 663

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

(a) For purposes of this section—

(1) the term "agricultural commodity" means any agricultural commodity normally produced by annual tilling of the soil, including one-trip planters; and

(2) the term "highly erodible land" means land classified by the Soil Conservation Service of the Department of Agriculture as class IVe, VIe, VII, or VIII land under the Land Capability Classification systems as in effect on the date of enactment of this bill. The land capability class for a field shall be that determined to be the "predominant" class under regulations issued by the Secretary of Agriculture.

(b) Except as provided in subsection (c) and notwithstanding any other provision of law, following the enactment of this Act any person who produces an agricultural commodity on highly erodible land shall be ineligible for—

(1) any type of price support assistance on such commodity made available under the Agricultural Act of 1949 (7 USC 1421 et seq), the Commodity Credit Corporation Charter Act (15 USC 714 et seq), or any other Act;

(2) a loan for the construction or purchase of a facility for the storage of such commodity made under section 4 of the Commodity Credit Corporation Charter Act (15 USC 714b(h));

(3) crop insurance for such commodity under the Federal Crop Insurance Act (7 USC 1501 et seq);

(4) a disaster payment for such commodity made under the Agricultural Act of 1949 (7 USC 1421 et seq); or

(5) a new loan made, insured, or guaranteed under the Consolidated Farm and Rural Development Act (7 USC 1921 et seq) or any other provision of law administered by the Farmers Home Administration, if the Secretary determines that such loan will be used for a purpose which will contribute to excessive erosion of highly erodible land.

(c) Subsection (b) shall not apply to—

(1) any agricultural commodity planted by a person to produce any of the 1973 through 1982 crops of agricultural commodities;

(2) any agricultural commodity planted by a person before the date of enactment of this Act;

(3) any agricultural commodity planted by a person during any crop year beginning before such date;

(4) any loan described in subsection (b) made before such date; or

(5) any agricultural commodity produced using a conservation system which has been approved by a soil conservation district, which is based on technical standards set forth in the Soil Conservation Service technical guide for that Soil Conservation District. In areas where no soil conservation district exists the Secretary shall determine the adequacy of a conservation system.

IMPACT OF THE ARMSTRONG SODBUSTER BILL

The potential effects of the sodbuster bill are best analyzed by considering the amount of land which could be brought under cultivation during the next few years, and how erodible that land would be. This information, when compared with the amount of highly erodible land already under cultivation in the same parts of the country gives a clear picture of the devastating effects of continued plowing on our nation's agricultural system.

First, it is important to note that only 10% of the 413 million acres of land currently being cultivated fall into land capability classes IVe, VIe, VII, and VIII, which are regarded as highly erodible. However, these lands result in 23% of the nation's erosion. The average erosion rate on all cultivated cropland is about five tons per acre per year. But the average for class IVe land is 10 tons per acre, for class VIe 18 tons, for class VII more than 30 tons! So cultivating such land is almost certain to cause severe erosion and often has damaging effects on neighboring land, too.

The Department of Agriculture estimates that as many as 248 million acres of land not currently under cultivation fall into land capability classes IVe, VIe, VII, and VIII. The vast majority of these acres are privately owned and could be plowed any time, though only 20 million acres could be cultivated with a suitable conservation system that would prevent severe erosion. The sodbuster bill would allow for the exemption of those acres, but stop payments from encouraging the other 230 million to be plowed.

Of these 248 million acres of highly erodible land with potential for conversion to cropland, most lies in the Mountain states, the Northern and Southern Plains. Particularly vulnerable, according to USDA, are Montana, Wyoming, Colorado, Nebraska, South Dakota, California, New Mexico, Arizona, Texas and Oklahoma. It is these acres that the sodbuster bill would affect—highly erodible land that is not suitable to cultivation and could add millions of tons of topsoil to our already serious erosion problems. And when added to the 41 million acres of this highly erodible land already under cultivation, it could under drought conditions create the worst dust bowl in our nation's history.

Attached is a chart showing the areas of the nation where sodbusting presents the greatest danger. The first column shows the amount of highly erodible land already under cultivation. The sodbuster amendment would not affect this land. The second column shows the amount of land with potential for conversion that is highly erodible. If we encourage the plowing of these fragile lands, together with the fragile acreage already plowed, the resulting erosion could threaten the long-term economic viability of our nation's agricultural system.

Also attached is a map highlighting the states where this legislation is most needed to avoid catastrophic erosion. The sodbuster amendment probably won't stop all of these acres from being converted to cropland, but it would at least stop the government from encouraging the conversion. It makes no sense to pay speculators to add land which is simply not suitable for cultivation to our already over-expanded farm base. If this bill is not passed now, another full year of plowing will occur before Congress has time to act again.

ADMINISTRATION SUPPORT FOR THE ARMSTRONG SODBUSTER BILL

(Excerpt from an address by Richard D. Siegel, Deputy Assistant Secretary of Agriculture for Natural Resources and Environment, at the District Operations Forum, National Association of Conservation District Annual Convention, New Orleans, Louisiana, February 9, 1983)

We do have a legitimate Federal role in conservation. We don't want to add regulations to farm programs, but we also do not want these programs to be part of the soil and water resource problem. When a particular farm program can be linked to a resource problem, when it would advance conservation to add certain carefully limited conservation requirements to these farm programs, and where the farm community involved is ready to accept these requirements, then this Administration is ready to consider them. * * * The plow-out of grassland in Colorado is a graphic illustration of how a Federal price support, in this case for wheat, has led directly to exploitation of fragile soil. The wheat price support program never asks the farmer how much new cropland he will plow and on what kind of soil. Senator Armstrong's remedy, and he is no radical socialist, is to make those farmers who would plow up fragile soil either live with a conservation plan on that fragile soil or forego their price supports and other farm benefits. * * *

The Administration supported Senator Armstrong's bill last December and intends to continue supporting it because it is aimed at a specific soil abuse for which farm programs have some responsibility. Moreover, the Western farm community supports it. The farm community sees that there is a direct connection between the degradation of fragile soil and the wheat price supports that are freely available for this kind of activity. And so this farm community is ready to accept this cross-compliance. The Armstrong bill, after all, came about from their own grass-roots response. The Colorado folks came to Washington, to their Senator, with this problem. The Colorado Cattlemen's Association and the Colorado Farm Bureau Federation both supported the bill, along with the Colorado Association of Soil Conservation Districts. Even the normally conservative American Farm Bureau Federation supported the bill, with a modification to apply it to fragile soil nationwide. We in Washington did not go to the farm community bearing a heavy-handed compulsory conservation scheme for each and every farmer. The farm community came to Washington. This is the crucial difference. * * * If the Armstrong bill is "cross-compliance," then it's the type of cross-compliance that is fair and reasonable to farmers, that is aimed at specific results and that does not intrude on any farmers except those that want to participate in a Government farm program and are putting soil and water at risk in a clearly defined way."●

● Mr. PRESSLER. Mr. President, today I am joining Senator ARMSTRONG from Colorado in introducing legislation to eliminate the economic incentive for farmers to break up certain highly erodible land. The so-called sodbuster bill will make Government price supports, crop insurance, disaster payments, FmHA loans, and farm storage facility loans unavailable for crops grown on newly plowed fragile lands. The amendment will not apply to land that has been plowed or land where erosion is not a problem. The legislation was approved by the Senate last year as an amendment to the fiscal year 1983 agriculture appropriations bill, but was unfortunately deleted in the House-Senate conference committee.

This measure does not prohibit farmers from plowing their land, but does prohibit Government subsidization for breaking up land in four highly erodible land capability classifications. This would allow farmers and USDA to direct their efforts to reclaim land that is currently being damaged by erosion. The Federal Government must not encourage the plowing of land that is vulnerable to erosion.

With grain surpluses at record levels and USDA encouraging farmers to divert farmland both through cash and grain payments, it is contradictory to encourage farmers to break up new land. Increased acreage planted in grain on these highly erodible lands will only incease grain production and soil erosion. Most of this rangeland converted to marginal farmland may produce wheat for a time. However, erosion quickly destroys the land for years to come. Topsoil, America's most valuable natural resource, must be protected.

In my State of South Dakota, last year 8.5 million acres of land were eroding at an unacceptable rate. Much of this erosion is occurring on land that should never have been broken. Between July 1, 1974, and June 30, 1982, almost 1 million acres of native grassland was converted to farmland in South Dakota alone. While much of this land is not fragile and susceptible to erosion, many acres are. In summary, almost 2 million of the 12 million total acres of vulnerable grassland in South Dakota have been broken. To an extent, this has been done to earn a short-term profit and with the support of USDA programs. Without Federal programs, there would be less incentive to farm these marginal lands.

To illustrate the erosion problem of this fragile land, nationwide only 10 percent of the land now under cultivation is in the highly vulnerable category, but it accounts for one-fourth of the soil lost to erosion every year. Farmers are having great economic difficulties, but continued Federal support to plow these lands will only hurt farmers in the long run. It is irresponsible to allow Federal support to grow crops on these lands.

Mr. President, I urge my colleagues to join me in support of this legislation and to work for early consideration of this measure.●

At the request of Mr. BYRD the following statement was ordered printed:

● Mr. HART. Mr. President, I am pleased to join my distinguished colleague from the State of Colorado, Senator ARMSTRONG, in cosponsoring the so-called sodbuster legislation. When enacted, this legislation will become an instrumental part of our efforts to effectively address the very real and threatening problem of soil erosion in this country. When enacted, this legislation will prohibit price and other Federal crop supports on lands which have not been cultivated for agricultural purposes in the past 10 years.

This legislation is a needed step toward addressing one of the most severe and devastating problems facing America's farm productivity in Colorado and throughout the Midwestern farm belt. Soil erosion is on the increase and threatens the very structure of the agricultural industry in this country, the industry that is and will remain the cornerstone of the American economy.

The intent of this measure is sound. The facts have been gathered. In Colorado alone, more than 450,000 acres of fragile grassland have been plowed in the past 3 years, more acreage than that destroyed in Colorado during the Dust Bowl years. Once plowed, this land is extremely vulnerable to wind and water erosion and, in most instances, proves to be only marginally productive cropland. The Colorado As-

sociation of Soil Conservation Districts has estimated soil erosion is above acceptable limits on more than 4.5 million acres of Colorado cropland and 488,000 acres of rangelands. The problem is most acute in areas that lack vegetative cover because of plowing.

It is imperative that we curtail indiscriminate plowing of Colorado and other Western range and grasslands. Prime agricultural lands are a limited and diminishing resource which, if improperly managed, threaten to disrupt both the fundamental tenets of the farm economy and this country's position as a leading world agricultural producer. When enacted, this legislation will provide us with an additional tool to enhance our efforts at preventing soil erosion and encouraging progressive and effective land conservation techniques. In short, this legislation will discourage the indiscriminate plowing of marginal lands by speculators and others whose primary motivations are not farming.

But, Mr. President, we must be careful not to expect this or any other piece of legislation, wise as it is, to be viewed as the cure-all for erosion problems across the country. We must continue to support established soil conservation efforts in all 50 States and turn back attempts to reduce the Federal commitment in this area. For the third consecutive year, this administration has sent us budget recommendations which propose significant cuts in soil and water conservation programs. This proposal, if adopted, would drop the Soil Conservation Service's funding far below that which is necessary to prevent further deterioration of our natural resource base. In its place, this administration urges farmers to voluntarily implement prudent conservation measures on their farms. Unfortunately for all of us, this attitude overlooks the fact that conservation practices cost money and require Federal assistance where possible. Today's farm economy is in a tailspin unequalled since the 1930's. Current conditions on the farm and the lack of cash flow on many farms within my own State prevent farmers from voluntarily adopting necessary conservation measures.

Mr. President, much of America's farm productivity today has been achieved by replacing natural methods of building soil fertility with artificial methods. Crop rotations that included soil-building grasses and legumes every third year or so were a common feature of agriculture years ago. Today, rotations are used on only a small percentage of our farms. The primary reason these rotation systems have been abandoned has been the availability of cheap fuel and fertilizers. The message to our farmers was clear: "Land is simply too valuable to waste one-third of it growing hay and green manure—you can buy cheaper nitrogen in a bag." Today, that nitrogen is not as cheap. But because of continuing economic pressure to maximize production on each acre of land, most farmers are hooked into the system that demands its use. As bills and debt have become harder and harder to meet, the farmer has had less and less incentive to do anything but maximize production.

Mr. President, soil and water conservation are public goods, benefitting all Americans. Any sincere discussion of reindustrializing America must incorporate efforts to conserve, improve and revitalize agricultural lands. Without a committed effort to improve the condition of our soil and water, other attempts to hold down inflation, improve the quality of our defense and rebuild America's economic strength can be only temporary.

It is imperative that we look to the land that sustained us. We must move quickly to implement this and other legislation establishing preventive and curative measures to address the decline in soil productivity that threatens every State. Farmers cannot be expected to do the job alone. Nor can efforts by States, such as that in Iowa, or counties, such as that in Weld County, Colo., get the job done satisfactorily. The Federal Government has a vital role in this effort and we must continue to adequately fund Federal conservation programs on an annual basis.

This country cannot afford the consequences of continuing to ignore soil and water conservation measures. This Congress must take the steps necessary to begin addressing the problem of soil erosion, thereby ensuring the long-term viability of our agricultural industry and the farmers that depend upon it. It is time that Congress and the administration acknowledge that our strength in this country rests as much on the sustained productivity of our soil as on our ability to amass the largest defense arsenal in the world.

I intend to work with Senator ARMSTRONG and other cosponsors to see this legislation gets the prompt consideration it is due and I encourage all Senators to join us in this effort.●

By Mr. SIMPSON:

S. 667. A bill to enhance the benefits available under the contributory education program and to eliminate the termination date for the GI bill education program, and for other purposes; to the Committee on Veterans' Affairs.

GI BILL EDUCATION PROGRAMS

● Mr. SIMPSON. Mr. President, I am today introducing a bill which is designed to enhance the benefits available under the current contributory education program administered by the Veterans' Administration, to eliminate the termination date for the GI bill education program, and for other purposes, to be known as the proposed Veterans' Administration Education Amendments of 1983. I ask unanimous consent that this bill be printed in the RECORD. This proposed legislation is designed to fine-tune the current contributory post-Vietnam-era educational assistance program, known as VEAP with kickers, or ultra-VEAP. Contrary to some rather negative early public comment ultra-VEAP is currently doing a very good job of attracting high-quality enlistees to the Army's combat arms. The Army is not the only service authorized to use ultra-VEAP, but is the only one which has used this attractive recruiting option. The program has the advantage of allowing the Army to pay a bonus for enlisting or reenlisting, but assuring that the bonus money goes for educational expenses only. According to a recent study, these same young men and women who enlist to receive bonuses in the form of educational benefits are of a higher intelligence category than might otherwise be attracted for a cost-effective expenditure of its dollars, the Army has found ultra-VEAP to be a highly satisfactory recruitment device. The Army would not like to see it repealed. Senator ARMSTRONG's new GI bill which he sincerely embraced during the 97th Congress, proposed to repeal ultra-VEAP and leave the Army with no competitive advantage for attracting high quality enlistees. I do feel that instead of designing a program to improve recruitment for the services, that proposal would instead create a new recruitment problem for the Army in particular.

The improvements to ultra-VEAP contained in my proposed legislation are as follows:

First, increase the matching contribution from DOD from $2 to $3. Since 1977 when VEAP was enacted, the basic educational benefit paid to a serviceperson has been $2 from the VA or DOD for every $1 the servicemember contributed. The maximum amount available for an education after an enlistment is $8,100. Many veterans use their educational benefits to study for a college degree. I propose that the matching amount contributed by DOD be raised to $3. Thus, $10,300 would be available for a veterans' education upon separation. We all are well aware that the cost of a college education moves upward annually, so assuredly this modest raise in the basic benefit for our servicemembers' educations is warranted.

Second, to pay interest on the servicemember's contribution. Currently, the servicemember's contribution to VEAP does not earn any interest. During recent times when even savings accounts have been paying relatively high interest rates, making monthly

contributions to VEAP has represented a very inadequate way to save money year after year, and this has actually provided a disincentive to participate in the program. I propose to allow the serviceperson's contribution, a maximum of $2,700 by the end of an enlistment, to earn interest from the time it is deposited until the veteran starts his formal schooling for a period up to 7 years after separation from the service, the rate of interest would be determined by the Secretary of the Treasury based on the current market rate. Again, it is difficult to argue against removing such a disincentive to participate in a program as the lack of being able to receive interest earning on savings.

According to CBO estimates, these two changes would cost approximately $5 million in 1984, and about $130 million in 1995 when the program would be fully in effect. If the costs are indexed to inflation, they are estimated to be about $330 million. (That compares to over $2 billion by the same 1995 date for the Armstrong bill's costs indexed, "with kickers.") For a modest cost, a significant additional achievement might be expected of my proposal: The Army should experience a doubling in the number of its high-quality VEAP participants. This improvement in VEAP is designed to assist the Army in keeping its competitive edge during coming times when we all are aware that competition for 18 and 19 year olds will only intensify among the services, educational institutions, and the labor market.

This proposed legislation has three other provisions which are without added cost consequences for VEAP:

First, change the name of the program to "Servicepersons' Account for Veterans' Education" (SAVE). VEAP unfortunately and unfairly began with a negative image, as I previously mentioned, and I feel it would benefit from a new program title which focuses on the added benefit of earned interest on the individual's investment.

Second, allow the rate of educational benefit payout to be determined by the VA Administrator when necessary. At present, VEAP participants who wish to complete a 2-year master's program, for example, have difficulty having their benefits paid out in 2 years instead of 3. Clearly, that is a frustration we can easily remove.

Third, remove the December 31, 1989, termination date on the Vietnam-era GI bill. When VEAP was passed, Congress legislated the end of the last GI bill benefits. As a result, some career servicepersons who enlisted before 1977, and who wish to remain in the services, will lose their GI bill eligibility. The termination date is a source of great and very real concern for them. Many feel that Congress has not been equitable toward them. Some will leave the service in order to use their benefits, to the services' detriment. DOD has testified repeatedly in favor of this proposed repeal of the 1989 termination date. All of the services would feel disposed to pay the additional expenses to be required in 1990, in order to remove this source of irritation, and loss of incentive in some of their most valued personnel.

This proposed legislation would become effective October 1, 1983.

I urge all of my colleagues to consider the excellent provisions of this modest and relatively inexpensive item of proposed legislation. It seems to me to be highly appropriate for the occasion—fair and adequate.●

By Mr. KENNEDY (for himself, Mr. BIDEN, Mr. THURMOND, Mr. LAXALT, Mr. BAUCUS, Mr. HATCH, Mr. ABDNOR, Mrs. HAWKINS, Mr. LEAHY, Mr. COHEN, Mr. D'AMATO, Mr. CHILES, Mr. GLENN, Mr. SPECTER, Mr. HUDDLESTON, Mr. LUGAR, Mr. DECONCINI, Mr. ZORINSKY, Mr. MOYNIHAN, Mr. METZENBAUM, Mr. SASSER, Mr. SIMPSON, and Mr. STEVENS.

S. 668. A bill to reform Federal criminal sentencing procedures; to the Committee on the Judiciary.

SENTENCING REFORM ACT OF 1983

Mr. KENNEDY. Mr. President, I am pleased to join Senators BIDEN, THURMOND, LAXALT, BAUCUS, HATCH, ABDNOR, HAWKINS, LEAHY, COHEN, D'AMATO, CHILES, GLENN, SPECTER, HUDDLESTON, LUGAR, DECONCINI, ZORINSKY, MOYNIHAN, METZENBAUM, SASSER, SIMPSON, and STEVENS in introducing the Sentencing Reform Act of 1983. This legislation revises Federal sentencing procedures to achieve a rationality, uniformity, and fairness that does not exist in the current system.

This sentencing reform proposal has a long history of strong bipartisan support in the Senate. In 1978, this legislation passed the Senate unanimously as part of the comprehensive Criminal Code legislation. In the 96th Congress, it was reported unanimously by the Senate Judiciary Committee. Last fall, sentencing reform passed the Senate 95 to 1, as part of S. 2572. The 97th Congress ended before the House-Senate conference reached agreement on sentencing reform. But I received assurances from the distinguished chairman of the House Judiciary Committee, Mr. RODINO, that the House committee will act early this year to report sentencing reform legislation.

Federal criminal sentencing is in desperate need of reform. Under current procedures, judges mete out an unjustifiably wide range of sentences to offenders convicted of similar crimes. One offender may receive a sentence of probation, while another—convicted of the very same crime and possessing a comparable criminal history—may be sentenced to a lengthy term of imprisonment. In one well-known study conducted in 1974, 50 Federal district court judges from the Second Circuit were given 20 identical files based on actual cases and were asked what sentence they would impose on each defendant. The sentencing disparities were astonishing. Mr. President, I ask unanimous consent that the results of the study be printed in the RECORD at the conclusion of my statement (appendix A).

In one extortion case, for example, the range of sentence varied from 20 years imprisonment and a $65,000 fine to 3 years imprisonment and no fine.

Sentencing disparities are the direct result of the unfettered discretion the law confers on those judges and correctional authorities responsible for imposing and implementing criminal sentences. This sweeping discretion flows from the lack of any meaningful statutory guidelines or review procedures to which courts and parole boards might look for guidance. Even where offenders are sentenced to similar terms of imprisonment for similar offenses, their time actually served may differ widely. One may be sentenced to a relatively short term and be released after serving most of the sentence while the other may be sentenced to a relatively long term and be denied parole indefinitely.

Mr. President, the current system is actually a nonsystem. It is unfair to the defendant, the victim, and society. It defeats the reasonable expectation of the public that a reasonable penalty will be imposed at the time of the defendant's conviction, and that a reasonable sentence actually will be served.

The reforms needed to achieve a workable, rational sentencing system are neither too complicated to legislate nor too difficult to implement. The legislation which I introduce today clearly articulates the purposes of sentencing, establishes a Sentencing Commission to develop guidelines for sentencing, abolishes parole, and provides for appellate review of sentences which are outside the guidelines.

The bill sets our four generally accepted purposes of sentencing—deterrence; protection of the public; assurance of just punishment; and, in non-jail cases, rehabilitation. The guidelines created by the Sentencing Commission will take into consideration factors such as the purposes of sentencing, the characteristics of the offender, and the aggravating or mitigating circumstances of the offense.

In a given case, a judge will be expected to impose a sentence within the range established in the guidelines. If the judge believes that the guideline range is inappropriate in a particular case, he may impose a sentence above or below the range, provided that he

explains his reasons for doing so. If an offender is sentenced below the range specified in the guidelines, the Government may seek appellate review of the sentence. If an offender is sentenced above the range, the offender may seek appeal. These overdue reforms will insure greater uniformity and fairness in sentencing, while retaining necessary judicial flexibility. Most important, the gross disparities in sentencing that are so pervasive in current law will be significantly reduced.

This new approach will also end the use of indeterminate sentences. In such cases in the past, a convicted bank robber could be sentenced anywhere from a term of probation to 25 years in prison; a rapist could be sentenced anywhere from probation to life imprisonment. Under this bill, determinate sentences, announced at the outset, will tell the offender and society the actual prison time that will be served.

With fixed sentences, the current system of parole release will be eliminated. The sentence a defendant gets is the sentence he must serve. Both society and defendants favor the elimination of parole. Too often, it is an arbitrary device for arbitrarily keeping an offender in jail.

Mr. President, I ask unanimous consent that a more detailed analysis of the bill (appendix B) be printed in the RECORD at the conclusion of my statement.

This sentencing reform proposal enjoys the strong support of the administration. The Attorney General's Task Force on Violent Crime endorsed it in its final report of August 17, 1981. The administration's commitment to sentencing reform recently was reaffirmed in Attorney General Smith's testimony before the Senate Judiciary Committee on the subject of organized crime.

Federal sentencing reform is long overdue. During the several years that this proposal has been pending in Congress, it has served as a model for sentencing reform at the State and local level. I look forward to early action on sentencing reform by both the Senate and the House of Representatives.

Mr. President, I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 668

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this title may be cited as the "Sentencing Reform Act of 1983".

SEC. 2. (a) Title 18 of the United States Code is amended by—

(1) redesignating sections 3577, 3578, 3579, 3580, 3611, 3612, 3615, 3617, 3618, 3619, 3620, and 3656 as sections 3661, 3662, 3663, 3664, 3665, 3666, 3667, 3668, 3669, 3670, 3671, and 3672 of a new chapter 232 of title 18 of the United States Code, respectively;

(2) repealing chapters 227, 229, and 231 and substituting the following new chapters:

"CHAPTER 227—SENTENCES

"Subchapter
"A. General Provisions 3551
"B. Probation 3561
"C. Fines 3571
"D. Imprisonment 3581

"SUBCHAPTER A—GENERAL PROVISIONS

"Sec.
"3551. Authorized sentences.
"3552. Presentence reports.
"3553. Imposition of a sentence.
"3554. Order of criminal forfeiture.
"3555. Order of notice to victims.
"3556. Order of restitution.
"3557. Review of a sentence.
"3558. Implementation of a sentence.
"3559. Sentencing classification of offenses.

"SUBCHAPTER A—GENERAL PROVISIONS

"§ 3551. Authorized sentences

"(a) IN GENERAL.—Except as otherwise specifically provided, a defendant who has been found guilty of an offense described in any Federal statute, other than an Act of Congress applicable exclusively in the District of Columbia or the Uniform Code of Military Justice, shall be sentenced in accordance with the provisions of this chapter so as to achieve the purposes set forth in subparagraphs (A) through (D) of section 3553(a)(2) to the extent that they are applicable in light of all the circumstances of the case.

"(b) INDIVIDUALS.—An individual found guilty of an offense shall be sentenced, in accordance with the provisions of section 3553, to—

"(1) a term of probation as authorized by subchapter B;

"(2) a fine as authorized by subchapter C; or

"(3) a term of imprisonment is authorized by subchapter D.

A sentence to pay a fine may be imposed in addition to any other sentence. A sanction authorized by section 3554, 3555, or 3556 may be imposed in addition to the sentence required by this subsection.

"(c) ORGANIZATIONS.—An organization found guilty of an offense shall be sentenced, in accordance with the provisions of section 3553, to—

"(1) a term of probation as authorized by subchapter B; or

"(2) a fine as authorized by subchapter C.

A sentence to pay a fine may be imposed in addition to a sentence to probation. A sanction authorized by section 3554, 3555, or 3556 may be imposed in addition to the sentence required by this subsection.

"§ 3552. Presentence reports

"(a) PRESENTENCE INVESTIGATION AND REPORT BY PROBATION OFFICER.—A United States probation officer shall, pursuant to the provisions of Rule 32(c) of the Federal Rules of Criminal Procedure, make a presentence investigation of a defendant, and shall, before the imposition of sentence, report the results of the investigation to the court.

"(b) PRESENTENCE STUDY AND REPORT BY BUREAU OF PRISONS.—If the court, before or after its receipt of a report specified in subsection (a) or (c), desires more information than is otherwise available to it as a basis for determining the sentence to be imposed on a defendant found guilty of a felony, it may order that the defendant, for the purpose of a study, be committed to the custody of the Bureau of Prisons for a period of not more than sixty days. The order shall specify the additional information that the court needs before determining the sentence to be imposed. Such an order shall be treated for administrative purposes as a provisional sentence of imprisonment for the maximum term authorized by section 3581(b) for the offense committed. The Bureau shall conduct a complete study of the defendant during such period, inquiring into such matters as are specified by the court and any other matters that it believes are pertinent to the factors set forth in section 3553(a). The period of commitment may, in the discretion of the court, be extended for an additional period of not more than sixty days. By the expiration of the period of commitment, or by the expiration of any extension granted by the court, the United States Marshal shall return the defendant to the court for final sentencing, and the Bureau shall provide the court with a written report of the pertinent results of the study, and make to the court whatever recommendations the Bureau believes will be helpful to a proper resolution of the case. The report shall include recommendations of the Bureau concerning the guidelines and policy statements, promulgated by the Sentencing Commission pursuant to 28 U.S.C. 994(a), that it believes are applicable to the defendant's case. After receiving the report and the recommendations, the court shall proceed finally to sentence the defendant in accordance with the sentencing alternatives and procedures available under this chapter.

"(c) PRESENTENCE EXAMINATION AND REPORT BY PSYCHIATRIC OR PSYCHOLOGICAL EXAMINERS.—If the court, before or after its receipt of a report specified in subsection (a) or (b) desires more information than is otherwise available to it as a basis for determining the mental condition of the defendant, it may order that the defendant undergo a phychiatric or psychological examination and that the court be provided with a written report of the results of the examination pursuant to the provisions of section 4247.

"(d) DISCLOSURE OF PRESENTENCE REPORTS.—The court shall assure that a report filed pursuant to this section is disclosed to the defendant, the counsel for the defendant, and the attorney for the government in a timely manner, pursuant to the provisions of Rule 32(c) of the Federal Rules of Criminal Procedure.

"§ 3553. Imposition of a sentence

"(a) FACTORS TO BE CONSIDERED IN IMPOSING A SENTENCE.—The court, in determining the particular sentence to be imposed, shall consider—

"(1) the nature and circumstances of the offense and the history and characteristics of the defendant;

"(2) the need for the sentence imposed—

"(A) to reflect the seriousness of the offense, to promote respect for law, and to provide just punishment for the offense;

"(B) to afford adequate deterrence to criminal conduct;

"(C) to protect the public from further crimes of the defendant; and

"(D) to provide the defendant with needed educational or vocational training, medical care, or other correctional treatment in the most effective manner;

"(3) the kinds of sentences available;

"(4) the kinds of sentence and the sentencing range established for the applicable

category of offense committed by the applicable category of defendant as set forth in the guidelines that are issued by the Sentencing Commission pursuant to 28 U.S.C. 994(a)(1) and that are in effect on the date the defendant is sentenced;

"(5) any pertinent policy statement issued by the Sentencing Commission pursuant to 28 U.S.C. 994(a)(2) that is in effect on the date the defendant is sentenced; and

"(6) the need to avoid unwarranted sentence disparities among defendants with similar records who have been found guilty of similar conduct.

"(b) APPLICATION OF GUIDELINES IN IMPOSING A SENTENCE.—The court shall impose a sentence of the kind, and within the range, referred to in subsection (a)(4) unless the court finds that an aggravating or mitigating circumstance exists that was not adequately taken into consideration by the Sentencing Commission in formulating the guidelines and that should result in a sentence different from that described.

"(c) STATEMENT OF REASONS FOR IMPOSING A SENTENCE.—The court, at the time of sentencing, shall state in open court the reasons for its imposition of the particular sentence, and, if the sentence—

"(1) is of the kind, and within the range, described in subsection (a)(4), the reason for imposing a sentence at a particular point within the range; or

"(2) is not of the kind, or is outside the range, described in subsection (a)(4), the specific reason for the imposition of a sentence different from that described.

If the sentence does not include an order of restitution, the court shall include in the statement the reason therefor. The clerk of the court shall provide a transcription of the court's statement of reasons to the Probation System, and, if the sentence includes a term of imprisonment, to the Bureau of Prisons.

"(d) PRESENTENCE PROCEDURE FOR AN ORDER OF NOTICE.—Prior to imposing an order of notice pursuant to section 3555, the court shall give notice to the defendant and the government that it is considering imposing such an order. Upon motion of the defendant or the government, or on its own motion, the court shall—

"(1) permit the defendant and the government to submit affidavits and written memoranda addressing matters relevant to the imposition of such an order;

"(2) afford counsel an opportunity in open court to address orally the appropriateness of the imposition of such an order; and

"(3) include in its statement of reasons pursuant to subsection (c) specific reasons underlying its determinations regarding the nature of such an order.

Upon motion of the defendant or the government, or on its own motion, the court may in its discretion employ any additional procedures that it concludes will not unduly complicate or prolong the sentencing process.

"§ 3554. Order of criminal forfeiture

The court, in imposing a sentence on a defendant who has been found guilty of an offense described in section 1962 of this title or in title II or III of the Comprehensive Drug Abuse Prevention and Control Act of 1970 shall order, in addition to the sentence that is imposed pursuant to the provisions of section 3551, that the defendant forfeit property to the United States in accordance with the provisions of section 1963 of this title or section 413 of the Comprehensive Drug Abuse and Control Act of 1970.

"§ 3555. Order of notice to victims

"The court, in imposing a sentence on a defendant who has been found guilty of an offense involving fraud or other intentionally deceptive practices, may order, in addition to the sentence that is imposed pursuant to the provisions of section 3551, that the defendant give reasonable notice and explanation of the conviction, in such form as the court may approve, to the victims of the offense. The notice may be ordered to be given by mail, by advertising in designated areas or through designated media, or by other appropriate means. In determining whether to require the defendant to give such notice, the court shall consider the factors set forth in section 3553(a) to the extent that they are applicable and shall consider the cost involved in giving the notice as it relates to the loss caused by the offense, and shall not require the defendant to bear the costs of notice in excess of $20,000.

"§ 3556. Order of restitution

"The court, in imposing a sentence on a defendant who has been found guilty of an offense under this title, or an offense under section 902 (h), (i), (j), or (n) of the Federal Aviation Act of 1958 (49 U.S.C. 1472), may order, in addition to the sentence that is imposed pursuant to the provisions of section 3551, that the defendant make restitution to any victim of the offense in accordance with the provisions of sections 3663 and 3664.

"§ 3557. Review of a sentence

"The review of a sentence imposed pursuant to section 3551 is governed by the provisions of sections 3742.

"§ 3558. Implementation of a sentence

"The implementation of a sentence imposed pursuant to section 3551 is governed by the provisions of chapter 229.

"§ 3559. Sentencing classification of offenses

"(a) CLASSIFICATION.—An offense that is not specifically classified by a letter grade in the section defining it, is classified—

"(1) if the maximum term of imprisonment authorized is—

"(A) life imprisonment, or if the maximum penalty is death, as a Class A felony;

"(B) twenty years or more, as a Class B felony;

"(C) less than twenty years but ten or more years, as a Class C felony;

"(D) less than ten years but five or more years, as a Class D felony;

"(E) less than five years but more than one year, as a Class E felony;

"(F) one year or less but more than six months, as a Class A misdemeanor;

"(G) six months or less but more than thirty days, as a Class B misdemeanor;

"(H) thirty days or less but more than five days, as a Class C misdemeanor; or

"(I) five days or less, or if no imprisonment is authorized, as an infraction.

"(b) EFFECT OF CLASSIFICATION.—An offense classified under subsection (a) carries all the incidents assigned to the applicable letter designation except that the maximum fine that may be imposed is the fine authorized by the statute describing the offense, or by this chapter, whichever is the greater.

"SUBCHAPTER B—PROBATION

"Sec.
"3561. Sentence of probation.
"3562. Imposition of a sentence of probation.
"3563. Conditions of probation.
"3564. Running of a term of probation.
"3565. Revocation of probation.
"3566. Implementation of a sentence of probation.

"SUBCHAPTER B—PROBATION

"§ 3561. Sentence of probation

"(a) IN GENERAL.—A defendant who has been found guilty of an offense may be sentenced to a term of probation unless—

"(1) the offense is a Class A felony;

"(2) the offense is an offense for which probation has been expressly precluded; or

"(3) the defendant is sentenced at the same time to a term of imprisonment for the same or a different offense.

"(b) AUTHORIZED TERMS.—The authorized terms of probation are—

"(1) for a felony, not less than one nor more than five years;

"(2) for a misdemeanor, not more than two years; and

"(3) for an infraction, not more than one year.

"§ 3562. Imposition of a sentence of probation

"(a) FACTORS TO BE CONSIDERED IN IMPOSING A TERM OF PROBATION.—The court, in determining whether to impose a term of probation, and, if a term of probation is to be imposed, in determining the length of the term and the conditions of probation, shall consider the factors set forth in section 3553(a) to the extent that they are applicable.

"(b) EFFECT OF FINALITY OF JUDGMENT.—Notwithstanding the fact that a sentence of probation can subsequently be—

"(1) modified or revoked pursuant to the provisions of section 3564 or 3565;

"(2) corrected pursuant to the provisions of rule 35 and section 3742; or

"(3) appealed and modified, if outside the guideline range, pursuant to the provisions of section 3742;

a judgment of conviction that includes such a sentence constitutes a final judgment for all other purposes.

"§ 3563. Conditions of probation

"(a) MANDATORY CONDITIONS.—The court shall provide, as an explicit condition of a sentence of probation—

"(1) for a felony, a misdemeanor, or an infraction, that the defendant not commit another federal, State, or local crime during the term of probation; and

"(2) for a felony, that the defendant also abide by at least one condition set forth in subsection (b)(2), (b)(3), or (b)(13).

"(b) DISCRETIONARY CONDITIONS.—The court may provide, as further conditions of a sentence of probation, to the extent that such conditions are reasonably related to the factors set forth in section 3553 (a)(1) and (a)(2) and to the extent that such conditions involve only such deprivations of liberty or property as are reasonably necessary for the purposes indicated in section 3553(a)(2), that the defendant—

"(1) support his dependents and meet other family responsibilities;

"(2) pay a fine imposed pursuant to the provisions of subchapter C;

"(3) make restitution to a victim of the offense pursuant to the provisions of section 3556;

"(4) give to the victims of the offense the notice ordered pursuant to the provisions of section 3555;

"(5) work conscientiously at suitable employment or pursue conscientiously a course of study or vocational training that will equip him for suitable employment;

"(6) refrain, in the case of an individual, from engaging in a specified occupation, business, or profession bearing a reasonably direct relationship to the conduct constitut-

ing the offense, or engage in such a specified occupation, business, or profession only to a stated degree or under stated circumstances;

"(7) refrain from frequenting specified kinds of places or from associating unnecessarily with specified persons;

"(8) refrain from excessive use of alcohol, or any use of a narcotic drug or other controlled substance, as defined in section 102 of the Controlled Substances Act (21 U.S.C. 802), without a prescription by a licensed medical practitioner;

"(9) refrain from possessing a firearm, destructive device, or other dangerous weapon;

"(10) undergo available medical, psychiatric, or psychological treatment, including treatment for drug or alcohol dependency, as specified by the court, and remain in a specified institution if required for that purpose;

"(11) remain in the custody of the Bureau of Prisons during nights, weekends, or other intervals of time, totaling no more than the lesser of one year or the term of imprisonment authorized for the offense in section 3581(b), during the first year of the term of probation;

"(12) reside at, or participate in the program of, a community correction facility for all or part of the term of probation;

"(13) work in community service as directed by the court;

"(14) reside in a specified place or area, or refrain from residing in a specified place or area;

"(15) remain within the jurisdiction of the court, unless granted permission to leave by the court or a probation officer;

"(16) report to a probation officer as directed by the court or the probation officer;

"(17) permit a probation officer to visit him at his home or elsewhere as specified by the court;

"(18) answer inquiries by a probation officer and notify the probation officer promptly of any change in address or employment;

"(19) notify the probation officer promptly if arrested or questioned by a law enforcement officer; or

"(20) satisfy such other conditions as the court may impose.

"(c) MODIFICATION OF CONDITIONS.—The court may, after a hearing, modify, reduce, or enlarge the conditions of a sentence of probation at any time prior to the expiration or termination of the term of probation, pursuant to the provisions applicable to the initial setting of the conditions of probation.

"(d) WRITTEN STATEMENT OF CONDITIONS.—The court shall direct that the probation officer provide the defendant with a written statement that sets forth all the conditions to which the sentence is subject, and that is sufficiently clear and specific to serve as a guide for the defendant's conduct and for such supervision as is required.

"§ 3564. Running of a term of probation

"(a) COMMENCEMENT.—A term of probation commences on the day that the sentence of probation is imposed, unless otherwise ordered by the court.

"(b) CONCURRENCE WITH OTHER SENTENCES.—Multiple terms of probation, whether imposed at the same time or at different times, run concurrently with each other. A term of probation runs concurrently with any federal, State, or local term of probation, or supervised release, or parole for another offense to which the defendant is subject or becomes subject during the term of probation, except that it does not run during any period in which the defendant is imprisoned, other than during limited intervals as a condition of probation or supervised release, in connection with a conviction for a federal, State, or local crime.

"(c) EARLY TERMINATION.—The court, after considering the factors set forth in section 3553(a) to the extent that they are applicable, may terminate a term of probation previously ordered and discharge the defendant at any time in the case of a misdemeanor or an infraction or at any time after the expiration of one year of probation in the case of a felony, if it is satisfied that such action is warranted by the conduct of the defendant and the interest of justice.

"(d) EXTENSION.—The court may, after a hearing, extend a term of probation, if less than the maximum authorized term was previously imposed, at any time prior to the expiration or termination of the term of probation, pursuant to the provisions applicable to the initial setting of the term of probation.

"(e) SUBJECT TO REVOCATION.—A sentence of probation remains conditional and subject to revocation until its expiration or termination.

"§ 3565. Revocation of probation

"(a) CONTINUATION OR REVOCATION.—If the defendant violates a condition of probation at any time prior to the expiration or termination of the term of probation, the court may, after a hearing pursuant to Rule 32.1 of the Federal Rules of Criminal Procedure, and after considering the factors set forth in section 3553(a) to the extent that they are applicable—

"(1) continue him on probation, with or without extending the term or modifying or enlarging the conditions; or

"(2) revoke the sentence of probation and impose any other sentence that was available under subchapter A at the time of the initial sentencing.

"(b) DELAYED REVOCATION.—The power of the court to revoke a sentence of probation for violation of a condition of probation, and to impose another sentence, extends beyond the expiration of the term of probation for any period reasonably necessary for the adjudication of matters arising before its expiration if, prior to its expiration, a warrant or summons has been issued on the basis of an allegation of such a violation.

"§ 3566. Implementation of a sentence of probation

"The implementation of a sentence of probation is governed by the provisions of subchapter A of chapter 229.

"SUBCHAPTER C—FINES

"Sec.
"3571. Sentence of fine.
"3572. Imposition of a sentence of fine.
"3573. Modification or remission of fine.
"3574. Implementation of a sentence of fine.

"SUBCHAPTER C—FINES

"§ 3571. Sentence of fine

"(a) IN GENERAL.—A defendant who has been found guilty of an offense may be sentenced to pay a fine.

"(b) AUTHORIZED FINES.—Except as otherwise provided, the authorized fines are—

"(1) if the defendant is an individual—

"(A) for a felony, or for a misdemeanor resulting in the loss of human life, not more than $250,000;

"(B) for any other misdemeanor, not more than $25,000; and

"(C) for an infraction, not more than $1,000; and

"(2) if the defendant is an organization—

"(A) for a felony, or for a misdemeanor resulting in the loss of human life, not more than $500,000;

"(B) for any other misdemeanor, not more than $100,000; and

"(C) for an infraction, not more than $10,000.

"§ 3572. Imposition of a sentence of fine

"(a) FACTORS TO BE CONSIDERED IN IMPOSING FINE.—The court, in determining whether to impose a fine, and, if a fine is to be imposed, in determining the amount of the fine, the time for payment, and the method of payment, shall consider—

"(1) the factors set forth in section 3553(a), to the extent they are applicable, including, with regard to the characteristics of the defendant under section 3553(a), the ability of the defendant to pay the fine in view of the defendant's income, earning capacity, and financial resources and, if the defendant is an organization, the size of the organization;

"(2) the nature of the burden that payment of the fine will impose on the defendant, and on any person who is financially dependent upon the defendant;

"(3) any restitution or reparation made by the defendant to the victim of the offense, and any obligation imposed upon the defendant to make such restitution or reparation to the victim of the offense;

"(4) if the defendant is an organization, any measure taken by the organization to discipline its employees or agents responsible for the offense or to insure against a recurrence of such an offense; and

"(5) any other pertinent equitable consideration.

"(b) LIMIT ON AGGREGATE OF MULTIPLE FINES.—Except as otherwise expressly provided, the aggregate of fines that a court may impose on a defendant at the same time for different offenses that arise from a common scheme or plan, and that do not cause separable or distinguishable kinds of harm or damage, is twice the amount imposable for the most serious offense.

"(c) EFFECT OF FINALITY OF JUDGMENT.—Notwithstanding the fact that a sentence to pay a fine can subsequently be—

"(1) modified or remitted pursuant to the provisions of section 3573;

"(2) corrected pursuant to the provisions of rule 35 and section 3742; or

"(3) appealed and modified, if outside the guideline range, pursuant to the provisions of section 3742;

a judgment of conviction that includes such a sentence constitutes a final judgment for all other purposes.

"(d) TIME AND METHOD OF PAYMENT.—At the time a defendant is sentenced to pay a fine, the court may provide for the payment to be made within a specified period of time or in specified installments. If no such provision is made a part of the sentence, payment is due immediately.

"(e) ALTERNATIVE SENTENCE PRECLUDED.—At the time a defendant is sentenced to pay a fine, the court may not impose an alternative sentence to be served in the event that the fine is not paid.

"(f) INDIVIDUAL RESPONSIBILITY FOR PAYMENT.—If a fine is imposed on an organization, it is the duty of each individual authorized to make disbursement of the assets of the organization to pay the fine from assets of the organization. If a fine is imposed on an agent or shareholder of an organization, the fine shall not be paid, directly or indirectly, out of the assets of the or-

ganization, unless the court finds that such payment is expressly permissible under applicable State law.

"§ 3573. Modification or remission of fine

"(a) PETITION FOR MODIFICATION OR REMISSION.—A defendant who has been sentenced to pay a fine, and who—

"(1) has paid part but not all thereof, and concerning whom the circumstances no longer exist that warranted the imposition of the fine in the amount imposed or payment by the time or method specified, may petition the court for—

"(A) an extension of the time for payment;

"(B) a modification in the method of payment; or

"(C) a remission of all or part of the unpaid portion; or

"(2) has thereafter voluntarily made restitution or reparation to the victim of the offense, may petition the court for a remission of the unpaid portion of the fine in an amount not exceeding the amount of such restitution or reparation.

"(b) ORDER OF MODIFICATION OR REMISSION.—If, after the filing of a petition as provided in subsection (a), the court finds that the circumstances warrant relief, the court may enter an appropriate order.

"§ 3574. Implementation of a sentence of fine

"The implementation of a sentence to pay a fine is governed by the provisions of subchapter B of chapter 229.

"SUBCHAPTER D—IMPRISONMENT

"Sec.
"3581. Sentence of imprisonment.
"3582. Imposition of a sentence of imprisonment.
"3583. Inclusion of a term of supervised release after imprisonment.
"3584. Multiple sentences of imprisonment.
"3585. Calculation of a term of imprisonment.
"3586. Implementation of a sentence of imprisonment.

"SUBCHAPTER D—IMPRISONMENT

"§ 3581. Sentence of imprisonment

"(a) IN GENERAL.—A defendant who has been found guilty of an offense may be sentenced to a term of imprisonment.

"(b) AUTHORIZED TERMS.—The authorized terms of imprisonment are—

"(1) for a Class A felony, the duration of the defendant's life or any period of time;

"(2) for a Class B felony, not more than twenty-five years;

"(3) for a Class C felony, not more than twelve years;

"(4) for a Class D felony, not more than six years;

"(5) for a Class E felony, not more than three years;

"(6) for a Class A misdemeanor, not more than one year;

"(7) for a Class B misdemeanor, not more than six months;

"(8) for a Class C misdemeanor, not more than thirty days; and

"(9) for an infraction, not more than five days.

"§ 3582. Imposition of a sentence of imprisonment

"(a) FACTORS TO BE CONSIDERED IN IMPOSING A TERM OF IMPRISONMENT.—The court, in determining whether to impose a term of imprisonment, and, if a term of imprisonment is to be imposed, in determining the length of the term, shall consider the factors set forth in section 3553(a) to the extent that they are applicable, recognizing that imprisonment is not an appropriate means of promoting correction and rehabilitation. In determining whether to make a recommendation concerning the type of prison facility appropriate for the defendant, the court shall consider any pertinent policy statements issued by the Sentencing Commission pursuant to 28 U.S.C. 994(a)(2).

"(b) EFFECT OF FINALITY OF JUDGMENT.—Notwithstanding the fact that a sentence to imprisonment can subsequently be—

"(1) modified pursuant to the provisions of subsection (c);

"(2) corrected pursuant to the provisions of rule 35 and section 3742; or

"(3) appealed and modified, if outside the guideline range, pursuant to the provisions of section 3742;

a judgment of conviction that includes such a sentence constitutes a final judgment for all other purposes.

"(c) MODIFICATION OF AN IMPOSED TERM OF IMPRISONMENT.—The court may not modify a term of imprisonment once it has been imposed except that—

"(1) in any case—

"(A) the court, upon motion of the Director of the Bureau of Prisons, may reduce the term of imprisonment, after considering the factors set forth in section 3553(a) to the extent that they are applicable, if it finds that extraordinary and compelling reasons warrant such a reduction and that such a reduction is consistent with applicable policy statements issued by the Sentencing Commission; and

"(B) the court may modify an imposed term of imprisonment to the extent otherwise expressly permitted by statute or by Rule 35 of the Federal Rules of Criminal Procedure;

"(2) in the case of a defendant who has been sentenced to a term of imprisonment in excess of six years, the court, upon motion of the defendant or the Director of the Bureau of Prisons, may reduce the term of imprisonment, after considering the factors set forth in section 3553(a) to the extent that they are applicable, if it finds that extraordinary and compelling reasons require such a reduction and that such a reduction is consistent with applicable policy statements issued by the Sentencing Commission; but the court may consider only two such motions with respect to a particular defendant, one, after the defendant has served at least six years of his sentence, and a second, after the defendant has served at least the maximum term of imprisonment specified in the applicable guideline issued by the Sentencing Commission pursuant to 28 U.S.C. 994(a)(1); and

"(3) in the case of a defendant who has been sentenced to a term of imprisonment based on a sentencing range that has subsequently been lowered by the Sentencing Commission pursuant to 28 U.S.C. 994(n), upon motion of the defendant or the Director of Bureau of Prisons, or on its own motion, the court may reduce the term of imprisonment, after considering the factors set forth in section 3553(a) to the extent that they are applicable, if such a reduction is consistent with applicable policy statements issued by the Sentencing Commission.

"(d) INCLUSION OF AN ORDER TO LIMIT CRIMINAL ASSOCIATION OF ORGANIZED CRIME AND DRUG OFFENDERS.—The court, in imposing a sentence to a term of imprisonment upon a defendant convicted of a felony set forth in chapter 95 (racketeering) or 96 (racketeer influenced and corrupt organizations) of this title or in the Comprehensive Drug Abuse Prevention and Control Act of 1970 (21 U.S.C. 801 et seq.), or at any time thereafter upon motion by the Director of the Bureau of Prisons or a United States attorney, may include as a part of the sentence an order that requires that the defendant not associate or communicate with a specified person, other than his attorney, upon a showing of probable cause to believe that association or communication with such person is for the purpose of enabling the defendant to control, manage, direct, finance, or otherwise participate in an illegal enterprise.

"§ 3583. Inclusion of a term of supervised release after imprisonment

"(a) IN GENERAL.—The court, in imposing a sentence to a term of imprisonment for a felony or a misdemeanor, may include as a part of the sentence a requirement that the defendant be placed on a term of supervised release after imprisonment.

"(b) AUTHORIZED TERMS OF SUPERVISED RELEASE.—The authorized terms of supervised release are—

"(1) for a Class A or Class B felony, not more than three years;

"(2) for a Class C or Class D felony, not more than two years; and

"(3) for a Class E felony, or for a misdemeanor, not more than one year.

"(c) FACTORS TO BE CONSIDERED IN INCLUDING A TERM OF SUPERVISED RELEASE.—The court, in determining whether to include a term of supervised release, and, if a term of supervised release is to be included, in determining the length of the term and the conditions of supervised release, shall consider the factors set forth in section 3553(a)(1), (a)(2)(B), (a)(2)(D), (a)(4), (a)(5), and (a)(6).

"(d) CONDITIONS OF SUPERVISED RELEASE.—The court shall order, as an explicit condition of supervised release, that the defendant not commit another Federal, State, or local crime during the term of supervision. The court may order, as a further condition of supervised release, to the extent that such condition—

"(1) is reasonably related to the factors set forth in section 3553(a)(1), (a)(2)(B), and (a)(2)(D);

"(2) involves no greater deprivation of liberty than is reasonably necessary for the purposes set forth in section 3553(a)(2)(B) and (a)(2)(D); and

"(3) is consistent with any pertinent policy statements issued by the Sentencing Commission pursuant to 28 U.S.C. 994(a);

any condition set forth as a discretionary condition of probation in section 3563(b)(1) through (b)(10) and (b)(12) through (b)(19), and any other condition it considers to be appropriate. If an alien defendant is subject to deportation, the court may provide, as a condition of supervised release, that he be deported and remain outside the United States, and may order that he be delivered to a duly authorized immigration official for such deportation.

"(e) MODIFICATION OF TERM OR CONDITIONS.—The court may, after considering the factors set forth in section 3553(a)(1), (a)(2)(B), (a)(2)(D), (a)(4), (a)(5), and (a)(6)—

"(1) terminate a term of supervised release previously ordered and discharge the person released at any time after the expiration of one year of supervised release, if it is satisfied that such action is warranted by the conduct of the person released and the interest of justice; or

"(2) after a hearing, extend a term of supervised release if less than the maximum authorized term was previously imposed,

and may modify, reduce, or enlarge the conditions of supervised release, at any time prior to the expiration or termination of the term of supervised release, pursuant to the provisions applicable to the initial setting of the term and conditions of post-release supervision.

"(f) WRITTEN STATEMENT OF CONDITIONS.—The court shall direct that the probation officer provide the defendant with a written statement that sets forth all the conditions to which the term of supervised release is subject, and that is sufficiently clear and specific to serve as a guide for the defendant's conduct and for such supervision as is required.

"§ 3584. Multiple sentences of imprisonment

"(a) IMPOSITION OF CONCURRENT OR CONSECUTIVE TERMS.—If multiple terms of imprisonment are imposed on a defendant at the same time, or if a term of imprisonment is imposed on a defendant who is already subject to an undischarged term of imprisonment, the terms may run concurrently or consecutively, except that the terms may not run consecutively for an attempt and for another offense that was the sole objective of the attempt. Multiple terms of imprisonment imposed at the same time run concurrently unless the court orders or the statute mandates that the terms are to run consecutively. Multiple terms of imprisonment imposed at different times run consecutively unless the court orders that the terms are to run concurrently.

"(b) FACTORS TO BE CONSIDERED IN IMPOSING CONCURRENT OR CONSECUTIVE TERMS.—The court, in determining whether the terms imposed are to be ordered to run concurrently or consecutively, shall consider, as to each offense for which a term of imprisonment is being imposed, the factors set forth in section 3553(a).

"(c) TREATMENT OF MULTIPLE SENTENCES AS AN AGGREGATE.—Multiple terms of imprisonment ordered to run consecutively or concurrently shall be treated for administrative purposes as a single, aggregate term of imprisonment.

"§ 3585. Calculation of a term of imprisonment

"(a) COMMENCEMENT OF SENTENCE.—A sentence to a term of imprisonment commences on the date the defendant is received in custody awaiting transportation to, or arrives voluntarily to commence service of sentence at, the official detention facility at which the sentence is to be served.

"(b) CREDIT FOR PRIOR CUSTODY.—A defendant shall be given credit toward the service of a term of imprisonment for any time he has spent in official detention prior to the date the sentence commences—

"(1) as a result of the offense for which the sentence was imposed; or

"(2) as a result of any other charge for which the defendant was arrested after the commission of the offense for which the sentence was imposed;

that has not been credited against another sentence.

"§ 3586. Implementation of a sentence of imprisonment

"The implementation of a sentence of imprisonment is governed by the provisions of subchapter C of chapter 229 and, if the sentence includes a term of supervised release, by the provisions of subchapter A of chapter 229.

"SUBCHAPTER A—PROBATION

"§ 3601. Supervision of probation

"A person who has been sentenced to probation pursuant to the provisions of subchapter B of chapter 227, or placed on probation pursuant to the provisions of chapter 403, or placed on supervised release pursuant to the provisions of section 3583, shall, during the term imposed, be supervised by a probation officer to the degree warranted by the conditions specified by the sentencing court.

"§ 3602. Appointment of probation officers

"(a) APPOINTMENT.—A district court of the United States shall appoint qualified persons to serve, with or without compensation, as probation officers within the jurisdiction and under the direction of the court making the appointment. The court may, for cause, remove a probation officer appointed to serve with compensation, and may, in its discretion, remove a probation officer appointed to serve without compensation.

"(b) RECORD OF APPOINTMENT.—The order of appointment shall be entered on the records of the court, a copy of the order shall be delivered to the officer appointed, and a copy shall be sent to the Director of the Administrative Office of the United States Courts.

"(c) CHIEF PROBATION OFFICER.—If the court appoints more than one probation officer, one may be designated by the court as chief probation officer and shall direct the work of all probation officers serving in the judicial district.

"§ 3603. Duties of probation officers

"A probation officer shall—

"(a) instruct a probationer or a person on supervised release, who is under his supervision as to the conditions specified by the sentencing court, and provide him with a written statement clearly setting forth all such conditions;

"(b) keep informed, to the degree required by the conditions specified by the sentencing court, as to the conduct and condition of a probationer or a person on supervised release, who is under his supervision, and report his conduct and condition to the sentencing court;

"(c) use all suitable methods, not inconsistent with the conditions specified by the court, to aid a probationer or a person on supervised release who is under his supervision, and to bring about improvements in his conduct and condition;

"(d) be responsible for the supervision of any probationer or a person on supervised release who is known to be within the judicial district;

"(e) keep a record of his work, and make such reports to the Director of the Administrative Office of the United States Courts as the Director may require;

"(f) upon request of the Attorney General or his designee, supervise and furnish information about a person within the custody of the Attorney General while on work release, furlough, or other authorized release from his regular place of confinement, or while in prerelease custody pursuant to the provisions of section 3624(c); and

"(g) perform any other duty that the court may designate.

"§ 3604. Transportation of a probationer

"A court, after imposing a sentence of probation, may direct a United States marshal to furnish the probationer with—

"(a) transportation to the place to which he is required to proceed as a condition of his probation; and

"(b) money, not to exceed such amount as the Attorney General may prescribe, for subsistence expenses while traveling to his destination.

"§ 3605. Transfer of jurisdiction over a probationer

"A court, after imposing a sentence, may transfer jurisdiction over a probationer or person on supervised release to the district court for any other district to which the person is required to proceed as a condition of his probation or release, or is permitted to proceed, with the concurrence of such court. A later transfer of jurisdiction may be made in the same manner. A court to which jurisdiction is transferred under this section is authorized to exercise all powers over the probationer or releasee that are permitted by this subchapter or subchapter B or D of chapter 227.

"§ 3606. Arrest and return of a probationer

"If there is probable cause to believe that a probationer or a person on supervised release has violated a condition of his probation or release, he may be arrested, and, upon arrest, shall be taken without unnecessary delay before the court having jurisdiction over him.

"§ 3607. Special probation and expungement procedures for drug possessors

"(a) PRE-JUDGMENT PROBATION.—If a person found guilty of an offense described in section 404 of the Controlled Substances Act (21 U.S.C. 844)—

"(1) has not, prior to the commission of such offense, been convicted of violating a federal or State law relating to controlled substances; and

"(2) has not previously been the subject of a disposition under this subsection;

the court may, with the consent of such person, place him on probation for a term of not more than one year without entering a judgment of conviction. At any time before the expiration of the term of probation, if the person has not violated a condition of his probation, the court may, without entering a judgment of conviction, dismiss the proceedings against the person and discharge him from probation. At the expiration of the term of probation, if the person has not violated a condition of his probation the court shall, without entering a judgment of conviction, dismiss the proceedings against the person and discharge him from probation. If the person violates a condition of his probation, the court shall proceed in accordance with the provisions of section 3565.

"(b) RECORD OF DISPOSITION.—A nonpublic record of a disposition under subsection (a), or a conviction that is the subject of an expungement order under subsection (c), shall be retained by the Department of Justice solely for the purpose of use by the courts in determining in any subsequent proceeding whether a person qualifies for the disposition provided in subsection (a) or the ex-

pungement provided in subsection (c). A disposition under subsection (a), or a conviction that is the subject of an expungement order under subsection (c), shall not be considered a conviction for the purpose of a disqualification or a disability imposed by law upon conviction of a crime, or for any other purpose.

"(c) EXPUNGEMENT OF RECORD OF DISPOSITION.—If the case against a person found guilty of an offense under section 404 of the Controlled Substances Act (21 U.S.C. 844) is the subject of a disposition under subsection (a), and the person was less than twenty-one years old at the time of the offense, the court shall enter an expungement order upon the application of such person. The expungement order shall direct that there be expunged from all official records, except the nonpublic records referred to in subsection (b), all references to his arrest for the offense, the institution of criminal proceedings against him, and the results thereof. The effect of the order shall be to restore such person, in the contemplation of the law, to the status he occupied before such arrest or institution of criminal proceedings. A person concerning whom such an order has been entered shall not be held thereafter under any provision of law to be guilty of perjury, false swearing, or making a false statement by reason of his failure to recite or acknowledge such arrests or institution of criminal proceedings, or the results thereof, in response to an inquiry made of him for any purpose.

"SUBCHAPTER B—FINES

"Sec.
"3611. Payment of a fine.
"3612. Collection of an unpaid fine.
"3613. Lien provisions for satisfaction of an unpaid fine.

"SUBCHAPTER B—FINES

"§ 3611. Payment of a fine

"A person who has been sentenced to pay a fine pursuant to the provisions of subchapter C of chapter 227 shall pay the fine immediately, or by the time and method specified by the sentencing court, to the clerk of the court. The clerk shall forward the payment to the United States Treasury.

"§ 3612. Collection of an unpaid fine

"(a) CERTIFICATION OF IMPOSITION.—If a fine is imposed, the sentencing court shall promptly certify to the Attorney General—
"(1) the name of the person fined;
"(2) his last known address;
"(3) the docket number of the case;
"(4) the amount of the fine imposed;
"(5) the time and method of payment specified by the court;
"(6) the nature of any modification or remission of the fine; and
"(7) the amount of the fine that is due and unpaid.

The court shall thereafter promptly certify to the Attorney General the amount of any subsequent payment that the court may receive with respect to, and the nature of any subsequent remission or modification of, a fine concerning which certification has previously been issued.

"(b) RESPONSIBILITY FOR COLLECTION.—The Attorney General shall be responsible for collection of an unpaid fine concerning which a certification has been issued as provided in subsection (a). An order of restitution, pursuant to section 3556, does not create any right of action against the United States by the person to whom restitution is ordered to be paid.

"§ 3613. Lien provisions for satisfaction of an unpaid fine

"(a) LIEN.—A fine imposed pursuant to the provisions of subchapter C of chapter 227 is a lien in favor of the United States upon all property belonging to the person fined. The lien arises at the time of the entry of the judgment and continues until the liability is satisfied, remitted, or set aside, or until it becomes unenforceable pursuant to the provisions of subsection (b). On application of the person fined, the Attorney General shall—

"(1) issue a certificate of release, as described in section 6325 of the Internal Revenue Code of 1954, of any lien imposed pursuant to this section, upon his acceptance of a bond described in section 6325(a)(2) of the Internal Revenue Code of 1954; or

"(2) issue a certificate of discharge, as described in section 6325 of the Internal Revenue Code of 1954, of any part of the person's property subject to a lien imposed pursuant to this section, upon his determination that the fair market value of that part of such property remaining subject to and available to satisfy the lien is at least three times the amount of the fine.

"(b) EXPIRATION OF LIEN.—A lien becomes unenforceable and liability to pay a fine expires—

"(1) twenty years after the entry of the judgment; or

"(2) upon the death of the individual fined.

The period set forth in paragraph (1) may be extended, prior to its expiration, by a written agreement between the person fined and the Attorney General. The running of the period set forth in paragraph (1) is suspended during any interval for which the running of the period of limitations for collection of a tax would be suspended pursuant to section 6503(b), 6503(c), 6503(f), or 7508(a)(1)(I) of the Internal Revenue Code of 1954 (26 U.S.C. 6503(b), 6503(c), 6503(g), or 7508(a)(1)(I)), or section 513 of the Act of October 17, 1940, 54 Stat. 1190.

"(c) APPLICATION OF OTHER LIEN PROVISIONS.—The provisions of sections 6323, other than 6323(f)(4), 6331 through 6343, 6901, 7402, 7403, 7405, 7423 through 7426, 7505(a), 7506, 7508, 7602 through 7605, 7622, 7701, and 7805 of the Internal Revenue Code of 1954 (26 U.S.C. 6323, 6331 through 6343, 6901, 7402, 7403, 7405, 7423 through 7426, 7505(a), 7506, 7508, 7602 through 7605, 7609, 7610, 7622, 7701, and 7805) and of section 513 of the Act of October 17, 1940, 54 Stat. 1190, apply to a fine and to the lien imposed by subsection (a) as if the liability of the person fined were for an internal revenue tax assessment, except to the extent that the application of such statutes is modified by regulations issued by the Attorney General to accord with differences in the nature of the liabilities. For the purposes of this subsection, references in the preceding sections of the Internal Revenue Code of 1954 to 'the Secretary' shall be construed to mean 'the Attorney General,' and references in those sections to 'tax' shall be construed to mean 'fine.'

"(d) EFFECT OF NOTICE OF LIEN.—A notice of the lien imposed by subsection (a) shall be considered a notice of lien for taxes payable to the United States for the purposes of any State or local law providing for the filing of a notice of a tax lien. The registration, recording, docketing, or indexing, in accordance with 28 U.S.C. 1962, of the judgment under which a fine is imposed shall be considered for all purposes as the filing prescribed by section 6323(f)(1)(A) of the Internal Revenue Code of 1954 (26 U.S.C. 6323(f)(1)(A)) and by subsection (c).

"SUBCHAPTER C—IMPRISONMENT

"Sec.
"3621. Imprisonment of a convicted person.
"3622. Temporary release of a prisoner.
"3623. Transfer of a prisoner to state authority.
"3624. Release of a prisoner.
"3625. Inapplicability of the Administrative Procedure Act.

"SUBCHAPTER C—IMPRISONMENT

"§ 3621. Imprisonment of a convicted person

"(a) COMMITMENT TO CUSTODY OF BUREAU OF PRISONS.—A person who has been sentenced to a term of imprisonment pursuant to the provisions of subchapter D of chapter 227 shall be committed to the custody of the Bureau of Prisons until the expiration of the term imposed, or until earlier released for satisfactory behavior pursuant to the provisions of section 3624.

"(b) PLACE OF IMPRISONMENT.—The Bureau of Prisons shall designate the place of the prisoner's imprisonment. The Bureau may designate any available penal or correctional facility that meets minimum standards of health and habitability established by the Bureau, whether maintained by the federal government or otherwise and whether within or without the judicial district in which the person was convicted, that the Bureau determines to be appropriate and suitable, considering—

"(1) the resources of the facility contemplated;

"(2) the nature and circumstances of the offense;

"(3) the history and characteristics of the prisoner;

"(4) any statement by the court that imposed the sentence—

"(A) concerning the purposes for which the sentence to imprisonment was determined to be warranted; or

"(B) recommending a type of penal or correctional facility as appropriate; and

"(5) any pertinent policy statement issued by the Sentencing Commission pursuant to section 994(a)(2) of title 28.

The Bureau may at any time, having regard for the same matters, direct the transfer of a prisoner from one penal or correctional facility to another.

"(c) DELIVERY OF ORDER OF COMMITMENT.—When a prisoner, pursuant to a court order, is placed in the custody of a person in charge of a penal or correctional facility, a copy of the order shall be delivered to such person as evidence of this authority to hold the prisoner, and the original order, with the return endorsed thereon, shall be returned to the court that issued it.

"(d) DELIVERY OF PRISONER FOR COURT APPEARANCES.—The United States Marshal shall, without charge, bring a prisoner into court or return him to a prison facility on order of a court of the United States or on written request of an attorney for the government.

"§ 3622. Temporary release of a prisoner

"The Bureau of Prisons may release a prisoner from the place of his imprisonment for a limited period, if such release appears to be consistent with the purposes for which the sentence was imposed and any pertinent policy statement issued by the Sentencing Commission pursuant to 28 U.S.C. 994(a)(2), if such release otherwise appears to be consistent with the public interest and if there is reasonable cause to believe that the prisoner will honor the trust to be imposed in

him, by authorizing him, under prescribed conditions, to—

"(a) visit a designated place for a period not to exceed thirty days, and then return to the same or another facility, for the purpose of—

"(1) visiting a relative who is dying;

"(2) attending a funeral of a relative;

"(3) obtaining medical treatment not otherwise available;

"(4) contacting a prospective employer;

"(5) establishing or reestablishing family or community ties; or

"(6) engaging in any other significant activity consistent with the public interest;

"(b) participate in a training or educational program in the community while continuing in official detention at the prison facility; or

"(c) work at paid employment in the community while continuing in official detention at the penal or correctional facility if—

"(1) the rates of pay and other conditions of employment will not be less than those paid or provided for work of a similar nature in the community; and

"(2) the prisoner agrees to pay to the Bureau such costs incident to his official detention as the Bureau finds appropriate and reasonable under all the circumstances, such costs to be collected by the Bureau and deposited in the Treasury to the credit of the appropriation available for such costs at the time such collections are made.

"§ 3623. Transfer of a prisoner to state authority

"The Director of the Bureau of Prisons shall order that a prisoner who has been charged in an indictment or information with, or convicted of, a State felony, be transferred to an official detention facility within such State prior to his release from a federal prison facility if—

"(1) the transfer has been requested by the Governor or other executive authority of the State;

"(2) the State has presented to the Director a certified copy of the indictment, information, or judgment of conviction; and

"(3) the Director finds that the transfer would be in the public interest.

If more than one request is presented with respect to a prisoner, the Director shall determine which request should receive preference. The expenses of such transfer shall be borne by the State requesting the transfer.

"§ 3624. Release of a prisoner

"(a) DATE OF RELEASE.—A prisoner shall be released by the Bureau of Prisons on the date of the expiration of his term of imprisonment, less any time credited toward the service of his sentence as provided in subsection (b). If the date for a prisoner's release falls on a Saturday, a Sunday, or a legal holiday at the place of confinement, the prisoner may be released by the Bureau on the last preceding weekday.

"(b) CREDIT TOWARD SERVICE OF SENTENCE FOR SATISFACTORY BEHAVIOR.—A prisoner who is serving a term of imprisonment of more than one year, other than a term of imprisonment for the duration of his life, shall receive credit toward the service of his sentence, beyond the time served, of thirty-six days at the end of each year of his term of imprisonment, beginning after the first year of the term, unless the Bureau of Prisons determines that, during that year, he has not satisfactorily complied with such institutional disciplinary regulations as have been approved by the Attorney General and issued to the prisoner. If the Bureau determines that, during that year, the prisoner has not satisfactorily complied with such institutional regulations, he shall receive no such credit toward service of his sentence or shall receive such lesser credit as the Bureau determines to be appropriate. The Bureau's determination shall be made within fifteen days after the end of each year of the sentence. Such credit toward service of sentence vests at the time that it is received. Credit that has vested may not later be withdrawn, and credit that has not been earned may not later be granted.

"(c) PRE-RELEASE CUSTODY.—The Bureau of Prisons shall, to the extent practicable, assure that a prisoner serving a term of imprisonment spends a reasonable part, not to exceed six months, of the last ten percent of the term to be served under conditions that will afford the prisoner a reasonable opportunity to adjust to and prepare for his reentry into the community. The United States Probation System shall, to the extent practicable, offer assistance to a prisoner during such pre-release custody.

"(d) ALLOTMENT OF CLOTHING, FUNDS, AND TRANSPORTATION.—Upon the release of a prisoner on the expiration of his term of imprisonment, the Bureau of Prisons shall furnish him with—

"(1) suitable clothing;

"(2) an amount of money, not more than $500, determined by the Director to be consistent with the needs of the offender and the public interest, unless the Director determines that the financial position of the offender is such that no sum should be furnished; and

"(3) transportation to the place of his conviction, to his bona fide residence within the United States, or to such other place within the United States as may be authorized by the Director.

"(e) SUPERVISION AFTER RELEASE.—A prisoner whose sentence includes a term of supervised release after imprisonment shall be released by the Bureau of Prisons to the supervision of a probation officer who shall, during the term imposed, supervise the person released to the degree warranted by the conditions specified by the sentencing court. The term of supervised release commences on the day the person is released from imprisonment. The term runs concurrently with any federal, State, or local term of probation or supervised release or parole for another offense to which the person is subject or becomes subject during the term of supervised release, except that it does not run during any period in which the person is imprisoned, other than during limited intervals as a condition of probation or supervised release, in connection with a conviction for a federal, State, or local crime.

"§ 3625. Inapplicability of the Administrative Procedure Act

"The provisions of sections 554 and 555 and 701 through 706 of title 5, United States Code, do not apply to the making of any determination, decision, or order under this subchapter."; and

(3) adding the following new section at the end of chapter 232:

"§ 3673. Definitions for sentencing provisions

"As used in chapters 227 and 229—

"(a) 'found guilty' includes acceptance by a court of a plea of guilty or nolo contendere;

"(b) 'commission of an offense' includes the attempted commission of an offense, the consummation of an offense, and any immediate flight after the commission of an offense; and

"(c) 'law enforcement officer' means a public servant authorized by law or by a government agency to engage in or supervise the prevention, detection, investigation, or prosecution of an offense."; and

(4) adding the following caption and sectional analysis at the beginning of new chapter 232:

"CHAPTER 232—MISCELLANEOUS SENTENCING PROVISIONS

"Sec.
"3661. Use of information for sentencing.
"3662. Conviction records.
"3663. Order of restitution.
"3664. Procedure for issuing order of restitution.
"3665. Firearms possessed by convicted felons.
"3666. Bribe moneys.
"3667. Liquors and related property; definitions.
"3668. Remission or mitigation of forfeitures under liquor laws; possession pending trial.
"3669. Conveyance carrying liquor.
"3670. Disposition of conveyances seized for violation of the Indian liquor laws.
"3671. Vessels carrying explosives and steerage passengers.
"3672. Duties of Director of Administrative Office of the United States Courts.
"3673. Definitions for sentencing provisions.".

(b) The chapter analysis of Part II of title 18, United States Code, is amended by striking out the items relating to chapters 227, 229, and 231, and inserting in lieu thereof the following:

"Sec.
"227. Sentences 3551
"229. Post-Sentence Administration .. 3601
"231. Repealed .....
"232. Miscellaneous Sentencing Provisions ..... 3661".

SEC. 3. (a) Chapter 235 of title 18, United States Code, is amended by adding the following new section at the end thereof:

"§ 3742. Review of a sentence

"(a) APPEAL BY A DEFENDANT.—A defendant may file a notice of appeal in the district court for review of an otherwise final sentence if the sentence—

"(1) was imposed in violation of law;

"(2) was imposed as a result of an incorrect application of the sentencing guidelines issued by the Sentencing Commission pursuant to 28 U.S.C. 994(a); or

"(3) was imposed for a felony or a class A misdemeanor and is greater than—

"(A) the sentence specified in the applicable sentencing guideline issued by the Sentencing Commission pursuant to 28 U.S.C. 994(a)(1), to the extent that the sentence includes a greater fine or term of imprisonment or term of supervised release than the maximum established in the guideline, or includes a more limiting condition of probation or supervised release under section 3563 (b)(6) or (b)(11) than the maximum established in the guideline; and

"(B) the sentence, if any, specified in a plea agreement under Rule 11 (e)(1)(B) or (e)(1)(C) of the Federal Rules of Criminal Procedure.

"(b) APPEAL BY THE GOVERNMENT.—The government may file a notice of appeal in the district court for review of an otherwise final sentence if the sentence—

"(1) was imposed in violation of law;

"(2) was imposed as a result of an incorrect application of the sentencing guidelines

issued by the Sentencing Commission pursuant to 28 U.S.C. 994(a); or

"(3) was imposed for a felony or a Class A misdemeanor and is less than—

"(A) the sentence specified in the applicable sentencing guideline issued by the Sentencing Commission pursuant to 28 U.S.C. 994(a)(1), to the extent that the sentence includes a lesser fine or term of imprisonment or term of supervised release than the minimum established in the guideline, or includes a less limiting condition of probation or supervised release under section 3563 (b)(6) or (b)(11) than the minimum established in the guideline; and

"(B) the sentence, if any, specified in a plea agreement under Rule 11 (e)(1)(B) or (e)(1)(C) of the Federal Rules of Criminal Procedure;

and the Attorney General or the Solicitor General personally approves the filing of the notice of appeal.

"(c) RECORD ON REVIEW.—If a notice of appeal is filed in the district court pursuant to subsection (a) or (b), the clerk shall certify to the court of appeals—

"(1) that portion of the record in the case that is designated as pertinent by either of the parties;

"(2) the presentence report; and

"(3) the information submitted during the sentencing proceeding.

"(d) CONSIDERATION.—Upon review of the record, the court of appeals shall determine whether the sentence—

"(1) was imposed in violation of law;

"(2) was imposed as a result of an incorrect application of the sentencing guidelines; or

"(3) is outside the range of the applicable sentencing guideline, and is unreasonable, having regard for—

"(A) the factors to be considered in imposing a sentence, as set forth in chapter 227 of this title; and

"(B) the reasons for the imposition of the particular sentence, as stated by the district court pursuant to the provisions of section 3553(c).

The court of appeals shall give due regard to the opportunity of the district court to judge the credibility of the witnesses, and shall accept the findings of fact of the district court unless they are clearly erroneous.

"(e) DECISION AND DISPOSITION.—If the court of appeals determines that the sentence—

"(1) was imposed in violation of law or imposed as a result of an incorrect application of the sentencing guidelines, it shall—

"(A) remand the case for further sentencing proceedings; or

"(B) correct the sentence;

"(2) is outside the range of the applicable sentencing guideline and is unreasonable, it shall state specific reasons for its conclusions and—

"(A) if it determines that the sentence is too high and the appeal has been filed under subsection (a), it shall set aside the sentence and—

"(i) remand the case for imposition of a lesser sentence;

"(ii) remand the case for further sentencing proceedings; or

"(iii) impose a lesser sentence;

"(B) if it determines that the sentence is too low and the appeal has been filed under subsection (b), it shall set aside the sentence and—

"(i) remand the case for imposition of a greater sentence;

"(ii) remand the case for further sentencing proceedings; or

"(iii) impose a greater sentence; or

"(3) was not imposed in violation of law or imposed as a result of an incorrect application of the sentencing guidelines, and is not unreasonable, it shall affirm the sentence.".

(b) The sectional analysis of chapter 235 of title 18, United States Code, is amended by adding the following new item after the item relating to section 3741:

"3742. Review of a sentence.".

SEC. 4. Chapter 403 of title 18, United States Code, is amended as follows:

(a) Section 5037 is amended—

(1) by redesignating subsection (c) as subsection (d); and

(2) by striking out subsections (a) and (b) and inserting the following new subsections in lieu thereof:

"(a) If the court finds a juvenile to be a juvenile delinquent, the court shall hold a disposition hearing concerning the appropriate disposition no later than twenty court days after the juvenile delinquency hearing unless the court has ordered further study pursuant to subsection (e). After the disposition hearing, and after considering any pertinent policy statements promulgated by the Sentencing Commission pursuant to 28 U.S.C. 994, the court may suspend the findings of juvenile delinquency, enter an order of restitution pursuant to section 3556, place him on probation, or commit him to official detention. With respect to release or detention pending an appeal or a petition for a writ of certiorari after disposition, the court shall proceed pursuant to the provisions of chapter 207.

"(b) The term for which probation may be ordered for a juvenile found to be a juvenile delinquent may not extend—

"(1) in the case of a juvenile who is less than seventeen years old, beyond the lesser of—

"(A) the date when the juvenile becomes twenty-one years old; or

"(B) the maximum term that would be authorized by section 3561(b) if the juvenile had been tried and convicted as an adult; or

"(2) in the case of a juvenile who is between seventeen and twenty-one years old, beyond the lesser of—

"(A) three years; or

"(B) the maximum term that would be authorized by section 3561(b) if the juvenile had been tried and convicted as an adult.

The provisions dealing with probation set forth in sections 3563, 3564, and 3565 are applicable to an order placing a juvenile on probation.

"(c) The term for which official detention may be ordered for a juvenile found to be a juvenile delinquent may not extend—

"(1) in the case of a juvenile who is less than seventeen years old, beyond the lesser of—

"(A) the date when the juvenile becomes twenty-one years old; or

"(B) the maximum term of imprisonment that would be authorized by section 3581(b) if the juvenile had been tried and convicted as an adult; or

"(2) in the case of a juvenile who is between seventeen and twenty-one years old—

"(A) who is convicted as an adult would be convicted of a Class A, B, or C felony, beyond five years; or

"(B) in any other case beyond the lesser of—

"(i) three years; or

"(ii) the maximum term of imprisonment that would be authorized by section 3581(b) if the juvenile had been tried and convicted as an adult.".

(b) Section 5041 is repealed.

(c) Section 5042 is amended by—

(1) striking out "parole or" each place it appears in the caption and text; and

(2) striking out "parolee or".

(d) The sectional analysis is amended by striking out the items relating to sections 5041 and 5042 and inserting in lieu thereof the following:

"5041. Repealed.

"5042. Revocation of probation.".

SEC. 5. The Federal Rules of Criminal Procedure are amended as follows:

(a) Rule 32 is amended—

(1) by deleting subdivision (a)(1) and inserting in lieu thereof the following:

"(1) IMPOSITION OF SENTENCE.—Sentence shall be imposed without unnecessary delay, but the court may, upon a motion that is jointly filed by the defendant and by the attorney for the government and that asserts a factor important to the sentencing determination is not capable of being resolved at that time, postpone the imposition of sentence for a reasonable time until the factor is capable of being resolved. Prior to the sentencing hearing, the court shall provide the counsel for the defendant and the attorney for the government with notice of the probation officer's determination, pursuant to the provisions of subdivision (c)(2)(B), of the sentencing classifications and sentencing guideline range believed to be applicable to the case. At the sentencing hearing, the court shall afford the counsel for the defendant and the attorney for the government an opportunity to comment upon the probation officer's determination and on other matters relating to the appropriate sentence. Before imposing sentence, the court shall also afford counsel for the defendant an opportunity to speak on behalf of the defendant and shall address the defendant personally and ask him if he wishes to make a statement in his own behalf and to present any information in mitigation of the sentence. The attorney for the government shall have an equivalent opportunity to speak to the court. Upon a motion that is jointly filed by the defendant and by the attorney for the government, the court may hear in camera such a statement by the defendant, counsel for the defendant, or the attorney for the government.";

(2) by adding after the words "right to appeal" in the first sentence of subdivision (a)(2) the words "from the conviction, of his right, if any, to obtain review of the sentence,";

(3) by deleting "right of appeal" in the second sentence of subdivision (a)(2) and inserting in lieu thereof "right to appeal or right to obtain review";

(4) by amending the first sentence of subdivision (c)(1) to read as follows:

"A probation officer shall make a presentence investigation and report to the court before the imposition of sentence unless the court finds that there is in the record information sufficient to enable the meaningful exercise of sentencing authority pursuant to 18 U.S.C. 3553, and the court explains this finding on the record.";

"(5) by amending subdivision (c)(2) to read as follows:

"(2) REPORT.—The report of the presentence investigation shall contain—

"(A) information about the history and characteristics of the defendant, including his prior criminal record, if any, his financial condition, and any circumstances affecting his behavior that may be helpful in imposing sentence or in the correctional treatment of the defendant;

"(B) the classification of the offense and of the defendant under the categories established by the Sentencing Commission pursuant to section 994(a) of title 28, that the probation officer believes to be applicable to the defendant's case; the kinds of sentence and the sentencing range suggested for such a category of offense committed by such a category of defendant as set forth in the guidelines issued by the Sentencing Commission pursuant to 28 U.S.C. 994(a)(1); and an explanation by the probation officer of any factors that may indicate that a sentence of a different kind or of a different length than one within the applicable guideline would be more appropriate under all the circumstances;

"(C) any pertinent policy statement issued by the Sentencing Commission pursuant to 28 U.S.C. 994(a)(2);

"(D) information concerning any harm, including financial, social, psychological, and physical harm, done to or loss suffered by any victim of the offense; and

"(E) any other information that may aid the court in sentencing, including the restitution needs of any victim of the offense.".

(6) in subdivision (c)(3)(A), by deleting "exclusive of any recommendations as to sentence" and inserting in lieu thereof ", including the information required by subdivision (c)(2) but not including any final recommendation as to sentence,";

(7) by deleting "or the Youth Correction Division of the Board of Parole pursuant to 18 U.S.C. 4208(b), 4252, 5010(e)" in subdivision (c)(3)(B) and inserting in lieu thereof "pursuant to 18 U.S.C. 3552(b)"; and

(8) by deleting "or imposition of sentence is suspended;" in subdivision (d) and inserting in lieu thereof a comma.

(b) Rule 35 is amended to read as follows:

"Rule 35. Correction of Sentence

"(a) CORRECTION OF A SENTENCE ON REMAND.—The court shall correct a sentence that is determined on appeal under 18 U.S.C. 3742 to have been imposed in violation of law, to have been imposed as a result of an incorrect application of the sentencing guidelines, or to be unreasonable, upon remand of the case to the court—

"(1) for imposition of a sentence in accord with the findings of the court of appeals; or

"(2) for further sentencing proceedings if, after such proceedings, the court determines that the original sentence was incorrect.

"(b) CORRECTION OF SENTENCE FOR CHANGED CIRCUMSTANCES.—The court, on motion of the government, may within one year after the imposition of sentence, lower a sentence to reflect a defendant's subsequent, substantial assistance in the investigation or prosecution of another person who has committed an offense, to the extent that such assistance is a factor in applicable guidelines or policy statements issued by the Sentencing Commission pursuant to 28 U.S.C. 994(a).".

(c) Rule 38 is amended—

(1) by amending the caption to read: "Stay of Execution" and deleting "(a) STAY OF EXECUTION.";

(2) by deleting subdivisions (b) and (c);

(3) by redesignating subdivisions (a)(1) through (a)(4) as subdivisions (a) through (d), respectively;

(4) in subdivision (a), by adding "from the conviction or sentence" after "is taken";

(5) in the first sentence of subdivision (b), by adding "from the conviction or sentence" after "is taken";

(6) by deleting "or a fine and costs" in the first sentence of subdivision (c);

(7) by deleting "and costs" in the second sentence of subdivision (c);

(8) by amending subdivision (d) to read as follows:

"(d) PROBATION.—A sentence of probation may be stayed if an appeal from the conviction or sentence is taken. If the sentence is stayed, the court shall fix the terms of the stay."; and

(9) by adding new subdivisions (e) and (f) as follows:

"(e) CRIMINAL FORFEITURE, NOTICE TO VICTIMS, AND RESTITUTION.—A sanction imposed as part of the sentence pursuant to 18 U.S.C. 3554, 3555, or 3556 may, if an appeal of the conviction or sentence is taken, be stayed by the district court or by the court of appeals upon such terms as the court finds appropriate. The court may issue such orders as may be reasonably necessary to ensure compliance with the sanction upon disposition of the appeal, including the entering of a restraining order or an injunction, or requiring a deposit in whole or in part of the monetary amount involved into the registry of the district court or execution of a performance bond.

"(f) DISABILITIES.—A civil or employment disability arising under a Federal statute by reason of the defendant's conviction or sentence, may, if an appeal is taken, be stayed by the district court or by the court of appeals upon such terms as the court finds appropriate. The court may enter a restraining order or an injunction, or take any other action that may be reasonably necessary to protect the interest represented by the disability pending disposition of the appeal.".

(d) Rule 40 is amended by deleting "3653" in subdivision (d)(1) and inserting in lieu thereof "3605".

(e) Rule 54 is amended—

(1) by amending the definition of "Petty offense" in subdivision (c) to read as follows: " 'Petty offense' means a class B or C misdemeanor or an infraction."; and

(2) by adding a new definition as follows: " 'Grade' includes the issue whether, for the purposes of section 3571 (Sentence of Fine), a misdemeanor resulted in the loss of human life.".

(f) The Table of Rules that precedes Rule 1 is amended as follows:

(1) The item relating to Rule 35 is amended by deleting the words "or Reduction";

(2) The item relating to Rule 38 is amended to read as follows:

"38. Stay of Execution.
"(a) Death.
"(b) Imprisonment.
"(c) Fine.
"(d) Probation.
"(e) Criminal forfeiture, notice to victims, and restitution.
"(f) Disabilities.".

SEC. 6. The Rules of Procedure for the Trial of Misdemeanors Before United States Magistrates are amended as follows:

(a) Rule 1 is amended by deleting "(including petty offenses)".

(b) Rule 9 is amended by deleting "as defined in title 18, U.S.C., § 1(3)".

(c) A new Rule 12 is added at the end thereof to read as follows:

"Rule 12. Definitions

"As used in these rules—

"(1) 'minor offense' means a misdemeanor or an infraction;

"(2) 'petty offense' means a Class B or C misdemeanor or an infraction.".

(d) The Table of Rules that precedes Rule 1 is amended by adding at the end thereof the following new item:

"12. Definitions".

SEC. 7. (a) Title 28 of the United States Code is amended by adding the following new chapter after chapter 57:

"CHAPTER 58—UNITED STATES SENTENCING COMMISSION

"Sec.
"991. United States Sentencing Commission; Establishment and Purpose.
"992. Terms of Office; Compensation.
"993. Powers and Duties of Chairman.
"994. Duties of the Commission.
"995. Powers of the Commission.
"996. Director and Staff.
"997. Annual Report.
"998. Definitions.

"§ 991. United States Sentencing Commission; establishment and purpose

"(a) There is established as an independent commission in the judicial branch of the United States a United States Sentencing Commission which shall consist of seven voting members and one nonvoting member. The President, after consultation with representatives of judges, prosecuting attorneys, defense attorneys, law enforcement officials, senior citizens, victims of crime, and others interested in the criminal justice process, shall appoint the voting members of the Commission, by and with the advice and consent of the Senate, one of whom shall be appointed, by and with the advice and consent of the Senate, as the Chairman. Not more than four of the members of the Commission shall be members of the same political party. The Attorney General, or his designee, shall be an ex officio, nonvoting member of the Commission. The Chairman and members of the Commission shall be subject to removal from the Commission by the President only for neglect of duty or malfeasance in office or for other good cause shown.

"(b) The purposes of the United States Sentencing Commission are to—

"(1) establish sentencing policies and practices for the federal criminal justice system that—

"(A) assure the meeting of the purposes of sentencing as set forth in section 3553(a)(2) of title 18, United States Code;

"(B) provide certainty and fairness in meeting the purposes of sentencing, avoiding unwarranted sentencing disparities among defendants with similar records who have been found guilty of similar criminal conduct while maintaining sufficient flexibility to permit individualized sentences when warranted by mitigating or aggravating factors not taken into account in the establishment of general sentencing practices;

"(C) reflect, to the extent practicable, advancement in knowledge of human behavior as it relates to the criminal justice process; and

"(2) develop means of measuring the degree to which the sentencing, penal, and correctional practices are effective in meeting the purposes of sentencing as set forth in section 3553(a)(2) of title 18, United States Code.

"§ 992. Terms of office; compensation

"(a) The voting members of the United States Sentencing Commission shall be appointed for six-year terms, except that the initial terms of the first members of the Commission shall be staggered so that—

"(1) two members, including the chairman, serve terms of six years;

"(2) three members serve terms of four years; and

"(3) two members serve terms of two years.

"(b) No voting member may serve more than two full terms. A voting member appointed to fill a vacancy that occurs before the expiration of the term for which his predecessor was appointed shall be appointed only for the remainder of such term.

"(c) Each voting member of the Commission shall be compensated during the term of office as a member of the Commission at the rate at which judges of the United States courts of appeals are compensated. A Federal judge may serve as a member of the Commission without resigning his appointment as a Federal judge.

"§ 993. Powers and duties of Chairman

"The Chairman shall—

"(a) call and preside at meetings of the Commission; and

"(b) direct—

"(1) the preparation of requests for appropriations for the Commission; and

"(2) the use of funds made available to the Commission.

"§ 994. Duties of the Commission

"(a) The Commission, by affirmative vote of at least four members of the Commission, and pursuant to its rules and regulations and consistent with all pertinent provisions of this title and title 18, United States Code, shall promulgate and distribute to all courts of the United States and to the United States Probation System—

"(1) guidelines, as described in this section, for use of a sentencing court in determining the sentence to be imposed in a criminal case, including—

"(A) a determination whether to impose a sentence to probation, a fine, or a term of imprisonment;

"(B) a determination as to the appropriate amount of a fine or the appropriate length of a term of probation or a term of imprisonment;

"(C) a determination whether a sentence to a term of imprisonment should include a requirement that the defendant be placed on a term of supervised release after imprisonment, and, if so, the appropriate length of such a term; and

"(D) a determination whether multiple sentences to terms of imprisonment should be ordered to run concurrently or consecutively;

"(2) general policy statements regarding application of the guidelines or any other aspect of sentencing or sentence implementation that in the view of the Commission would further the purposes set forth in section 3553(a)(2) of title 18, United States Code, including the appropriate use of—

"(A) the sanctions set forth in sections 3554, 3555, and 3556 of title 18;

"(B) the conditions of probation and supervised release set forth in sections 3563(b) and 3583(d) of title 18;

"(C) the sentence modification provisions set forth in sections 3563(c), 3573, and 3582(c) of title 18;

"(D) the authority granted under rule 11(e)(2) of the Federal Rules of Criminal Procedure to accept or reject a plea agreement entered into pursuant to rule 11(e)(1); and

"(E) the temporary release provisions set forth in section 3622 of title 18, and the prerelease custody provisions set forth in section 3624(c) of title 18; and

"(3) guidelines or general policy statements regarding appropriate use of the probation revocation provisions set forth in section 3565 of title 18, and the provisions for modification of the term or conditions of probation or supervised release set forth in sections 3563(c), 3564(d), and 3583(e) of title 18.

"(b) The Commission, in the guidelines promulgated pursuant to subsection (a)(1), shall, for each category of offense involving each category of defendant, establish a sentencing range that is consistent with all pertinent provisions of title 18, United States Code. If a sentence specified by the guidelines includes a term of imprisonment, the maximum of the range established for such a term shall not exceed the minimum of that range by more than 25 percent.

"(c) The Commission, in establishing categories of offenses for use in the guidelines and policy statements governing the imposition of sentences of probation, a fine, or imprisonment, governing the imposition of other authorized sanctions, governing the size of a fine or the length of a term of probation, imprisonment, or supervised release, and governing the conditions of probation, supervised release, or imprisonment, shall consider whether the following matters, among others, have any relevance to the nature, extent, place of service, or other incidents of an appropriate sentence, and shall take them into account only to the extent that they do have relevance—

"(1) the grade of the offense;

"(2) the circumstances under which the offense was committed which mitigate or aggravate the seriousness of the offense;

"(3) the nature and degree of the harm caused by the offense, including whether it involved property, irreplaceable property, a person, a number of persons, or a breach of public trust;

"(4) the community view of the gravity of the offense;

"(5) the public concern generated by the offense;

"(6) the deterrent effect a particular sentence may have on the commission of the offense by others; and

"(7) the current incidence of the offense in the community and in the nation as a whole.

"(d) The Commission in establishing categories of defendants for use in the guidelines and policy statements governing the imposition of sentences of probation, a fine, or imprisonment, governing the imposition of other authorized sanctions, governing the size of a fine or the length of a term of probation, imprisonment, or supervised release, and governing the conditions of probation, supervised release, or imprisonment, shall consider whether the following matters, among others, with respect to a defendant, have any relevance to the nature, extent, place of service, or other incidents of an appropriate sentence, and shall take them into account only to the extent that they do have relevance—

"(1) age;

"(2) education;

"(3) vocational skills;

"(4) mental and emotional condition to the extent that such condition mitigates the defendant's culpability or to the extent that such condition is otherwise plainly relevant;

"(5) physical condition, including drug dependence;

"(6) previous employment record;

"(7) family ties and responsibilities;

"(8) community ties;

"(9) role in the offense;

"(10) criminal history; and

"(11) degree of dependence upon criminal activity for a livelihood.

The Commission shall assure that the guidelines and policy statements are entirely neutral as to the race, sex, national origin, creed, and socioeconomic status of offenders.

"(e) The Commission shall assure that the guidelines and policy statements, in recommending a term of imprisonment or length of a term of imprisonment, reflect the general inappropriateness of considering the education, vocational skills, employment record, family ties and responsibilities, and community ties of the defendant.

"(f) The Commission, in promulgating guidelines pursuant to subsection (a)(1), shall promote the purposes set forth in section 991(b)(1), with particular attention to the requirements of subsection 991(b)(1)(B) for providing certainty and fairness in sentencing and reducing unwarranted sentence disparities.

"(g) The Commission, in the course of promulgating guidelines pursuant to subsection (a)(1) to meet the purposes of sentencing as set forth in section 3553(a)(2) of title 18, United States Code, shall review the nature and capacity of the penal, correctional, and other facilities and services available, and shall make recommendations concerning any change or expansion in the nature or capacity of such facilities and services that might become necessary as a result of the guidelines promulgated pursuant to the provisions of this chapter.

"(h) The Commission shall assure that the guidelines will specify a sentence to a term of imprisonment at or near the maximum term authorized by section 3581(b) of title 18, United States Code, for categories of defendants in which the defendant is eighteen years old or older and—

"(1) has been convicted of a felony that is—

"(A) a crime of violence; or

"(B) an offense described in section 841, 952(a), 955, or 959 of title 21, United States Code; and

"(2) has previously been convicted of two or more prior felonies, each of which is—

"(A) a crime of violence; or

"(B) an offense described in section 841, 952(a), 955, or 959 of title 21, United States Code.

"(i) The Commission shall assure that the guidelines will specify a sentence to a substantial term of imprisonment for categories of defendants in which the defendant—

"(1) has a history of two or more prior Federal or State felony convictions for offenses committed on different occasions;

"(2) committed the offense as part of a pattern of criminal conduct from which he derived a substantial portion of his income;

"(3) committed the offense in furtherance of a conspiracy with three or more persons engaging in a pattern of racketeering activity in which the defendant participated in a managerial or supervisory capacity;

"(4) committed a crime of violence that constitutes a felony while on release pending trial, sentence, or appeal from a Federal, State, or local felony for which he was ultimately convicted; or

"(5) committed a felony that is set forth in section 401 or 1010 of the Comprehensive Drug Abuse Prevention and Control Act of 1970 (21 U.S.C. 841 and 960), and that involved trafficking in a substantial quantity of a controlled substance.

"(j) The Commission shall insure that the guidelines reflect the general appropriateness of imposing a sentence other than imprisonment in many cases in which the defendant is a first offender who has not been

convicted of a crime of violence or an otherwise serious offense, and the general appropriateness of imposing a term of imprisonment on a person convicted of a crime of violence that results in serious bodily injury.

"(j) The Commission shall insure that the guidelines reflect the inappropriateness of imposing a sentence to a term of imprisonment for the purpose of rehabilitating the defendant or providing the defendant with needed educational or vocational training, medical care, or other correctional treatment.

"(k) The Commission shall insure that the guidelines promulgated pursuant to subsection (a)(1) reflect—

"(1) the appropriateness of imposing an incremental penalty for each offense in a case in which a defendant is convicted of—

"(A) multiple offenses committed in the same course of conduct that result in the exercise of ancillary jurisdiction over one or more of the offenses; and

"(B) multiple offenses committed at different times, including those cases in which the subsequent offense is a violation of section 3146 (Penalty for failure to appear) or is committed while the person is released pursuant to the provisions of section 3147 (Penalty for an offense committed while on release) of title 18; and

"(2) the general inappropriateness of imposing consecutive terms of imprisonment for an offense of conspiring to commit an offense or soliciting commission of an offense and for an offense that was the sole object of the conspiracy or solicitation.

"(l) The Commission shall insure that the guidelines reflect the fact that, in many cases current sentences do not accurately reflect the seriousness of the offense. This will require that, as a starting point in its development of the initial sets of guidelines for particular categories of cases, the Commission ascertain the average sentences imposed in such categories of cases prior to the creation of the Commission, and in cases involving sentences to terms of imprisonment, the length of such terms actually served. The Commission shall not be bound by such average sentences, and shall independently develop a sentencing range that is consistent with the provisions of this section and with the purposes of sentencing described in section 3553(a)(2) of title 18, United States Code.

"(m) The Commission periodically shall review and revise, in consideration of comments and data coming to its attention, the guidelines promulgated pursuant to the provisions of this section. In fulfilling its duties and in exercising its powers, the Commission shall consult with authorities on, and individual and institutional representatives of, various aspects of the Federal criminal justice system. The United States Probation System, the Bureau of Prisons, the Judicial Conference of the United States, the Criminal Division of the United States Department of Justice, and a representative of the Federal Public Defenders shall submit to the Commission any observations, comments, or questions pertinent to the work of the Commission whenever it believes such communication would be useful, and shall, at least annually, submit to the Commission a written report commenting on the operation of the Commission's guidelines, suggesting changes in the guidelines that appear to be warranted, and otherwise assessing the Commission's work.

"(n) The Commission, at or after the beginning of a regular session of Congress but not later than the first day of May, shall report to the Congress any amendments of the guidelines promulgated pursuant to subsection (a)(1), and a report of the reasons therefor, and the amended guidelines shall take effect one hundred and eighty days after the Commission reports them, except to the extent the effective date is enlarged or the guidelines are disapproved or modified by Act of Congress.

"(o) The Commission and the Bureau of Prisons shall submit to Congress an analysis and recommendations concerning maximum utilization of resources to deal effectively with the Federal prison population. Such report shall be based upon consideration of a variety of alternatives, including—

"(1) modernization of existing facilities;

"(2) inmate classification and periodic review of such classification for use in placing inmates in the least restrictive facility necessary to ensure adequate security; and

"(3) use of existing Federal facilities, such as those currently within military jurisdiction.

"(p) The Commission shall evaluate the impact of the sentencing guidelines on prosecutorial discretion, plea bargaining, disparities in sentencing, and the use of incarceration, and shall, by affirmative vote of a majority of the voting members of the Commission, issue a report of its findings to all appropriate courts, the Department of Justice, and the Congress.

"(q) The Commission, within three years of the date of enactment of the Sentencing Reform Act of 1982, and thereafter whenever it finds it advisable, shall recommend to the Congress that it raise or lower the grades, or otherwise modify the maximum penalties, of those offenses for which such an adjustment appears appropriate.

"(r) The Commission shall give due consideration to any petition filed by a defendant requesting modification of the guidelines utilized in the sentencing of such defendant, on the basis of changed circumstances unrelated to the defendant, including changes in—

"(1) the community view of the gravity of the offense;

"(2) the public concern generated by the offense; and

"(3) the deterrent effect particular sentences may have on the commission of the offense by others.

Within one hundred and eighty days of the filing of such petition the Commission shall provide written notice to the defendant whether or not it has approved the petition. If the petition is disapproved the written notice shall contain the reasons for such disapproval. The Commission shall submit to the Congress at least annually an analysis of such written notices.

"(s) The Commission, in promulgating general policy statements regarding the sentencing modification provisions in section 3582(c)(2) of title 18, shall describe what should be considered extraordinary and compelling reasons for sentence reduction, including the criteria to be applied and a list of specific examples. Rehabilitation of the defendant alone shall not be considered an extraordinary and compelling reason.

"(t) If the Commission reduces the term of imprisonment recommended in the guidelines applicable to a particular offense or category of offenses, it shall specify by what amount the sentences of prisoners serving terms of imprisonment that are outside the applicable guideline ranges for the offense may be reduced in order to carry out the purpose of the reduction.

"(u) The Commission shall ensure that the general policy statements promulgated pursuant to subsection (a)(2) include a policy limiting consecutive terms of imprisonment for an offense involving a violation of a general prohibition and for an offense involving a violation of a specific prohibition encompassed within the general prohibition.

"(v) The appropriate judge or officer shall submit to the Commission in connection with each sentence imposed a written report of the sentence, the offense for which it is imposed, the age, race, and sex of the offender, information regarding factors made relevant by the guidelines, and such other information as the Commission finds appropriate. The Commission shall submit to Congress at least annually an analysis of these reports and any recommendation for legislation that the Commission concludes is warranted by that analysis.

"(w) The provisions of section 553 of title 5, relating to publication in the Federal Register and public hearing procedure, shall apply to the promulgation of guidelines pursuant to this section.

"§ 995. Powers of the Commission

"(a) The Commission, by vote of a majority of the members present and voting, shall have the power to—

"(1) establish general policies and promulgate such rules and regulations for the Commission as are necessary to carry out the purposes of this chapter;

"(2) appoint and fix the salary and duties of the Staff Director of the Sentencing Commission, who shall serve at the discretion of the Commission and who shall be compensated at a rate not to exceed the highest rate now or hereafter prescribed for grade 18 of the General Schedule pay rates (5 U.S.C. 5332);

"(3) deny, revise, or ratify any request for regular, supplemental, or deficiency appropriations prior to any submission of such request to the Office of Management and Budget by the Chairman;

"(4) procure for the Commission temporary and intermittent services to the same extent as is authorized by section 3109(b) of title 5, United States Code;

"(5) utilize, with their consent, the services, equipment, personnel, information, and facilities of other Federal, State, local, and private agencies and instrumentalities with or without reimbursement therefor;

"(6) without regard to section 3648 of the Revised Statutes of the United States (31 U.S.C. 529), enter into and perform such contracts, leases, cooperative agreements, and other transactions as may be necessary in the conduct of the functions of the Commission, with any public agency, or with any person, firm, association, corporation, educational institution, or nonprofit organization;

"(7) accept voluntary and uncompensated services, notwithstanding the provisions of section 3679 of the Revised Statutes of the United States (31 U.S.C. 655(b));

"(8) request such information, data, and reports from any federal agency or judicial officer as the Commission may from time to time require and as may be produced consistent with other law;

"(9) monitor the performance of probation officers with regard to sentencing recommendations, including application of the Sentencing Commission guidelines and policy statements;

"(10) issue instructions to probation officers concerning the application of Commission guidelines and policy statements;

"(11) arrange with the head of any other federal agency for the performance by such agency of any function of the Commission, with or without reimbursement;

"(12) establish a research and development program within the Commission for the purpose of—

"(A) serving as a clearinghouse and information center for the collection, preparation, and dissemination of information on federal sentencing practices;

"(B) assisting and serving in a consulting capacity to federal courts, departments, and agencies in the development, maintenance, and coordination of sound sentencing practices;

"(13) collect systematically the data obtained from studies, research, and the empirical experience of public and private agencies concerning the sentencing process;

"(14) publish data concerning the sentencing process;

"(15) collect systematically and disseminate information concerning sentences actually imposed, and the relationship of such sentences to the factors set forth in section 3553(a) of title 18, United States Code;

"(16) collect systematically and disseminate information regarding effectiveness of sentences imposed;

"(17) devise and conduct, in various geographical locations, seminars and workshops providing continuing studies for persons engaged in the sentencing field;

"(18) devise and conduct periodic training programs of instruction in sentencing techniques for judicial and probation personnel and other persons connected with the sentencing process;

"(19) study the feasibility of developing guidelines for the disposition of juvenile delinquents;

"(20) make recommendations to Congress concerning modification or enactment of statutes relating to sentencing, penal, and correctional matters that the Commission finds to be necessary and advisable to carry out an effective, humane, and rational sentencing policy;

"(21) hold hearings and call witnesses that might assist the Commission in the exercise of its powers or duties; and

"(22) perform such other functions as are required to permit federal courts to meet their responsibilities under section 3553(a) of title 18, United States Code, and to permit others involved in the federal criminal justice system to meet their related responsibilities.

"(b) The Commission shall have such other powers and duties and shall perform such other functions as may be necessary to carry out the purposes of this chapter, and may delegate to any member or designated person such powers as may be appropriate other than the power to establish general policy statements and guidelines pursuant to section 994(a) (1) and (2), the issuance of general policies and promulgation of rules and regulations pursuant to subsection (a)(1) of this section, and the decisions as to the factors to be considered in establishment of categories of offenses and offenders pursuant to section 994(b). The Commission shall coordinate its activities under subsections (a)(9), (a)(10), (a)(11), (a)(12), (a)(13), (a)(14), (a)(15), (a)(16), (a)(17), and (a)(18), to the extent practicable, with any related activities of the Administrative Office of the United States Courts and the Federal Judicial Center for the purpose of avoiding unnecessary duplication.

"(c) Upon the request of the Commission, each federal agency is authorized and directed to make its services, equipment, personnel, facilities, and information available to the greatest practicable extent to the Commission in the execution of its functions.

"(d) A simple majority of the membership then serving shall constitute a quorum for the conduct of business. Other than for the promulgation of guidelines and policy statements pursuant to section 994, the Commission may exercise its powers and fulfill its duties by the vote of a simple majority of the members present.

"(e) Except as otherwise provided by law, the Commission shall maintain and make available for public inspection a record of the final vote of each member of any action taken by it.

"§ 996. Director and staff

"(a) The Staff Director shall supervise the activities of persons employed by the Commission and perform other duties assigned to him by the Commission.

"(b) The Staff Director shall, subject to the approval of the Commission, appoint such officers and employees as are necessary in the execution of the functions of the Commission. The officers and employees of the Commission shall be exempt from the provisions of part III of title 5, United States Code, except the following chapters: 81 (Compensation for Work Injuries), 83 (Retirement), 85 (Unemployment Compensation), 87 (Life Insurance), 89 (Health Insurance), and 91 (Conflicts of Interest).

"§ 997. Annual report

"The Commission shall report annually to the Judicial Conference of the United States, the Congress, and the President of the United States on the activities of the Commission.

"§ 998. Definitions

"As used in this chapter—

"(a) 'Commission' means the United States Sentencing Commission;

"(b) 'Commissioner' means a member of the United States Sentencing Commission;

"(c) 'guidelines' means the guidelines promulgated by the Commission pursuant to section 994(a) of this title; and

"(d) 'rules and regulations' means rules and regulations promulgated by the Commission pursuant to section 995 of this title.".

(b) The chapter analysis of part III of title 28, United States Code, is amended by adding after the item relating to chapter 57 the following new item:

"58. United States Sentencing Commission ..... 991".

REPEALERS

SEC. 8. (a) The following provisions of title 18, United States Code, are repealed:

(1) section 1;

(2) chapter 309;

(3) chapter 311;

(4) chapter 314;

(5) sections 4281, 4283, and 4284; and

(6) chapter 402.

(b) The item relating to section 1 in the sectional analysis of chapter 1 of title 18, United States Code, is amended to read: "1. Repealed.".

(c) The chapter analysis of part III of title 18, United States Code, is amended by amending the items relating to—

(1) chapters 309 and 311 to read as follows:

"309. Repealed.

"311. Repealed.";

and

(2) chapter 314 to read as follows:

"314. Repealed.".

(d) The sectional analysis of chapter 315 of title 18, United States Code, is amended by amending the items relating to—

(1) section 4281 to read:

"4281. Repealed.";

and

(2) sections 4283 and 4284 to read as follows:

"4283. Repealed.

"4284. Repealed.".

(e) The item relating to chapter 402 in the chapter analysis of Part IV of title 18, United States Code, is amended to read as follows:

"402. Repealed.".

SEC. 9. (a) Sections 404(b) and 409 of the Controlled Substances Act (21 U.S.C. 844(b) and 849) are repealed.

(b) Section 404(a) of the Controlled Substances Act (21 U.S.C. 844(a)) is amended by deleting the designation "(a)" at the beginning of the subsection.

TECHNICAL AND CONFORMING AMENDMENTS

SEC. 10. The Immigration and Nationality Act (8 U.S.C. 1101 et seq.) is amended as follows:

(a) The second sentence of section 212(a)(9) (8 U.S.C. 1182(a)(9)) is amended to read: "An alien who would be excludable because of the conviction of an offense for which the sentence actually imposed did not exceed a term of imprisonment in excess of six months, or who would be excludable as one who admits the commission of an offense for which a sentence not to exceed one year's imprisonment might have been imposed on him, may be granted a visa and admitted to the United States if otherwise admissible: *Provided*, That the alien has committed only one such offense, or admits the commission of acts which constitute the essential elements of only one such offense.".

(b) Section 242(h) (8 U.S.C. 1252(h)) is amended by adding "supervised release," after "parole,".

SEC. 11. Section 4 of the Act of September 28, 1962 (16 U.S.C. 460k-3) is amended by deleting "petty offense (18 U.S.C. 1)" and substituting "misdemeanor".

SEC. 12. Section 9 of the Act of October 8, 1964 (16 U.S.C. 460n-8) is amended—

(a) in the first paragraph, by deleting "commissioner" each place it appears and substituting "magistrate"; and

(b) in the second paragraph, by amending the first sentence to read: "The functions of the magistrate shall include the trial and sentencing of persons charged with the commission of misdemeanors and infractions as defined in section 3581 of title 18, United States Code."

SEC. 13. Title 18 of the United States Code is amended as follows:

(a) Section 924(a) is amended by deleting ", and shall become eligible for parole as the Board of Parole shall determine".

(b) Section 1161 is amended by deleting "3618" and inserting in lieu thereof "3669".

(c) Section 1761(a) is amended by adding ", supervised release," after "parole".

(d) Section 1963 is amended—

(1) in subsection (a), by deleting "(1) any interest he has acquired" and all through the end of the subsection and substituting "the property described in section 3554 in accord with the provisions of that section."; and

(2) by repealing subsections (b) and (c).

(e) Section 3006A is amended—

(1) in subsections (a)(1) and (b), by deleting "misdemeanor (other than a petty offense as defined in section 1 of this title)" each place it appears and substituting "Class A misdemeanor"; and

(2) in subsections (a)(3) and (g), deleting "subject to revocation of parole," each place it appears.

(f) Section 3156(b)(2) is amended by deleting "petty offense as described in section 1(3) of this title" and substituting "Class B or C misdemeanor or an infraction".

(g) Section 3172(2) is amended by deleting "petty offense as defined in section 1(3) of this title" and substituting "Class B or C misdemeanor or an infraction".

(h) Section 3401 is amended—

(1) by repealing subsection (g); and

(2) in subsection (h), by deleting "petty offense case" and substituting "Class B or C misdemeanor case, or infraction case,".

(i)(1) Section 3664(a) (formerly section 3580(a)) is amended by deleting "3579" and substituting "3663".

(2) Section 3670 (formerly section 3619) is amended by deleting "3617" and "3618" and substituting "3668" and "3669", respectively.

(j) Section 4004 is amended by deleting "record clerks, and parole officers" and substituting "and record clerks".

(k) Chapter 306 is amended as follows:

(1) Section 4101 is amended—

(A) in subsection (f), by adding ", including a term of supervised release pursuant to section 3583" after "supervision"; and

(B) in subsection (g), by deleting "to a penalty of imprisonment the execution of which is suspended and" and substituting "under which", and by deleting "the suspended" and substituting "a".

(2) Section 4105(c) is amended—

(A) in paragraph (1), by deleting "for good time" the second place it appears and substituting "toward service of sentence for satisfactory behavior";

(B) in paragraphs (1) and (2), by deleting "section 4161" and substituting "section 3624(b)";

(C) in paragraph (1), by deleting "section 4164" and substituting "section 3624(a)";

(D) by repealing paragraph (3); and

(E) by amending paragraph (4) to read as follows:

"(4) Credit toward service of sentence may be withheld as provided in section 3624(b) of this title.".

(3) Section 4106 is amended—

(A) in subsection (a), by deleting "Parole Commission" and substituting "Probation System";

(B) by amending subsection (b) to read as follows:

"(b) An offender transferred to the United States to serve a sentence of imprisonment shall be released pursuant to section 3624(a) of this title after serving the period of time specified in the applicable sentencing guideline promulgated pursuant to 28 U.S.C. 994(a)(1). He shall be released to serve a term of supervised release for any term specified in the applicable guideline. The provisions of section 3742 of this title apply to a sentence under this subsection, and the United States court of appeals for the district in which the offender is imprisoned or under supervision after transfer to the United States has jurisdiction to review the sentence as though it had been imposed by the United States district court."; and

(C) by repealing subsection (c).

(4) Section 4108(a) is amended by adding ", including any term of imprisonment or term of supervised release specified in the applicable sentencing guideline promulgated pursuant to 28 U.S.C. 994(a)(1)," after "consequences thereof".

(l) Section 4321 is amended by deleting "parole or".

(m) Section 4351(b) is amended by deleting "Parole Board" and substituting "Sentencing Commission".

(n) Section 5002 is amended by deleting "Board of Parole, the Chairman of the Youth Division," and substituting "United States Sentencing Commission,".

SEC. 14. The Controlled Substances Act (21 U.S.C. 801 et seq.) is amended as follows:

(a) Section 401 (21 U.S.C. 841) is amended—

(1) in subsection (b)(1)(A), by deleting the last sentence;

(2) in subsection (b)(1)(B), by deleting the last sentence;

(3) in subsection (b)(2), by deleting the last sentence;

(4) in subsection (b)(4), by deleting "subsections (a) and (b) of", and by adding "and section 3607 of title 18, United States Code" after "404";

(5) in subsection (b)(5), by deleting the last sentence; and

(6) by repealing subsection (c).

(b) Section 405 (21 U.S.C. 845) is amended—

(1) in subsection (a), by deleting "(1)" the second place it appears, and by deleting ", and (2) at least twice any special parole term authorized by section 401(b), for a first offense involving the same controlled substance and schedule"; and

(2) in subsection (b), by deleting "(1)" the second place it appears, and by deleting ", and (2) at least three times any special parole term authorized by section 401(b), for a second or subsequent offense involving the same controlled substance and schedule".

(c) Section 408(c) (21 U.S.C. 848(c)) is amended by deleting "and section 4202 of title 18 of the United States Code".

SEC. 15. The Controlled Substances Import and Export Act (21 U.S.C. 951 et seq.) is amended as follows:

(a) Section 1010 (21 U.S.C. 960) is amended—

(1) in subsection (b)(1), by deleting the last sentence;

(2) in subsection (b)(2), by deleting the last sentence; and

(b) Section 1012(a) (21 U.S.C. 962(a)) is amended by deleting the last sentence.

SEC. 16. Section 114(b) of title 23, United States Code, is amended by adding ", supervised release," after "parole".

SEC. 17. Section 5871 of the Internal Revenue Code of 1954 (26 U.S.C. 5871) is amended by deleting ", and shall become eligible for parole as the Board of Parole shall determine".

SEC. 18. Title 28 of the United States Code is amended as follows:

(a) Section 509 is amended—

(1) in paragraph (3), by deleting "; and" and substituting a period; and

(2) by repealing paragraph (4).

(b) Section 591(a) is amended by deleting "petty offense" and substituting "Class B or C misdemeanor or an infraction".

(c) Section 2901 is amended—

(1) in subsection (e), by deleting "section" and substituting "section 3581"; and

(2) in subsection (g)(3), by adding ", supervised release," after "parole", and by adding "supervised release," after "parole,".

SEC. 19. Section 504(a) of the Labor Management Reporting and Disclosure Act of 1959 (29 U.S.C. 504(a)) and section 411(a) of the Employee Retirement Income Security Act of 1974 (29 U.S.C. 1111(a)) are amended—

(a) by deleting "Board of Parole of the United States Department of Justice" and substituting "if the offense is a Federal offense, the sentencing judge or, if the offense is a State or local offense, on motion of the attorney for the government, the district court of the United States for the district in which the offense was committed";

(b) by adding ", pursuant to sentencing guidelines and policy statements issued pursuant to 28 U.S.C. 994(a),";

(c) by deleting "Board" and "Board's" and substituting "court" and "court's", respectively; and

(d) by deleting "an administrative" and substituting "a".

SEC. 20. Section 411(c)(3) of the Employee Retirement Income Security Act of 1974 (29 U.S.C. 1111(c)(3)) is amended by adding "or supervised release" after "parole".

SEC. 21. Section 454(b) of the Comprehensive Employment and Training Act of 1973, as added by section 2 of the Act of October 27, 1978 (29 U.S.C. 927(b)), is amended by deleting "or parole" the first place it appears and substituting ", parole, or supervised release".

SEC. 22. The Public Health Service Act (42 U.S.C. et seq.) is amended as follows:

(a) Section 341(a) (42 U.S.C. 257(a)) is amended by deleting "or convicted of offenses against the United States and sentenced to treatment" and "addicts who are committed to the custody of the Attorney General pursuant to provisions of the Federal Youth Corrections Act (chapter 402 of title 18 of the United States Code),".

(b) Section 343(d) (42 U.S.C. 259(d)) is amended by adding "or supervised release" after "parole".

SEC. 23. Section 11507 of title 49, United States Code, is amended by adding ", supervised release," after "parole".

SEC. 24. Section 10(b)(7) of the Military Selective Service Act (50 U.S.C. App. 460(b)(7)) is amended by deleting "parole" and substituting "release".

EFFECTIVE DATE

SEC. 25. (a)(1) This title shall take effect on the first day of the first calendar month beginning twenty-four months after the date of enactment, except that—

(A) the repeal of chapter 402 of title 18, United States Code, shall take effect on the date of enactment; and

(B)(i) chapter 58 of title 28, United States Code, shall take effect on the date of enactment of this Act or October 1, 1982, whichever occurs later, and the United States Sentencing Commission shall submit the initial sentencing guidelines promulgated pursuant to section 994(a)(1) of title 28 to the Congress within eighteen months of the effective date of the chapter; and

(ii) the sentencing guidelines promulgated pursuant to section 994(a)(1), and the provisions of sections 3581, 3583, and 3624 of title 18, United States Code, shall not go into effect until the day after—

(a) the United States Sentencing Commission has submitted the initial set of sentencing guidelines to the Congress pursuant to subparagraph (B)(i), along with a report stating the reasons for the Commission's recommendations;

(b) the General Accounting Office has undertaken a study of the guidelines, and their potential impact in comparison with the operation of the existing sentencing and parole release system, and has, within three months of the submission of the guidelines,

reported to the Congress the results of its study; and

(c) the Congress has had six months after the date described in subclause (a) in which to examine the guidelines and consider the reports.

(2) For the purposes of section 992(a) of title 28, the terms of the first members of the United States Sentencing Commission shall not begin to run until the sentencing guidelines go into effect pursuant to paragraph (1)(B)(ii).

"(b)(1) The following provisions of law in effect on the day before the effective date of this Act shall remain in effect for five years after the effective date as to an individual convicted of an offense or adjudicated to be a juvenile delinquent before the effective date and as to a term of imprisonment during the period described in subsection (a)(1)(B):

(A) Chapter 311 of title 18, United States Code.

(B) Chapter 309 of title 18, United States Code.

(C) Sections 4254 through 4255 of title 18, United States Code.

(D) Sections 5041 and 5042 of title 18, United States Code.

(E) Sections 5017 through 5020 of title 18, United States Code, as to a sentence imposed before the date of enactment.

(F) The maximum term of imprisonment in effect on the effective date for an offense committed before the effective date.

(G) Any other law relating to a violation of a condition of release or to arrest authority with regard to a person who violates a condition of release.

(2) Notwithstanding the provisions of section 4202 of title 18, United States Code, as in effect on the day before the effective date of this Act, the term of office of a Commissioner who is in office on the effective date is extended to the end of the five-year period after the effective date of this Act.

(3) The United States Parole Commission shall set a release date, for an individual who will be in its jurisdiction the day before the expiration of five years after the effective date of this Act, that is the earliest date that applies to the prisoner under the applicable parole guideline. A release date set pursuant to this paragraph shall be set early enough to permit consideration of an appeal of the release date, in accordance with Parole Commission procedures, before the expiration of five years following the effective date of this Act.

(4) Notwithstanding the other provisions of this subsection, all laws in effect on the day before the effective date of this Act pertaining to an individual who is—

(A) released pursuant to a provision listed in paragraph (1); and

(B)(i) subject to supervision on the day before the expiration of the five-year period following the effective date of this Act; or

(ii) released on a date set pursuant to paragraph (3);

including laws pertaining to terms and conditions of release, revocation of release, provision of counsel, and payment of transportation costs, shall remain in effect as to that individual until the expiration of his sentence, except that the district court shall determine, in accord with the Federal Rules of Criminal Procedure, whether release should be revoked or the conditions of release amended for violation of a condition of release.

(5) Notwithstanding the provisions of section 991 of title 28, United States Code, and sections 4351 and 5002 of title 18, United States Code, the Chairman of the United States Parole Commission or his designee shall be a member of the National Institute of Corrections, and the Chairman of the United States Parole Commission shall be a member of the Advisory Corrections Council and a nonvoting member of the United States Sentencing Commission, ex officio, until the expiration of the five-year period following the effective date of this Act. Notwithstanding the provisions of section 4351 of title 18, during that five-year period the National Institute of Corrections shall have seventeen members, including seven ex officio members.

REVIEW BY CONGRESS

SEC. 26. (a)(1) Four years after the sentencing guidelines promulgated pursuant to section 994(a)(1), and the provisions of sections 3581, 3583, and 3624 of title 18, United States Code, go into effect, the General Accounting Office shall undertake a study of the guidelines in order to determine their impact and compare the guideline system with the operation of the previous sentencing and parole release system, and, within six months of the undertaking of such study, report to the Congress the results of its study.

(2) Within one month of the start of the study required under subsection (a), the United States Sentencing Commission shall submit a report to the General Accounting Office detailing the operation of the sentencing guideline system and discussing any problems with the system or reforms needed.

(b) The Congress shall review the study submitted pursuant to subsection (a) in order to determine—

(1) whether the sentencing guideline system has been effective;

(2) whether any changes should be made in the sentencing guideline system; and

(3) whether the parole system should be reinstated in some form and the life of the Parole Commission extended.

Note.—References to "(a)(2)" signify a sentence pursuant to former 18 U.S.C. § 4208(a)(2); under which the defendant is given an indeterminate sentence and is eligible for parole at any time determined by the Board of Parole. References to "§ 4209" signify a sentence pursuant to former 18 U.S.C. § 4209, under which young adult offenders (under age 26) are given specialized treatment. References to "YCA indet." signify an indeterminate sentence for young offenders under age 22 pursuant to 18 U.S.C. § 5010.

THE SENTENCING REFORM ACT OF 1983—SUMMARY AND ANALYSIS

The bill completely revises current law as to the purposes of sentencing, the process by which the judge determines the appropriate sentence in a particular case, and review of sentence to assure its legality and reasonableness.

A. LEGISLATIVE PRESCRIBED PURPOSES

The bill gives legislative recognition for the first time to the appropriate purposes of sentencing. The stated purposes specifically include assurance of just punishment, deterrence of criminal conduct by others, protection of the public, and rehabilitation. (Proposed 18 U.S.C. 3553(a)(2).)

B. THE SENTENCING PROCESS

Judges are directed to sentence with the above purposes in mind, pursuant to guidelines established by a Sentencing Commission.

1. The Sentencing Commission

The Sentencing Commission is to be an independent agency in the judicial branch consisting of seven voting members appointed by the President with advice and consent of the Senate and one ex-officio, non-voting member, the Attorney General. The Commission is directed to draft guidelines for use by Federal judges, taking into consideration all offender and offense characteristics that appear relevant to the specified purposes of sentencing. For each Federal offense, the guidelines will be expected to specify a variety of appropriate sentencing ranges, depending upon different combinations of offender and offense characteristics. Development of the guidelines is subject to the public hearing process of the Administrative Procedure Act. The initial guidelines, and all subsequent modifications, are to be transmitted by the Commission to the Congress for review and possible modification. Absent Congressional rejection of the guidelines, they will be officially promulgated. (Proposed chapter 58 of Title 28, U.S.C.)

In a few areas (involving, e.g., recidivists, organized crime offenders, first offenders) the bill provides general legislatable guidance to the Commission as to the kind of sentence and degree of severity that would seem to be appropriate for inclusion in the guidelines. These provisions are intended to accord some direction to the Commission without so circumscribing its consideration of occasional countervailing factors as to prove unduly rigid. The provisions are limited to subject areas that otherwise would be considered likely candidates for legislatively directed mandatory sentences to imprisonment, or legislatively directed presumptions in favor of probation.

2. The guidelines

For each Federal offense, the guidelines will specify a variety of appropriate sentencing ranges—encompassing imprisonment, fines, and probation—depending upon the particular history and characteristics of the defendant in the case and the particular circumstances under which the offense is committed. Each offense, therefore, may have a dozen or so sentencing ranges specified, only one of which will fit a given case. (Proposed 28 U.S.C. 994 (a).)

3. Judicial application of the guidelines

After a sentencing hearing, a judge will determine the particular guideline range that is applicable to the offender and the offense. He will then be expected to sentence within the narrow range specified. The judge may, however, sentence above or below the specified guideline range in unusual circumstances, but must give specific reasons for such a sentence.

C. SENTENCING OPTIONS

1. Probation

Probation is cast by the bill as a penalty in itself, rather than as a deferred penalty. A judge is required to impose as a condition of probation in a felony case a condition that the defendant pay a fine or make restitution to the victim or that he engage in community service. The judge is required, for every crime, to impose a prohibition against the defendant's committing another crime during the probationary period. A variety of potentially useful discretionary conditions of probation (including undertaking vocational training or undergoing medical or psychiatric treatment) are set forth in the bill for the consideration of the Sentencing Commission and the judges. (Proposed subchapter B of chapter 227 of Title 18, U.S.C.)

2. Fines

The maximum fine levels under the bill are dramatically increased. The maximums specified for felonies are up to a quarter of a million dollars for an individual defendant, and up to half a million dollars for an organizational defendant, although the actual amount imposed is to be predicated upon the defendant's ability to pay as well as upon the gravity of the offense and related considerations. (Proposed subchapter C of chapter 227 of Title 18 U.S.C.) Lien procedures, like those in the tax laws, are provided to assure an effective means of collecting imposed fines. (Proposed subchapter B of chapter 229 of Title 18 U.S.C.)

3. Imprisonment

The bill makes a major change in sentences to imprisonment. It moves to a determinate system, abolishing early release on parole and providing for the first time that the sentence announced by the sentencing judge will be for almost all cases the sentence actually served by the defendant (except for a potential 10 percent credit for "good time"). Such sentences will not need to involve the artificially lengthy terms that are imposed today in the expectation that they will be shortened later by parole authorities. Although early release on parole is abolished, in a case in which a judge believes that a defendant should be supervised for a period after the expiration of his term of imprisonment, he may order a term of post-release supervision. (Proposed subchapter D of chapter 227 of Title 18 U.S.C.)

Terms of imprisonment ordinarily will not be subject to later adjustment. However, an exception is made in the case of an unusually long term of imprisonment. A defendant serving a term of imprisonment longer than six years will be entitled after six years to petition the sentencing judge for reexamination of the sentence, and the judge will be empowered to reduce the sentence upon a finding of the existence of extraordinary and compelling reasons and a finding of compatibility of such a reduction with Sentencing Commission standards. A defendant sentenced to an unusually long sentence that is above the applicable guideline will be able to obtain a second review, for which the same standards will apply, after he has served the maximum time specified in the applicable guideline. (Proposed 18 U.S.C. 3582 (c).)

4. Collateral sentencing orders

In addition to the penalties traditionally applicable, a court is empowered by the bill to order a convicted defendant found guilty of an offense causing bodily injury, or property damage or loss, to make direct restitution to the victim of the offense, even if a term of imprisonment is also imposed. (Proposed 18 U.S.C. 3556.) This is not possible under current law. A court is further empowered to order a defendant convicted of a fraud (a situation in which an appropriate amount of restitution might be difficult to ascertain in an ordinary sentencing hearing) to give notice of the conviction to the victims of the offense (who may not be known to anyone other than the defendant) in order to facilitate their bringing of whatever private recovery actions might prove to be appropriate. (Proposed 18 U.S.C. 3555.)

D. REVIEW PROCESS

The bill contains an appellate process to review sentence propriety in questionable cases. By incorporating the appeal procedures into the general structure of the guideline sentencing system, the amendments assure that the extremes of sentencing that most deserve review may be called to the attention of an appellate court, without overburdening the court with a flood of challenges to sentences well within the bounds of what would generally be considered reasonable under all of the circumstances. The defendant is permitted to appeal a term of imprisonment, a restrictive condition of probation, or a fine, that falls above the range specified in the applicable guideline, and to appeal a restitution order or a notice order. Recognizing that sentence disparity reaches in two directions, the bill also permits the government, on behalf of the public, to seek review of a sentence that falls below the applicable guideline range in a case in which the Attorney General approves the filing of such an appeal. In both situations, the question on appeal is whether the sentence imposed is, under the circumstance, "clearly unreasonable". (Proposed 18 U.S.C. 3742.)

SENTENCING REFORM LEGISLATION

Mr. BIDEN. Mr. President, I am this morning cosponsoring sentencing reform legislation introduced by the Senator from Massachusetts (Mr. KENNEDY).

Mr. President, the bill we are introducing today is not new. It is the product of many years of work by the Senate Judiciary Committee and the Senate approved the bill by an overwhelming vote of 95 to 1 in the last Congress. The substantial progress we made toward final enactment of a bill in the last Congress makes this one of the most important pieces of criminal law legislation before us in this Congress.

A recent Washington Post editorial, February 28, 1983, stressed the need for the bill. It stated:

One burglar comes before Judge A, who doesn't think crimes against property are serious and who believes that rehabilitation is the goal of sentencing. He puts the offender on probation and orders psychiatric treatment and job training. A second burglar of similar background comes before Judge B, who takes the crime very seriously and believes that judges must penalize wrongdoing, protect the community by incapacitating the miscreant, and set an example for other would-be burglars. Sentence: Eight to 12 years.

Rightly dismayed by such results, certain States, Maryland among them, have begun to adjust criminal sentencing procedures to reduce sentence disparity while leaving judges some discretion. Congress has wrestled with this question as part of an effort to revise the entire Federal criminal code. But the revision has been stalled for so long that legislators have begun to think of salvaging some sections by considering them separately. Members of the House and Senate Judiciary Committees tried to fashion a separate bill on sentencing guidelines in the lame-duck session. Time ran out, but the bipartisan leadership of both committees agreed to consider a bill early in this session.

The purpose is to provide objective guidelines to assist judges in sentencing. In the Maryland experiment, for example, a manual has been prepared that assigns points to offenses based on the seriousness of the crime and gives points to offenders based on such things as prior record and bail or parole status. The judge then cross-indexes these points to find the range of sentences best suited to that offender for that crime.

The bill before Congress would simply authorize a commission to establish guidelines. But many questions remain to be settled: Should the commission consists of judges or a varied group chosen by the President? Should judges be required, or just urged, to follow the guidelines? If discretion is allowed, should a defendant be able to appeal a sentence greater than the maximum in the guidelines? Should prosecutors be able to appeal sentences below the minimum? Should parole be abolished, and if so, should mandatory minimums be low? What should be done if the increased imposition of mandatory minimum sentences overcrowds prisons? Should corrections officials then be authorized to release nonviolent offenders early?

These are hard questions, but compromises on each were considered by Federal legislators last December. The Judiciary Committees have a full plate this session: Bankruptcy courts, immigration reform, and help for the Supreme Court are priority items. Sentencing legislation belongs on that list. If the progress made during the last hours of the 97th Congress is any indication, the job can be done.

At the end of the last Congress we spent many hours in an effort to answer those questions. In fact, we also made substantial progress in most of the major areas in which the members of the House Judiciary Committee saw a need for change in the bill. I believe that had we processed legislation earlier in the Congress, we could have reached final agreements with the Members of the House and sentencing reform legislation would be law today, assuming the President did not veto it as he did the crime bill.

While there may be some debate and need for compromise on certain provisions of the bill, it is clear that sentencing reform legislation is long overdue. We have the information we need to make needed changes in the law. For example:

We know that incarceration for rehabilitation does not work. Jails do not cure so imprisonment until a prisoner has been "cured" is a waste of resources. Instead, the severity of a punishment should be directly related to the seriousness of the crime—a punishment which fits the crime is a fair sentence.

We know that different judges too often impose different sentences for the same crime. As the Post editorial points out, we must provide greater direction to judges to prevent such disparity.

We know that our present parole system, while it fulfills important goals including reducing sentence disparity and relieving prison overcrowding, nevertheless has resulted in actual prison sentences which are too often much shorter than the sentence imposed. Under a fair and rational system the sentence imposed should be fair and correct and served in full.

Finally, we know that prison is a more appropriate and effective punishment for some offenders than for others. Those repeat or career offenders commit a significant portion of all violent crimes. Dr. Marvin Wolfgang documented the existence of this group in a study which began in 1945 and which found that 6 percent of the group studied committed 70 percent of the total number of serious crimes committed by the entire group in that study.

Subsequent studies by the Rand Corp. in California and others in other cities found a hard core of about 10 percent of the criminal population were responsible for up to 50 percent of these type of offenses.

The bill we are introducing today had its origins in legislation introduced over a decade ago. It has been carefully drafted to insure that it addresses these and other changes which we know are urgently needed.

In the last Congress the Democratic Task Force on Crime included sentencing reform legislation in the National Security and Violent Crime Control Act of 1981 (S. 1455) which had the unanimous support of my Democratic colleagues.

The sentencing provisions of that bill were subsequently incorporated into consensus bipartisan legislation which subsequently passed the Senate by an overwhelming vote of 95 to 1.

As a result of the substantial progress we made in negotiating our differences with the House, Chairman RODINO gave us his assurance that he would process sentencing reform legislation early in this Congress.

I urge my colleagues to consider this legislation at the earliest possible date so we can continue to progress from where we were at the end of the last Congress, and see legislation enacted into law in this Congress.

Mr. President, we have made significant progress, and I believe the time is ripe again because we have the full assurance from the chairman of the House Judiciary Committee that he will process this legislation early.

Mr. President, once again, I sincerely hope that my colleagues will look closely at this bill. I can assure you as the ranking minority member of the Judiciary Committee, and on behalf of the Judiciary Committee chairman, Senator THURMOND, that we will process this legislation rapidly. It is nothing new. We have been around the horn for a number of years on this legislation. I hope we can move on it quickly.

Also, I hope that the chairman of the House Judiciary Committee will be able to move as expeditiously as I know he would like to.

Mr. THURMOND. Mr. President, I am pleased to join today with the senior Senator from Massachusetts (Mr. KENNEDY), the ranking minority member of the Committee on the Judiciary (Mr. BIDEN), the distinguished chairman of the Subcommittee on Criminal Laws (Mr. LAXALT), and others on a major legislative initiative to rationalize the Federal criminal justice sentencing system.

Mr. President, this bill is virtually identical to the sentencing provisions of S. 2572—the Violent Crime and Drug Enforcement Improvements Act of 1982—which passed the Senate on September 30, 1982, by a vote of 95 to 1. It was desirable to make a few minor or technical changes, particularly to conform the measure to the recently enacted Victim-Witness Protection Act.

Briefly, Mr. President, this measure seeks to make fundamental changes in the Federal sentencing system to enhance accomplishing the basic purposes of sentencing.

The major features of this bill include for the first time setting forth the purposes of sentencing and changing the sentencing system to a determinative system, with no parole and with limited good time credits. A seven-member sentencing commission would be responsible for promulgating sentencing guidelines, subject to review by the Congress, for courts to use in determining an appropriate sentence. The court must explain on the trial record the basis for passing sentences which are outside of guidelines. The Government may appeal a sentence which is more lenient than the applicable guideline, and the defendant may appeal a sentence more severe than the applicable guideline. So-called safety-net provisions are included to provide, after service of a specified portion of the sentence, an opportunity for review and modification of a

11-059 O-87-35 (Pt. 3)

long sentence in unusual circumstances.

Mr. President, I believe we have an opportunity this Congress—with the cooperation of Congressman RODINO and FISH, chairman and ranking member of the House Committee on the Judiciary, respectively, and the administration—to accomplish the long-sought-after goals of this legislation to improve Federal sentencing. I anticipate that the Senate Judiciary Subcommittee on Criminal Laws, chaired by Senator LAXALT, will plan and execute expeditious hearings on the bill so that we may approach the subject again with the ideas and observations of the experts and other interested groups concerned with the subject of criminal justice and corrections policy. After due deliberation, I sincerely hope we can successfully proceed with this important bill.

By Mr. HATFIELD (for himself, Mr. PACKWOOD, Mr. GORTON, Mr. JACKSON, Mr. BAUCUS, Mr. MELCHER, and Mr. MCCLURE):

S. 669. A bill to authorize the construction of the project for navigation at the Bonneville lock and dam, Oregon and Washington; to the Committee on Environment and Public Works.

NAVIGATION PROJECT AT BONNEVILLE LOCK AND DAM

● Mr. HATFIELD. Mr. President, today, along with Senators PACKWOOD, MELCHER, BAUCUS, GORTON, and JACKSON, I am introducing a bill which would authorize the construction of a replacement lock at Bonneville Dam on the Columbia River. This may be one of the most straightforward pieces of legislation introduced in this session of Congress.

The current lock was built in 1938, and without any substantial rehabilitation for 20 years, it is the prime bottleneck on the entire Columbia River system. Under current conditions, barge traffic must split up into smaller sections to traverse this lock, causing unneeded delays and increased costs. A new lock could save shippers $2.50 per ton, substantially improving their market position in the world market.

The Columbia/Snake River system moves nearly 3.2 billion tons of waterborne cargo each year, including wheat, forest products, sand, gravel, and other bulk commodities that are moved more efficiently and economically on the river than by truck or rail. Any significant increase in this volume is severely hampered by the tieup at Bonneville lock. Oregon and Washington are extremely dependent on international trade, and particularly on dry-bulk commodities such as wheat. Nearly 25 percent of all U.S. exports of grain pass down the Columbia River system. Nearly $1.6 billion worth of cargo passed through the Bonneville lock in 1981. Estimates indicate that for every billion dollars of export, 23,700 jobs are created. Construction of this new lock should vastly improve our ability to move cargo and significantly increase exports.

Construction must begin soon, as the Corps of Engineers' projection is that the lock will be unable to handle any additional traffic above the 13 million tons that should be reached soon after 1988. This project will take some time to complete, so time is of the essence.

Mr. President, a new Bonneville lock has the support of the Northwest delegation and would be a great boon to the entire region. I have worked with my colleagues for a number of years to get this construction project underway. The corps has studied, studied, and restudied the benefits and feasibility of the project. Each time they have supported the construction. The $167,000,000 spent on this project should generate $500,000,000 in private investment in the Pacific Northwest at a time we are desperate for new employment opportunities. If the committee fails to act promptly, I am prepared to use any available avenue to see that the project moves forward. It is my hope that Congress will see fit to authorize this project in the very near future.●

● Mr. PACKWOOD. Mr. President, I am delighted to join with my colleague from Oregon, Senator HATFIELD, in reintroducing a bill we first introduced in 1979: a bill to authorize construction of a new lock at Bonneville Dam on the Columbia River between Oregon and Washington.

The existing lock at Bonneville Dam is inadequate and in need of replacement. It is the lock closest to the mouth of the Columbia River, bears the most traffic, yet is the smallest lock on the entire Columbia/Snake River system. Consequently, the bottleneck created by the inadequate size of the lock greatly hampers the flow of interstate commerce along the Columbia/Snake River system.

Completed in January 1938, the existing lock is 76 feet wide and 500 feet long. The U.S. Corps of Engineers has estimated its maximum commercial shipping capacity to be 13 million tons per year. Each of the upstream locks currents has an estimated capacity of over 30 million tons per year, more than twice the capacity of the Bonneville lock.

In addition to its size limitations, the existing lock at Bonneville has hazardous entrances for both upstream and downstream traffic. Due to the extraordinary difficulty of entering the lock from the east, river pilots have dubbed the entrance "the gut." In April 1982 I had the opportunity to enter "the gut" aboard the river tugboat the *Oregon*. The east end of the north lock wall is scarred from many collisions by barge tows, attesting to the danger of the entrance. While the skill of the tugboat captains is impressive, it is only a matter of time before serious loss of life and/or property occurs on this stretch of the river.

The new lock, while eliminating the extremely hazardous conditions, would decrease the average time to go through the lock time-in-system from 12.7 hours to 1.9 hours. If we share the goal of increasing exports to the Pacific rim nations, we must maintain the viability of the Columbia/Snake River system by making the system of locks as efficient as possible. This river system represents a vital link between the Midwest and the Pacific coast.

Two factors have changed since Senator HATFIELD and I originally introduced the legislation in 1979. The severity of the problem and the cost of the solution have increased. The new lock needs to be built now. Delays in the construction of the new lock will only result in deterioration of the condition of the existing lock and an increase in the replacement cost.●

By Mr. PELL (for himself and Mr. STAFFORD):

S. 670. A bill to establish a New England Regional Power Planning and Distribution Authority, and for other purposes; to the Committee on Energy and Natural Resources.

NEW ENGLAND REGIONAL POWER PLANNING AND DISTRIBUTION ACT OF 1983

● Mr. PELL. Mr. President, I am pleased to introduce legislation today which authorizes the establishment of a power planning and distribution authority for the six-State New England region.

The bill I propose today would establish a power authority for the six-State region with specific responsibilities to develop a long-range energy plan for New England, provide for the maximum development of the region's indigeneous resources, including conservation, and to coordinate the importation of hydropower, natural gas and other energy sources from Canada.

Similar to other Federal power authorities, the New England Power Authority would have the ability to raise capital through the sale of reserve bonds. These funds could then be used for the development of indigeneous resources, conservation activities and the importation of Canadian energy resources.

In addition, the legislation required the General Accounting Office to study all energy development and conservation financing options for the authority and to evaluate recommendations regarding the voluntary transfer of utility rate regulation to regional/multi-States authorities. This legislation with the exception of the review of regional utility regulation and financing options for the authority is similar to the provisions of S. 957, in-

troduced by Senator CHAFEE and me early in the 97th Congress.

The importance of this legislative initiative in the 98th Congress despite the recent reduction of OPEC oil prices has not diminished. Since the oil disruption of 1972-73, the cost and reliability of energy supplies for New England remain two of the most critical problems for the region. Both factors are clearly principal impediments to efforts to encourage sustained economic growth in the New England region.

New England, despite vigorous energy conservation efforts, remains 80 percent dependent on oil as the prime energy source. This compares to a nationwide oil dependence of approximately 50 percent. In addition, 85 percent of the petroleum consumed in the region is imported with a significant percentage of this supply coming from the Persian Gulf states. This significant dependency has unfortunately subjected consumers in the New England region, including Rhode Island, to high energy prices—prices which, on the average, are 25 percent higher than those in the Nation as a whole.

It seems clear that it is in our national interest to help the New England region diversify its energy mix and reduce the use of imported oil. It is also in the regional interest to lower energy costs and make better use of indigenous energy supplies including wind, solar, conservation, low-head hydropower, and reasonably priced energy, particularly hydroelectric power imported from Canada.

The legislation I am introducing today is indeed timely as several associations, including the Northeast Public Power Association, the American Public Power Association, and the National Governors Association, have all expressed their support for the concept of regional power planning. Of considerable interest in this regard is the specific recommendation of the National Governors Association Electric Utility Task Force calling for Federal legislation authorizing voluntary multi-State agreements for regional power planning and regional regulation.

It is clear that considerable attention is now being focused on regional power planning and regulation. Such an authority would be extremely helpful for New England since we are one of the few regions which does not have a regional power planning authority such as the Bonneville Power Authority in the Northwest. Also, it would have minimal budgetary impact and would respond responsibly to the concerns of energy costs and supply reliability. I hope my colleagues will join in the support of this legislation.

I ask unanimous consent that the text of this bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 670

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SHORT TITLE AND TABLE OF CONTENTS

SECTION 1. this Act may be cited as the "New England Regional Power Planning and Distribution Act of 1983".

TABLE OF CONTENTS

Sec. 1. Short title and table of contents.
Sec. 2. Findings and purpose.
Sec. 3. Definitions.
TITLE I—ESTABLISHMENT OF AUTHORITY
Sec. 101. Establishment and composition.
Sec. 102. Location.
Sec. 103. Officers and employees.
Sec. 104. Experts and consultants.
Sec. 105. General powers.
Sec. 106. Annual report.
TITLE II—REGIONAL PLANNING
Sec. 201. Regional energy power plan.
TITLE III—PURCHASE AND SALE OF POWER
Sec. 301. Purchase of power.
Sec. 302. Sale of power.
TITLE IV—FINANCING AUTHORITY
Sec. 401. Funds.
Sec. 402. Bonds.
TITLE V—GENERAL PROVISIONS
Sec. 501. Relationship to State law.
Sec. 502. Accounts and audits.
Sec. 503. Options to bond options.
TITLE VI—REGIONAL POWER PLANNING AND REGULATION STUDY
Sec. 601. Regional power planning and regulation study.

FINDINGS AND PURPOSE

SEC. 2. (a) The Congress finds that—

(1) the New England Region does not have an adequate coordinated and long-range plan for ascertaining and meeting the future energy service requirements of the Region;

(2) the limited existing and potential fuel resources which are indigenous to the Region do not provide the Region with long-term assurance of reasonably priced energy services; and

(3) it is in the national interest, and in the best interest of the New England Region to establish in the Region a regional energy service planning authority to plan for the energy needs of the Region and to insure, to the extent possible, that such needs can be met in an appropriate and cost-effective manner.

(b) It is the purpose of this Act to establish a New England Regional Power Planning Authority to systematically and periodically assess the long-term energy service requirements for the New England Region as a whole, to facilitate the appropriate regionwide use of existing electric power capacity, to provide financial assistance for the development, where necessary, of the additional sources of energy, including low-cost imported electric power, to maximize the efficient use of existing and potential energy resources available to the Region, and to encourage the adoption of energy conservation and efficiency measures and renewable energy programs to the extent such programs and measures are cost effective.

DEFINITIONS

SEC. 3. As used in this Act; the term—

(1) "Regional Authority" or "Authority" means the New England Regional Power Planning Authority.

(2) "Region" or "New England Region" means the area within the boundaries of the States of Maine, New Hampshire, Vermont, Massachusetts, Rhode Island, and Connecticut.

(3) "Fund" means the New England Power Fund established under section 401.

TITLE I—ESTABLISHMENT OF AUTHORITY

ESTABLISHMENT AND COMPOSITION

SEC. 101. (a) There is hereby established within the Department of Energy a New England Regional Planning Authority to be under the supervision of a Board of Directors.

(b) The Board shall be composed of twelve members appointed by the President as follows:

(1) Two members of the Board shall be appointed by the President from among nominations made by the Governor of Maine.

(2) Two members of the Board shall be appointed by the President from among nominations made by the Governor of New Hampshire.

(3) Two members of the Board shall be appointed by the President from among nominations made by the Governor of Vermont.

(4) Two members of the Board shall be appointed by the President from among nominations made by the Governor of Massachusetts.

(5) Two members of the Board shall be appointed by the President from among nominations made by the Governor of Rhode Island.

(6) Two members of the Board shall be appointed by the President from among nominations made by the Governor of Connecticut.

Nominations made by the Governors of each State shall be made in accordance with any procedures and requirements established for such purposes under State law. Any vacancy in the Board shall be filled in the manner in which the original appointment was made.

(c)(1) Except as provided in paragraph (2), members shall be appointed for terms of four years.

(2) Of the members first appointed—

(A) three shall be appointed for a term of one year;

(B) three shall be appointed for a term of two years; and

(C) three shall be appointed for a term of three years.

as designated by the President at the time of appointment. Any member of the Board appointed to fill a vacancy occurring before the expiration of the term for which his predecessor was appointed shall be appointed only for the remainder of such term. A member may serve after the expiration of his term until his successor has taken office.

(d) Members of the Board shall each be paid at a rate equal to the rate of basic pay payable for level IV of the Executive Schedule for each day (including traveltime) during which they are engaged in the actual performance of duties vested in the Board. While away from their homes or regular places of business in the performance of services for the Board, members shall be allowed travel expenses, including per diem in lieu of subsistence, in the same manner as persons employed intermittently in Govern-

ment service are allowed expenses under section 5703 of title 5 of the United States Code.

(e) Seven members of the Board shall constitute a quorum but a lesser number may hold hearings.

(f) The Chairman of the Board shall be elected by the members of the Board and shall serve for a term of two years.

LOCATION

SEC. 102. The principal offices of the authority shall be in the New England Region.

OFFICERS AND EMPLOYEES

SEC. 103. (a) The Board shall have an Executive Director who shall be appointed by the Board and who shall be paid at a rate not to exceed the rate of basic pay payable for level IV of the Executive Schedule. The duties and authorities of the Executive Director shall be prescribed by the Board. The Executive Director shall serve as a voting member of the Board in the case of any vote by the Board, which, but for the vote of the Executive Director, would be a tie vote.

(b) Subject to such rules as may be prescribed by the Board, the Executive Director may appoint and fix the pay of such personnel as he considers appropriate.

(c) Upon request of the Board, the head of any Federal agency is authorized to detail, on a reimbursable basis, any of the personnel of such agency to the Board to assist the Board in carrying out its duties under this Act.

EXPERTS AND CONSULTANTS

SEC. 104. Subject to such rules as may be prescribed by the Board, the Executive Director may procure temporary and intermittent services under section 3109(b) of title 5 of the United States Code.

GENERAL POWERS

SEC. 105. (a) The Executive Director is authorized to enter into and perform such contracts, leases, cooperative agreements, or other similar transactions with public agencies and private organizations and persons, and to make such payments as he may deem necessary or appropriate to carry out functions now or hereafter vested in him.

(b) The Executive Director may, on behalf of the Board, accept, use, and dispose of gifts or donations or services or property.

(c) The Regional Authority may use the United States mails in the same manner and under the same conditions as other departments and agencies of the United States.

(d) The Administrator of General Services shall provide to the Regional Authority on a reimbursable basis such administrative support services as the Executive Director may request.

ANNUAL REPORT

SEC. 106. The Regional Authority shall file an annual report with the Congress respecting its operations.

TITLE II—REGIONAL PLANNING

REGIONAL ENERGY SERVICE PLAN

SEC. 201. (a) As promptly as practicable after the date of enactment of this Act, and after undertaking the necessary studies and investigations, the Regional Authority shall prepare, adopt, and publish a regional energy service plan for the New England Region. The plan shall be reviewed by the Regional Authority not less frequently than every five years and amended by the Authority from time to time as may be appropriate.

(b) Prior to the adoption of the plan or any amendment thereto, the Regional Authority shall hold a public hearing in each State within the Region which the Authority determines may be affected by the proposed action of the Authority. Such hearings shall be subject to such procedures as the Regional Authority deems necessary to insure full and complete public participation and participation by State and local authorities.

(c) The plan shall include—

(1) an energy power demand forecast for the Region;

(2) a forecast of the additional power resources, if any, estimated to be necessary to meet the projected demand;

(3) a system for determining priorities among the various alternative resources which may be available to meet energy power demand within the Region;

(4) an analysis of reserve and reliability requirements affecting electric power use and availability in the Region;

(5) guidelines respecting the rates to be applicable to the sale of power by the Authority under title III of this Act; and

(6) such other elements as the Regional Authority deems appropriate.

The plan shall emphasize conservation, recycling of municipal waste, and the development of renewable resources where cost effective and environmentally sound. The plan shall be consistent with applicable Federal energy policies, including the policies set forth in the National Energy Conservation Policy Act, the Public Utility Regulatory Policies Act of 1978, and other Federal legislation respecting the use, conservation, and development of domestic energy resources.

(d) Following adoption of the plan, action of the Authority under title III shall be consistent with the plan and any amendment thereto.

TITLE III—PURCHASE AND SALE OF GAS OR ELECTRIC POWER

PURCHASE OF GAS AND ELECTRIC POWER

SEC. 301. (a) The Executive Director of the Regional Authority is authorized to purchase from any person or authority, for purposes of resale under this Act, gas or electric power generated from imported hydroelectric facilities located in Canada or from utilities or power authorities located in other parts of the nation. Such purchases shall be consistent with this Act, with the plan adopted under title II, and with the provisions of an applicable treaty between the United States and Canada. All purchases made by the New England Power Authority shall be subject to an expedited process of approval by the Secretary of Energy under the Presidential Permit Process.

(b) For purposes of assisting in the construction of new hydroelectric capacity in Canada which will be available to the Regional Authority for purposes of resale under this title, the Regional Authority for purposes of resale under this title, the Regional Authority is authorized to enter into long-term contracts for the purchase of power from such new capacity and to commit, and make available in advance, funds to private and public persons, including foreign governmental and nongovernmental entities.

(c) No contract or other arrangement may be entered into by the Regional Authority respecting the acquisition of any power until such time as the regional plan has been adopted pursuant to title II and a treaty has been adopted by both the United States and Canada respecting the purchase by the Authority of gas or electric energy generated in Canada.

(d) International energy purchases in place as of the date of enactment of this Act shall be reviewed by the Regional Authority as part of the regional energy development plan and a treaty adopted between the United States and Canada protecting existing contracts.

SALE OF ELECTRIC POWER

SEC. 302. (a) The Authority is authorized to offer to sell, and to sell, power acquired as provided in section 301 to electric utilities for resale for use within the Region. Such sales may be made only to persons engaged in the business of selling electric power.

(b) No power may be sold by the Regional Authority under this Act to any person unless the Regional Authority determines that such sale is consistent with the plan adopted under title II and that the purposes, sales, and other operations of such person are consistent with such plan.

(c)(1) The Regional Authority shall establish, and periodically review and revise, rates for the sale of power under this Act. Such rates shall be consistent with the guidelines established in the plan prepared under title II.

(2) Rates established under this section shall become effective only upon confirmation and approval by the Federal Energy Regulatory Commission upon a finding by the Commission that such rates are adequate to cover the Authority's total system costs and amortize any obligations incurred under section 301 and produce such additional revenues as may be required to pay when due the principal of, premiums, discounts, and expenses in connection with the issuance of and interest of all bonds issued and outstanding pursuant to this Act, and amounts required to establish and maintain reserve and other funds and accounts established in connection therewith.

(d) In establishing rates under this section, the Regional Authority shall—

(1) provide public notice in an appropriate manner of the proposed rates and the date schedule for the hearing referred to in paragraph (2); and

(2) conduct a public hearing respecting the proposed rates at which interested parties are afforded an opportunity to submit oral and written data, views, and arguments and a reasonable opportunity for cross-examination and for refutation or rebuttal of material submitted by other persons.

The decision of the Authority respecting any rates established under this section shall be based upon the record of such hearing and shall include a full and complete statement of the basis and reasons for such decision.

TITLE IV—FINANCING AUTHORITY

FUND

SEC. 401. (a) There is hereby established in the Treasury of the United States a New England Power Fund. The Fund shall consist of—

BONDS

(1) all receipts, collections, and recoveries of the Authority from all sources, and

(2) all proceeds derived from the sale of bonds by the Authority.

(b) Amounts credited to the Fund shall be available, as provided in appropriations Act, for any purpose necessary or appropriate to carry out any duty or authority of the Authority, including—

(1) the development of a New England Regional Energy Power Plan in accordance with title II of this Act;

(2) the purchase and marketing of power including the advance payment of amounts pursuant to contracts entered into under section 301 providing for the construction of hydroelectric facilities in Canada, all or a part of the electric energy from which will be available to the Authority; and

(3) paying the interest, premiums, discounts, and expenses associated with the issuance of bonds under this title and paying the principal amount of such bonds when due.

(c)(1) If the Regional Authority determines that moneys in the Fund are in excess of current needs, it may request the investment of such amounts as it deems advisable by the Secretary of the Treasury in direct, general obligations of, or obligations guaranteed as to both principal and interest by, the United States of America.

(2) With the approval of the Secretary of the Treasury, the Regional Authority may deposit moneys of the Fund in any Federal Reserve bank or other depository for funds of the United States of America, or in such other banks and financial institutions and under such terms and conditions as the Regional Authority and the Secretary of the Treasury may mutually agree.

SEC. 402. (a) The Regional Authority is authorized to issue and sell to the public from time to time in the name of and for and on behalf of the Authority, bonds, notes, and other evidences of indebtedness (referred to in this Act as "bonds") to assist in carrying out the duties and responsibilities of the Authority. Such bonds shall be in such forms and denominations, bear such maturities, and be subject to such terms and conditions as may be prescribed by the Secretary of the Treasury taking into account terms and conditions prevailing in the market for similar bonds, the term of the contract for the financing of which the bonds are issued, and the financing practices of the utility industry. Refunding provisions may be prescribed by the Regional Authority. Such bonds shall bear interest at a rate determined by the Secretary of the Treasury taking into consideration the current average market yield on outstanding marketable obligations of the United States of comparable maturities, plus an amount in the judgment of the Secretary of the Treasury to provide for a rate comparable to the rates prevailing in the market for similar bonds.

(b) The Secretary of the Treasury shall purchase forthwith any bonds issued by the Regional Authority under this Act and for that purpose is authorized to use as a public debt transaction the proceeds from the sale of any securities issued under the Second Liberty Bond Act, as now or hereafter in force, and the purposes for which securities may be issued under the Second Liberty Bond Act, as now or hereafter in force, are extended to include any purchases of the bonds issued by the Regional Authority under this Act. The Secretary of the Treasury may, at any time, sell any of the bonds acquired by him under this Act. All redemptions, purchases, and sales by the Secretary of the Treasury of such bonds shall be treated as public debt transactions of the United States.

(c)(1) The principal of, premiums (if any), and interest on bonds issued by the Authority shall be payable solely from the net proceeds of the Authority.

(2) No bond, and no contract, obligation, or other action of the Regional Authority shall be construed as an obligation secured by the full faith and credit of the United States.

TITLE V—GENERAL PROVISIONS

RELATIONSHIP TO STATE LAW

SEC. 501. Nothing in this Act shall preempt the authority of any State or local authority to establish or enforce any rate for the sale of electric power (other than a rate established by the Regional Authority under title III and approved by the Federal Energy Regulatory Commission) or to exercise any other authority under State or local law respecting the construction or operation of any facility for the generation or transmission of electric energy, respecting the purchase or sale of electric energy, or respecting the financial or organizational aspects of electric utilities and other persons engaged in the generation, transmission, or distribution of electric power.

ACCOUNTS AND AUDITS

SEC. 502. The Executive Director of the Regional Authority shall, subject to the requirements of the Federal Power Act, keep complete and accurate accounts of all operations of the Authority, including all funds expended and received in connection with the purchase and sale of electric power under this Act.

OPTIONS TO BOND OPTIONS

SEC. 503. The General Accounting Office shall review and recommend alternative financing options for the New England Power Authority in addition to the bond options provided in this Act. In making its recommendations, the General Accounting Office shall focus on financing options that will ensure the New England Power Authority success in its efforts to raise funds for power exchanges and encourage indigenious renewable energy development and conservation.

TITLE VI—REGIONAL POWER PLANNING AND REGULATORY STUDY

REGIONAL POWER PLANNING AND REGULATION STUDY

SEC. 601. (a) The General Accounting Office is authorized and directed to conduct a study of the economic impact of Federal legislation—

(1) allowing States to enter voluntarily into multi-State agreements not subject to congressional approval for regional power planning and regional regulation and granting such States authority for the development of—

(A) electricity demand and supply forecasts;

(B) reliability and reserve requirements;

(C) increased power pooling and interconnections; and

(D) electricity import and export agreements; and

(2) increasing regional electric regulatory authority and reducing the current authority of the Federal Energy Regulatory Commission by—

(A) shifting FERC jurisdiction over intrastate wholesale transactions to individual States or to regional regulatory bodies, at the option of the State or States involved; and

(B) shifting FERC jurisdiction over interstate wholesale transactions to regional regulatory bodies where they exist and desire such authority.●

By Mr. McCLURE (for himself and Mr. DECONCINI):

S. 671. A bill to authorize a national program to encourage dam safety; to the Committee on Environment and Public Works.

DAM SAFETY ACT OF 1983

● Mr. McCLURE. Mr. President, I am today introducing legislation that was passed by the Senate during the 95th Congress, was considered favorably in the Committee on Environment and Public Works during the 96th Congress, but has yet to become law. This failure stems from the inability of Congress to enact comprehensive water resources legislation since 1976.

This bill authorizes an ongoing program to assist the States in developing and implementing dam safety programs. The language is nearly identical to what the Senate has passed previously. Essentially, this bill creates an opportunity for the Federal Government to assist the States in developing effective, continuing dam safety programs. In return, the States must meet certain basic criteria, such as preconstruction safety reviews and inspections every 2 years.

I recognize that modest changes in the bill could prove helpful. For example, this bill adds new sections 9 and 10 to the basic dam safety law. These sections may no longer be as necessary as they were at the time of the original passage of this bill. Yet a discussion of this insurance and Federal assistance in upgrading the safety of dams must be a vital component in any discussion of this issue. And I remain convinced that the basic components of the bill are sound, necessary, and essential.

The Federal Government, through the Army Corps of Engineers has recently inspected 9,000 dams for safety. The corps estimates that 33 percent of these dams are unsafe in varying degrees. Much of this corps activity was subcontracted to the States, which carried out the work. But the authority for this program expired at the end of fiscal year 1982. A need exists to continue such a program. This bill achieves that goal, transferring the basic responsibility to the States.

It is appropriate to transfer this responsibility to the States. But it also is appropriate to provide Federal assistance to the States in carrying out this important work.

Mr. President, I believe this bill offers a responsible approach to a difficult challenge. I ask unanimous consent that a copy of the bill be printed at this point in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 671

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That Public Law 92-367 (86 Stat. 506) is amended as follows:

(a) SIZE OF DAMS.—Section 1 is amended by deleting the final sentence.

(b) RIGHT OF ENTRY.—Section 2 is amended (a) by inserting "(a)" immediately after the words "the Chief of Engineers shall

carry out a national program of inspection of dams for the purpose of protecting human life and property.", and by striking the "and" after "inspection" and striking the period after "property" and inserting the following: "and (5) dams located within a State having an approved program under section 8 of this Act." and (b) by adding at the end thereof the following new subsection:

"(b) In order to carry out the purposes of this Act, the Secretary, or his authorized, representative, upon presenting appropriate credentials to the owner, operator, or agent in charge is authorized—

"(1) to enter without delay and at reasonable times any damsite, structure, appurtenance, or any work area, or other area used in connection with operation of the dam; and

"(2) to inspect and investigate during regular working hours and at other reasonable times, and within reasonable limits and in a reasonable manner, any such damsite and all pertinent conditions, structures, machinery, apparatus, devices, equipment, and materials therein or thereon; and to require any owner, operator, agent or employee, or designer, contractor or builder, to provide information regarding the design, construction, operation, and maintenance of the same; and to have access to any records, blueprints, plans or other pertinent documents pertaining to the design, construction, operation, and maintenance of the same.

"(c) Except as to cases the court considers of greater importance, any judicial proceedings involving this Act before a district court of the United States, and appeals therefrom, take precedence on the docket over all cases and shall be assigned for hearing and trial or for argument at the earliest practicable date and expedited in every way.".

(c) CONTRACTOR LIABILITY.—Section 6 is amended by inserting a new paragraph (2) as follows, and by renumbering paragraph (2) as paragraph (3):

"(2) to create any liability for agents or contractors for damages caused by such action or failure to act in excess of the amount of the contract entered into pursuant to the Act;".

(d) STATE ASSISTANCE PROGRAM.—Following section 6, add the following new sections:

"SEC. 7. There is authorized to be appropriated to the Secretary of the Army, acting through the Chief of Engineers (hereafter in this Act referred to as the 'Secretary'), $15,000,000 for each of the fiscal years ending September 30, 1984, September 30, 1985, September 30, 1986, and September 30, 1987. Sums appropriated under this section shall be distributed annually among those States on the following basis: One-third equally among those States that have established dam safety programs approved under the terms of section 8 of this Act, and two-thirds in proportion to the number of dams located in each State that has an established dam safety program under the terms of section 8 of this Act to the number of dams in all States with such approved programs. In no event shall funds distributed to any State under this section exceed 50 per centum of the reasonable cost of implementing an approved dam safety program in such State.

"SEC. 8. (a) In order to encourage the establishment and maintenance of effective programs intended to assure dam safety to protect human life and property, the Secretary shall provide assistance under the terms of section 7 of this Act to any State that establishes and maintains a dam safety program which is approved under this section. In evaluating a State's dam safety program, under the terms of subsections (b) and (c) of this section, the Secretary shall determine that such program includes the following:

"(1) a procedure, whereby, prior to any construction, the plans for any dam will be reviewed to provide reasonable assurance of the safety and integrity of such dam over its intended life;

"(2) a procedure to determine, during and following construction and prior to operation of each dam built in the State, that such dam has been conducted and will be operated in a safe and reasonable manner;

"(3) a procedure to inspect every dam within such State at least once every two years;

"(4) a procedure for more detailed and frequent safety inspections, if warranted;

"(5) the State has or can be expected to have authority to require those changes or modifications in a dam, or its operation, necessary to assure the dam's safety;

"(6) the State has or can be expected to develop a system of emergency procedures that would be utilized in the event a dam fails or for which failure is imminent together with an identification for those dams where failure could be reasonably expected to endanger human life, of the maximum area that could be inundated in the event of the failure of such dam, as well as identification of those necessary public facilities that would be affected by such inundation;

"(7) the State has or can be expected to have the authority to assure that any repairs or other changes needed to maintain the integrity of any dam will be undertaken by the dam's owner, or other responsible party; and

"(8) the State has or can be expected to have authority and necessary funds to make immediate repairs or other changes to, or removal of, a dam in order to protect human life and property, and if the owner does not take action, to take appropriate action as expeditiously as possible.

"(b) Any program which is submitted to the Secretary under the authority of this section shall be deemed approved one hundred and twenty days following its receipt by the Secretary unless the Secretary determines that such program fails to reasonably meet the requirements of subsection (a) of this section. If the Secretary determines such a program cannot be approved, he shall immediately notify such State in writing, together with his reasons and those changes needed to enable such plan to be approved.

"(c) Utilizing the expertise of the Board established under section 11 of this Act, the Secretary shall review periodically the implementation and effectiveness of approved State dam safety programs. In the event the Board finds that a State program under this Act has proven inadequate to reasonably protect human life and property, and the Secretary agrees, the Secretary shall revoke approval of such State program and withhold assistance under the terms of section 7 of this Act until State program has been reapproved.

"SEC. 9. (a) In order to assure that owners of dams will be able to obtain liability insurance at reasonable rates, and to protect persons located downriver of dams, the Secretary, or the head of any agency of the United States designated by the Secretary, shall provide to any insurer, subject to conditions established by regulation, reinsurance or gurantees of any insurance provided to the owner of a dam to protect such owner from liabilities incurred in the event of the failure of such dam. Reinsurance or guarantess provided under this section shall reimburse an insurer for those liabilities in excess of an amount agreed upon between the Secretary, or his designee, and the insurer.

"(b) Any reinsurance or gurantees provided under this section shall be available only in a State which has an approved dam safety program under the terms of section 8 of this Act.

"(c) Agreements on reinsurance or guarantees under this section shall provide that the failure of the owner of any dam to carry out expeditiously any modification or procedure required by a State under the terms of its dam safety program shall result in the cancellation of any reinsurance or guarantee provided by the Secretary, or his designee.

"(d) There is authorized to be appropriated such sums as may be necessary to carry out this section.

"(e) Not later than eighteen months after enactment of the Dam Safety Act of 1983, the Secretary and the Secretary of the Treasury shall report jointly to the Congress with an analysis of the effects of this section, together with any recommendations for a more comprehensive dam safety insurance program to assure the availability of insurance to owners of dams inspected under a State program approval under section 8 of this Act, in an effort to lessen or eliminate the need for any disaster assistance in the event of the failure of such a dam.

"SEC. 10. There is authorized to be appropriated and remain available the sum of $20,000,000 to be placed in a revolving fund by the Secretary, such funds to be available for loans, on terms established by the Secretary, to any owner for any dam required to make repairs, to replace, or to make other safety improvements in such dam under any safety program approved under section 8 of this Act, if such owner can demonstrate to the Secretary that other funds are not reasonably available, and such owner agrees to repay such funds at a rate of interest on terms agreed to with the Secretary.

"SEC. 11. (a) There is authorized to be established a Federal Dam Safety Review Board (hereinafter referred to as the 'Board'), which shall be responsible for reviewing the procedures and standards utilized in the design and safety analysis of dams constructed and operated under authority of the United States, and to monitor State implementation of this Act. The Board is authorized to hire necessary staff and shall review as expeditiously as possible the plans and specifications on all dams specifically authorized by Congress prior to initiation of construction of such dam, and file an advisory report on the safety of such dam with the appropriate agency, the appropriate State, and the Congress. The Board is authorized to utilize the expertise of other agencies of the United States and to enter into contracts for necessary studies to carry out the requirements for this section. There is authorized to be appropriated to the Board such sums as may be necessary to carry out this section.

"(b) The Board shall consist of nine members selected for their expertise in dam safety, including one representative each from the Department of the Army, the Department of the Interior, the Tennessee

Valley Authority, and the Department of Agriculture, plus five members, appointed by the President for periods of five years, on a rotating basis, who are not employees of the United States. At least two members of the Board shall be employees of the States having an approved program under section 8 of this Act. The Chairman of the Board shall be selected from among those members who are not employees of the United States.

"SEC. 12. The head of any agency of the United States that owns or operates a dam, or proposes to construct a dam in any State, shall, when requested by such State, consult fully with such State on the design and safety of such dam and allow officials of such State to participate with officials of such agency in all safety inspections of such dam.

"SEC. 13. The Secretary shall, at the request of any State that has or intends to develop a dam safety program under section 8 of this Act, provide training for State dam safety inspectors. There is authorized to be appropriated to carry out this section $1,000,000 for the fiscal year ending September 30, 1984, and $500,000 during each of fiscal years ending September 30, 1985, September 30, 1986, and September 30, 1987.

"SEC. 14. The Secretary, in cooperation with the National Bureau of Standards, shall undertake a program of research in order to develop improved techniques and equipment for rapid and effective dam inspection, together with devices for the continued monitoring of dams for safety purposes. The Secretary shall provide for State participation in such research and periodically advise all States of the results of such research. There is authorized to be appropriated to carry out this section $1,000,000 for each of the fiscal years ending September 30, 1984, September 30, 1985, September 30, 1986, and September 30, 1987.

"SEC. 15. The Secretary is authorized to maintain and periodically publish updated information on the inventory of dams authorized in section 5 of this Act.".

REPORTING OF DAM SAFETY

SEC. 2. Any report that is submitted to the Committee on Environment and Public Works of the Senate or the Committee on Public Works and Transportation of the House of Representatives by the Secretary of the Army, acting through the Chief of Engineers, or the Secretary of Agriculture, acting under Public Law 83-566, as amended, which proposes construction of a water impoundment facility, shall include information on the possibility of failure of such facility due to geologic or design factors, the potential impact of the failure of such facility, and information on the design features that would prevent, lessen, or mitigate such possibility of failure or the impact of failure.

SHORT TITLE

SEC. 3. This Act shall be known as the "Dam Safety Act of 1983".●

By Mr. McCLURE (for himself, Mr. GOLDWATER, and Mr. WALLOP):

S. 672. A bill to amend the Reclamation Safety of Dams Act of 1978 to authorize additional appropriations, and for other purposes; to the Committee on Energy and Natural Resources.

SAFETY OF DAMS PROGRAM

● Mr. McCLURE. Mr. President, the legislation I am introducing today for myself, Mr. GOLDWATER, and Mr. WALLOP, authorizes additional funding for the Bureau of Reclamation safety of dams program and is identical to the last Congress S. 956, as reported on August 19, 1982, by the Committee on Energy and Natural Resources.

My colleagues will recall that a companion measure, H.R. 3208, passed the House on April 29, 1982. Unfortunately, the Senate did not consider either measure prior to adjournment of the 97th Congress.

I believe that it would be helpful to my colleagues and the public to include in the RECORD at this point an excerpt from the committee report (S. Rept. 97-533) that accompanied S. 956 when it was reported by the committee. This should help place the legislation in perspective in relation to the current safety of dams program at the Bureau of Reclamation and will furnish additional information to the Senate.

BACKGROUND AND NEED

The Act of November 2, 1978 (Public Law 95-578) authorized the appropriation of $100 million to the Secretary of the Interior for purposes of a safety of dams program for the Bureau of Reclamation and established the parameters under which the Secretary was authorized to construct, operate, and maintain new or modified features at existing Federal reclamation dams for safety of dams purposes. Recent events of the time (the Rapid City, South Dakota flood and the failure of the Bureau's Teton Dam in Idaho) had focused concern upon the hazards presented by floods and the failure of dams or related structures.

Traditionally, the Bureau of Reclamation had maintained a formal program of inspection under its Examination of Existing Structures Program of the facilities related to the 333 reservoir impoundments under the Bureau's jurisdiction. Major modifications of dams for safety purposes had been authorized by Congress on a case-by-case basis; each project considered in a separate authorizing bill. The 1978 Safety of Dams Act provided the Secretary with permanent authority to undertake safety of dams modifications rather than having to come to the Congress for each project. However, the Act was specific that the funds were to be used only for safety purposes and not for providing additional water storage capacity or the development of benefits above those provided by the original structures. Costs of the program which resulted from age and normal deterioration of structures or from nonperformance of reasonable and normal maintenance were to be treated as project costs and reimbursable by project participants in accordance with existing law.

Since initiation of the program, estimated costs of dam safety activities have increased as a result of inflation and also the discovery of additional safety problems which need to be addressed. During the hearings on S. 956, the Administration testified that in addition to the thirteen dams identified at the outset of the program in 1978, an additional thirty-five dams have been identified as needing safety related work. The current authorization of $100 million is inadequate to fund the additional work which is estimated to cost in excess of $500 million. An increase in the authorization for the program of an additional $550 million will permit dam safety activities at the newly identified projects as well as allow for the increase in costs due to inflation.

Mr. President, the major thrust of this measure is to increase the amount authorized to be appropriated for implementing the Reclamation Safety of Dams Act of 1978. This act has proven to be a most workable and viable means of correcting unsafe conditions at many of the older structures built by the Department of the Interior's Bureau of Reclamation. The program is directed to those structures at which the Secretary has determined—and subsequently reported to the Congress—first, that an unsafe condition exists, and second, that this condition could not have been foreseen at the time the dam was designed. Generally, these conditions derive from two causes, the first of which is hydrologic and the second seismic in nature.

The problem most frequently occurring is one that arises from inadequate spillway capacity. This in turn stems from an underestimation on the part of the designers of the magnitude of flood runoff which might be expected. Longer study of, and greater experience with, flood flow forecasting now show that many of the older spillways are incapable of handling flood crests. Without adequate spillway capacity, the entire structure is threatened with catastrophic failure, resulting not only in potential loss of life and property downstream, but in the loss of a very valuable piece of Federal property—the dam itself. The effect of this legislation, Mr. President, would be to authorize flood protection for Federal property, and to avoid the failure of a Federal dam with its ensuing liability for damages.

In like manner, advances in the study of seismic factors sometimes disclose that a particular structure is in danger from earthquakes. Where these conditions are found to exist, the Federal Reclamation Safety of Dams Act provides that the Secretary of the Interior may proceed with dispatch to propose corrective measures at Federal expense. The original sum authorized to be appropriated for this program has been substantially exhausted, yet there remains a sizable backlog of repair work to be undertaken.

Mr. President, the philosophical basis underlying the existing law is that the United States, having designed and constructed a dam which it now finds poses a major threat to the lives and property of its citizens, shall proceed with the utmost expediency to eliminate the dangers which threaten its citizens and property, and that the United States shall accomplish these corrective works at public expense.

Responsibility for the safe condition of its property goes hand-in-hand with ownership of that property. Any at-

tempt to avoid that responsibility and change the law is an affront to fair play, commonsense, and the basic precepts of English common law, which provide that property owners must assume responsibility for the operation and conduct of their property.

Mr. President, the 1978 Safety of Dams Act was premised on the acknowledgement of the culpability of the Federal Government for inadequacies of design and any resulting damages due to failure of the structure. The act had four basic objectives: To protect the lives and property of our citizens by preventing dam failures; to protect the investment of the Federal Government in the dams and related structures; to prevent dam failure and the ensuing liability of the Federal Government for damages; and to assure the ability of the projects to continue to perform, to meet contractual relationships, and to provide revenues to the Treasury.

We need only look at the failure of Teton Dam in my home State of Idaho to grasp the importance of these goals. As many of my distinguished colleagues will recall, Teton Dam was completed by the Bureau of Reclamation in November of 1975. On June 5, 1976, it failed, causing 11 deaths, disrupting the lives of thousands, and costing the Federal Government over $350 million in damage claims. As a result, the Federal Government is now denied the revenues from a 20-megawatt powerplant, as well as the revenues and the social and economic benefits accruing from irrigation of 150,000 acres. We are also $79 million out of pocket for the construction of Teton Dam and powerhouse.

Mr. President, I ask unanimous consent that the text of the measure, and a list compiled by the Bureau of Reclamation of the structures where safety work pursuant to the Safety of Dams Act of 1978 is underway or contemplated be included in the RECORD at this point.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 672

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Reclamation Safety of Dams Act of 1978 (92 Stat. 2471, 43 U.S.C. 506, et seq.) is amended as follows:

(1) In section 2, following "modifications" insert "or replacement".

(2) In section 4, wherever the word "modification" appears insert thereafter "replacement".

(3) In section 5, (a) in the first sentence after "$100,000,000" delete the comma and insert, "and, effective October 1, 1983, not to exceed an additional $550,000,000,"; change "construction to modify an existing dam" to read "construction to modify or replace an existing dam"; and delete the period at the end of the proviso by inserting a colon and the following additional proviso: Provided further, That such obligation may be made prior to the expiration of such sixty days in any case in which the respective committee of jurisdiction in the House of Representatives and the Senate approve an earlier date and notifies the Secretary in writing, of such approval." and (b) in the second and third sentences wherever the words "modification or modifications" appear insert thereafter "or replacement".

(4) Following section 11, insert the following new section 12:

"SEC. 12. Included within the scope of this Act are Fish Lake, Four Mile, Ochoco, Savage Rapids Diversion and Warm Springs Dams, Oregon; Como Dam, Montana; Little Wood River Dam, Idaho; Twin Buttes Dam, Texas; Foss Dam, Oklahoma and related facilities: Provided, That the cost of foundation treatment, drainage, and instrumentation work planned or underway at Twin Buttes Dam, Texas, and Foss Dam, Oklahoma, shall be nonreimbursable and nonreturnable under Federal reclamation laws.".

PRELIMINARY RESULTS OF DAM SAFETY INVESTIGATION WORK BUREAU OF RECLAMATION

[Dollars in millions]

State/dam	Description of modification	Estimated cost
Distribution of Initial Safety of Dams Act Appropriation Ceiling		
Arizona: Stewart Mountain Dam	Modify spillway	$8.9
California:		
East Park Dam	do	6.9
Stony Gorge Dam	do	4.9
Idaho:		
Black Canyon Dam	Construct auxiliary spillway	5.4
Island Park Dam	Raise crest, rehabilitate outlet, and modify spillway	5.7
Montana:		
Gibson Dam	Structural modification to withstand overtopping	3.3
Lake Sherburne Dam	Raise dam crest	4.5
Willow Creek Dam	Modify spillway	5.6
Nevada: Lahontan Dam	Rehabilitate spillway and outlet works	6.7
South Dakota: Deerfield Dam	Raise crest and modify spillway	8.5
Utah: Hyrum Dam	Construct auxiliary spillway	9.5
Wyoming: Jackson Lake Dam	Stabilize embankments	6.8
Modification reports and preconstruction planning		52.7
Subtotal		129.4
Anticipated Future Work To Be Performed Under the Safety of Dams Act		
Arizona:		
Bartlett Dam and Horseshoe Dam	Structural modification will be minor on Bartlett Dam and Horseshoe Dam will be eliminated if Cliff Dam is constructed	
Horse Mesa Dam and Mormon Flat Dam	Structural modification will be minor if Theodore Roosevelt Dam is modified or replaced	
Theodore Roosevelt Dam	Foundation treatment, spillway modification	
Total for Salt River Project (SRP)		350.0
Arizona-California:		
Parker Dam	Replace structural components in the spillway bridges	.5
Senator Wash Dam	Seepage control modification	1.0
California		
Bradbury Dam	Embankment stability modification	10.0
Casitas Dam	do	10.0
Folsom Dam	Inflow design flood (IDF) and seismic modification	10.0
Friant Dam	Replace portions of the top of dam and protect dike and abutment for IDF	2.5
Glen Anne Dam	Rehabilitate asphalt lining and underdrain, repair slides on upstream face	1.5
Lake Tahoe Dam	Rehabilitate spillway structure	3.0
O'Neill Dam	Embankment stability modification	5.0
San Luis Dam	do	20.0
Shasta Dam	Grout contraction joints in dam	.5
Trinity Dam	Possible modification to left abutment slide to prevent blocking or plugging of spillway	1.0
Colorado:		
Fruitgrowers Dam	Spillway replacement	6.0
Olympus Dam	Construct emergency spillway and possibly modify existing spillway	10.0
Idaho: Soldiers Meadow Dam	Rehabilitate spillway and modify embankment for IDF and seepage	2.5
New Mexico: Navajo Dam	Embankment stability	1.0
Nevada: Rye Patch Dam	Foundation/embankment stability modification	4.0
North Dakota:		
Heart Butte Dam	Inflow design flood modification	5.0
Jamestown Dam	do	10.0
Oklahoma:		
Altus Dam	Structural modification	.8
Arbuckle Dam	Inflow design flood modification	2.5
Foss Dam	do	2.5

PRELIMINARY RESULTS OF DAM SAFETY INVESTIGATION WORK BUREAU OF RECLAMATION—Continued

[Dollars in millions]

State/dam	Description of modification	Estimated cost
Oregon:		
Cold Springs Dam	Modify seepage control system. Replace or modify spillway	2.8
Owyhee Dam	Repair top 75 feet of arch	.5
South Dakota: Pactola Dam	Spillway/embankment modification to pass the IDF	15.5
Texas: Twin Buttes Dam	Inflow design flood modification	5.5
Utah:		
Joes Valley Dam	Provide additional spillway structure	3.0
Newton Dam	Inflow design flood and seismic modification	5.5
Washington: Bumping Lake Dam	Modify spillway structure and correct foundation seepage	3.0
Wyoming:		
Bid Sandy Dam	Rehabilitate spillway structure wall and floor slabs. Extend grout curtain adjacent to spillway	3.0
Guernsey Dam	Rehabilitate spillway walls and floor	2.4
Subtotal		500.5
Safety of Dams Work Resulting From Possible Amendments to the Reclamation Safety of Dams Act		
Idaho: Little Wood River Dam	Stability analysis is underway	
Montana: Como Dam	do	
Oregon:		
Fish Lake Dam	Modify spillway and grout tunnel	3.0
Fourmile Lake Dam	Stability analysis is underway	
Ochoco Dam	Rehabilitate spillway and seepage control	2.5
Savage Rapids Diversion Dam	Stability analysis is underway	
Warm Springs Dam	do	
Texas: Twin Buttes Dam	Seepage control	5.5
Subtotal		11.0
Estimated total required for safety of dams modification work		640.9

By Mr. McCLURE:

S. 673. A bill to amend the Internal Revenue Code of 1954 to provide for the establishment of, and the credit against tax for contributions to, individual housing accounts; to the Committee on Finance.

THE NEST EGG ACT

● Mr. McCLURE. Mr. President, I am proud today to introduce a major piece of legislation designed to aid our housing industry and give the American people an incentive to save.

For many years the United States has had the lowest rate of savings and investment in the Western World. As a consequence, every other major Western nation has a better employment record, and a faster rate of growth of real wage and fringe benefits, than the United States. It is also quite clear that our extremely low rate of savings and the closely related problem of lagging productivity is as serious a threat as any facing the economic well-being of our Nation.

Our tax laws have seriously penalized saving and investment. Our goal should be a break for small savers, which allows Americans to set aside savings for future needs while, at the same time, increase the savings rate in order to provide additional investment for capital formation.

Only recently have we seen an upswing in our Nation's savings rate. For the past 5 years it has decreased to the point where it is one of the lowest in the free world. Nowhere do we find more built-in disincentives to save.

Looking at it logically, the American taxpayer usually pays his taxes before ever seeing the paycheck. After that is done, he manages to save a little money for a rainy day in an account that pays a little interest. Then the Government comes back for its pound of flesh and taxes the interest that's earned. Hence, another disincentive to save; now, the worker feels compelled to go out and spend more than he has. In doing so, he incurs a little interest debt for having spent more than he has, and he is rewarded by our tax structure with a deduction on the interest. The result, of course, is that powerful incentive to spend more than we have, rather than save some of what we make.

For many years our tax system has encouraged consumption by penalizing savings. Access to money through credit cards, charge accounts, and other forms of consumer credit has eased over the years, and it has reduced the need to save up for major purchases. Clearly, a more equitable taxation of income is necessary for any improvement in our productivity.

I feel strongly that the housing industry will not benefit in the long run from any short-term influx of Government money. We must decrese the burden of government and give all Americans incentives to save and invest.

The United States League of Savings Associations indicates that 42 million Americans, the crest of the postwar baby boom, will reach the age of 30 in the 1980's, 10 million more than in the seventies. To insure a viable housing industry there must be an adequate supply of capital in the market to finance the expansion that will go along with this population explosion. Recently, a general shortage of savings in the economy meant that home mortgage lending was only able to claim 15 percent of the available capital pool. This is the lowest level since 1970 and far below the traditional 25 percent.

The legislation that I am introducing today establishes a savings account similar to the popular individual retirement account (IRA). The nest egg account would be used for a down payment on a house. It is extremely difficult for young people today to accumulate enough money for a down payment. Our society incorrectly stresses the merits of spend now and save later while our tax structure has become increasingly opposed to savings. This legislation is designed to give all who do not own a house the opportunity and incentive to save and plan for the future.

The bill I am introducing provides a major incentive for potential homebuyers currently shutout of the American dream. The President's Commission on Housing identified the inability of potential homebuyers to accumulate enough capital for a downpayment as a major problem associated with the housing industry. High housing prices invariably means high down payments. Many households across the country qualify for a mortgage, but are shutout of the American dream by an inability to accumulate enough downpayment money.

My bill breaks down these barriers and allows a potential homebuyer to deposit up to $1,500—$3,000 on a joint return—in a nest egg account. This contribution forms the basis for a 25-percent tax credit.

A cornerstone in President Reagan's program for recovery is to increase savings. The Economic Recovery Tax Act stressed the need for saving and investment, but did not go far enough. The tax exempt all-savers certificate was a disappointment and did very little for the housing industry. The universal individual retirement accounts have been very popular and successful, supplying our capital markets with billions of dollars of long-term money. Home mortgage lending is supported nearly exclusively by personal savings. The IRA program has

helped, but it is the obligation of the Congress to continue to promote a greater flow of savings.

I strongly urge my colleagues to cosponsor this important piece of legislation, and I ask unanimous consent that a copy of the bill be printed in full in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 673

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) subpart A of part IV of subchapter A of chapter 1 of the Internal Revenue Code of 1954 (relating to credits allowable against tax) is amended by inserting after section 44H the following new section:

"SEC. 441. CONTRIBUTIONS TO INDIVIDUAL HOUSING ACCOUNTS.

"(a) CREDIT ALLOWED.—In the case of an individual who has never owned a principal residence (within the meaning of section 1034) by himself or with one or more other individuals, there shall be allowed as a credit against the tax imposed by this chapter for the taxable year an amount equal to 25 percent of the sum of the amounts paid in cash or the fair market value of stocks, bonds, or other securities, readily tradable on an established securities market, during the taxable year by such individual to an individual housing account.

"(b) LIMITATIONS.—

"(1) MAXIMUM ANNUAL CREDIT.—The amount allowable as a credit under subsection (a) to an individual for any taxable year may not exceed $1,500 ($3,000 in the case of married individual filing a joint return).

"(2) MINIMUM DEPOSIT PERIOD.—Any amount paid into an individual housing account which is paid or distributed out of the account less than 12 months after it was paid into the account shall be treated as if it were not contributed. For purposes of this paragraph, any amount paid or distributed out of such an account shall be treated as having been distributed out of the most recently contributed amounts.

"(3) APPLICATION WITH OTHER CREDITS.—The credit allowed by subsection (a) shall not exceed the tax imposed by this chapter for the taxable year, reduced by the sum of the credits allowable under a section of this subpart having a lower number or letter designation than this section, other than the credits allowable by sections 31, 39, and 43.

"(4) STOCK, ETC., TO BE VALUED ON TRANSFER DATE.—The fair market value of stock, bonds, and other securities is to be determined as of the date on which it is transferred to the account, or, if the transfer occurs on a Saturday, Sunday, or other public legal holiday, on the last preceding day on which it could have been traded.

"(c) DEFINITION AND SPECIAL RULES.—For purposes of this section, the term 'individual housing account' means a trust created or organized in the United States for the exclusive benefit of an individual, or in the case of a married individual, for the exclusive benefit of the individual and his spouse jointly, but only if the written governing instrument creating the trust meets the following requirements:

"(1) No contribution will be accepted unless it is in cash or in stocks, bonds, or other securities readily tradeable on an established exchange, and contributions will not be accepted for the taxable year in excess of $1,500 on behalf of any individual ($3,000 in the case of a trust for an individual and his spouse).

"(2) The trustee is a bank (as defined in section 401(d)(1)) or another person who demonstrates to the satisfaction of the Secretary that the manner in which that person will administer the trust will be consistent with the requirements of this section.

"(3) No part of the trust assets will be invested in life insurance contracts.

"(4) The interest of the individual in the balance in his account is nonforfeitable.

"(5) The assets of the trust will not be commingled with other property except in a common trust fund or common investment fund.

"(6) The entire interest of an individual or married couple for whose benefit the trust is maintained will be distributed to him, or them, not later than 120 months after the date on which the first contribution is made to the trust.

"(7) The assets of the trust shall be invested in accordance with the directions of the individual contributing to the trust, but, if more than one individual makes contributions to the trust the consent of all such individuals shall be required with respect to such direction.

"(d) TAX TREATMENT OF DISTRIBUTIONS.—

"(1) IN GENERAL.—Except as otherwise provided in this subsection, if any amount is paid or distributed out of an individual housing account for any purpose other than the purchase of a principal residence, then the tax under this chapter for the taxable year shall be increased by an amount equal to 25 percent of the amount so paid or distributed. The basis of any person in such an account is zero.

"(2) EXCESS CONTRIBUTIONS RETURNED BEFORE DUE DATE OF RETURN.—Paragraph (1) does not apply to the distribution of any contribution paid during a taxable year to an individual housing account to the extent that such contribution exceeds the amount allowable under subsection (b)(1) if—

"(A) such distribution is received on or before the day prescribed by law (including extensions of time) for filing such individual's return for such taxable year,

"(B) no credit is allowed under subsection (a) with respect to such excess contribution, and

"(C) such distribution is accompanied by the amount of net income attributable to such excess contribution.

Any net income described in subparagraph (C) shall be included in the gross income of the individual for the taxable year in which it is received.

"(3) TRANSFER OF ACCOUNT INCIDENT TO DIVORCE.—The transfer of an individual's interest in an individual housing account to his former spouse under a divorce decree or under a written instrument incident to a divorce is not to be considered a taxable transfer made by such individual notwithstanding any other provision of this subtitle, and such interest, at the time of the transfer, is to be treated as an individual housing account of the spouse, and not of such individual. After the transfer, the account is to be treated, for purposes of this subtitle, as maintained for the benefit of the spouse.

"(4) AMOUNTS NOT MEETING MINIMUM DEPOSIT PERIOD REQUIREMENT.—Paragraph (1) does not apply to any amount to which subsection (b)(2) applies.

"(e) TAX TREATMENT OF ACCOUNTS.—

"(1) EXEMPTION FROM TAX.—Any individual housing account is exempt from taxation under this subtitle unless such account has ceased to be an individual housing account by reason of paragraph (2) or (3). Notwithstanding the preceding sentence, any such account is subject to the taxes imposed by section 511 (relating to imposition of tax on unrelated business income of charitable, etc., organizations).

"(2) LOSS OF EXEMPTION OF ACCOUNT WHERE INDIVIDUAL ENGAGES IN PROHIBITED TRANSACTION.—

"(A) IN GENERAL.—If, during any taxable year of the individual for whose benefit an individual housing account is established, that individual engages in any transaction prohibited by section 4975 with respect to the account, the account ceases to be an individual housing account as of the first day of that taxable year. For purposes of this subparagraph the individual for whose benefit any account was established is treated as the creator of the account.

"(B) ACCOUNT TREATED AS DISTRIBUTING ALL ITS ASSETS.—In any case in which any account ceases to be an individual housing account by reason of subparagraph (A) on the first day of any taxable year, paragraph (1) of subsection (d) applies as if there were a distribution on such first day in an amount equal to the fair market value (on such first day) of all assets in the account (on such first day).

"(3) EFFECT OF PLEDGING ACCOUNT AS SECURITY.—If, during any taxable year, the individual for whose benefit an individual housing account is established uses the account or any portion thereof as security for a loan, the portion so used is treated as distributed to that individual.

"(f) ADDITIONAL TAX ON CERTAIN AMOUNTS INCLUDED IN GROSS INCOME.—

"(1) DISTRIBUTION NOT USED TO PURCHASE RESIDENCE.—If a distribution from an individual housing account to an individual for whose benefit such account was established is made, and not used in connection with the purchase of a principal residence for such individual, the tax liability of such individual under this chapter for the taxable year in which such distribution is received shall be increased by an amount equal to 10 percent of the amount of the distribution which is includable in his gross income for such taxable year.

"(2) DISQUALIFICATION CASES.—If an amount is includable in the gross income of an individual for a taxable year under subsection (e), his tax under this chapter for such taxable year shall be increased by an amount equal to 10 percent of such amount required to be included in his gross income.

"(3) DISABILITY CASES.—Paragraphs (1) and (2) do not apply if the payment or distribution is attributable to the taxpayer becoming disabled within the meaning of section 72(m)(7).

"(g) COMMUNITY PROPERTY LAWS.—This section shall be applied without regard to any community property laws.

"(h) CUSTODIAL ACCOUNTS.—For purposes of this section, a custodial account shall be treated as a trust if the assets of such account are held by a bank (as defined in section 401(d)(1)) or another person who demonstrates, to the satisfaction of the Secretary, that the manner in which he will administer the account will be consistent with the requirements of this section, and if the custodial account would, except for the fact that it is not a trust, constitute an individual housing account described in subsection (c). For purposes of this title, in the case of

a custodial account treated as a trust by reason of the preceding sentence, the custodian of such account shall be treated as the trustee thereof.

"(i) REPORTS.—The trustee of an individual housing account shall make such reports regarding such account to the Secretary and to the individual for whom the account is maintained with respect to contributions, distributions, and such other matters as the Secretary may require under regulations. The reports required by this subsection shall be filed at such time and in such manner and furnished to such individuals at such time and in such manner as may be required by those regulations.

"(j) REDUCTION OF BASIS.—The basis of any residence acquired with funds withdrawn from an individual housing account shall be reduced by an amount equal to the amount of expenditures made in connection with the acquisition of the residence out of such funds.".

(b) Section 4973 of such Code (relating to tax on excess contributions to individual retirement accounts, certain section 403(b) contracts, certain individual retirement annuities, and certain retirement bonds) is amended—

(1) by inserting "individual housing accounts," after "individual retirement accounts," in the caption of such section,

(2) by redesignating paragraphs (2) and (3) of subsection (a) as paragraphs (3) and (4), respectively, and by inserting after paragraph (1) the following:

"(2) an individual housing account (within the meaning of section 441(c)),", and

(3) by adding at the end thereof the following new subsection:

"(d) EXCESS CONTRIBUTIONS TO INDIVIDUAL HOUSING ACCOUNTS.—For purposes of this section, in the case of an individual housing account, the term 'excess contributions' means the amount by which the amount contributed for the taxable year to the account exceeds the amount allowable under section 441(b)(1) for such taxable year. For purposes of this subsection, any contribution which is distributed out of the individual housing account and a distribution to which section 441(d)(2) applies shall be treated as an amount not contributed.".

(c) Section 4975 of such Code (relating to prohibited transactions) is amended—

(1) by adding at the end of subsection (c) the following new paragraph:

"(4) SPECIAL RULE FOR INDIVIDUAL HOUSING ACCOUNTS.— An individual for whose benefit an individual housing account is established shall be exempt from the tax imposed by this section with respect to any transaction concerning such account (which would otherwise be taxable under this section) if, with respect to such transaction, the account ceases to be an individual housing account by reason of the application of section 44I(e)(2)(A) or if section 44I(e)(3) applies to such account.", and

(2) by inserting "or an individual housing account described in section 44I(c)" in subsection (e)(1) after "described in section 428(a)".

(d)(1) Subsection (b) of section 6401 of such Code (relating to amounts treated as overpayments) is amended—

(A) by striking out "and 43 (relating to earned income credit)", and inserting in lieu thereof the following: "43 (relating to earned income credit), and 44I (relating to contributions to individual housing accounts)", and

(B) by striking out "sections 31, 39, and 43" and inserting in lieu thereof the following: "sections 31, 39, 43, and 44I".

(2) Paragraph (2) of section 55 of such Code (defining regular tax) is amended by striking out "and 43" and inserting in lieu thereof ", 143, and 44I".

(3) Paragraph (4) of section 6201(a) (relating to erroneous credit under section 39 or 43) is amended—

(A) by striking out "section 39 or 43" in the caption and inserting in lieu thereof the following: "section 39, 43, or 44I)", and

(B) by striking out "or section 43 (relating to earned income)," and inserting in lieu thereof the following: ", section 43 (relating to earned income), or section 44I (relating to contributions to individual housing accounts),".

(4) Section 6513 of such Code (relating to time return deemed filed and tax considered paid) is amended by adding at the end thereof the following new subsection:

"(f) INDIVIDUAL HOUSING ACCOUNT CREDIT CONSIDERED PAID.—For purposes of section 6511, the taxpayer shall be considered as paying an amount of tax on the last day prescribed by law for payment of the tax (determined without regard to any extension of time and without regard to any election to pay the tax in installments) equal to so much of the credit allowed by section 44I (relating to individual housing account credit) as is treated under section 6401(b) as an overpayment of tax.".

(5) Subsection (d) of section 6611 of such Code is amended by striking out the caption and inserting in lieu thereof the following:

"(d) ADVANCE PAYMENT OF TAX, PAYMENT OF ESTIMATED TAX, CREDIT FOR INCOME TAX WITHHOLDING, AND INDIVIDUAL HOUSING ACCOUNT CREDIT.—".

(e) Section 6693 of such Code (relating to failure to provide reports on individual retirement accounts or annuities) is amended—

(1) by striking out the period and inserting in lieu thereof a comma and by inserting "or individual housing accounts" after "annuities" in the caption of such section, and

(2) by adding at the end of subsection (a) the following: "The person required by section 44I(i) to file a report regarding an individual housing account at the time and in the manner required by such section shall pay a penalty of $10 for each failure unless it is shown that such failure is due to reasonable cause.".

(f) Section 1016(a) of such Code (relating to adjustments by striking out "and" at the end of paragraph (24), by striking out the period at the end of paragraph (25) and inserting in lieu thereof "; and", and by inserting after paragraph (25) the following new paragraph:

"(26) in the case of residence the acquisition of which was made in whole or in part with funds from an individual housing account, to the extent provided in section 44I (j);".

(g) Subsection (b) of section 121 of such Code (relating to limitations) is amended by adding at the end thereof the following new paragraph:

"(4) Reduction of exclusion for housing savings amount.—The $125,000 amount in paragraph (1) shall be reduced by any amount paid or distributed out of an individual housing account of the taxpayer which was not included in gross income of the taxpayer for the year in which it was paid or distributed to the taxpayer (one-half of such amount in the case of a separate return by a married individual).".

(h) Subsection (b) of section 6396 of such Code (relating to designation of income tax payments to Presidential Election Campaign Fund) is amended by striking out "and 44H" and inserting in lieu thereof "44H, and 44I".

(i) (1) The table of sections for subpart A of part IV of subchapter A of chapter 1 of such Code is amended by inserting after the item relating to section 44H the following:

"Sec. 44I. Contributions to individual housing accounts.".

(2) The table of sections for chapter 43 of such Code is amended by striking out the item relating to section 4973 and inserting in lieu thereof the following:

"Sec. 4973. Tax on excess contributions to individual retirement accounts, individual housing accounts, certain 403(b) contracts, certain individual retirement annuities, and certain retirement bonds.".

(3) The table of sections for subchapter 8 of chapter 68 of such Code is amended by striking out the item relating to section 6693 and inserting in lieu thereof the following:

"Sec. 6693. Failure to provide reports on individual retirement accounts or annuities or individual housing accounts.".

(j) The amendments made by this section apply to taxable years beginning after December 31, 1982.●

By Mr. SPECTER:

S. 674. A bill to authorize implementation of a project for flood damage prevention at Milton, Pa.; to the Committee on Environment and Public Works.

MILTON FLOOD CONTROL PROJECT

Mr. SPECTER. Mr. President, I rise today to introduce legislation that would authorize the construction of a flood damage prevention project for the Borough of Milton in Northumberland County, Pa.

Located along the west branch of the Susquehanna River, the Milton area has a variety of structural flaws that make it prone to flooding. In 1972, for example, tropical storm Agnes ravaged a large portion of the Susquehanna River Basin, causing millions of damages to Milton and various other population centers. Without this badly needed flood control project, Milton will continue to exist under the threat of severe destruction from future storms.

I recently introduced legislation that would authorize flood control projects in Wyoming Valley in Luzerne County, Harrisburg, and Lock Haven, Pa. Clearly, the devastation resulting from past flooding demonstrates a critical need for flood damage protection at Milton as well. Now is the time to proceed on these important public works programs, given current economic conditions and the need for infrastructure improvements.

The Army Corps of Engineers estimates the cost of the Milton project to be $87 million. The possibilty of future destruction from flooding and the capability of providing valuable jobs to

this region make the Milton project important to central Pennsylvania.

Mr. President, I ask unanimous consent that the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 674

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Secretary of the Army, acting through the Chief of Engineers, is authorized to implement a project for flood damage prevention at Milton, Northumberland County, Pennsylvania, on the West Branch of the Susquehanna River, substantially in accordance with the report of the Corps of Engineers entitled "Local Flood Protection Study at Milton, Pennsylvania" dated July 13, 1977, at an estimated cost of $87,000,000.

SEC. 2. There are authorized to be appropriated such sums as may be necessary to carry out the provisions of this Act.

By Mr. TOWER (for himself and Mr. JACKSON) (by request):

S. 675. A bill to authorize appropriations for fiscal year 1984 for the Armed Forces for procurement, for research, development, test, and evaluation, and for operation and maintenance, to prescribe personnel strengths for such fiscal year for the Armed Forces and for civilian employees of the Department of Defense, and for other purposes; to the Committee on Armed Services.

DEPARTMENT OF DEFENSE AUTHORIZATION ACT, 1984

Mr. TOWER. Mr. President, by request, for myself and the senior Senator from Washington (Mr. JACKSON) I introduce for appropriate reference a bill to authorize appropriations for fiscal year 1984 for the Armed Forces for procurement, for research, development, test, and evaluation, and for operation and maintenance, to prescribe personnel strengths for such fiscal year for the Armed Forces and for civilian employees of the Department of Defense, and for other purposes.

I ask unanimous consent that a letter of transmittal requesting consideration of the legislation and explaining its purpose be printed in the RECORD immediately following the listing of the bill.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 675

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Department of Defense Authorization Act, 1984."

TITLE I—PROCUREMENT

AUTHORIZATION OF APPROPRIATIONS, ARMY

SEC. 101. Funds are hereby authorized to be appropriated for fiscal year 1984 for procurement of aircraft, missiles, weapons and tracked combat vehicles, and ammunition and for other procurement for the Army as follows:

For aircraft, $3,472,100,000.

For missiles, $3,088,500,000.

For weapons and tracked combat vehicles, $4,934,416,000.

For ammunition, $2,334,189,000.

For other procurement, $5,362,870,000.

AUTHORIZATION OF APPROPRIATIONS, NAVY AND MARINE CORPS

SEC. 102. (a) Funds are hereby authorized to be appropriated for fiscal year 1984 for procurement of aircraft, weapons (including missiles and torpedoes), shipbuilding and conversion, and other procurement for the Navy as follows:

For aircraft, $11,127,300,000.

For weapons (including missiles and torpedoes), $4,028,600,000.

For shipbuilding and conversion, $12,698,800,000.

For other procurement, $5,001,838,000.

(b) Funds are hereby authorized to be appropriated for fiscal year 1984 for procurement for the Marine Corps (including missiles, tracked combat vehicles, and other weapons) in the amount of $1,852,049,000.

AUTHORIZATION OF APPROPRIATIONS, AIR FORCE

SEC. 103. (a) Funds are hereby authorized to be appropriated for fiscal year 1984 for procurement of aircraft and missiles and for other procurement for the Air Force as follows:

For aircraft, $22,707,190,000.

For missiles, $8,570,834,000.

For other procurement, $7,626,302,000.

(b) Of the funds authorized to be appropriated in this section for aircraft for the Air Force, the sum of $112,100,000 is available only for contribution by the United States as its share of the cost for fiscal year 1984 of acquisition by the North Atlantic Treaty Organization of the Airborne Warning and Control System (AWACS).

AUTHORIZATION OF APPROPRIATIONS, DEFENSE AGENCIES

SEC. 104. Funds are hereby authorized to be appropriated for fiscal year 1984 for procurement by the Defense Agencies in the amount of $1,082,791,000.

AUTHORIZATION OF APPROPRIATIONS, DEFENSE PRODUCTION ACT PURCHASES

SEC. 105. Funds are hereby authorized to be appropriated for fiscal year 1984 for purchases or commitments to purchase metals, minerals, or other materials by the Department of Defense pursuant to section 303 of the Defense Production Act of 1950, as amended (50 U.S.C. App. § 2093) in the amount of $200,000,000.

CERTAIN AUTHORITY PROVIDED THE SECRETARY OF DEFENSE IN CONNECTION WITH THE NATO AIRBORNE WARNING AND CONTROL SYSTEM (AWACS) PROGRAM

SEC. 106. Effective on October 1, 1983, section 103(a) of the Department of Defense Authorization Act, 1982 (Public Law 97-86; 95 Stat. 1100) is amended by striking out "fiscal year 1983" both places it appears and inserting in lieu thereof "fiscal year 1984".

SECURE COMMUNICATIONS EQUIPMENT AND A SPECIAL CLASSIFIED PROGRAM

SEC. 107. The Secretary of Defense is authorized to procure secure telephone communication systems, including equipment and related items, during fiscal year 1984 for the Department of Defense and other government agencies and entities to support a national program to provide secure telephone service. Of the funds authorized to be appropriated pursuant to this title, not more than $60,000,000 may be used to provide secure telephone equipment and related items to the Department of Defense and other government agencies and entities in support of such a national program. Equipment provided to government agencies and entities outside the Department of Defense under the authority of this section and such related services as may be necessary may be furnished by the Secretary of Defense with or without reimbursement. In addition, of the funds authorized to be appropriated pursuant to this Act, not more than $220,000,000 is authorized for a special classified program.

TITLE II—RESEARCH, DEVELOPMENT, TEST, AND EVALUATION

AUTHORIZATION OF APPROPRIATIONS

SEC. 201. (a) Funds are hereby authorized to be appropriated for fiscal year 1984 for the use of the Armed Forces for research, development, test, and evaluation, in amounts as follows:

For the Army, $4,793,674,000.

For the Navy (including the Marine Corps), $8,182,419,000.

For the Air Force, $13,652,273,000.

For the Defense Agencies, $2,996,900,000, of which $56,800,000 is authorized for the activities of the Director of Test and Evaluation, Defense.

(b) In addition to the funds authorized to be appropriated in subsection (a), there are authorized to be appropriated for fiscal year 1984 such additional sums as may be necessary for increases in salary, pay, retirement, and other employee benefits authorized by law for civilian employees of the Department of Defense whose compensation is provided for by funds authorized to be appropriated in subsection (a).

TITLE III—OPERATION AND MAINTENANCE

SEC. 301. (a) Funds are hereby authorized to be appropriated for fiscal year 1984 for the use of the Armed Forces of the United States and other activities and agencies of the Department of Defense for expenses, not otherwise provided for, for operation and maintenance, in amounts as follows:

For the Army, $17,867,800,000.

For the Navy, $23,225,600,000.

For the Marine Corps, $1,575,900,000.

For the Air Force, $18,999,100,000.

For the Defense Agencies, $6,871,900,000.

For the Army Reserve, $662,800,000.

For the Naval Reserve, $693,000,000.

For the Marine Corps Reserve, $53,629,000.

For the Air Force Reserve, $815,000,000.

For the Army National Guard, $1,135,000,000.

For the Air National Guard, $1,824,700,000.

For the National Board for the Promotion of Rifle Practice, $899,000.

For Defense Claims, $222,900,000.

For the Court of Military Appeals, $3,372,000.

(b) There are authorized to be appropriated for fiscal year 1984, in addition to the amounts authorized to be appropriated in subsection (a), such sums as may be necessary—

(1) for increases in salary, pay, retirement, and other employee benefits authorized by law for civilian employees of the Department of Defense whose compensation is provided for by funds authorized to be appropriated in subsection (a);

(2) for unbudgeted increases in fuel costs; and

(3) for increases as the result of inflation in the cost of activities authorized by subsection (a).

AUTHORIZATION OF APPROPRIATIONS FOR ASSISTANCE FOR 1984 GAMES OF THE XXIII OLYMPIAD

SEC. 302. (a) Notwithstanding any other provision of law, the Secretary of Defense is authorized—

(1) to provide logistical support and personnel services to the 1984 Games of the XXIII Olympiad;

(2) to lend and provide equipment in support of the 1984 Games of the XXIII Olympiad; and

(3) to provide such other services in support of the 1984 Games of the XXIII Olympiad as the Secretary may consider advisable.

(b) There is authorized to be appropriated to the Department of Defense for fiscal year 1984 an amount not to exceed $50,000,000 for the purpose of carrying out subsection (a). Except for funds used for pay and non-travel-related allowances for members of the Armed Forces, other than members of the Reserve components thereof called or ordered to active duty to provide support for the XXIII Olympiad, no funds may be obligated for such purpose unless specifically appropriated for such purpose. The costs for pay and non-travel-related allowances of members of the Armed Forces, other than members of the Reserve components thereof called or ordered to active duty to provide support for the XXIII Olympiad, may not be charged to appropriations made pursuant to this authorization.

TITLE IV—ACTIVE FORCES

SEC. 401. The Armed Forces are authorized strengths for active duty personnel as of September 30, 1984, as follows:

(1) The Army, 782,600.

(2) The Navy, 572,200.

(3) The Marine Corps, 197,300.

(4) The Air Force, 612,600.

TITLE V—RESERVE FORCES

AUTHORIZATION OF AVERAGE STRENGTHS FOR SELECTED RESERVE

SEC. 501. For fiscal year 1984 the Selected Reserve of the reserve components of the Armed Forces shall be programmed to attain average strengths of not less than the following:

(1) The Army National Guard of the United States, 418,400.

(2) The Army Reserve, 270,700.

(3) The Naval Reserve, 112,600.

(4) The Marine Corps Reserve, 40,300.

(5) The Air National Guard of the United States, 103,400.

(6) The Air Force Reserve, 68,600.

(7) The Coast Guard Reserve, 12,000.

(b) The average strength prescribed by subsection (a) for the Selected Reserve of any reserve component shall be proportionately reduced by (1) the total authorized strength of units organized to serve as units of the Selected Reserve of such component which are on active duty (other than for training) at any time during the fiscal year, and (2) the total number of individual members not in units organized to serve as units of the Selected Reserve of such component who are on active duty (other than for training or for unsatisfactory participation in training) without their consent at any time during the fiscal year. Whenever such units or such individual members are released from active duty during any fiscal year, the average strength prescribed for such fiscal year for the Selected Reserve of such reserve component shall be proportionately increased by the total authorized strength of such units and by the total number of such individual members.

AUTHORIZATION OF END STRENGTHS FOR RESERVES ON ACTIVE DUTY IN SUPPORT OF THE RESERVES

SEC. 502. Within the average strengths prescribed in section 501, the reserve components of the Armed Forces are authorized, as of September 30, 1984, the following number of Reserves to be serving on full-time active duty for the purpose of organizing, administering, recruiting, instructing, or training the reserve components:

(1) The Army National Guard of the United States, 18,630.

(2) The Army Reserve, 10,664.

(3) The Naval Reserve, 13,846.

(4) The Marine Corps Reserve, 801.

(5) The Air National Guard of the United States, 5,915.

(6) The Air Force Reserve, 517.

(b) Upon a determination by the Secretary of Defense that such action is in the national interest, the end strengths prescribed by subsection (a) may be increased by a total of not more than the number equal to 2 percent of the total end strengths prescribed.

INCREASE IN NUMBER OF CERTAIN PERSONNEL AUTHORIZED TO BE ON ACTIVE DUTY IN SUPPORT OF THE RESERVE COMPONENTS

SEC. 503. The columns under the headings "Army", and "Marine Corps" in the table in section 524(a) of title 10, United States Code, are amended to read as follows:

"Army	Marine Corps
1,577	95
793	48
291	23".

TITLE VI—CIVILIAN PERSONNEL

AUTHORIZATION OF END STRENGTH

SEC. 601. (a) The Department of Defense is authorized a strength in civilian personnel, as of September 30, 1984, of 1,072,174.

(b) The strength for civilian personnel prescribed in subsection (a) shall be apportioned among the Department of the Army, the Department of the Navy, the Department of the Air Force, and the agencies of the Department of Defense (other than the military departments) in such numbers as the Secretary of Defense shall prescribe. The Secretary of Defense shall report to the Congress within sixty days after the date of enactment of this Act on the manner in which the initial allocation of civilian personnel is made among the military departments and the agencies of the Department of Defense (other than the military departments) and shall include the rationale for each allocation.

(c)(1) In computing the strength for civilian personnel, there shall be included all direct-hire and indirect-hire civilian personnel employed to perform military functions administered by the Department of Defense (other than those performed by the National Security Agency) whether employed on a full-time, part-time, or intermittent basis, but excluding special employment categories for students and disadvantaged youth such as the stay-in-school campaign, the temporary summer aid program and the Federal junior fellowship program and personnel participating in the worker-trainee opportunity program.

(2) Personnel employed under a part-time career employment program established by section 3402 of title 5, United States Code, shall be counted as prescribed in section 3404 of that title. Personnel employed in an overseas area on a part-time basis under a nonpermanent local-hire appointment who are dependents accompanying a Federal civilian employee or a member of a uniformed service on official assignment or tour of duty shall also be counted as prescribed by section 3404 of that title.

(3) Whenever a function, power or duty, or activity is transferred or assigned to a department or agency of the Department of Defense from a department or agency outside of the Department of Defense, or from another department or agency within the Department of Defense, the civilian personnel end-strength authorized for such departments or agencies of the Department of Defense affected shall be adjusted to reflect any increases or decreases in civilian personnel required as a result of such transfer or assignment.

(d) When the Secretary of Defense determines that such action is necessary in the national interest, the Secretary of Defense may authorize the employment of civilian personnel in excess of the number authorized by subsection (a), but such additional number may not exceed 2 percent of the total number of civilian personnel authorized for the Department of Defense by subsection (a). The Secretary of Defense shall promptly notify the Congress of any authorization to increase civilian personnel strength under this subsection.

TITLE VII—MILITARY TRAINING STUDENT LOADS

AUTHORIZATION OF TRAINING STUDENT LOADS

SEC. 701. (a) For fiscal year 1984, the components of the Armed Forces are authorized average military training student loads as follows:

(1) The Army, 71,817.

(2) The Navy, 66,911.

(3) The Marine Corps, 21,105.

(4) The Air Force, 49,007.

(5) The Army National Guard of the United States, 21,105.

(6) The Army Reserve, 12,724.

(7) The Naval Reserve, 2,886.

(8) The Marine Corps Reserve, 3,223.

(9) The Air National Guard of the United States, 2,845.

(10) The Air Force Reserve, 1,705.

(b) The average military student loads for the Army, the Navy, the Marine Corps, and the Air Force and the reserve components authorized in subsection (a) for fiscal year 1984 shall be adjusted consistent with the manpower strengths authorized in titles IV, V, and VI of this Act. Such adjustment shall be apportioned among the Army, the Navy, the Marine Corps, and the Air Force and the reserve components in such manner as the Secretary of Defense shall prescribe.

TITLE VIII—GENERAL PROVISIONS

REPEAL OF PROHIBITION AGAINST CONSOLIDATING FUNCTIONS OF THE MILITARY TRANSPORTATION COMMANDS

SEC. 801. Section 1110 of the Department of Defense Authorization Act, 1983, (Public Law 97-252; 96 Stat. 747), is repealed.

AUTHORIZATION TO PROVIDE RECIPROCAL COMMUNICATIONS SUPPORT OR RELATED SUPPLIES AND SERVICES

SEC. 802. (a) Chapter 147 of title 10, United States Code, is amended by inserting after section 2482, the following new section:

"§ 2483. Reciprocal communications support or related supplies and services

"The Secretary of Defense may, subject to the concurrence of the Secretary of State, enter into agreements with the Government of any friendly foreign country or international organization under which the United States agrees to provide communications support or related supplies and services to such country or international organization in return for the reciprocal provision of an equivalent value of communications support or related supplies and services by such country or international organization.".

(b) The table of sections at the beginning of such chapter is amended by inserting after the item relating to section 2482 the following new item:

"2483. Reciprocal communications support and related supplies and services.".

GENERAL COUNSEL OF THE DEPARTMENT OF DEFENSE,
Washington, D.C., February 28, 1983.

Hon. GEORGE BUSH,
President of the Senate,
Washington, D.C.

DEAR MR. PRESIDENT. There is forwarded herewith legislation, "To authorize appropriations for fiscal year 1984 for the Armed Forces for procurement, for research, development, test, and evaluation, and for operation and maintenance, to prescribe personnel strengths for such fiscal year for the Armed Forces and for civilian employees of the Department of Defense, and for other purposes."

In accordance with the Congressional Budget Act of 1974, we are also submitting herewith, as separate legislation, a similar request for authorization of appropriations for fiscal year 1985.

These proposals are part of the Department of Defense legislative program for the 98th Congress and the Office of Management and Budget advises that enactment of these proposals would be in accord with the program of the President.

Title I provides procurement authorization for the military departments and the Defense Agencies and for the United States share of the cost of the acquisition of the Airborne Early Warning and Control System by the North Atlantic Treaty Organization in amounts equal to the budget authority included in the President's budget for fiscal year 1984. It contains a provision that extends for fiscal year 1984 the authority to waive certain costs and to assume certain liability in connection with the NATO AWACS program. It also contains a provision authorizing the Department to provide secure voice communications systems and related items throughout the Government on either a reimbursable or non-reimbursable basis and authorizes the appropriation of funds for a special classified program.

Title II provides for the authorization of each of the research, development, test, and evaluation appropriations for the military departments and the Defense Agencies in amounts equal to the budget authority included in the President's budget for fiscal year 1984. The authorization contains a provision that authorizes the appropriation of funds that are necessary to cover increased pay costs and other employee benefits to preclude the necessity of submitting a request for a supplemental authorization for such non-discretionary personnel costs.

Title III provides for authorization of the operation and maintenance appropriations of the military departments and the Defense Agencies in amounts equal to the budget authority included in the President's budget for fiscal year 1984. The authorization contains a provision that authorizes the appropriation of funds that are necessary to cover increased pay costs, unbudgeted increases in fuel costs, and inflation in the cost of activities covered by title III. Title III also contains a provision that authorizes the Department of Defense to provide support to the 1984 Games of the XXIII Olympiad to be held in Los Angeles.

Title IV prescribes the end strengths for active duty personnel in each component of the armed forces as required by section 138(c)(1) of title 10, United States Code, in the numbers provided for by the budget authority and appropriations requested for these components for fiscal year 1984.

Title V provides for average strengths of the Selected Reserve of each reserve component of the armed forces as required by section 138(b) of title 10, United States Code, in the numbers provided for by the budget authority and appropriations requested for the Department of Defense in the President's budget for fiscal year 1984. Title V also prescribes the end strengths for reserve component members on full-time active duty for the purpose of administering the reserve forces and provides for an increase in the number of certain commissioned officers who may be serving on active duty in support of the reserve components.

Title VI provides for civilian personnel end strengths for each component of the Department of Defense as required by section 138(c)(2) of title 10, United States Code, in the numbers provided for by the budget authority in appropriations requested for the Department of Defense in the President's budget for fiscal year 1984.

Title VII provides for the average military training student loans as required by section 138(d)(1) of title 10, United States Code, in the numbers provided for this purpose in the President's budget for fiscal year 1984.

Title VIII consists of two general provisions. Section 801 repeals section 1110 of the Department of Defense Authorization Act, 1983, which prohibits the consolidation of the military transportation commands. Section 802 amends title 10, United States Code, by adding a new section, 2483, which authorizes the Department to furnish reciprocal communications support or related supplies and services.

Sincerely,

WILLIAM H. TAFT IV.

By Mr. SASSER (for himself, Mr. TSONGAS, Mr. PRYOR, Mr. RIEGLE, Mr. RANDOLPH, Mr. FORD, and Mr. BAUCUS):

S. 676. A bill to provide for capital assistance to State and local governments; to the Committee on Finance.

CAPITAL ASSISTANCE TO STATE AND LOCAL GOVERNMENTS

● Mr. SASSER. Mr. President, I am today introducing the Capital Assistance Revenue Sharing Act of 1983. I am introducing this legislation with the cosponsorship of my distinguished colleagues, Senator TSONGAS, Senator PRYOR, Senator RIEGLE, Senator RANDOLPH, Senator FORD, and Senator BAUCUS.

The purpose of this legislation is as clear as the needs it addresses: Federal funding for virtually immediate, back-to-work public works projects of State and local governments and the establishment of an ongoing program in which the Federal Government entitles State and local governments to assistance for their capital improvement needs by using the framework for assistance outlined in the general revenue-sharing program.

The bill would provide $3 billion annually for State and local governments. One-third of the funds would go to State governments and the remaining two-thirds to local governments. An additional half-billion dollars would be set aside to meet project requests for smaller communities that would not be eligible for funds under the regular formulae for distribution.

S. 676 also spells out just what the funds could be used for—roads, bridges, sewerage facilities, fire safety facilities, law enforcement facilities, and other essential public works activities.

While the bill has a projected life of 2 years, it is my hope that the success of this concept will make it a regular feature of Federal budgetary policy.

There are more than enough reasons to justify the establishment of this form of revenue sharing. Let me focus on what I believe are the four major arguments in its behalf.

First, it would create jobs more quickly than any other public works-jobs program under consideration. The capital budgets of State and local governments have declined dramatically in recent years, and in many cases the types of projects deferred are projects in which planning has been completed, designs approved; and bid specifications drawn. Once the Capital Assistance Revenue Sharing Act is approved and signed into law, funds would start flowing almost immediately, while State and local governments let bids and awarded contracts, and jobs could be created within 90 days in some cases. Every other public works-jobs program involves a much longer lead-time.

There is no accurate way to estimate the number of jobs which this legislation would create, but the impact of its immediacy will augment whatever number of jobs S. 676 would create.

Second, there is an urgent need for a permanent program of capital improvement assistance because of the condition of our Nation's basic infrastructure.

Our highways, public buildings, bridges, and waterworks are crumbling and tumbling and leaking at such rates as to demand definition as a national disaster.

Mayors, town council members, State legislators, county commissioners, and Governors have alluded to this impending disaster time and time again before the Governmental Affairs Subcommittee on Intergovernmental Relations during the past 6

years I have served on that panel as we strove to assay the fiscal needs and wants of State and local governments.

The hard numbers which define the actual infrastructure needs are so huge that they defy comprehension. For instance, in a recent report, the Associated General Contractors of America estimated public construction needs in the United States at $909.9 billion. This estimate can be put in some perspective when you consider that the $909.9 billion exceeds the amount—roughly $891 billion—it took to run the entire U.S. Government from its inception in 1789 under George Washington through the first fiscal year of the Government under President Dwight Eisenhower.

Several months ago, a national newsmagazine had a feature article on U.S. infrastructure needs, headlining the cost at $2.5 trillion.

These estimates, as well as others highlighted in different reports on our infrastructure needs, have certainly helped to focus attention on a critical problem that has been largely overlooked during the past decade. As with all problems which confront our society, this one did not go away simply because most of us chose to overlook it.

Now, of course, the problen is basking in attention. Both the administration and the Congress have focused on it through different legislative initiatives. Much of the impetus behind this activity stems from the appalling level of unemployment in our country and the realization that the construction and rehabilitation of public facilities means jobs.

We need to be concerned about jobs, of course, but we must look farther down the road, having learned a lesson from the past. Infrastructure needs will never cease, no matter what the rate of unemployment is. Streets, sewers, water treatment and pollution control facilities, mass transit, airports, and public buildings will always need replacement, repair, or rehabilitation.

If ever there was a proper time to set in place a program of Federal aid targeted to infrastructure needs, it is now. Now, when there is high recognition of both the need for, and the potential benefits of infrastructure improvements.

Third, there comes the question: Why use the relative simplicity of the revenue-sharing model as the framework for program of capital improvement assistance, which implies complexity?

The answer is that general revenue sharing works, and it works well. In fact, no program of Federal aid works so well. Less than 1 percent of the total cost of the program goes for administration and overhead—I might add, parenthetically, that if the same were true of all Federal programs, we might not have such a ballooning Federal budget deficit.

Created with broad, bipartisan backing in 1972, the program has been especially helpful to the Nation's local governments. Many local governments can count general revenue sharing as the only program under which they receive any Federal grant assistance.

I have no doubt that both the Senate and the House will give their overwhelming approval to the extension of general revenue sharing when the program comes up for reauthorization in the 98th Congress.

If there has been a problem with general revenue sharing, it is that economic conditions in our Nation have not allowed it to work as well as it could have worked.

When it was launched, the widespread hope and assumption among those who supported general revenue sharing was that it would be an ample and additional source of Federal funding to help meet some of the fiscal needs of State and local governments. The first general revenue sharing law stipulated that the funds be used for the "priority expenditures" of State and local governments, that is, for "ordinary and necessary maintenance and operating expenses for public safety, environmental protection, public transportation, health, recreation, libraries, social services for the poor or aged, and financial administration."

Clearly, it was the intention of the framers of this program that the funds be targeted primarily for the infrastructure needs of State and local governments.

Yet, a recession in 1973 and 1974 drained the revenues of State and local governments, causing them to postpone "priority expenditures" in capital improvements. Every government activity became, in effect, a "priority activity" and when the program was reauthorized in 1976 it became more like the virtual "no strings attached" program we have today.

The Capital Assistance Revenue Sharing Act would reimplement the text and spirit of the original general revenue sharing law, targeting the use of these funds to needed capital improvements. Not only would local governments receive general revenue sharing funds through the extension of the current GRS Act, they would also have capital assistance funds under a CARS Act—funds that would help to chip away at the enormous, nationwide infrastructure needs of our cities and counties and towns.

Then, in the future, even in the worst case economic conditions, infrastructure improvements and rehabilitation would be guaranteed. By guaranteeing such activity, the Federal Government will allow local governments the flexibility to target true priority expenditures in capital improvements, to focus when necessary on the more labor-intensive projects. In this way, we will have a built-in jobs-creation program "on the shelf" at all times. There would be no lag time in implementing an emergency public works-jobs program as there is now and as there will be with all of the legislative initiatives before us now. The funds will be there because of the Capital Assistance Revenue Sharing Act.

Fourth, we have to move in the direction of such a program because the fiscal condition of our fragile intergovernmental network of Federal, State and local activities demands it.

When general revenue sharing was established as a Federal program, it was done so at a time and in an environment that generated optimism about fiscal conditions. The Federal Government, with its broad-based tax system, would only see its revenues grow and grow as the Nation prospered. State governments and local governments had narrower, more restrictive tax bases, so the redistribution of ample Federal revenues—in addition to existing Federal programs—would help to redress the balance. Or so the argument went.

What happened was that the Federal Government initiated billions of dollars' worth of tax cuts; prices for basic energy supplies increased exponentially, skewering all economic projections; and State and local governments, reeling from a recession, were hit with a wave of taxpayer resentment.

By the beginning of the 1980's, nearly every State in the Union had in place a constitutional tax limitation or spending limitation measure. In those States in which the State retains legislative options regarding local tax powers, local governments have suffered severely.

Federal aid to State and local governments, which expanded with certainty every year for a quarter of a century, leveled out in fiscal year 1980 and declined in the subsequent 3 fiscal years.

As a consequence of all of these developments, the Council of State Governments reported in September 1982 that:

> After a financially turbulent year that saw almost half the states raise broad-based taxes, many states are still financially unstable. The persistent recession, federal program changes and budget cuts, along with self-imposed tax and spending limitations continue to threaten many states' financial security.

Seven States ended their 1982 fiscal year with deficits, and according to a recent survey by the National Governors Association, 9 out of 41 States responding said they expected budget deficits at the conclusion of the current fiscal year for States on June 30.

And only 5 weeks ago, the American Federation of State, County and Municipal Employees released a lengthy

study which cataloged current reductions in Federal aid targeted for infrastructure improvement and physical capital investment; the report put the total loss for a 3-year period in Tennessee along at $1.148 billion.

Insofar as capital spending is concerned, what the States face is a fiscal catch-22, described by the Council of State Governments as a situation in which the credit ratings of State and local governments are falling because of poor fiscal conditions, at the very same time these fiscal conditions force State and local governments to borrow additional funds for capital improvements because these same poor fiscal conditions are straining their customary sources of revenue.

The administration reponse has been to increase the use of block grants to States in order to provide the States with greater flexibility in meeting program needs. While a help in some activities, the block grant approach overlooks the broad infrastructure needs of local governments.

The Capital Assistance Revenue Sharing Act would allow State and local governments which know and understand their own capital needs better than any Federal agency, the range and flexibility to address their own capital priorities.

In sum, I urge prompt and positive consideration of S. 676, for it addresses clearly and directly the immediate need for jobs; it focuses on both the short-term and long-range infrastructure needs in our country; it reinvigorates the spirit of the most successful Federal aid program ever developed, general revenue sharing, and it helps local governments and State governments shore up their fiscal footing in our Nation's intergovernmental fiscal network.

Mr. President, I ask that the text of S. 676 be included in the RECORD at this point along with a factsheet detailing the provisions of the Capital Assistance Revenue Sharing Act.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 676

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) subtitle V of title 31, United States Code, is amended by adding at the end thereof the following new chapter:

"CHAPTER 74—CAPITAL ASSISTANCE TO STATE AND LOCAL GOVERNMENTS

"Sec. 7401. Congressional findings and declarations.
"Sec. 7402. Definitions.
"Sec. 7403. Payments out of the Trust Fund.
"Sec. 7404. Creation of Trust Fund; appropriations.
"Sec. 7405. Allocation among States.
"Sec. 7406. Entitlements of State governments.
"Sec. 7407. Entitlements of local governments.
"Sec. 7408. Discretionary Capital Assistance Trust Funds.
"Sec. 7409. Reports on use of funds; publication.
"Sec. 7410. Nondiscrimination provision.
"Sec. 7411. Miscellaneous provisions.
"Sec. 7412. Regulations.
"Sec. 7413. Termination.

"§ 7401. Congressional findings and declarations

"The Congress declares it is essential—

"(1) to provide unconditional capital fiscal assistance to State and local governments to assist them in meeting critical capital projects;

"(2) to undertake a national program of capital fiscal assistance that will help reduce unemployment and will help in the rebuilding of our Nation's infrastructure; and

"(3) to continue with the tradition of providing unconditional fiscal assistance to State and local governments that permits flexible local decisionmaking among our local governments about priority public service needs.

"§ 7402. Definitions

"In this chapter—

"(1) 'Secretary' means the Secretary of the Treasury.

"(2) 'Comptroller General' means the Comptroller General of the United States.

"(3) 'Trust Fund' means the State and Local Capital Assistance Trust Fund.

"(4) 'unit of local government' means—

"(A) the government of a county, municipality, township, or other unit of government below the State which is a unit of general government (determined on the basis of the same principles as are used by the Bureau of the Census for general statistical purposes), and

"(B) the recognized governing body of an Indian tribe or Alaskan Native Village which performs substantial governmental functions.

"(5) 'population' means resident population as determined by the Bureau of the Census for general statistical purposes.

"(6) 'personal income' means the income of individuals, as determined by the Department of Commerce for national income purposes.

"(7) 'township' includes equivalent subdivisions of government having different designations (such as 'towns'), and shall be determined on the basis of the same principles as are used by the Bureau of the Census for general statistical purposes.

"(8) 'construction' means the erection of new structures and the acquisition and installation of initial equipment for such structure.

"(9) 'rehabilitation' means the alteration or modernization of an existing structure.

"(10) 'relative income factor' is an amount determined with respect to a State by dividing—

"(A) the per capita income of the United States, by

"(B) the per capita income of such State.

"(11) 'income' means the total money income received from all sources, as determined by the Bureau of the Census for general statistical purposes.

"(12) 'entitlement period' means—

"(A) the period beginning on January 1, 1983, and ending on September 30, 1983, and

"(B) each of the 1-year periods beginning on October 1 of 1983, 1984, and 1985.

"§ 7403. Payments out of the Trust Fund

"(a)(1) Except as otherwise provided in this chapter, the Secretary shall, for each entitlement period, pay out of the Trust Fund—

"(A) to each State government a total amount equal to the entitlement of such State government determined under section 7406 for such period, and

"(B) to each unit of local government, a total amount equal to the entitlement of such unit of government determined under section 7407.

"(2)(A) Payments made under paragraph (1) shall be made in quarterly installments and shall be paid no later than 5 days after the close of the quarter.

"(B) Payments made under paragraph (1) may be initially made on the basis of estimates.

"(C) Proper adjustment shall be made in the amount of any payment to a State government or a unit of local government to the extent that the payments previously made to such government under this chapter were in excess of, or less than, the amounts required to be paid.

"(D) The Secretary may reserve such percentage (not exceeding 0.5 percent) of the total entitlement payment for any entitlement period with respect to any State government and all units of local government within such State as he deems necessary to insure that there will be sufficient funds available to pay adjustments due after the final allocation of funds among such governments.

"(b)(1) Any funds paid to a State or to any unit of local government under this chapter may only be used for capital expenditures.

"(2) In this chapter, 'capital expenditure' means any expense incurred in the construction or rehabilitation of any public facility, including (but not limited to) any—

"(A) education facility;

"(B) energy facility;

"(C) fire safety facility;

"(D) health clinic or hospital;

"(E) law enforcement facility, jail, or prison;

"(F) recreation facility;

"(G) solid waste facility;

"(H) telecommunications facility;

"(I) highway, road, bridge, railroad, port, river, inland water, airport, pipeline, or mass transit facility;

"(J) facility for the storage, transportation, treatment, or distribution of water; or

"(K) waste water disposal facility.

"§ 7404. Creation of Trust Fund; appropriations

"(a)(1) There is hereby established within the Treasury of the United States a trust fund to be known as the 'State and Local Government Capital Fiscal Assistance Trust Fund'. The Trust Fund shall consist of such amounts as may be appropriated to it and deposited in it as provided in subsection (b) of this section. Except as provided in this chapter, amounts in the Trust Fund may be used only for the payments to State and local governments provided by this chapter.

"(2) The Secretary of the Treasury shall be the trustee of the Trust Fund and shall report to the Congress not later than March 1 of each year on the operation and status of the Trust Fund during the preceding fiscal year.

"(b) There is appropriated to the Trust Fund, out of amounts in the general fund of the Treasury attributable to the collections of the Federal individual income taxes not otherwise appropriated $3,000,000,000 for each entitlement period.

"(c) The Secretary shall from time to time transfer from the Trust Fund to the general fund of the Treasury any moneys in the Trust Fund which he determines will not be needed to make payments to State govern-

ments and units of local government under this chapter.

"§ 7405. Allocation among States

"(a) There shall be allocated to each State for each entitlement period, out of amounts appropriated under section 7404(b) of this title for that entitlement period, an amount which bears the same ratio to the amount appropriated under that section for that period as the amount allocable to that State under subsection (b) of this section bears to the sum of the amounts allocable to all States under subsection (b) of this section.

"(b)(1) For purposes of subsection (a) of this section, the amount allocable to a State under this subsection for any entitlement period is the amount which bears the same ratio to the amount appropriated under section 7404(b) for such period as—

"(A) the population of that State, multiplied by the relative income factor of that State, bears to

"(B) the sum of the products determined under subparagraph (A) for all States.

"§ 7406. Entitlements of State governments

"(A) The State government shall be entitled to receive 33⅓ percent of the amount allocated to that State for each entitlement period. The remaining portion of each State's allocation shall be allocated among the units of local government of that State as provided in section 7407.

"(b)(1) The entitlement of any State government for any entitlement period shall be reduced by the amount (if any) by which—

"(A) the average of the aggregate amounts transferred by the State government (out of its own sources) during such period and the preceding entitlement period to all units of local government in such State, is less than,

"(B) the similar aggregate amount for the one-year period beginning July 1, 1981.

For purposes of subparagraph (A), the amount of any reduction in the entitlement of a State government under this subsection, for subsequent years, be treated as an amount transferred by the State government (out of its own sources) during such period to units of local government in such States.

"(2) If the State government establishes to the satisfaction of the Secretary that since June 30, 1982, it has assumed responsibility for a category of expenditures which (before July 1, 1982) was the responsibility of local governments located in such State, then, under regulations prescribed by the Secretary, the aggregate amount taken into account under paragraph (1)(B) shall be reduced to the extent that increased State government spending (out of its own sources) for such category has replaced corresponding amounts which for the 1-year period beginning July 1, 1981, it transferred to units of local government.

"(3) If the Secretary has reason to believe that paragraph (1) requires a reduction in the entitlement of any State government for any entitlement period, he shall give reasonable notice and opportunity for hearing to the State. If, thereafter, he determines that paragraph (1) requires the reduction of such entitlement, he shall also determine the amount of such reduction and shall notify the Governor of such State of such determinations and shall withhold from subsequent payments to such State government under this subchapter an amount equal to such reduction.

"(4) An amount equal to the reduction in the entitlement of any State government which results from the application of this subsection shall be transferred from the Trust Fund to the general fund of the Treasury on the day on which such reduction becomes final.

"§ 7407. Entitlements of local governments

"(a) At least 66⅔ percent of the amount allocated to any State under section 7405 for any entitlement period shall be available for payments to units of local government of such State for such period.

"(b) Each unit of local government which is eligible to receive payments under this section for any entitlement period shall be entitled to receive the amount allocated to such unit of government for such period under subsection (c).

"(c)(1) Each unit of local government of a State shall be allocated that portion of the amount available for all units of local government of such State described in subsection (a) which bears the same relationship to the total of such available amount as the population of such unit of local government bears to the total population of such State.

"(2) For purposes of paragraph (1), the population of any county government shall be reduced by the population of any other unit of local government which is eligible to receive payments under this section for the entitlement period to the extent that the population of such other unit is included in the population of such county government.

"(d)(1) No unit of local government of any State shall receive—

"(A) more than 20 percent of the amount available for all units of local governments of such State described in subsection (a) for the entitlement period, or

"(B) less than 0.5 percent of such available amount.

"(2) The Secretary shall adjust the allocations made under subsection (c) in order to bring those allocations into compliance with the provisions of paragraph (1).

"(e) All units of local government shall be eligible to receive payments under this section for any entitlement period other than—

"(1) any municipality, township, Indian tribe, or Alaskan Native Village which has a population of less than 35,000.

"(2) any county government with a population of less than 10,000, and

"(3) any unit of local government which is allocated less than $10,000 under subsection (c) for such period.

"(f) If any county government is ineligible to receive payments under this section for the entitlement period, the amount allocated to such county government under subsection (c) for such period shall be added to the entitlement under section 7406 for such period for the State in which such county is located.

"(g) For purposes of this section, in any State in which any unit of local government (other than a county government) constitutes the next level of government below the State government level, such unit of government shall be treated as a county government with respect to that portion of the State's geographic area.

"§ 7408. Creation of Discretionary Capital Assistance Trust Fund; appropriations

"(a)(1) There is hereby established within the Treasury of the United States a trust fund to be known as the Discretionary Capital Assistance Trust Fund. This Trust Fund shall remain available without fiscal year limitation and shall consist of such amounts as may be appropriated to it and deposited in it as provided in subsection (b). The amounts in the Trust Fund may only be used for the payments to local governments provided by this section.

"(2) The Secretary of the Treasury shall be the trustee of the Discretionary Capital Assistance Trust Fund and shall report to the Congress not later than September 30 of each year on the operation of such Trust Fund during the preceding fiscal year.

"(b) There is appropriated to the Discretionary Capital Assistance Trust Fund, out of amounts in the general fund of the Treasury attributable to the collections of the Federal individual income taxes not otherwise appropriated—

"(1) for the period beginning January 1, 1983, and ending September 30, 1983, $500,000,000;

"(2) for the fiscal year beginning October 1, 1983, $500,000,000; and

"(3) for the fiscal year beginning October 1, 1984, $500,000,000.

"(c) The Secretary may pay out of the Discretionary Capital Assistance Trust Fund to any unit of local government eligible to receive payments under this section for the entitlement period any amount determined in accordance with regulations prescribed by the Secretary.

"(d) Any unit of local government which is not eligible to receive a payment under section 7407 for the entitlement period shall be eligible to receive a payment under this section for such entitlement period.

"§ 7409. Reports on use of funds; publication

"(a) Each State government and unit of local government which receives funds under this chapter shall, after the close of each entitlement period, submit a report to the Secretary setting forth the amounts and purposes for which funds received during such period have been spent or obligated. Such reports shall be in such form and detail and shall be submitted at such time as the Secretary may prescribe.

"(b) Each State government and unit of local government which expects to receive funds under this chapter for any entitlement period shall submit a report to the Secretary setting forth the amounts and purposes for which it plans to spend or obligate the funds which it expects to receive during such period. Such reports shall be in such form and detail as the Secretary may prescribe and shall be submitted at such time before the beginning of the entitlement period as the Secretary may prescribe.

"(c) Each State government and unit of local government shall have a copy of each report submitted by it under subsection (a) or (b) of this section published in a newspaper which is published within the State and has general circulation within the geographic area of that government. Each State government and unit of local government shall advise the news media of the publication of its reports pursuant to this subsection.

"§ 7410. Nondiscrimination provision

"(a) No person in the United States shall on the ground of race, color, national origin, or sex be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity funded in whole or in part with funds made available under this chapter.

"(b) Whenever the Secretary determines that a State government or unit of local government has failed to comply with subsection (a) of this section or an applicable regulation, he shall notify the Governor of the State (or, in the case of a unit of local government, the Governor of the State in which such unit is located) of the noncompliance and shall request the Governor to secure compliance. If within a reasonable period of time the Governor fails or refuses

to secure compliance, the Secretary is authorized (1) to refer the matter to the Attorney General with a recommendation that an appropriate civil action be instituted; (2) to exercise the powers and functions provided by title VI of the Civil Rights Act of 1964; or (3) to take such other action as may be provided by law.

"(c) When a matter is referred to the Attorney General pursuant to subsection (b), or whenever he has reason to believe that a State government or unit of local government is engaged in a pattern or practice in violation of the provisions of this section, the Attorney General may bring a civil action in any appropriate United States district court for such relief as may be appropriate, including injunctive relief.

"§ 7411. Miscellaneous provisions

"(a) In order to qualify for any payment under this chapter for any entitlement period, a State government or unit of local government must establish (in accordance with regulations prescribed by the Secretary, and, with respect to a unit of local government, after an opportunity for review and comment by the Governor of the State in which such unit is located) to the satisfaction of the Secretary that—

"(1) it will establish a trust fund in which it will deposit all payments it receives under this chapter;

"(2) it will use amounts in such trust fund (including any interest earned thereon while in such trust fund) during such reasonable period or periods as may be provided in such regulations;

"(3) it will—

"(A) use fiscal, accounting, and audit procedures which conform to guidelines established therefor by the Secretary (after consultation with the Comptroller General),

"(B) provide to the Secretary (and to the Comptroller General), on reasonable notice, access to, and the right to examine, such books, documents, papers, or records as the Secretary may reasonably require for purposes of reviewing compliance with this chapter (or, in the case of the Comptroller General, as the Comptroller General may reasonably require for purposes of reviewing compliance and operations under subsection (c)(2)), and

"(C) make such annual and interim reports to the Secretary as he may reasonably require;

"(4) all laborers and mechanics employed by contractors or subcontractors in the performance of work on any construction project, will be paid wages at rates not less than those prevailing on similar construction in the locality as determined by the Secretary of Labor in accordance with the Davis-Bacon Act, as amended, and that with respect to the labor standards specified in this paragraph the Secretary of Labor shall act in accordance with Reorganization Plan Numbered 14 of 1950 and section 2 of the Act of June 13, 1943 (48 Stat. 948, chapter 482; 40 U.S.C. 276c); and

"(5) individuals employed by it whose wages are paid in whole or in part out of its trust fund established under paragraph (1) will be paid wages which are not lower than the prevailing rates of pay for persons employed in similar public occupations by the same employer.

"(b) If the Secretary determines that a State government or unit of local government has failed to comply substantially with any provision of subsection (a) of this section or any regulations prescribed thereunder, after giving reasonable notice and opportunity for a hearing to the Governor of the State or the chief executive officer of the unit of local government, he shall notify the State government or unit of local government that if it fails to take corrective action within 60 days from the date of receipt of such notification further payments to it will be withheld for the remainder of the entitlement period and for any subsequent entitlement period until such time as the Secretary is satisfied that appropriate corrective action has been taken and that there will no longer be any failure to comply. Until he is satisfied, the Secretary shall make no further payments of such amounts.

"(c) (1) The Secretary shall provide for such accounting and auditing procedures, evaluations, and reviews as may be necessary to insure that the expenditures of funds received under this chapter by State governments and units of local government comply fully with the requirements of this chapter. The Secretary is authorized to accept an audit by a State of such expenditures of a State government or unit of local government if he determines that such audit and the audit procedures of the State are sufficiently reliable to enable him to carry out his duties under this chapter.

"(2) The Comptroller General of the United States shall make such reviews of the work as done by the Secretary, the State governments, and the units of local government as may be necessary for the Congress to evaluate compliance and operations under this chapter.

"(d)(1) Except as provided in regulations, the determination of allocations and entitlements for any entitlement period shall be made as of the first day of the third month immediately preceding the beginning of such period.

"(2)(A) Except as provided in subparagraph (B), the data used in making any determination under this chapter shall be the most recently available data provided by the Bureau of the Census or the Department of Commerce, as the case may be.

"(B) Where the Secretary determines that the data referred to in subparagraph (A) are not current enough or are not comprehensive enough to provide for equitable allocations, he may use such additional data (including data based on estimates) as the Secretary may prescribe under regulations.

"(e) For purposes of this chapter, the District of Columbia shall be treated both—

"(1) as a State (and any reference to the Governor of a State shall, in the case of the District of Columbia, be treated as a reference to the Mayor of the District of Columbia), and

"(2) as a county area which has no units of local government (other than itself) within the geographic area.

"§ 7412. Regulations

"(a) The Secretary shall prescribe such regulations as are necessary to carry out the provisions of this chapter.

"(b) The rulemaking provisions of subchapter II of chapter 5 of title 5, United States Code, shall apply to any regulations prescribed under this chapter.

"§ 7413. Termination

All authorities under this chapter shall expire on September 30, 1985.".

(b) The table of chapters for subtitle V of such title is amended by adding at the end thereof the following new item:

"74. Capital Assistance to State and Local Governments ..... 7401".

(c) The Secretary of the Treasury shall prescribe the regulations required under section 7408(c) of such title within 90 days after the date of enactment of this Act.

THE CAPITAL ASSISTANCE REVENUE SHARING ACT OF 1983—FACTSHEET

The Capital Assistance Revenue Sharing (CARS) Act of 1983 is designed to establish an ongoing federal program of financial assistance to state and local governments for the purpose of helping state and local governments to meet the demand for new capital construction as well as infrastructure repair and rehabilitation.

In order to allow state and local governments maximum flexibility in making their own determinations as to what capital improvement projects to undertake, the Act reaches back to, and complements the 1972 general revenue sharing law and employs the GRS formulae for distribution of funds. State and local governments will, in effect, be given virtually "no-strings-attached" federal funds for capital improvements.

Specifically, the CARS Act will do the following:

Authorize, through entitlement, capital improvements assistance at a level of $3 billion annually, with states receiving one-third of the funds and local governments receiving two-thirds of the funds;

Distribute the funds primarily on the bases of formulae using population and income;

Set base and ceiling levels for funds that any one unit of local government could receive (no more than 20% and no less than 0.5% for any one unit of government from the total share for local governments within a state);

Define the types of capital improvements permitted with the use of the funds;

Set a cutoff population base in order to determine eligibility for funds (municipalities with a population of less than 35,000 and counties with a population of less than 10,000 will not be eligible);

Create a separate trust fund, authorized at $500 million annually and administered by the Department of Treasury, to fund needed capital improvement projects in local governments not eligible for other CARS funds because of population;

Respect certain, standard cross-cutting requirements with regard to auditing, civil rights, Davis-Bacon and other provisions; and

Contain a sunset provision terminating the Act at the end of Fiscal Year 1985.●

By Mr. HEFLIN:

S. 677. A bill to amend the Federal Rules of Civil Procedure with respect to the examination of prospective jurors; to the Committee on the Judiciary.

VOIR DIRE PROCEDURE

Mr. HEFLIN. Mr. President, I rise today to introduce a bill to amend the Federal Rules of Civil Procedure so to require the court to permit counsel to participate directly in the examination of prospective jurors in a civil case. This bill is similar to Senate bill 386, introduced by me earlier this session, which makes these changes in the Federal Rules of Criminal Procedure.

The reasons for these proposed changes are outlined in the statement I made on the introduction of Senate

bill 386, to which I would refer my colleagues.

Mr. President, I ask that the text of this bill be printed in the RECORD after my remarks.

Thank you, Mr. President.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 677

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That Rule 47 (a) of the Federal Rules of Civil Procedure is amended to read as follows:

"(a) EXAMINATION OF JURORS.—The court shall permit the parties or their attorneys to conduct the oral examination of prospective jurors, and may, in addition to such examination, conduct its own examination. The court may impose such reasonable limitations as it deems proper with respect to the examination of prospective jurors by the parties or their attorneys, except that the defendant or his attorney and the attorney for the government may each request, and shall be granted not less than thirty minutes for such examination. In cases where there is more than one defendant, the court shall allow the attorneys for such defendants an additional ten minutes for each additional defendant.".

By Mr. QUAYLE (for himself and Mr. LEVIN):

S. 678. A bill making emergency supplemental appropriations for the fiscal year 1983; to the Committee on Appropriations.

JOBS BILL SHOULD PROVIDE JOBS

● Mr. QUAYLE. Mr. President, the emergency supplemental appropriations bill is being described as an anti-recession jobs bill by some—but I have grave doubts as to how many items in that bill deserve that label. I have expressed my concerns in a memorandum to Senator HATFIELD, chairman of the Appropriations Committee, and have suggested to him various steps that could be taken to insure that the bill really becomes what it has been labeled. A copy of that memorandum is attached to my statement.

The Appropriations Committee will mark up the bill on Monday, March 7 and it will therefore not be ready for Senate action until well into next week. I believe that the issues raised by this bill are of major importance and deserve reasoned consideration. That will not be possible, however, unless we deal with the immediate emergency that is facing us—the fact that the States will soon run out of money to pay unemployment compensation claims. Additional money must be made available by next Friday, March 11. I am therefore introducing with Senator CARL LEVIN an emergency supplemental appropriation bill that will only be sufficient to meet all the States' needs for unemployment compensation until the Easter recess. By enacting that bill immediately, we can both deal with the unemployment compensation crisis and give fair consideration to the complex issues involved in the jobs supplemental.

I ask unanimous consent that the text of my memorandum to Senator HATFIELD and the text of the bill be printed in the RECORD at this point.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

COMMITTEE ON LABOR AND HUMAN RESOURCES,
Washington, D.C.

To: Senator MARK HATFIELD. Chairman, Senate Appropriations Committee.
From: DAN QUAYLE.
Date: March 2, 1983.

As you know, I am concerned that the Emergency Supplemental Appropriation Act actually be a constructive response to current high unemployment rates. It seems to me that any measure which promises to provide jobs as a countercyclical tool must be based on four principles:

First, it must provide a reasonable number of jobs in relationship to the proposed expenditure;

Second, it must provide those jobs during the current high unemployment period;

Third, it must concentrate jobs areas of high unemployment; and

Fourth, it must target those jobs on those hardest hit by unemployment.

It is, of course, difficult to assure compliance with these principles in the context of an appropriations bill. However, I believe that the very same conditions which justify an emergency bill require a non-traditional approach to that bill.

I therefore recommend that with respect to any appropriations account that is included in the emergency bill *because it is designed as a jobs response to the current recession,* the following provisos be added to the appropriations language:

1. No grant shall be made under the program unless the grantee certifies that funds will be used so that there will be at least one person year of direct employment for every $20,000 of funds received.

2. Funds shall be available for obligation until September 30, 1983 and for expenditure for no more than 18 months after date of obligation.

3. Funds shall be distributed so that at least 75% of the funds are distributed to States (in the case of State grant programs) or areas (in the case of direct grants to substate areas) in which the rate of unemployment for the last three months of 1982 was higher than the national average rate of unemployment.

4. No grant shall be made under the program unless 75% of the persons hired pursuant to the grant shall be certified by the local agency of the USES as unemployed and as having been unemployed for at least 15 weeks in the preceding six months.

The inclusion of such language would provide statutory safeguards that the maximum number of jobs be created, that they be created during the period when unemployment is projected to remain in the 10% range and that the jobs be targeted both to high unemployment areas and to those hardest hit by unemployment.

I believe it is important that these provisions be incorporated into the House passed bill either in the Appropriations Committee or on the floor. We are promising the American people a jobs bill and I fear that without such provisions the bill would fall short of the promises.

S. 678

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the following sums are appropriated, out of any money in the Treasury not otherwise appropriated, for the fiscal year 1983;

DEPARTMENT OF LABOR

EMPLOYMENT AND TRAINING ADMINISTRATION

ADVANCES TO THE UNEMPLOYMENT TRUST FUND AND OTHER FUNDS

For an additional amount for "Advances to the Unemployment Trust Fund and Other Funds", $600,000,000 to remain available until September 30, 1984.●

By Mr. PERCY:

S. 679. A bill to establish a program to provide funds to States for the purpose of job opportunities and business stimulation, and for other purposes; to the Committee on Governmental Affairs.

JOB OPPORTUNITY AND BUSINESS STIMULATION

Mr. PERCY. Mr. President, it is my privilege to introduce today in the Senate a creative and sound approach to this Nation's unemployment problem, one which was developed and introduced in the House of Representatives by my distinguished Illinois colleague, Congresswoman LYNN MARTIN.

This legislation—H.R. 116 in the House—authorizes a new type of revenue-sharing program to be used by the States, with Governors as the key leaders in developing employment programs for the unemployed.

Our legislation provides for a 2-year program of grants to the States, with a yearly authorization of $3 billion. The funds would be allocated among the States according to a formula based one-third on population and two-thirds on wage and salary growth compared to the national average. All of the money will be under the jurisdiction of the Governor of each State. He or she will be directed to spend 50 percent of the money on qualifying employment projects in those counties of the State which have above average unemployment and below average per capita income, according to a formula spelled out in the bill. The other 50 percent can be spent in the rest of the State.

In all cases of funding, it is the Governor who determines what jobs programs will be undertaken. He must consult with the State job training coordinating council as established last year by the Job Training Partnership Act. The council is composed of business and labor representatives and of State and local officials. He must determine that the projects funded will contribute most to the creation of jobs for the unemployed in the State and, further, he is required to present an explanation of how these expenditures can be expected to increase jobs and why one particular use of funds to create jobs was chosen over another.

The funds may be used within the State for any program, project, or activity, the principal purpose of which is to increase the number of jobs available within a State or eligible county area. Some good examples of eligible activities are: Retraining dislocated workers; buying down mortgages; building industrial parks; loans or grants to businesses for equipment and modernization, et cetera. In effect, the money can be used for a host of job-creating activities similar to those funded through the UDAG, community development block grant, and EDA programs. The major difference, however, is that for the first time, all of these job stimulus activities can be considered as part of a statewide comprehensive strategy to increase employment. The other major benefit, as I see it, is that there is no limit to the creativity and initiative of the individual States in gearing job creation programs to their own unique needs.

Mr. President, I have been a supporter of general revenue sharing since I first cosponsored the first legislation for this purpose with HOWARD BAKER in 1967. Few Government programs, in my judgment, have worked as well. Within certain limits, also contained in my bill, the States are free to develop individualized responses to their own problems, unhampered by stringent categorical or formula requirements enacted by Congress to muster the necessary political support for passage. I believe that this revenue-sharing concept can be applied as well to our search for solutions to this Nation's critical unemployment problems.

Illinois problems are not the same as those in Arkansas. Within my State, Danville's problems are not the same as Quincy's. Local areas are unique in their talents, resources, employment base, and needs. Therefore, I feel that to the greatest extent possible, their response to local problems should be allowed to be unique as well.

Several times in my remarks, I have mentioned limits, and I would like to make clear what they are. Funds received under the bill cannot be used as a means of fiscal substitution, to provide social services, to displace another employed worker, or to reduce taxes. It also contains provisions similar to those in the revenue sharing and community development block grant programs to provide for public participation in the development of programs.

Mr. President, I ask unanimous consent that two tables be printed in the RECORD at the conclusion of my remarks: The first, a list of the anticipated State allocations pursuant to this legislation, and the second, a list of the allocations within the State of Illinois to counties most seriously affected by unemployment.

The situation in my State has brought us almost to the point of despair. Simply stated, and using January 1983 preliminary data, this is the bad news:

Unemployment rate

City	*Percent*
Chicago	12.7
Danville	23.6
Decatur	20.2
East St. Louis	13.6
Joliet	22.5
Kankakee	21.2
Moline	21.1
Peoria	19.5
Quincy	19.1
Rockford	25.5
Rock Island	18.9
Springfield	11.3

Our statewide unemployment rate in Illinois is 13.5 percent and, in all cases, the rate everywhere within the State is running far in excess of the national average.

I know that many different solutions have been proposed to meet our immediate unemployment problems. I add my own to expand the debate and bring to the table for discussion what I believe to be a very creative and easily implemented proposal. I commend Mrs. MARTIN for her thoughtfulness and diligence in the development of this proposal, and look forward to working with her, as well as with my Senate colleagues, on its behalf.

There being no objection, the tables were ordered to be printed in the RECORD, as follows:

STATE AREA ALLOCATIONS

By Mr. SARBANES (for himself and Mr. MATHIAS):

S. 680. A bill entitled the "Gladys Noon Spellman Parkway"; to the Committee on Energy and Natural Resources.

GLADYS NOON SPELLMAN PARKWAY

Mr. SARBANES. Mr. President, I am introducing legislation today with my colleague from Maryland, Senator CHARLES MCC. MATHIAS, JR., to provide a fitting tribute to Gladys Noon Spellman, one of Maryland's most distinguished citizens. Congresswoman Gladys Spellman spent a lifetime dedicated to public service, and her years in the House of Representatives are remembered for her record of achievement and her great respect for the democratic process. She touched many lives, and this legislation pays tribute to her achievements by renaming the Baltimore-Washington Parkway in her honor.

Designation of the parkway would be an appropriate monument to a great legislator. Gladys Spellman was first elected to the U.S. House of Representatives in 1974; and with the spirit of boundless enthusiasm which characterized all of her activities, she set about the process of upgrading the Baltimore-Washington Parkway, which was then in a state of disrepair and ran through the center of Maryland's Fifth District. She guided legislation through the House Appropriations Committee, which provided funds for repairing and resurfacing the parkway. Knowing the importance of this regional transportation asset to visitors to the Nation's Capital, as well as her own constituents, she held a series of meetings to expedite planning and construction. The repaving was completed in 1976.

These efforts to improve the parkway were just a small part of her activities on behalf of regional transportation programs. She was an early and strong supporter of the regional Metrorail system, both as a member of the Prince George's County Council and later as a Member of Congress. Gladys Spellman believed in government and knew how to make government at all levels work in a spirit of cooperation and mutual concern.

In the 1982 session of the Maryland General Assembly in Annapolis, that body passed a joint resolution which requested the Maryland Department of Transportation to rename that portion of the Baltimore-Washington Parkway under the jurisdiction of the State "The Gladys Noon Spellman Parkway." The resolution further urged the U.S. Congress to pass legislation designating the Federal portion of the highway. Those of you who have driven the highway in the last 6 months should have noticed that the State has already complied with the general assembly's directions.

The fine parkway between Baltimore and Washington, the gateway to both cities and a vital transportation link, is already a monument to the unique abilities of a great legislator and the dedication and work of Gladys Spellman. Designation of the parkway as the Gladys Noon Spellman Parkway would make this tribute a permanent reality.

I ask unanimous consent that the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 680

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Congress finds that Gladys Noon Spellman, elected to four terms in the House of Representatives from the State of Maryland, should be afforded recognition not only for her personal efforts in upgrading one of the Capital region's most important transportation corridors, but more broadly for the dedication, commitment, and concern she expended on behalf of the people of Maryland. The quality of her service to the public exemplifies the high ideals and principles she held paramount.

SEC. 2. The parkway, under the jurisdiction of the Secretary of the Interior, in the State of Maryland known as the Baltimore-Washington Parkway, shall hereafter be known as and designated as the, "Gladys Noon Spellman Parkway." Any reference in any sign, law, map, regulation, document, record, or other paper of the United States to such parkway shall be held to be a reference to the "Gladys Noon Spellman Parkway" and any future signs, regulations, records, maps, or other documents of the United States referring to this parkway shall bear the name "Gladys Noon Spellman Parkway." The Secretary of the Interior shall, before October 1, 1983, replace the existing signs for such parkway with appropriate signs designating the parkway as the "Gladys Noon Spellman Parkway."

SEC. 3. The Secretary of the Interior is authorized and directed in cooperation with the State of Maryland, to design and erect a suitable location adjacent to the Gladys Noon Spellman Parkway an appropriate marker commemorating the outstanding contributions of Gladys Noon Spellman.

SEC. 4. Effective October 1, 1983, there are hereby authorized to be appropriated such sums as are necessary to carry out the provisions of this Act.

By Mr. EXON:

S. 681. A bill to authorize the Secretary of the Interior to engage in a feasibility study of water resources development and for other purposes in the Central Platte Valley, Nebr.; to the Committee on Energy and Natural Resources.

PRAIRIE BEND FEASIBILITY STUDY

Mr. EXON. Mr. President, the legislation which I am introducing today would authorize a 4-year study to examine the potential for irrigation of up to 70,000 acres utilizing water from the Platte River and stabilization of ground water levels over an area of about 136,000 acres. The study, and I emphasize that it is precisely that, a

study, would also examine the potential for outdoor recreation and the enhancement of habitat for waterfowl including the sandhill crane and the endangered whooping crane.

This measure was introduced in the 97th Congress, and was included in S. 2443, which passed the Senate on October 1, 1982. This bill was amended by the House and returned to the Senate as H.R. 5536, on December 18, 1982. The bill, however, was not acted upon before the 97th Congress had adjourned. It is evident that support exists for this study in both the House and the Senate.

Mr. President, this study is important in assisting the State of Nebraska to determine an appropriate response to the critical water needs of the Central Platte Valley. Preliminary investigations have indicated that, due to declining groundwater problems and increasing energy costs to operate irrigation systems, the area of the Central Platte Valley will be forced to revert to dryland farming over the next 25 to 35 years.

The authorization of this feasibility study will provide the State of Nebraska with information to determine whether a multipurpose project will best address the problems of this area of my State. The maintenance of a reliable irrigation economy, flood protection, maintenance of the wildlife habitat for migratory birds including the sandhill and whooping cranes in addition to streamflow regulation, improved groundwater quality, and energy savings, are among the issues to be addressed.

In addition, this study should closely examine the feasibility of alternatives to the development of a multipurpose project such as the use of groundwater, which may make it unnecessary to divert surface water from the Platte River.

Mr. President, I am hopeful that, with authorization of the study, the Bureau and the local natural resource districts cooperating on this appraisal, will fully examine the impact of proposed diversions from the Platte River. Water is a scarce commodity, and litigation and controversy has escalated in recent years over the withdrawal of excessive or unreasonable amounts of surface waters. The Prairie Bend study should focus considerable attention on the average annual flow of the Platte and consider diversions which support a reasonable groundwater recharge.

The study has the strong support of the State and the Central Platte Natural Resource District has expressed a willingness to share costs on this study through both financial assistance and in-kind services amounting to nearly 40 percent of the estimated cost.

I would urge the Senate's support for this measure, and I ask unanimous consent that the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 681

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Secretary of the Interior is hereby authorized to engage in a feasibility study for the Prairie Bend unit, Pick-Sloan Missouri River Basin program, located in Dawson, Buffalo, and Hall Counties in Nebraska for irrigation, stabilization of ground-water levels, enhancement of water quality, small community and rural domestic water supplies, management of fish and wildlife habitat, public outdoor recreation, flood control, and other purposes determined to be appropriate. Such feasibility study shall include a detailed report on any effects the proposed project may have on wildlife habitat, including habitat of the sandhill crane and the endangered whooping crane. Before funds are expended for the feasibility study, the State of Nebraska, or other non-Federal entity, shall agree to participate in the study and to share in the cost of the study. The non-Federal share of the costs may be partly or wholly in the form of services directly related to the conduct of the study.

By Mr. BUMPERS:

S. 682. A bill to amend the Agricultural Act of 1949 to modify the acreage base to be used for a farm under the acreage limitation programs for the 1983 crops of wheat, feed grains, and rice; to the Committee on Agricultuve, Nutrition, and Forestry.

FARM ACREAGE BASE STANDARDS

● Mr. BUMPERS. Mr. President, last year when we passed the Omnibus Reconciliation Act of 1982, we froze the farm acreage base at 1982 calculation levels for the 1983 crops of wheat, feed grains, and rice for those producers who wish to participate under the Federal programs for these crops. I think that this was a mistake, and today I am offering legislation to restore the acreage base standards set out in the 1981 Farm Act.

Under the Agriculture and Food Act of 1981 (Public Law 97-98), producers were eligible to establish their acreage base every year before entering a Federal limitation program for their program crop, by proving either the acreage planted on the farm to the particular crop for harvest in the crop year immediately preceding the year for which the determination was to be made or, at the discretion of the Secretary, the average acreage planted in the particular crop for harvest in the 2 crop years immediately preceding the year for which the determination was to be made. The 1981 act also removed the last vestiges of the allotment system for rice, and made available Federal program benefits to all rice producers as of the 1982 crop year.

In my State of Arkansas, as in many other States, the patterns of row crop agriculture have undergone considerable changes in the last few years and will possibly evolve further in the coming years. Wheat production has become increasingly important to Arkansas, with harvested acreage jumping from 865,000 acres in 1980 to over 1,760,000 acres in 1982 and representing production of 68,640,000 bushels in 1982, up from 32,870,000 in 1980.

We have also experienced an expansion of production of rice in Arkansas, especially in the northeast section of the State. With the opening of the program for 1982, many new rice farmers went to tremendous expense, sometimes $100,000 per farm, in readying their fields for rice production by leveling the land, installing wells and irrigation systems, and building levees. Once a farm has undergone this type of conversion it would be prohibitively costly to return to any other type of production.

Farmers entering into these new areas of production, and who took the standards in the 1981 farm bill at face value, were caught in a catch-22 situation when Congress passed last year's reconciliation bill, which included the freezing of acreage bases at 1982 levels for 1983. Under the freeze, farmers who grew a program crop except cotton under a Federal program in 1982 would have the same base for 1983. Those producers who grew outside of the program in 1982 would have to use the average base of the 1980-81 crop years. Although the freezing of the farm acreage base was intended to discourage expansion in the production of wheat, feed grains, and rice by prohibiting producers from increasing their base, and to protect traditional producers from new production, I believe that it is having an unintended effect and that we should reinstate the acreage base determinations specified in the 1981 Agriculture and Food Act.

As the law now is applied, rice producers in northeast Arkansas, who only began growing rice in 1982, are forced to grow outside of the Federal limitation program, including PIK, because they have no base. Even farmers who grew outside of the program in 1981, but who planned to establish a base for 1983, find themselves with little or no base. This is true even though these producers wish to participate in the Federal program, and it is the objective of the Government to limit agricultural production by using the announced limitation and PIK program. Farmers forced outside of Federal programs must boost production as a quasi-replacement for Federal support.

Wheat producers are faced with essentially the same dilemma. Since wheat production is relatively new, going back to an average of the 1980-81 acreage base will usually include 1 or 2 years in which the producer did not grow any wheat. By not taking

into consideration the 1982 crop year, many Arkansas wheat growers are being forced to grow outside the Federal limitation program. Both the wheat and rice farmer do not have the option of establishing bases for crops previously grown, either because the cost of converting the land was too high to revert, or 1 year of the formula would include the newly produced crop, or, as is frequently the case with wheat, the crop was a double crop and there was no other production.

Mr. President, my bill will bring us back to standards set in the 1981 Agriculture and Food Act for determining the acreage base for our farmers. I urge the Senate Agriculture Committee to act quickly and favorably on this bill.

I ask unanimous consent that the text of this bill be printed in the RECORD immediately following this statement.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 682

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) Section 107B(e)(2) of the Agricultural Act of 1949 (7 U.S.C. 1445b-1(e)(2)), as amended by section 122(3) of the Omnibus Budget Reconciliation Act of 1982, is amended by striking out the sixth sentence.

(b) Section 105B(e)(2) of the Agricultural Act of 1949 (7 U.S.C. 1444d(e)(2)), as amended by section 124(3) of the Omnibus Budget Reconciliation Act of 1982, is amended by striking out the seventh sentence.

(c) Section 101(i)(5)(A) of the Agricultural Act of 1949 (7 U.S.C. 1441(i)(5)(A)), as amended by section 125 (3) of the Omnibus Budget Reconciliation Act of 1982, is amended by striking out the tenth sentence.●

By Mr. BUMPERS (for himself and Mr. PRYOR):

S. 683. A bill to modify the special payment-in-kind land conservation program, and for other purposes; to the Committee on Agriculture, Nutrition, and Forestry.

PAYMENT-IN-KIND AMENDMENTS ACT OF 1983

● Mr. BUMPERS. Mr. President, like many of my colleagues, I welcomed the announcement by the USDA of a massive payment-in-kind program that promised to raise the prices our farmers were receiving for their commodities while, at the same time, allowing the Government to unburden itself of tremendous stocks that were costly to store and which weighed heavily over our commodity markets. Farmers in Arkansas were as enthusiastic as any in the country and potential participation was high. Even those who were not totally sold on the PIK program were as philosophical as David Hillman, Arkansas County Farm Bureau president, in noting that "when you are falling off a cliff, you're not picky about the branches you grab for."

Yet, as the PIK program began to take more definite shape, it became apparent that the USDA was conveniently overlooking a significant segment of our farmers—those who double-crop. Although double-cropping is not peculiar to any one section of our Nation, it is of particular importance to those States in the so-called Sun Belt, including its ever-increasing importance to my State of Arkansas.

By far, the most common system of double-cropping in my State is the production of winter wheat followed by soybeans. In 1982, 1,760,000, acres in Arkansas were planted in wheat and 80 percent, or 1,410,000, of these acres were followed by soybeans. This double-cropping has evolved into a necessary part of agriculture production in Arkansas, and a similar trend is being experienced throughout the South.

Under the PIK program as proposed, each farm is designated as having one base. When a farmer enters the PIK program he must set aside a certain percentage of this base, which is to be put into conservation use. However, double-croppers, in effect, can have two bases covering the same acreage, and, like all farmers, they count on both crops in their total farm plan. Yet, according to USDA, once acreage has been put into conservation use, it must remain in conservation use until the following crop year. For double-croppers interested in enrolling their wheat acreage in the PIK program this means they must continue the wheat set-aside acreage in conservation use until the following crop year. For double-croppers interested in enrolling their wheat acreage in the PIK program this means they must continue the wheat set-aside acreage in conservation use through the period of soybean production. Farmers will be compensated at the rate of 95 percent of their established yield in wheat PIK commodities for enrolling in the wheat program, but will receive nothing for the set-aside continued through the soybean production season. Many farmers are faced with the decision of laying aside a possible 50 percent of their soybeans simply to gain the PIK benefits on their wheat.

This is especially difficult for farmers in States such as Arkansas where soybeans represent the No. 1 money crop. Three times as many acres are devoted to soybeans in Arkansas as are devoted to rice, the next leading crop. All of this has had the effect of discouraging participation in the PIK program by our double-croppers at a time when acreage reduction is most needed and when our farmers are most eager to enroll in the PIK program. The situation is the same for all double-cropping where at least one program crop is involved.

My bill would equitably address the current penalty in the PIK plan for double-cropping. Farmers forced to set aside acreage through both crop production seasons will be compensated for the loss in the second crop by receiving additional PIK commodities of the program crop, above the amount allowed in the regular PIK program. This not only will make double-croppers whole and encourage participation in the PIK program, it will also allow that acreage put into conservation use to stay out of production. Those farmers with established bases for both crops will be able to use their base acreage figure to establish their compensation. Those farmers without established bases may, nonetheless, prove their history of double-cropping for 2 of the last 3 years through any reasonable evidence.

Another area of serious concern to our farmers is the quality of grain or cotton that they will receive in their PIK payment. Those farmers receiving PIK commodities are guaranteed to be paid in commodities representing a base grade or, for some, the historical area quality. If there is not enough of the particular commodity of the base quality, lower quality commodities may be substituted. To compensate for the lower quality, the PIK payment will be adjusted in quantity.

The problem arises in the determination for quantity adjustment. My bill would mandate that adjustments must be based on average price projections for the 1983 crop year instead of using comparative loan amounts with discounts or historical price data. although the loan amounts for No. 4 rice may only be slightly lower than No. 2 rice, the marketing reality for No. 4 rice may prevent producers from receiving little more than sacrificial prices. Producers receiving No. 2 rice would fare much better although the results were intended to be roughly parallel after basing the adjustments on loan comparisons.

By using 1983 price projections we can equitably devise quantity adjustments and alleviate much of the fear felt by our participating producers very concerned over the possibility of receiving poor quality commodities. Another important provision in the bill would require USDA to review the average price projections made for the particular crop year and to establish a procedure of reimbursement to farmers who were shorted in quantity adjustments, using the final average marketing price for comparison.

Mr. President, both of these issues—double cropping and quality of grain or cotton—must be dealt with if we expect the PIK program to be effective in meeting the needs of farmers in Arkansas and other States. I urge the Senate Agriculture Committee to give quick and favorable consideration to this bill.

I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 683

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Payment-in-Kind Amendments Act of 1983".

DEFINITIONS

SEC. 2. As used in this Act—

(1) the term "double cropping" means the practice of harvesting two agricultural commodities from the same acreage during different seasons of the same year;

(2) the term "payment-in-kind program" means a program under which the Secretary pays a producer with a quantity of an agricultural commodity to divert farm acreage from the production of an agricultural commodity and devote such acreage to conservation uses; and

(3) the term "secretary" means the Secretary of Agriculture.

DOUBLE CROPPING

SEC. 3. (a) If the Secretary establishes a payment-in-kind program and, as a condition of eligibility for payment under such program, prohibits a producer who practices double cropping from harvesting both commodities normally planted on the same acreage on the farm, the Secretary shall increase the amount of payments under such program to compensate such producer for the reduction of both commodities.

(b)(1) In order to be eligible for increased payments under subsection (a), a producer must establish that the producer practiced double cropping in at least two of the three crop years preceding the first crop year to which the payment-in-kind program applies and, but for the operation of such program, would have practiced double cropping during the current crop year.

(2) In administering this section, the Secretary shall accept any reasonable evidence of double cropping submitted by a producer, including established bases.

QUANTITY ADJUSTMENTS

SEC. 4. (a) If the Secretary establishes a payment-in-kind program for a year and adjusts the quantity of commodities provided under such program to reflect variations in the quality of such commodities, the Secretary shall base such adjustment on projected prices for such commodities for such year.

(b) If the Secretary adjusts the quantity of commodities provided under a payment-in-kind program for a year under subsection (a), within sixty days after the end of such year, the Secretary shall—

(1) determine whether actual prices for such commodities for such year were lower than projected prices for such commodities for such year; and

(2) if the Secretary determines that actual prices were lower than projected prices under clause (1), provide payments to participating producers to compensate such producers for the difference between actual and projected prices for such commodities for such year.●

By Mr. ABDNOR (for himself and Mr. MOYNIHAN):

S. 684. A bill to authorize an ongoing program of water resources research; to the Committee on Environment and Public Works.

WATER RESOURCES RESEARCH

● Mr. ABDNOR. Mr. President, I am pleased to introduce, together with Senator MOYNIHAN, the ranking minority member of the Subcommittee on Water Resources, legislation that is essentially identical to S. 2494, which passed the Senate during the 97th Congress. That bill, which was designed to augment the Federal water resources research program, failed to be considered by the House of Representatives.

Despite that failure, the Congress appropriated $14.1 million to continue a water research program for the current fiscal year. Such work, I am convinced, carries broad support within the Congress. Yet it deserves to be evaluated with care by the authorizing committees, not simply perpetuated through last minute action on an appropriations act.

The bill I am introducing today was originally a portion of S. 1095, as reported by the Committee on Environment and Public Works in 1981. Therefore, this bill can be viewed as companion legislation to another facet of that bill, the National Water Resources Planning Act of 1983, which I intend to introduce soon.

Earlier this week, the Committee on Environment and Public Works endorsed continued Federal spending in both of these areas in our recommendation to the Budget Committee for fiscal year 1984 spending.

Specifically, the bill I am introducing today authorizes a total of $8,100,000 yearly for allocation among the water resources institutes located in each State, plus another $13,000,000 in matching research grants open to qualified groups.

During the 97th Congress, numerous public witnesses before the Committee on Environment and Public Works testified in favor of a continued Federal water research program. Testimony before our Subcommittee on Water Resources has shown that any cutoff of research funds will produce serious problems for the existing network of State water resources institutes. If some of the research institutes are to be phased out—with the States assuming a larger role—this must occur over several years. If it occurred precipitously, serious disruptions in a national program of water research would result.

It is clear to me that our universities should continue to serve as the primary focus of these research activities. Each State should have its own institute to deal with State-specific water problems.

A major issue in past discussions has been a specific set-aside for saline water research. In an effort to provide as much flexibility as possible, this bill removes the specific set-aside for saline research.

My introduction of this proposal does not mean that I no longer recognize the need for fiscal restraint by our Government. We must ask for a greater financial commitment from non-Federal sources for programs such as this, as well as others. But we must, at the same time, create reasonable tools that will permit evolution in the programs to occur.

Mr. President, this is a sound bill, one that should become law. To assist my colleagues, I ask unanimous consent that a copy of the bill be printed at this point in the RECORD, together with excerpts from the report of the Committee on Environment and Public Works on this proposal in the 97th Congress.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 684

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act shall be cited as the "Water Resources Research Act of 1983."

SEC. 2. The Congress finds and declares that—

(a) the existence of an adequate supply of water of good quality for the production of materials and energy for the Nation's needs and for the efficient use of the Nation's energy and water resources is essential to national economic stability and growth, and to the well-being of the people;

(b) there is an increasing threat of impairment to the quantity and quality of surface and ground-water resources;

(c) the Nation's capabilities for technological assessment and planning and for policy formulation for water resources must be strengthened at the Federal, State, and local governmental levels;

(d) there should be a continuing national investment in water and related research and technology commensurate with growing national needs;

(e) it is necessary to provide for the research and development of technology for the conversion of saline and other impaired waters to a quality suitable for municipal, industrial, agricultural, recreational, and other beneficial uses; and

(f) the pool of scientists, engineers, and technicians trained in fields related to water resources constitutes an invaluable natural resource which should be increased, fully utilized, and regularly replenished.

SEC. 3. It is the purpose of this Act to assist the Nation and the States in augmenting their water resources science and technology as a way to—

(a) assure supplies of water, sufficient in quantity and quality, to meet the Nation's expanding needs for the production of food, materials, and energy;

(b) identify and find practical solutions to the Nation's water and water resources related problems, particularly those problems related to impaired water quality;

(c) promote the interest of State and local governments as well as private industry in research and the development of technology that will reclaim waste water and to convert saline and other impaired waters to waters suitable for municipal, industrial, agricul-

tural, recreational, and other beneficial uses; and

(d) coordinate more effectively the Nation's water resources research programs.

SEC. 4. (a) The Secretary of the Interior (hereinafter referred to as the "Secretary") is authorized and directed to assist the work of any water resources research and technology institute, center, or equivalent agency (hereinafter referred to as the "institute") established in the States in accordance with the terms of subsection (f) of this section.

(b) Each designated institute shall—

(1) have responsibility for planning, conducting, and/or arranging for competent research in relation to water resources, including investigations and experiments of either a basic or practical nature, or both; to promote the dissemination and application of the results of these efforts; and to provide for the training of scientists and engineers through such research, investigations, and experiments, and

(2) cooperate closely with other colleges and universities in the State that have demonstrated capabilities for research, information dissemination, and graduate training in order to develop a statewide program designed to resolve State and regional water and related land problems. Such institute shall also cooperate closely with regional consortia, as may be designated by the Secretary to increase the effectiveness of the institutes and for the purpose of regional coordination.

(c) Prior to the receipt each fiscal year of funds authorized by subsection (e) of this section, each institute shall submit to the Secretary for his approval a water research program that includes assurances, satisfactory to the Secretary, that such program was developed in close consultation and collaboration with the director of that State's department of water resources, or similar agency, and other leading water resources officials with the State, including interested members of the public. The program described in the preceding sentence shall include plans to promote research, training, information dissemination, and other activities meeting the needs of the State and Nation, and encourage regional cooperation among institutes in research into areas of water management, development, and conservation that have a regional or national character.

(d) From the sums appropriated pursuant to subsection (e) of this section, the Secretary shall make grants to each designed institute to be matched on a basis of no less than one non-Federal dollar for every Federal dollar during the fiscal years ending September 30, 1984, and September 30, 1985, one and one-half non-Federal dollars for each Federal dollar during the fiscal years ending September 30, 1986, and September 30, 1987, and two non-Federal dollars for each Federal dollar during the fiscal year ending September 30, 1988.

(e) There is hereby authorized to be appropriated to the Secretary for the purpose of carrying out this section the sum of $8,100,000 during each of the fiscal years ending September 30, 1984, through September 30, 1988.

(f) For the purposes of this section, an institute may be established at one college or university in each State, which was established in accordance with the Act approved July 2, 1862 (12 Stat. 503; 7 U.S.C. 301ff), entitled "An Act donating public lands to the several States and territories which may provide colleges for the benefit of agriculture and the mechanic arts" or some other institution designated by act of the legislature of the state concerned: *Provided,* That (1) if there is more than one such college or university in a State established in accordance with said Act of July 2, 1862, funds under this section shall, in the absence of a designation to the contrary by act of the legislature of the State, be paid to the one such college or university designated by the Governor of the State to receive the same, subject to the Secretary's determination that such college or university has or may reasonably be expected to have the capability of doing effective work under this title; (2) two or more States may cooperate in the designation of a single institute or regional institute, in which event the sums otherwise allocated to institutes in each of the cooperating States shall be paid to such regional institute.

SEC. 5. (a)(1) In addition to the grants authorized by section 4 of this Act, the Secretary is authorized to make grants, on a dollar-for-dollar matching basis, to the institutes established pursuant to section 4 of this Act, as well as other qualified educational institutions, private foundations, private firms, individuals, and agencies of local or State government for research concerning any aspect of a water-related problem which the Secretary may deem to be in the national interest, including the operation of test facilities.

(2) In cases where the Secretary determines, according to criteria established by him, that research under this section is of a basic nature which would not otherwise be undertaken, the Secretary may approve grants under this section on a matching requirement other than that specified in paragraph (1) of this subsection.

(b) Each application for a grant pursuant to this section shall state the nature of the project to be undertaken, the period during which it will be pursued, the qualifications of the personnel who will direct and conduct it, the importance of the project to the Nation as well as to the region and State concerned, its relation to other known research projects previously or currently being pursued, and the extent to which it will provide an opportunity for the training of water resources scientists. No grant shall be made under this section except for a project approved by the Secretary, and all grants shall be made upon the basis of the merit of the project and the need for the knowledge it is expected to produce when completed.

(c) The sum of $23,000,000 is authorized to be appropriated to the Secretary for the purposes of grants under this section, as well as for administration of grants under this section and grants to the institutes under section 4 of this Act for each of the fiscal years ending September 30, 1984, through September 30, 1988.

SEC. 6. The type of research to be undertaken under the authority of section 5 of this Act and to be encouraged by the institutes established under section 4 of this Act shall include, without being limited to:

(a) Aspects of the hydrologic cycle;

(b) Supply and demand for water;

(c) Demineralization of saline and other impaired waters;

(d) Conservation and best use of available supplies of water and methods of increasing such supplies;

(e) Water reuse;

(f) Depletion and degradation of ground water supplies;

(g) Improvements in the productivity of water when used for agricultural and commercial purposes;

(h) The economic, legal, engineering, social, recreational, biological, geographic, ecological, and other aspects of water problems;

(i) Scientific information dissemination activities, including identifying, assembling, and interpreting the results of scientific and engineering research on water resources problems; and

(j) Providing means for improved communication of research results, having due regard for the varying conditions and needs for the respective States and regions.

SEC. 7. Notwithstanding any other provision of law, the Secretary shall be governed by the provisions of sections 9 and 10 of the Federal Nonnuclear Energy, Research and Development Act of 1974 (Public Law 93-577; 88 Stat. 1887, 1891; 42 U.S.C. 5908-5909) with respect to patent policy and to the definition of title to, and licensing of inventions made or conceived in the course of, or under any contract or grant pursuant to this title; *Provided, however,* That subsections (l) and (n) of section 9 of such Act shall not apply to this Act: and *Provided further,* That, subject to the patent policy of section 498, all research or development contracted for, sponsored, cosponsored, or authorized under authority of this title, shall be provided in such manner that all information, data, and know-how, regardless of their nature of mediums, resulting from such research and develpment will (with such exceptions and limitations, if any, as the Secretary may find to be necessary in the interest of national defense) be usefully available for practice by the general public.

SEC. 8. (a) Public Law 95-467 is repealed.

(b) Rules and regulations issued, prior to the date of enactment of this Act, under the authority of Public Law 95-467 shall remain in full force and effect under this Act until superseded by new rules and regulations promulgated under this Act.

GENERAL STATEMENT

S. 2494, as introduced and reported, seeks to encourage a more active partnership between the Federal Government and non-Federal water resources researchers, one that is centered at the university community. This legislation will encourage investigations of basic scientific issues that may have a regional character or application, rather than fulfilling a specific need of a Federal agency.

The Federal Government annually spends several billions of dollars to construct traditional water resources projects—dams, levees, sewage treatment plants, and river and harbor channels. According to a report of the Water Resources Research Review Committee of the National Research Council, the entire Federal Government spends only 4 percent, or $380 million, for water resources research, development, demonstration, and technology transfer. Less than half of the "research" money goes to true research. And nearly all of the research that is undertaken is mission oriented within various Federal agencies and departments.

More basic scientific research, together with research into regional problems—both encouraged by this legislation—do not fit neatly into any Federal water research effort outside this bill.

Under current law, a program similar to the one authorized by S. 2494 is operated by

the Office of Water Research and Technology (OWRT) within the Department of the Interior. OWRT helps to finance water research institutes established at 54 land-grant colleges, provides matching grants to individual researchers, and conducts its own research, development, testing, and demonstration programs, particularly in desalting technology. OWRT also maintains a clearinghouse of data and technical literature on water research. These authorities, funded recently at about $33 million yearly, come from the Water Research and Development Act of 1978 (Public Law 95-467).

The Administration's budget for fiscal year 1983, however, proposes that no funds be made available for any of the water research programs authorized by the 1978 Act. In the Committee's judgment, basic and applied water research, beyond the requirements of regulatory programs or mission oriented agencies, is needed and cost-effective.

Therefore, S. 2494 repeals that 1978 authorization, replacing it with a more focused approach centered on the 54 state institutes. In addition, the bill provides competitive matching grants to individuals and organizations to study specific water problems. The total annual authorization is $22.1 million.

The strength of the institutes is their location within the university community, a location where a multitude of disciplines can be concentrated on water problems, offering new and innovative approaches. This approach also disperses funds among institutes in every state, assuring the widest possible geographic search for information—from new drip irrigation techniques in the desert Southwest to lake-cycle research in the Northeast.

Yet the Committee recognizes the need to augment the strength of some of this state-based research work on water. The bill gradually requires an increased non-Federal contribution, and requires that a portion of that contribution be made in cash. Thus, those states and those universities that are less seriously committed to an effective water research program may be forced to drop out of the program.

S. 2494 also encourages greater regional cooperation among the water institutes, as well as among the states. While the States are effective participants in the national effort to improve the utilization of our water resources, their value could be increased in some cases when they work together to manage their water resources on a regional basis.

For example, in phasing-out the Federal operation of the existing OWRT desalting facilities, the Secretary of the Interior is encouraged under this bill to transfer these facilities to the control of individual state institutes, or a regional consortium of institutes, which would then operate them. Thus, the expertise would not be lost, with emphasis on a new regional non-Federal approach. These facilities, of course, would be eligible for matching funds under this Act.

This bill also authorizes a general water research matching grant program that is available to scientific experts, both individuals or groups. Through a competitive approach, the Committee expects the Secretary of the Interior to define and direct funds to the Nation's most pressing water research needs.

In implementing the new approaches in this legislation, the Secretary of the Interior should review the "Federal Water Resources Research: A Review of the Proposed Five-Year Program Plan," prepared last year by the Water Resources Research Review Committee of the Commission on Natural Resources, National Research Council. In addition, the Secretary is invited to return to the Congress with proposals for a more effective and coordinated plan for water resources research. This would enable Congress to examine the program in preparation for possible legislation once this new five-year law would expire.

Under present law, there is separate funding for the basic water research program and the program focused on saline water problems. This legislation combines funding to assure greater flexibility in selecting those research proposals that have the highest priority. Improvements in deasalting technology may offer an opportunity for improving the quality of water pumped from underground aquifers for use in households, industry, and agriculture. The bill does not amend the existing authority pursuant to Public Law 95-84 and Public Law 96-457 to construct demonstration desalination plants.

SECTION-BY-SECTION ANALYSIS

Section 1 of the bill declares that the bill shall be cited as the "Water Resources Research Act of 1982."

Section 2 states a number of Congressional findings relating to the national interest in water resources research. This section describes the existing problems with water resources utilization, expecially the impairment of the quality of both surface and ground-water resources, and its consequent effect on available water supply. This section also defines the need to strengthen the skills and research capabilities of technical personnel related to water resource needs throughout the nation.

Section 3 declares that the purpose of the bill is to augment basic water resource research and to direct such research toward practical solutions of our nation's water problems.

Section 4 establishes a modified approach to the Federal support of the various water research institutes located at 54 land-grant colleges in every state as well as the District of Columbia and three territories. The section encourages a greater non-Federal financial commitment to each research institute.

The present program of grants to the institutes requires no specific cash contribution by the non-Federal sponsor, and establishes a maximum level of funding per institute.

S. 2494 makes two changes in that approach. During the initial two years, Federal funds must be matched on a one-to-one basis with non-Federal funds. In fiscal years 1985 and 1986, the non-Federal match increases to three-to-two; in fiscal year 1987, the match would be two non-Federal dollars to each Federal dollar. The non-Federal share for each institute need not to be entirely in cash, but can be partially contributed in-kind.

The bill also authorizes the Department of the Interior to distribute $8,100,000 among the research institutes during each of five fiscal years. If all institutes continue to participate, each of 54 institutes would receive $150,000 annually. If several institutes should decide not to participate, due to the increasingly strict non-Federal requirements, the $8,100,000 would be available to be distributed equally (and matched) among fewer institutes. Thus, there is the possibility that more than $150,000 yearly would be available to each institute, permitting the program to keep up with inflation.

The grants to the institutes can be made only after an institute submits a water research program, which contains assurances that the program was developed in close coordination with that State's department of water resources. This section also contains technical language to require that institutes be established only at a land-grant university or some other institution designated by act of the state legislature. There can be only one institute in a state.

Section 5 authorizes $13,000,000 annually for specific water research project grants on a wide variety of water problems listed in Section 6. These grants will be available to any qualified individual or group. This includes, but is not limited to: State institutes, other universities, private or public corporations, river basin commissions, and foundations. The Secretary will award these research grants on a competitive basis. They must be matched on a one-to-one basis by non-Federal funds. In the case of basic research, which might otherwise not be undertaken, the Secretary of the Interior may adjust the matching requirement, as appropriate, to a higher Federal share. For the purposes of this section, basic research is that which is undertaken for the purpose of increasing knowledge or understanding of a subject without specifying the use of the results.

Section 6 specifies the type of research, from the basic hydrologic processes to conservation and reuse, that will be eligible for a section 5 research grant and which the section 4 institute programs should encourage. Work to disseminate or interpret scientific information is another important activity eligible for funding under this section.

Section 7 requires that information developed by water resources investigators under a grant authorized by section 4 or 5 be available to the general public.

Section 8 repeals the Water Research and Development Act of 1978 (Public Law 95-467), which expires at the end of fiscal year 1982.●

By Mr. QUAYLE:

S. 685. A bill to provide savings in the Federal Employees Compensation Act, and for other purposes; to the Committee on Labor and Human Resources.

FEDERAL EMPLOYEES COMPENSATION AMENDMENTS ACT

● Mr. QUAYLE. Mr. President, I am today introducing a bill to amend the Federal Employees Compensation Act (FECA), the Government's worker's compensation system for its own civilian employees. FECA provides compensation-wage replacement income, medical benefits, and death benefits to survivors for job-related injuries and death.

This bill is based on a measure which I introduced during the 97th Congress. As in my earlier bill, these two amendments will provide savings in the administration of the act, first, by elimination of the continuation-of-pay provision, and second, in changing the method by which the cost-of-living adjustment is computed. It seems to me that these changes make eminent sense today as they did in 1981 and

continue to be worthy of our consideration.

I introduce this bill today to give my colleagues and other interested persons an opportunity to study it. I am also requesting both the administration and the Congressional Budget Office to provide a cost estimate of the proposal. I shall briefly describe the two amendments and give the rationale for the proposal:

Continuation-of-pay allows a Federal employee who is injured on the job to receive his full wages while his disability claim is under adjudication. The employee may receive his wages for up to 45 days. The Federal system payments are made without any adjudication that the claim is a meritorious one. Since the continuation-of-pay provision was enacted in 1974, the number of claims submitted has risen dramatically. In 1976, 70,000 employees received continuation of pay without any reduction in the regular claims load of 40,000 claims. By 1977, the GAO reported that claims had risen by over 70 percent in the aggregate. By fiscal year 1980, over three-quarters of a billion dollars in compensation and medical payments were made to Federal civilian employees. This amazing increase in the amount of money expended has occurred during a time when safety efforts in Federal workplaces have increased, and the size of the civilian Federal work force has remained relatively constant.

The second amendment to the Federal Employees Compensation Act would change the formula by which cost-of-living adjustments are computed. Cash compensation to long-term beneficiaries of the Federal employees compensation program is currently indexed to the Consumer Price Index while Federal wages increase at a much slower rate. From 1974 to 1980, compensation payments increased by 90 percent while salary levels increased by 60 percent. As a result, compensation becomes an ever higher percentage of pay with the inevitable effect that the injured employee has even less incentive to return to work.

This bill changes the formula to limit automatic compensation increases to an amount consistent with the pay adjustments made to general schedule employees or to changes in the Consumer Price Indexed, whichever is less, so as not only to save on payments but also to preserve work incentives.

The need for these changes is great. In these times of economic stringency we cannot afford to permit this inequity in FECA to be continued.

Mr. President, I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 685

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a)(1)(A) section 8118 of title 5, United States Code, is amended to read as follows:

§ 8118. Election to use annual or sick leave

"An employee may use annual or sick leave to his credit at the time the disability begins, but his compensation for disability shall not begin, and the time periods specified by section 8117 of this title shall not begin to run, until the use of the annual or sick leave ends."

(B) The analysis for chapter 81 of such title is amended by striking out the item relating to section 8118 and inserting in lieu thereof the following new item:

"8118. Election to use annual or sick leave."

(2) Section 8145 of title 5, United States Code, is amended—

(A) by inserting "(a)" before "The", and

(B) by adding at the end thereof the following new subsection:

"(b) In order to insure the prompt determination of claims for eligibility under this subchapter, the Secretary may, with the consent of a Federal agency, use employees of such agency to make any initial determination under section 8124(a) of this title, subject to review under section 8124(b) or 8128 of this title.".

(3) The amendments made by this subsection shall apply to individuals who become disabled as a result of injuries occurring after September 30, 1981.

(b)(1) Subsection (a) of section 8146a of title 5, United States Code, is amended to read as follows:

"(a) Compensation payable on account of disability or death which occurred more than one year before March 1 of each year shall be annually increased on that date by an amount equal to the lesser of—

"(1) the amount determined by the Secretary of Labor to represent the percent change in the price index published for December of the preceding year over the price index published for the December of the year prior to the preceding year, adjusted to the nearest one-tenth of 1 per centum, or

"(2) the amount determined by the Secretary of Labor to represent the overall percentage adjustment in the rates of pay under the General Schedule which took effect under section 5305 of this title for the first applicable pay period commencing on or after October 1 of the preceding calendar year.".

(2) The amendment made by this subsection shall apply with respect to adjustments made on or after the date of the enactment of this Act.●

By Mr. QUAYLE:

S. 686. A bill to amend the Age Discrimination in Employment Act of 1967 to eliminate the upper age limitation of 70 years of age, to make procedural reforms, and reinstate the tenured faculty exemption, and for other purposes; to the Committee on Labor and Human Resources.

AGE DISCRIMINATION IN EMPLOYMENT AMENDMENTS OF 1983

● Mr. QUAYLE. Mr. President, today, I am introducing the Age Discrimination in Employment Amendments of 1983. This is identical to the bill I introduced during the last Congress to amend the age Discrimination in Employment Act of 1967. My bill eliminates the upper age limitation of 70 years of age, makes procedural reforms, and reinstates the tenured faculty exemption.

There are, and will be, other bills to deal with this issue. I have met with others and discussed various approaches to amending the ADEA. I have decided that there is still a need to reintroduce my proposal, which is drafted on the premise that all issues should be put on the table so that when the committee and the Congress decide to act, it will be after a full attaining of the issue.

My bill has three major purposes: The first is to remove the current 70-year cap on the protections afforded by the Age Discrimination in Employment Act; the second is to make procedural reforms in the enforcement provisions of the act to make it more consistent with other employment discrimination statutes; and the third is to restore the exemption from the ban on mandatory retirement for tenured faculty members, which expired last year, on July 1, 1982.

LIFTING THE AGE 70 CAP

Under present law, protection against age discrimination is limited to individuals age 40 to 69. My bill removes the upper age restriction to include all individuals over the age of 69. This amendment is premised on the right of older workers to continue working, if they are able and willing to do so, and is supported by the fact that conditions which once justified encouraging early retirement of older workers are changing. Demographic projections indicate that we will have an increasingly older work force, while at the same time an increasing number of jobs do not require great physical stress and take place in an office setting. Increasing opportunities for older workers is thus not only a matter of equity for the workers but also makes commonsense in terms of labor market changes. It also has the potential of providing relief for the hard-pressed social security system.

Over the coming decades, the age distribution of our population will be shifting dramatically. The absolute number of older people in our society will increase and both the public and private sectors will need to pay more attention to the concerns of older workers. While the percentage of older Americans will not change from the current level for the balance of this century, the number of older workers is likely to increase dramatically in the early years of the 21st century.

This change in the structure of the available work force will have great implications for older workers. In the past, the great influx of younger workers created enormous pressure to remove older workers from the labor force. In the future, the demographics

will work in favor of retaining older workers and labor market needs will require their utilization. Yet, few trends in the 20th century have been more pronounced than the decline in the labor force participation rates of older persons.

The participation rates of older workers—especially men—have been declining at an alarming rate for the past 20 years. The labor force participation rate for men age 65 and over has dropped from 34 percent in 1960 to less than 20 percent in 1981. For men age 55 to 64, the rate has dropped 15 percent over the last 20 years. The participation rate for women over age 65 has always been and still remains very low. In contrast, recently there has been an increase in the number of women age 55 to 64 entering the labor force.

These statistics and trends have been available for many years and have been stated countless times in testimony before Congress and in studies presented by the Department of Labor.

With an increasingly older population, greater attention will be given to Federal policies which intentionally or unintentionally restrict participation in the work force by older Americans. We must encourage more flexible arrangements for continued work. Removal of the 70 year age cap is a necessary step in encouraging continued labor force participation of older workers.

Also, I believe, as a matter of principle, that no American should be forced to retire at a set age without regard to physical or mental condition. Ability, not age, should be the guiding criteria in developing a retirement policy. Recent surveys show that 9 out of 10 Americans oppose, as I do, forced retirement because of age. An individual who desires to continue working should be permitted to do so, if capable.

During the last Congress, it was suggested that we should prohibit age discrimination against employees over age 69 with respect to mandatory retirement but not with respect to hiring and promotion. However, I believe that the act should be amended to prohibit age discrimination in all areas of employment policy for individuals over the age of 69.

How can we prohibit age discrimination in some areas of employment policy and permit it in others? How can we protect an individual from age discrimination by prohibiting mandatory retirement and, yet, permit age discrimination against another individual, the same age, who is seeking work? This confusing situation would only lead to lengthy litigation that would be an additional burden on the courts. My bill amends the ADEA to prohibit arbitrary discrimination on the basis of age in all areas of employment policy, including hiring, firing, and promotions.

I do not wish to suggest that the aging process does not affect an individual's capabilities. For this reason I would like to emphasize that "arbitrary" is a key word in the legislative history of the act. In 1965, Willard Wirtz, as the Secretary of Labor, presented the findings of a study on the evidence of age discrimination in our society, which subsequently led to enactment of the ADEA. Secretary Wirtz carefully distinguished between arbitrary discrimination where there is no factual basis for assumptions about the effect of age on an individual's ability to do a job and those cases where there is in fact a demonstrable relationship between age and ability to perform a job. For this reason, the ADEA permits exemptions to the prohibitions of the act which are based on reasonable factors other than age and bona fide occupational qualifications. These provisions will continue to enable employers to take necessary personnel actions in those cases where age does affect an individual's ability to perform a job.

REVISING THE ENFORCEMENT PROCEDURES

I believe that what is appropriate as an individual's remedy for discrimination on account of race or sex or national origin is also appropriate for discrimination based on age. That is why I have revised the enforcement procedure so as to eliminate the jury trial and liquidated damage provisions taken from the Fair Labor Standards Act and replaced them with equitable relief provisions as found in other antidiscrimination statutes.

The current enforcement provisions of the ADEA are modeled on those of the Fair Labor Standards Act—the Federal minimum wage law—which are geared to enabling plaintiffs to recover the wages that they have been underpaid, that is, to get a money judgment. In such actions for money damages, the right to a jury trial is, of course, appropriate and even constitutionally required. But the purpose of an antidiscrimination statute, such as the ADEA, is not to collect money damages; it is to change the nature of employment practices. Therefore, the remedies in antidiscrimination laws—most importantly title VII of the Civil Rights Act—are geared to equitable relief, to orders for future compliance for which back pay may be an appropriate auxiliary remedy. Such actions are not appropriate for jury trial.

These amendments are particularly necessary because of the legislative history of the act and its implementation. Prior to Reorganization Plan No. 1 of 1978, the ADEA was administered by the Department of Labor, which also administers the FLSA. There was, therefore, at least some logic in having similar enforcement for the two statutes. But the reorganization plan transferred administration of ADEA to the Equal Employment Opportunities Commission and the same logic that supported the transfer dictates the revision of the enforcement procedures.

Like title VII, the emphasis in the ADEA is on voluntary compliance through informal methods of conciliation, conference, and persuasion. Liquidated damages encourage complainants to litigate and discourage informal resolution of lawsuits.

RESTORING THE TENURED FACULTY EXEMPTION

When the ADEA was amended in 1978 to extend the protections of the act from age 65 to age 70, a temporary exemption for tenured faculty was provided so that such faculty could continue to be retired at age 65. At that time, the rationale given for the exemption of tenured faculty was that for the foreseeable future the number of available positions would be closely related to the number of retirements, thereby making it difficult to employ younger professors. The exemption expired last year, on July 1, 1982. However, the situation is the same today as it was in 1978 and will continue to be a problem in the foreseeable future.

The tenure system presents a unique case among professions because it is a contract which insures that faculty members are guaranteed employment and acquire academic freedom—the freedom to think, study, teach, and write without fear of reprisal. This guarantee is granted in exchange for a set retirement date. If we do not restore this exemption colleges and universities will be faced with a choice between two very undesirable options.

If mandatory retirement for tenured faculty is eliminated, colleges and universities could elect to keep the tenure system as it now functions essentially intact. The result would be that individuals would have the assurance of continued employment, for life—with harmful effects on education, on the advancement of new faculty members, and on the academic enterprise as a whole. Another alternative would be to eliminate tenure, or substantially alter it, perhaps by introducing periodic reviews of competence—with chilling effects on academic freedom and consequently, on teaching, faculty morale, and the advancement of knowledge.

A stipulated mandatory retirement age has the important advantage of allowing institutions to achieve the positive benefits which tenure provides while simultaneously assuring some regular degree of turnover. It also permits far more humane conclusions to careers than would otherwise occur if senior faculty members had to be told by their colleagues when they were no longer fit to teach. Tenure is an effective device to assure academic vitality, but it probably will not endure in the

absence of a mandatory retirement age.

I ask unanimous consent that the text of the bill be inserted at the conclusion of my remarks.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 686

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Age Discrimination in Employment Amendments of 1983".

SEC. 2. (a)(1) Section 7(b) of the Age Discrimination in Employment Act of 1967 is amended to read as follows:

"(b)(1) The provisions of this Act shall be enforced in accordance with the provisions of this subsection and subsection (c) of this section.

"(2) The Commission shall, upon receiving a complaint or as a result of investigations, attempt to eliminate the discriminatory practice or practices alleged, and to affect voluntary compliance with the requirements of this Act through informal methods of conciliation, conference, and persuasion.

"(3) Any person claiming to be aggrieved by an act prohibited under section 4 of this Act or the Commission may bring a civil action for such equitable relief as will carry out the purposes of this Act. If the court finds that the respondent has engaged in or is engaging in acts prohibited under section 4 of this Act charged in the complaint, the court may enjoin the respondent from engaging in acts prohibited under section 4 of this Act, and order such equitable relief as may be appropriate, which may include reinstatement or hiring of employees, with or without back pay (payable by the employer, employment agency, or labor organization, as the case may be, responsible for the acts prohibited under section 4 of this Act).

"(4) The right of any person to bring or maintain such action shall terminate upon the commencement of an action by the Commission to enforce the right of such employee under this Act.".

(2) Section 11 of such Act is amended by adding at the end thereof the following:

"(j) The term 'Commission' means the Equal Employment Opportunity Commission.".

(b) Section 7(c) of such Act is amended to read as follows:

"(c) Each United States district court subject to the jurisdiction of the United States shall have jurisdiction of actions brought in such court under this Act. Such an action may be brought in any judicial district in the State in which the prohibied acts are alleged to have been committed, in the judicial district in which the employment records relevant to such practice are maintained and administered, or in the judicial district in which the aggrieved person would have worked but for the alleged prohibited acts, but if the respondent is not found within any such district, such an action may be brought within the judicial district in which the respondent has his principal office. For purposes of sections 1404 and 1406 of title 28 of the United States Code, the judicial district in which the respondent has his principal office shall in all cases be considered a district in which the action might have been brought.".

SEC. 3. Section 12(a) of the Age Discrimination in Employment Act of 1967 is amended by striking out "but less than 70 years of age".

SEC. 4. (a) Section 12(c)(1) of the Age Discrimination in Employment Act of 1967 is amended by striking out "but not 70 years of age".

(b) Section 12 of such Act is amended by adding after subsection (c) the following new subsection:

"(d) Nothing in this Act shall be construed to prohibit compulsory retirement of any employee who has attained 65 years of age, and who is serving under a contract of unlimited tenure (or similar arrangement providing for unlimited tenure) at an institution of higher education (as defined by section 1201(a) of the Higher Education Act of 1965).".

SEC. 5. The amendments made by section 2 of this Act shall take effect with respect to civil actions brought after the date of enactment of this Act. The amendment made by section 3 of this Act shall take effect on January 1, 1983, or six months after the date of enactment of this Act, whichever is later. The amendment made by section 4 of this Act shall take effect on July 1, 1982.●

By Mr. HEINZ (for himself, Mr. DIXON, Mr. BYRD, Mr. SPECTER, Mr. PERCY, Mr. LEVIN, Mr. RIEGLE, Mr. RANDOLPH, Mr. SARBANES, Mr. PELL, and Mr. GLENN):

S. 687. A bill to amend the Federal Supplemental Compensation Act of 1982 to increase the number of weeks of compensation; to the Committee on Finance.

ADDITIONAL UNEMPLOYMENT COMPENSATION

● Mr. HEINZ. Mr. President, today I am introducing legislation to provide as many as 65 additional weeks of unemployment benefits to workers who, having lost their jobs during this recession through no fault of their own, are compelled to continue to rely on Federal unemployment compensation payments as their principal source of income. The additional weeks of Federal supplemental compensation are weighted according to the degree of severity of the insured unemployment rate in a State.

The Department of Labor estimates that the existing Federal supplemental compensation program will have assisted over 2 million claimants before it automatically terminates on March 31 of this year. Under the existing program, five levels of benefit duration are provided:

First, 16 weeks of FSC in States with an insured unemployment rate (IUR) of 6 percent or above (13 States):

Second, 14 weeks of benefits in States with less than a 6-percent IUR if a State was eligible for extended benefits anytime between June 1, 1982, and January 6, 1983 (24 States);

Third, 12 weeks of benefits in States with less than a 6-percent IUR, but at least 4.5 percent or if the State becomes eligible for extended benefits after January 6, 1983 (one State);

Fourth, 10 weeks of benefits in States where the IUR is below 4.5 percent but not below 3.5 percent (eight States); and,

Fifth, 8 weeks of benefits in all other States (six States).

To render a simpler description of the existing program, individual entitlements for total unemployment benefits range from 34 weeks of benefits in States with the lowest rates of unemployment to 55 weeks of benefits in States with the highest levels of insured unemployment.

Mr. President, my legislation would expand the number of weeks of Federal supplemental compensation available under the existing program. In short, individual entitlements for total unemployment benefits would, under this bill, range from 36 weeks of benefits in States with the lowest rates of unemployment to 65 weeks of benefits in States with the highest levels of insured unemployment.

Specifically, this bill would continue the existing five tiers of benefit levels according to the following new schedule:

First, 26 weeks of FSC in States with an IUR above 6 percent;

Second, 22 weeks of FSC in States where the IUR is below 6 percent and the State was previously eligible for extended benefits;

Third, 18 weeks of FSC in States with an IUR between 4.5 percent and 6 percent or if the State triggers onto extended benefits;

Fourth, 14 weeks of benefits in States where the IUR is between 3.5 percent and 4.5 percent; and,

Fifth, 10 weeks of benefits in all other States.

In addition, this legislation would extend the existing FSC program for an additional 6 months, through the end of this fiscal year.

Mr. President, this legislation addresses a clear emergency. Over 2 million American citizens, with long work histories, are simply unable to find a job. These Americans want nothing more than to return to work, but employment opportunities are limited. Unless additional weeks of unemployment benefits are provided to them, they will have no other source of income to tide them over until they can find a job. Overall, as counted by conventional measures not recording those discouraged workers who have given up looking for work, more than 11 million Americans are unemployed. Most of our unemployed receive benefits for only a relatively short time before finding another job; but, in certain regions, and in certain industries, the unemployment experience of many Americans has been prolonged agony.

The President is not incorrect when he asserts that the economy is "on the mend." The national unemployment rate for January was down 10.4 percent, down from 10.8 percent in January. That is welcome news. However, the economy is not mending in all

States at the same pace. In fact, in my home State of Pennsylvania, the unemployment rate went up in January by a full percentage point, to 13.6 percent.

Even the most optimistic projections foresee unemployment remaining above 8 percent nationally through 1984. It is critical that we pursue jobs creation to stimulate employment. It is heartening that the President has endorsed a jobs bill. It is important that we lower the budget deficit to keep interest rates low to sustain recovery. It is equally critical that the Federal Government provide a safety net for those individuals who have been particularly hard hit by the recession, and for whom employment initiatives will be too little and too late.

Mr. President, I would remind my colleagues that under Presidents Nixon and Ford this Government provided 65 weeks of unemployment compensation to unemployed individuals with long histories of work force participation. During those years, unemployment was far less severe than it is today. In addition, recoveries from those economic downturns were predicted to be much more vigorous than the recovery predicted from this recession.

I urge my colleagues to endorse this modest proposal to assist our unemployed neighbors, and will be pleased to consider any modifications to this legislation which would improve it.

Mr. President, I ask unanimous consent that the bill be printed in the RECORD.●

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 687

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) section 602(e) of the Federal Supplemental Compensation Act of 1982 is amended—

(1) in paragraph (2)(A)(i), by striking out "65 per centum of";

(2) in paragraph (2)(A)(ii), by striking out "a" and inserting in lieu thereof "10";

(3) in paragraph (2)(B)(i), by striking out "by substituting '16' for '8' " and inserting in lieu thereof "by substituting '26' for '10' ";

(4) in paragraph (2)(B)(ii), by striking out "by substituting '14' for '8' " and inserting in lieu thereof "by substituting '22' for '10' ";

(5) in paragraph (2)(B)(iii), by striking out "by substituting '12' for '8' " and inserting in lieu thereof "by substituting '18' for '10' ";

(6) in paragraph (2)(B)(iv), by striking out "by substituting '10' for '8' " and inserting in lieu thereof "by substituting '14' for '10' "; and

(7) by striking out paragraph (3).

(b)(1) Section 602(f)(2) of such Act is amended by striking out "March 31, 1983" and inserting in lieu thereof "September 30, 1983".

(2) Section 605(2) of such Act is amended by striking out "April 1, 1983" and inserting in lieu thereof "October 1, 1983".

(c)(1) Section 602(b) of such Act is amended in the matter following paragraph (2) by inserting "most recently" before "exhausted his rights".

(2) Section 602(d)(3) of such Act is amended by inserting "for any benefit year" after "compensation payable".

(d) The amendments made by subsections (a), (b), and (c) shall apply to Federal supplemental compensation payable for weeks beginning on or after the date of the enactment of this Act. In the case of any eligible individual to whom any Federal supplemental compensation was payable for any week beginning prior to such date of enactment and who exhausted his rights to such compensation (by reason of the payment of all the amount in his Federal supplemental compensation account) prior to the first week beginning on or after such date of enactment, such individual's eligibility for additional weeks of compensation by reason of the amendments made by this section shall not be limited or terminated by reason of any even, or failure to meet any requirement of law relating to eligibility for unemployment compensation, occurring after the date of such exhaustion of rights and prior to the date of the enactment of this Act (and such weeks shall not be counted for purposes of determining the expiration of the two years following the end of his benefit year for purposes of section 602(b) of the Federal Supplemental Compensation Act of 1982).

(e) The Secretary of Labor shall, at the earliest practicable date after the date of the enactment of this Act, propose to each State with which he has in effect an agreement under section 602 of the Federal Supplemental Compensation Act of 1982 a modification of such agreement designed to provide for the payment of Federal supplemental compensation under such Act in accordance with the amendments made by this Act. Notwithstanding any other provision of law, if any State fails or refuses, within the three-week period beginning on the date the Secretary of Labor proposes such a modification to such State, to enter into such a modification of such agreement, the Secretary of Labor shall terminate such agreement effective with the end of the last week which ends on or before such three-week period.

● Mr. SPECTER. Mr. President, I am pleased to join with my colleague, Senator HEINZ, in offering legislation that would extend Federal supplemental unemployment benefits an additional 10 weeks for those workers who have exhausted all assistance.

More than 700,000 Pennsylvanians remain jobless. Our home State suffers from the second greatest number of unemployed in the Nation. It would be unconscionable for us to ignore the desperate plight of these thousands of individuals who have become unemployed through no fault of their own and who continue in their search for new jobs—but find none.

The Congress has embarked on a formidable effort to provide productive jobs for the women and men who are unemployed. I am hopeful that we will move quickly to enact an effective emergency jobs package. Meanwhile, we must continue to give relief to those Americans who will expend all compensation payments due them. To that end, I earlier introduced legislation with Senator LEVIN to extend the current benefits program an additional 6 months. This bill will supplement that legislation.

Those individuals who will be eligible for these additional 10 weeks have earned them. Unemployment compensation is not a dole; it is an insurance fund, into which these workers contributed during the many months and years of their employment. The beneficiaries of this program both need and deserve this assistance; it is our responsibility to provide it.

Granted, extending the duration of unemployment compensation benefits will not put all of these people back to work; nonetheless, extending benefits will ease the burden of joblessness and instill some certainty in their very cloudy future. The Department of Labor estimates that 2 million individuals will benefit from the current supplemental benefits program; each week more people are losing their eligibility and exhausting these payments.

Now is the time to allay these fears. Now is the time to insure that assistance will be provided during this transitional period for those who have suffered the longest. I am confident the legislation we introduce will help fill this need.●

● Mr. LEVIN. Mr. President, I am pleased to be a cosponsor of the legislation introduced today by Senators HEINZ and DIXON to extend the current Federal supplemental compensation program through September 30, the end of the fiscal year, and to increase the number of weeks of benefits for which individuals are eligible.

For my State of Michigan, which has an unemployment rate of 15.5 percent and is now into its 39th consecutive month of double digit unemployment, this legislation is an essential response to a dire need. Failure to pass this legislation would mean that after March 31, the maximum number of weeks of unemployment benefits in Michigan would drop from 55 to 39. I have already introduced legislation, cosponsored by Senators SPECTER, HEINZ, and DIXON, among others, which would extend the current FSC program through September 30. With an average of 14,000 people exhausting their first 39 weeks of benefits each month in Michigan, termination of the FSC program on March 31 would take away from the long-term unemployed the life preserver which has put food on their tables and lessened the anxiety in their hearts. We cannot allow this to happen.

This legislation would also increase the maximum weeks of unemployment benefits from 55 weeks to 65 weeks.

For Michigan this means that the 4,000 people who on an average are exhausting all their unemployment benefits each week would receive additional assistance. This is both a step forward at the same time that it is not unprecedented. It is not a departure from the past because for a time in the 1970's individuals were eligible for 65 weeks of unemployment benefits, even with an unemployment rate which was significantly below what it was today. But it is also a step forward because it is now reasonable to think that this legislation has a chance of being approved by the Congress when this session of the Congress began, and we introduced legislation to extend the FSC program, I had serious doubts as to whether it would be possible to do anything more than extend the current program beyond March 31.

Since then, however, the House Ways and Means Committee has approved similar legislation providing up to 63 weeks of benefits and it appears likely that it will pass the full House as well. This is a good indication that people throughout the country are becoming aware of what people in Michigan and Pennsylvania and Illinois have known all along—the economy is sick and we had better care adequately for its victims until it gets better. This legislation would not do the whole job by itself, but it is important for the country and essential for those among the unemployed who are on the doorstep of despair.●

● Mr. DIXON. Mr. President, I am pleased to join my good friend and colleague, JOHN HEINZ, in cosponsoring this bill, which will extend the current Federal supplemental compensation program through the end of this fiscal year. In addition, it will provide 10 more weeks of benefits in States with the highest rate of unemployment, thereby increasing the total number of weeks available to 65 in some States.

The bill will also add 8 weeks to States currently eligible for 14 weeks, of a total of 22; 6 weeks will be added to those States currently eligible for 12, for a total of 18 weeks; 4 more weeks for States currently paying 10, for a total of 14; and 2 more weeks for those States qualifying for 8, for a total of 10 weeks.

The eligibility criteria are identical to the FSC program as it was most recently extended, last December, based on a State's insured unemployment rate. Currently, 17 States will receive the maximum number of weeks, based on an insured rate above 6 percent. They are: Alabama, Alaska, Arkansas, Idaho, Illinois, Kentucky, Michigan, Mississippi, Montana, Ohio, Oregon, Pennsylvania, Rhode Island, Vermont, Washington, West Virginia, and Wisconsin.

I joined Senator LEVIN as a cosponsor of the simple extension of the FSC program last month. I believe that at a bare minimum, that is what needs to be done, which I so stated on January 27. However, that bill does not address the issue of over 2 million people who have or will have exhausted all benefits by March 31, 1983.

There is a precedent for this 65-week maximum, as I have pointed out before. I think it merits repeating.

In 1975, under President Gerald Ford, the FSC program was extended to provide a maximum of 65 weeks of coverage under all levels of unemployment benefits. The unemployment rate when this was done was 8.8 percent.

In 1974, again, under President Ford, with a national unemployment level of 7.1 percent, a total of 52 weeks of coverage was available, 26 of which were federally paid benefits, which is the maximum that the most beleaguered States would receive under this bill.

This is a bipartisan effort to address what we all realize is a problem that will not go away.

The administration's projections for the remainder of the year are for unemployment rates to continue over 10 percent. They are saying recovery is beginning, and I certainly hope it is, but unemployment will be the last to improve; 12 million workers will not believe the economy is recovering until they are working again—providing for their families again—seeing a ray of hope again.

We have a basic responsibility to see that the basic needs of individuals are met. I am encouraged that the administration has finally joined many of us in support of an extension of this program beyond the expiration date of March 31, but it is really not enough.

What will we say to the more than 2 million people who have or will have exhausted all benefits by March 31—3 weeks from today—when they have nowhere else to turn? Two million people who have worked and contributed to their communities before they lost their jobs?

A few weeks ago, the Chicago Tribune published a full page article entitled, "From the Middle Class to the Soup Kitchen." The article points out that the people that are taking advantage of meal-sites and food pantries created by charitable organizations are not street people, but people who used to work and care for themselves. The increases are startling.

In Aurora, Ill., with a county unemployment rate of 12.6 percent—60th out of 102 counties in our State—they are now serving 120 to 140 people. Last July, 20 people took their meals there.

About 2 years ago, in DuPage County, there were 16 food pantries. Now, with an unemployment rate of only 8.4 percent, one of the lowest in the State, there are 30.

These people are classified as the "new poor." They are proud people and do not like to come to these places for handouts. But they do, because they cannot afford to buy food. A substantial portion are Vietnam veterans.

The U.S. Conference of Mayors reports that 60 percent of the 55 cities surveyed cannot meet the need for emergency food and shelter.

We have to provide the means for these unfortunate workers and their families to meet their basic needs. Our proposal for this extension of benefits will help them to do so.

In a few days we will be considering legislation which will put some of our people back to work. We cannot help them all. That is the reality of the situation. But we can see that a large number of the jobless, while they are looking for work, can continue to receive unemployment benefits.

We cannot ignore 12 million people. We cannot turn a deaf ear on their cries for help.

The pain is real. The need, dire. Our responsibility is clear, and our agenda, vast.●

By Mr. HATFIELD:

S. 688. A bill to provide that, unless the Government of El Salvador actively participates in negotiations with all major parties to the conflict which are willing to participate unconditionally in negotiations for the purpose of achieving a cease-fire and an equitable political solution to hostilities, U.S. military support of El Salvador shall be terminated, with military assistance funds to be transferred for use for development and humanitarian assistance; to the Committee on Foreign Relations.

AID TO EL SALVADOR

Mr. HATFIELD. Mr. President, today, along with Congressman JIM LEACH in the House of Representatives, I am introducing legislation conditioning military aid to El Salvador on participation of the Government of El Salvador in negotiations with all parties to the conflict.

Blame for the continuing violence rests not only with the guerrillas, but also with the Government which, as the State Department acknowledges, shares responsibility for massive human rights violations. We believe the troubles in Central America, although exacerbated by others, are primarily rooted in poverty, landlessness, illiteracy, social injustice, and historic denial of political representation. One does not have to sympathize with radical or revolutionary remedies to recognize that social and economic problems exist and must be addressed foremost if a humane, democratic way of life can be assured in the region. These objectives cannot be met, and this process cannot go forward, until and unless peace is attained.

Because of the blame which rests with all sides in this conflict, the continuing military stalemate, the finan-

cial cost to American taxpayers of underwriting a war to which there appears to be no end in sight, and the need to prevent any possibility of a military victory in the long term by the guerrillas, we urge the administration to give renewed consideration to a course of political negotiation and reconciliation in El Salvador. We do not propose to dictate the framework within which such a dialog should occur. Such negotiations could be one component of a broader multinational or regional plan. Many of our important allies in Central America and elsewhere have been urging negotiation and offering to assist in constructive ways. Their willingness to help us should be embraced.

A willingness on the part of the Government to sit down at the negotiating table and talk does not obligate it to accept unrealistic proposals from its opponents. Secretary of State Shultz testified recently that the United States would never support negotiations which would allow the insurgents to shoot their way into the Government. We agree. However, the Salvadoran Government can make its absolute commitment to a democratic process known more effectively at the bargaining table than it can on the battlefield. The flow of arms from outside sources and other forms of support for the insurgency can also be dealt with in the context of negotiations. Representatives of the insurgency have been calling for unconditional talks for some time now. It is time to test their sincerity.

This legislation will condition the provision of further military aid to the Government of El Salvador on the basis of whether the Government is actively engaged in good faith in a negotiation process. If the Government is unwilling to do so, all military advisors will be withdrawn and U.S. military assistance will be immediately transferred into humanitarian and development aid for El Salvador. The transfer of military aid into other forms of assistance stems from our desire to avoid sending a signal to the people of that country that we are prepared to abandon them. Rather, we simply seek to encourage the Government of El Salvador to find a peaceful solution to the war and to strengthen the hand of moderates in the Salvadoran Government who favor a negotiated settlement but lack sufficient political support to challenge those who prefer a prolonged war with the insurgents. The legislation, of course, places the Government of El Salvador under no obligation to negotiate if the opposition is unwilling to do so without prior conditions. Therefore, our bill requires that good faith be shown not only by the Salvadoran Government, but also by the opposition.

The purpose of this legislation is to signal to the Government of El Salvador that the people of the United States are unwilling to continue the seemingly endless war without an active effort of El Salvador's Government to end the violence. We believe a negotiated settlement is the only rational solution to the conflict.

Mr. President, I ask unanimous consent that the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 688

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That chapter 1 of part III of the Foreign Assistance Act of 1961 is amended by adding at the end thereof the following new section:

"SEC. 620F. UNITED STATES MILITARY SUPPORT FOR EL SALVADOR.—(a) United States military support for El Salvador may not be provided after the end of the 180-day period beginning on the date of enactment of this section unless the President transmits to the Congress, at the end of that 180-day period, a report stating that the President has determined that—

"(1) the Government of El Salvador is actively engaged in good faith in a negotiation process (A) whose purpose is to achieve a cease-fire and an equitable political solution to hostilities, and (B) which involves all major parties to the conflict in El Salvador which are willing to participate unconditionally in such a negotiation process; or

"(2) the Government of El Salvador cannot proceed with such a negotiation process because the Revolutionary Democratic Front (FDR) and the Farabundo Marti National Liberation Front (FMNL) are not willing to participate unconditionally.

In making the determination required by this subsection, the President shall consult with the Congress.

"(b) If United States military support for El Salvador is terminated pursuant to this section, any unobligated funds allocated for El Salvador under chapter 2 or 5 of part II of this Act shall be—

"(1) transferred under section 610 for use for development assistance projects in El Salvador under chapter 1 of part I of this Act or for assistance under section 495I of this Act for persons displaced by the strife in El Salvador; or

"(2) deposited in the Treasury as miscellaneous receipts.

"(c) As used in this section, the term 'United States military support for El Salvador' means—

"(1) the obligating of funds for assistance for El Salvador under chapter 2 or 5 of part II of this Act, and the issuing of letters of offer, extending of credits, or issuing of guarantees for El Salvador under the Arms Export Control Act;

"(2) the assigning or detailing to El Salvador of members of the United States Armed Forces to perform defense services under this Act or the Arms Export Control Act, to conduct international military education and training under chapter 5 of part II of this Act, or to perform international military assistance and sales management functions under section 515 of this Act; and

"(3) any other assigning or detailing to El Salvador, or other introduction into El Salvador, of members of the United States Armed Forces (other than members of the Armed Forces responsible for security at the United States Embassy in El Salvador), except that this paragraph does not prohibit the introduction of United States Armed Forces into El Salvador in order (A) to meet a clear and present danger of hostile attack upon the United States, or (B) to meet a clear and present danger to, and to provide essential and immediate evacuation of, citizens of the United States.".

By Mr. HEINZ:

S. 689. A bill entitled the "Natural Gas Policy Act Amendments of 1983"; to the Committee on Energy and Natural Resources.

NATURAL GAS POLICY ACT AMENDMENTS OF 1983

● Mr. HEINZ. Mr. President, today I am introducing the Natural Gas Policy Act Amendments of 1983. Its enactment would provide immediate price relief to all natural gas consumers, providing an average annual savings for each residential consumer of at least $200, a nationwide total annual savings of $25 billion.

In no way is it an oversimplification to state that many Pennsylvanians and people across our Nation will be faced with the choice of heating or eating this year.

The citizens of my home State and many others know only too well that gas prices have outstripped both their income earning capabilities and that these crippling price increases have affected other goods and services.

Consider that between 1978 and 1981, the income of a Pennsylvania manufacturing employee increased by 30 percent while his natural gas bill increase by 127 percent.

Consider that between September of 1978 and September of 1982, the gas rates charged by the six pipelines serving Pennsylvania increased by an average of 175.6 percent while the Consumer Price Index was growing by 47.2 percent.

Consider that between 1978 and 1982, gas prices charged to residential consumers in the city of Philadelphia increased by in excess of 94 percent and in the city of Pittsburgh by in excess of 86 percent.

As I said earlier, many Pennsylvanians will be faced with the choice of heating or eating this year.

Over 350,000 Pennsylvania families fall below 125 percent of the poverty level, the financial dividing line for most Federal assistance programs. That line is $5,016 per year, or $418 per month in disposable income. After spending money for rent, the gas bill, the nonheating electric utility bill, and food, the average family of three below the poverty level will find itself $33 in debt.

Just as bad is that plight of the single elderly Pennsylvanian totally dependent on a maximum supplementary security income payment of $317.60 per month. After paying his or her natural gas bill, this elderly Penn-

sylvanian will be left with only $39 a week for all other living expenses. I intend to schedule hearings before the Senate Aging Committee which I chair to further investigate the severity of these price increases on this Nation's elderly citizens.

On a nationwide basis, natural gas prices continue to rise by an average annualized rate of approximately 25.3 percent. In many parts of our Nation, this increase more nearly approaches a level of 40 to 50 percent. This has occurred despite the sizable present surplus of deliverable gas.

The facts I have just stated make it imperative that this Congress move expeditiously to take action to provide our country's citizens with the relief they urgently need from excessive and unjustified gas cost increases.

After very long and arduous deliberations in the 92d, 93d, and 94th Congresses, the 95th Congress passed and the President signed the Natural Gas Policy Act of 1978 NGPA. Fundamental to the NGPA was a balanced approach to the twin objectives of consumer price protection and adequate price incentives for vigorous domestic gas supply development. In these respects, the NGPA established an incentive price for new gas supplies with the ultimate decontrol of most of that gas by January 1, 1985. Further, NGPA retained controls on old gas both to assure consumers the price benefits of that gas and to provide additional incentives to producers for new gas exploration. We enacted NGPA in 1978 pursuant to the best wisdom and political climate prevailing at that time.

Since 1978, however, a series of conditions have arisen which we could not have anticipated then, but which now combine to require our action once again in this most controversial and complex area. Some of these events were internal to the very premise and construction of the NGPA while others were external to the NGPA.

For example, the NGPA did not anticipate dramatic increases in oil prices, or the FERC's self-enforced abdication of its traditional consumer protection role. Moreover, NGPA did not anticipate the magnitude to which interstate pipelines and gas producers would seek to increase gas prices by their contracts now and at the time of decontrol of new gas in 1985. High take-or-pay and indefinite price clauses in those contracts are causing gas prices to the consumer to be higher than necessary, creating grave consequences for consumers and the gas industry alike in 1985 if not restrained.

The events have been compounded by certain internal characteristics of NGPA. The NGPA category pricing mechanisms have proven to be highly inflexible and one way—up. Wellhead prices responsive to retail market conditions have been virtually impossible to achieve even at this time when supply is clearly in excess of demand. Moreover, by providing interstate pipeline companies with a so-called guaranteed passthrough of their purchased gas costs, NGPA itself greatly reduced the institutional incentive of those companies to drive hard bargains with the gas producers and to control reasonably their purchased gas costs.

I, of course, am hardly the first person to notice or point out these inadequacies in the legal and institutional framework surrounding gas prices. Indeed, many of us have already addressed in some fashion most of the concerns I am expressing today. And, I believe it is fair to say that almost all gas consumers, utilities, pipelines, and producers agree that "something" must be done. The real question is what? The purpose of the bill I am introducing today is to answer that question.

First, my legislation will continue all existing controls on old gas while retaining the schedule for the decontrol of new gas mandated by the NGPA. This strategy protects the consumer from increases in the price of old gas, which constitutes more than 40 percent of supply, while providing incentives necessary for secure, long-term gas supplies.

Second, my legislation will further nullify indefinite price escalators in existing and future gas contracts; limit take or pay provisions in existing contracts to 50 percent; and mandate the existence of market out provisions in all contracts for gas to interstate pipelines after 1977 with appropriate transportation provisions.

These provisions will provide access to low-cost gas, currently denied to consumers by abusive contract provisions and will serve to eliminate nonmarket related increases.

Third, this legislation, in order to put an end to abusive pipeline purchasing practices, requires the implementation of stringent pipeline accountability standards outlined in sections 4 and 5 of the Natural Gas Act. Also, a penalty would be established which requires pipeline companies to pay interest on refunds of any excess rate collections charged customers at 3 percentage points above the prevailing prime rate.

Fourth, consumer protection will be further enhanced through a series of technical amendments relating to determining the Btu content of natural gas, clarifying that contract authority is a necessary precondition for the collection of NGPA ceiling prices, and reaffirming that NGPA ceiling prices cannot be exceeded either by noncost based production-related allowances or by pipelines providing other below value services to producers while also paying NGPA price.

These and other features of my legislation—described in detail in the section-by-section analysis that follows—will achieve upon enactment a $25 billion savings for gas consumers. Again, this equates to no less than a $200 annual saving for residential gas consumers.

In sum, I have introduced legislation today which achieves consumer price and supply protection and provides a permanent and comprehensive, and above all, workable solution to the serious problems confronting gas consumers and the gas industry today, and I urge my colleagues careful study and support.

Mr. President, I ask unanimous consent that the bill and a summary of the bill be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 689

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. Short Title; Table of Contents:

(a) SHORT TITLE.—This Act may be cited as the "Natural Gas Policy Act Amendments of 1983."

(b) TABLE OF CONTENTS.—

TABLE OF CONTENTS

TITLE I—FINDINGS AND PURPOSES

Sec. 101. Findings.

Sec. 102. Purposes.

TITLE II—AMENDMENTS TO THE NATURAL GAS POLICY ACT OF 1978

Sec. 201. Amendments to section 2 of the Natural Gas Policy Act of 1978.

Sec. 202. Amendments to Title I of the Natural Gas Policy Act of 1978.

Sec. 203. Amendments to Title III of the Natural Gas Policy Act of 1978.

Sec. 204. Amendments to section 601 of the Natural Gas Policy Act of 1978.

TITLE I—FINDINGS AND PURPOSES

SEC. 101. The Congress finds and declares that—

(1) Natural gas is a fuel widely used in residential, industrial and commercial applications and significantly affects interstate commerce;

(2) There presently exists a surplus of deliverable natural gas;

(3) Natural gas prices are currently above market-clearing levels in many markets;

(4) Wellhead prices of natural gas are not responding promptly to retail market conditions;

(5) Take-or-pay clauses in wellhead gas purchase contracts are causing gas pipeline companies to incur substantial payment penalties and to purchase a mix of higher cost supplies than otherwise necessary;

(6) Indefinite price escalation clauses in wellhead gas purchase contracts steadily increase gas prices with little or no relationship to retail market conditions and are likely to increase prices significantly above market-determined prices if not controlled;

(7) Take-or-pay and indefinite price escalation clauses are causing or will cause results contrary to the public interest;

(8) Natural gas companies, as defined by the Natural Gas Act of 1938, have inadequate incentive to control purchased gas

costs in view of section 601(c)(2) of the Natural Gas Policy Act of 1978;

(9) Gas producers and pipeline companies are unlikely to renegotiate their gas purchase contracts to resolve the problems extant today in the natural gas industry; and

(10) Urgent legislative action is necessary to achieve wellhead gas prices responsive to retail market conditions.

SEC. 102. The purposes of this Act are to—

(1) Provide mechanisms for a smooth transition to the ultimate decontrol of certain wellhead natural gas prices;

(2) Assure that natural gas companies are held accountable, through federal regulation, for all costs incurred by such companies, including purchased gas costs;

(3) Provide technical amendments to the Natural Gas Policy Act of 1978;

(4) Nullify certain gas purchase contract provisions which inhibit the free flow of market signals between consumers and producers of natural gas;

(5) Provide in certain wellhead gas purchase contracts market-out clauses to permit price adjustments in response to market conditions;

(6) Assure gas supply security to interstate markets;

(7) Assure that natural gas of marketable quality is received in return for maximum lawful prices; and,

(8) Exercise the power of Congress to the maximum extent to regulate interstate commerce in the public interest.

TITLE II—AMENDMENT TO THE NATURAL GAS POLICY ACT OF 1978

SEC. 201. Section 2 of the Natural Gas Policy Act of 1978 is amended—

(1) by inserting at the end of section 2(30), the following: "For purposes of determining the number of Btu's per unit volume of natural gas, the Btu content of one cubic foot of natural gas shall be the number of Btu's produced by the combustion, at constant pressure, of the amount of gas which would occupy a volume of one cubic foot at a temperature of sixty degrees Fahrenheit, saturated with water vapor and under a pressure equivalent to that of thirty inches of mercury at thirty-two degrees Fahrenheit, and under standard gravitational force (980.665 centimeters per second squared) with air of the same temperature and pressure as the gas, when the products of combustion are cooled to the initial temperature of the gas and air and when the water formed by combustion is condensed to the liquid state; provided, however, that a different method for determining Btu's may be used whenever any contract for the first sale of natural gas expressly and specifically by its plain language so provides."; and

(2) by adding at the end thereof the following:

"(38) DEFINITE PRICE PROVISION.—The term "definite price provision" means any provision in a contract for the first sale of natural gas that establishes a specific unit price, which is known or predictable with certainty at any present and future time during the duration of the contract, for natural gas sold under such contract.

"(39) INDEFINITE PRICE PROVISION.—The term "indefinite price provision" means any provision in a contract for the first sale of natural gas, other than a definite price provision, which establishes a price for natural gas sold under such contract.

"(40) MARKET-OUT PROVISION.—The term "market-out provision" means a provision in a contract for the first sale of natural gas which permits either party in its sole discretion on thirty days notice to require the other party to accept a price different from the prevailing contract price as the contract price.

"(41) TAKE-OR-PAY PROVISION.—The term "take-or-pay provision" means a provision in a contract for the first sale of natural gas which obligates the purchaser to take delivery of or to pay for an indicated percentage of natural gas under such contract.".

SEC. 202. Title I of the Natural Gas Policy Act of 1978 is amended—

(1) by adding at the end of paragraph 101(b)(9) the following: "The price under any contract in effect on November 8, 1978, shall remain the price after November 8, 1978, unless the contract expressly and specifically by its plain language authorizes prices established by Congress, in which case any price not in excess of the applicable maximum lawful price may apply.";

(2) by adding after subsection 101(b) the following:

"(c) REPEAL OF ANNUAL INFLATION ADJUSTMENT FACTORS.—Upon the date of enactment of this Act, the annual inflation adjustment factor, as defined in subsection 101(a) and applied in sections 102, 103, 104, 105, 106, 107, 108 and 109, shall cease to apply.

"(d) COVERAGE OF CEILING PRICES.—

"(1) GENERAL RULE.—The applicable maximum lawful price for any first sale of natural gas shall be deemed to include all costs necessary to, or associated with, the delivery of marketable natural gas to the purchaser.

"(2) SELLER ALLOWANCE OR ADJUSTMENT.—To the extent that the seller incurs costs necessary to deliver natural gas of marketable quality to the purchaser and such costs deprive the seller of the opportunity to earn a just and reasonable return within the applicable maximum lawful price, the Commission may exercise its authority pursuant to sections 110 and 502(c) to provide an allowance or adjustment to the maximum lawful price which will permit the seller to earn a just and reasonable return.

"(3) PURCHASER ADJUSTMENT.—The Commission shall reduce any applicable maximum lawful price by the value of any consideration of any kind which the purchaser provides to the seller in addition to the applicable maximum lawful price. Such reduction shall include, but not be limited to, the value to the seller of any free or below-value transportation of liquid or liquefiable hydrocarbons provided by the purchaser.".

SEC. 203. Title III of the Natural Gas Policy Act of 1978 is amended—

(1) by deleting "." at the end of paragraph 311(a)(1) and inserting the following: "; provided, however, that the just and reasonable rate shall be no less than $0.05 per million Btu's and that all revenues received by the interstate pipeline in excess of $0.05 per million Btu's shall be credited back to the customers of such pipeline."; and

(2) by adding at the end thereof the following:

"SEC. 316. FIRST SALE CONTRACTS AND PROVISIONS THEREOF—

"(a) INDEFINITE PRICE PROVISIONS.—Indefinite price provisions in all contracts for the first sale of natural gas are null and void as contrary to public policy.

"(b) MARKET-OUT PROVISIONS.—All contracts for the first sale of natural gas enumerated in subsections 121(a) (1) and (2), 121(b) and (c) are deemed by operation of law to include a market-out provision.

"(1) EXERCISE BY PURCHASER.—The exercise of a market-out provision by the purchaser shall authorize the seller to seek an alternative purchaser. At the conclusion of the thirty day notice period, the seller shall either accept as the contract price the price offered by the purchaser or offer to the purchaser a right of first refusal at the price which the seller has negotiated with an alternative purchaser.

"(2) EXERCISE BY SELLER.—The exercise of a market-out provision by the seller shall require the seller to offer to the purchaser a right of first refusal at the price which the seller has negotiated with an alternative purchaser.

"(3) TRANSPORTATION SERVICE AND RATES.—Any pipeline purchaser which declines an offer made pursuant to any right of first refusal required by this subsection shall transport the natural gas involved on a best efforts basis on behalf of the seller. The rate charged for such transportation service shall be the rate agreed to by the seller and the pipeline purchaser or, if no rate is agreed to, the rate established by the appropriate State or Federal regulatory authority; provided, however, that no State or Federal regulatory authority may establish a rate less than $0.05 per million Btu's plus the cost of such transportation and that all revenues received by a pipeline purchaser in excess of $0.05 per million Btu's shall be credited back to the customers of such pipeline.

"(c) TAKE-OR-PAY PROVISIONS.—Take-or-pay provisions in all contracts for the first sale of natural gas in effect on the date of enactment of this Act shall be deemed by operation of law to be limited to fifty percent.

"(d) RIGHTS OF PURCHASER TO CONTEST.—Any provision of any contract for the first sale of natural gas which has the effect of restricting the right of the purchaser to contest in any manner the rights and obligations of the parties to such contract shall be null and void as contrary to public policy.

"(e) ACCESS TO CONTRACTS.—All contracts and ancillary agreements for the first sale of natural gas shall be filed with the Commission and made available by the Commission to the public in an orderly manner within sixty days after the later of the date of enactment of this Act or the execution of the contract.

"(f) COORDINATION WITH EXISTING CONTRACTUAL PROVISIONS.—Any provision of any contract for the first sale of natural gas which would affect the rights and obligations of the parties to such contract as a consequence of this section shall be null and void as contrary to public policy to the extent such provision is inconsistent with this section or would cause termination of the contract.

"(g) CONTRACT INTERPRETATION.—On petition by any party to a contract for the first sale of natural gas or by any local distribution company affected by such contract, the Commission shall have jurisdiction to resolve any matter concerning the rights and obligations of the parties or any other matters involving the interpretation of contract language.".

SEC. 204. Section 601 of the Natural Gas Policy Act of 1978 is amended to add the following:

"(d) EFFECTIVENESS OF NATURAL GAS ACT.—Notwithstanding any other provision of law, the authority of the Commission pursuant to sections 4 and 5 of the Natural Gas Act shall be in full force and effect with respect to natural gas companies, as defined in such Act, including, without limitation, purchased gas costs incurred by natural gas companies.

"(e) RATE INCREASE DISINCENTIVE.—

"(1) PURPOSE.—The purpose of this subsection is to establish a mechanism to discourage natural gas companies, as defined in the Natural Gas Act, from making repetitive or excessive rate increase filings.

"(2) COMMISSION RULE.—Within ninety days after the date of enactment of this Act, the Commission shall promulgate a final rule which establishes the interest rate at which refunds shall be paid by natural gas companies on any collections made by such companies in excess of rates approved by final order of the Commission.

"(3) MINIMUM INTEREST RATE.—The interest rate established by the Commission pursuant to this subsection shall be no less than three percentage points above the prime interest rate prevailing during the period of any collections subject to refund made by any natural gas company.

"(f) TARIFF STUDY.—Within one year after the date of enactment of this Act, the Commission shall undertake and complete a comprehensive study of minimum bill and related provisions in interstate pipeline tariffs. The study shall—

"(1) include analyses of the effects of such provisions on the responsiveness of wellhead gas prices to retail market conditions, the rates charged customers of interstate pipelines, the ability of local distribution companies to secure varied sources of gas supply, and the present and future financing of existing and new interstate pipelines;

"(2) include analysis of the necessity for such provisions; and

"(3) be undertaken with opportunities for written and verbal comments of interested parties.

Pursuant to the Natural Gas Act, the Commission may, as appropriate, require the revision of minimum bill and related provisions in interstate pipeline tariffs. Nothing in this subsection shall preclude the Commission from ordering appropriate revisions to interstate pipeline tariffs during the pendency, or after the completion, of the study required by this subsection.".

HIGHLIGHTS OF NATURAL GAS POLICY ACT AMENDMENTS OF 1983

SUBSTANTIAL GAS PRICE REDUCTIONS UPON ENACTMENT

Immediate price reductions upon enactment totaling some $25 billion

Average savings per residential customer approximately $200

Additional price reductions clear, but amount dependent upon supply/demand factors in gas markets and mix of interstate pipeline supplies

CLEAR, PERMANENT AND COMPREHENSIVE RESOLUTION OF CONTRACTS PROBLEMS

Indefinite price escalation provisions nullified and prohibited now and forever

Take-or-pay provisions in existing contracts limited to 50 percent

Market-out provisions mandated in all contracts for gas to be decontrolled in 1985 and 1987

No formula or "capping" mechanism of uncertain consequence

SUPPLY STABILITY AND INCENTIVES FOR VIGOROUS DOMESTIC GAS EXPLORATION

Maintains Natural Gas Policy Act phased decontrol schedule for new gas and also maintains NGPA authority of Congress or President to reimpose price controls

No "old" gas decontrol

PIPELINE ACCOUNTABILITY AND OVERSIGHT

Reassertion of pipeline regulation under the Natural Gas Act, including reasonableness review of purchased gas costs

Rate increase disincentive to discourage repetitive or excessive pipeline rate filings

Economic incentive for pipelines to render transportation service

Mandate FERC review of pipeline minimum bill and related provisions

---

SECTION-BY-SECTION ANALYSIS OF NATURAL GAS POLICY ACT AMENDMENTS OF 1983

TITLE I—FINDINGS AND PURPOSES

Section 101.—Ten separate Congressional findings and declarations are set forth in section 101. These are based upon testimony presented to the Congress in hearings held over the past year, responses to Congressional inquiries submitted by gas producers, pipeline companies, utilities and consumers, and numerous studies and analyses produced by governmental bodies and private parties on natural gas issues. The findings and declarations are largely self-explanatory.

Section 102.—This section sets forth eight purposes of the bill. These too are largely self-explanatory and evolve from the findings and declarations in section 101.

The specific language of section 101 and 102 was carefully chosen to leave no doubt as to the urgent need for legislative action and, in light of judicial precedent, to assure that the bill generally and its contract measures in particular will withstand any constitutionally based legal challenge.

TITLE II—AMENDMENTS TO THE NATURAL GAS POLICY ACT OF 1978

This title consists of four sections, each amending a different component of the Natural Gas Policy Act of 1978 (NGPA), but in a wholly interrelated fashion. The overall objectives of this title are to:

(a) Clarify certain sections of NGPA to provide for Federal Energy Regulatory Commission (FERC or Commission) implementation of NGPA in a manner more consistent with the original intent of Congress in that Act;

(b) Resolve certain problems with respect to the terms of gas sales contracts to assure that demand signals for natural gas can be efficiently transmitted through the gas marketing chain to the wellhead;

(c) Provide permanent, comprehensive contractual and pipeline regulatory mechanisms to facilitate the responsiveness of wellhead gas prices to retail market conditions;

(d) Hold natural gas companies, as defined in the Natural Gas Act (NGA), accountable to their customers and gas consumers for their gas acquisition practices and prices; and,

(e) Accomplish such other matters as described further herein.

As important as what the bill intends to do, is what it does not intend to do. It does not, for example, intend to decontrol "old" gas prices or to encourage FERC to raise prices for old gas in any manner. It also does not intend to upset or revise the NGPA schedule for phased decontrol of certain new gas supplies nor the NGPA authority of Congress or the President to reimpose price controls. Moreover, it does not establish new rigid wellhead pricing formulae or mechanisms which have proven to be ineffective consumer protection measures by the NGPA itself.

Section 201.—This section amends the NGPA definitional section in two respects. First, it adds to the NGPA definition of "Btu" a specific measurement technique for determining the Btu content of natural gas. The technique prescribed is the so-called "saturated" or "wet" basis measurement which has been the generally accepted industry standard for decades. This measurement standard was revised by FERC to achieve a so-called "dry" basis for Btu measurement. This dramatic shift by FERC has been estimated to raise wellhead gas prices nationwide by about 1.8 percent. The FERC regulation is being litigated in court, but, in the meantime, consumers are paying the higher prices premised on a dry Btu measurement. The amendatory language specifically requires a "wet" Btu measurement, but allows for a different measurement technique whenever the contract for the first sale of gas expressly and specifically by its plain language provides for such a different technique. Thus, the generally accepted industry standard is maintained, but parties to the gas sales contract are permitted to deviate from that standard to the extent their contract so provides.

Second, this section adds four new definitions to the NGPA definitional section. In new paragraph (38), "definite price provision" is defined to mean any provision in a contract for the first sale of natural gas that establishes a specific unit price, which is known or predictable with certainty at any present and future time during the contract duration, for gas sold under a contract. The key factor here is that the unit contract price must be a specifically determinable amount at any time during the term of the contract. A certain, predictable unit price is paramount. In new paragraph (39), "indefinite price provision," is then defined as any provision of a contract other than a definite price provision which establishes the price under the contract.

New paragraph (40) defines a "market-out provision" as a provision in a first sale contract which permits either party in its sole discretion on thirty days notice to require the other party to accept a price different from the prevailing contract price as the new contract price. The key components of this definition are that the market-out provision may be exercised in the sole, unfettered discretion of either party upon thirty days notice.

Lastly, new paragraph (41) defines "take-or-pay provision" to mean a provision in a first sale contract that obligates the purchaser to take delivery of or to pay for an indicated percentage of gas under the contract.

Of course, as in NGPA, the new definitions, (38)-(41), are not complete absent their implementation in a later section (section 203) of this bill. Thus, these definitions must be read in connection with section 203 of the bill and are described with further detail there.

Section 202.—This section amends Title I of NGPA in several respects. The first of these amendments (Section 202 (1)) supplements NGPA Section 101(b)(9) and clarifies the standing of area rate clauses in contracts for the first sale of natural gas. The essential role of this amendment is to resolve a dispute FERC has been unable to resolve since it arose in January, 1979. Under this amendment "area rate clauses" will not entitle the producer/seller of natural gas to receive the applicable NGPA ceiling price unless the plain language of the contract for the sale authorizes prices established by Congress. For the most part, this amendment will affect contracts covering "old" gas, given that most "new" gas contracts contain the contract authority required.

Second, Section 202(2) amends Title I to add a subsection 101(c) which repeals the

annual inflation adjustment factor prescribed in the NGPA for all vintages of gas, including stripper well and tight sands gas. The amendment does not, however, modify that part of NGPA which authorizes real (noninflationary) increases in ceiling price levels. The obvious difference between these two NGPA-based automatic ceiling price increasing mechanisms is that inflation-based increases are "indefinite price escalators" (which are outlawed by Section 203(2) of this bill), and real increases in field prices are prescribed at a stated amount in NGPA (either at one percent or four percent above the stated ceiling price), depending on the vintage of the gas well.

Third, Section 202(2) amends Title I of NGPA by adding a new subsection 101(d). This new subsection begins with a general rule that ceiling prices are deemed to include all costs necessary to the delivery of marketable natural gas. Paragraph (2) of the new subsection then describes the NGPA mechanism whereby sellers are allowed to charge prices in excess of ceiling prices where such higher prices are justified by cost-based "production-related expenditures." Thus, it allows FERC to permit the seller to collect a price in excess of the applicable ceiling price if such higher price is necessary to allow the seller to earn a just and resonable return on its investment. In addition, paragraph (3) of new subsection 101(d) specifies the treatment of liquids and liquefiables transportation service rendered by gas pipelines on behalf of gas producer-sellers. Under this paragraph, the value of any transportation service rendered by a pipeline on behalf of a seller is applied as a reduction in the ceiling price applicable to the gas sold to the pipeline. Accordingly, paragraph (3) ends the practice whereby pipelines provide free or low-cost transportation service on non-gaseous hydrocarbons owned by sellers (and produced jointly with methane or natural gas) but which are removed and sold by the producer at points remote from the production site.

Section 203.—This section amends NGPA Title III in several respects. First, a phrase is added at the end of existing NGPA paragraph 311(a)(1), relating to the just and reasonable rates which interstate pipelines may charge for certain transportation services rendered by them. The existing law as implemented is inadequate because it fails to provide a sufficient economic incentive to encourage the interstate pipeline companies to provide transportation service. The amendatory language establishes a transportation rate of no less than $0.05 per million Btu's, which is generally recognized as an amount necessary to provide sufficient financial incentive to transport gas. The amendment also requires, however, that the pipeline rendering transportation service can not retain any revenues received for such service in excess of $0.05. The revenues, if any, in excess of $0.05 must be flowed back to the customers of the pipeline through the traditional FERC procedures.

The second major amendment to NGPA Title III made by this section is the addition of a new section 316, which contains numerous provisions relating to the so-called contracts problems and inability of NGPA established prices to reflect retail market conditions. Subsection 316(a) relates to indefinite price provisions. These provisions are likely to cause wellhead prices in 1985 vastly in excess of prices which would prevail if market forces were operative. Further, such provisions have, at the least, anticompetitive implications and act to ratchet inexorably gas prices upward only. Thus, subsection 315(a) nullifies and voids indefinite price provisions in all, existing and future, contracts for the first sale of natural gas as contrary to public policy.

Section 316(b) provides that a market-out provision shall be deemed by operation of law to be in all contracts for the first sale of natural gas enumerated in subsections 121(a) (1) and (2), 121(b) and (c) of the NGPA. This includes only contracts for gas which will be deregulated under the NGPA. Certain intrastate contracts are not, however, included by subsection 316(b) because a record which establishes the necessity for a market-out in such contracts does not presently exist. The market-out may be exercised by either the seller or purchaser on thirty days notice. A right of first refusal by the purchaser is required, and best efforts transportation of the seller's gas is also required in the event that the right of first refusal is not exercised. The rates for transportation of the seller's gas are, with some self-explanatory variation, set in accordance with the previously described amendment to NGPA paragraph 311(a)(1). It is fully anticipated that this provision will result in a substantial reduction in gas prices given current market conditions.

Subsection 316(c) provides that the percentage factor applicable to take-or-pay provisions in all existing contracts will be limited to fifty percent. This limitation is not based upon reserves or deliverability as specified in any particular contract, but, instead limits to fifty percent whatever higher percentage factor may be stated in a given contract. The language does not apply to contracts entered into after the date of enactment, since it would not be advisable to restrict a pipeline purchaser's flexibility to agree to a higher take-or-pay provision in return for a lower sales price. The reasonableness of any pipeline's exercise either of its right to reduce its take-or-pay obligation to the fifty percent level or of its flexibility to agree to higher take-or-pay percentage in post-enactment contracts would, of course, be subject to FERC review pursuant to section 601(d) added by this Act. It is expected that subsection 316(c) will permit pipeline companies to achieve substantial reductions in gas prices both by permitting a change in the mix of higher and lower cost supplies pipelines take at any given time and by avoiding prepayments under existing high take-or-pay provisions.

Subsection 316(d) provides that a purchaser of gas in any "first sale" transaction would acquire the right to contest the "rights and obligations" of the seller in a gas sales contract. The effect of the subsection is to nullify as "contrary to public policy" any arrangement whereby a first sale purchaser of gas has conveyed to the seller its right to oppose or object to the seller's assertions with respect to prices to be paid or any other aspect of the gas sales transaction.

Subsection 316(e) clarifies FERC's mandate to be the respository of all first sale contracts and ancillary agreements. This subsection requires the filing of such agreements within 60 days after the execution thereof (or date of enactment, in the case of older agreements) and is not intended to enlarge FERC's information gathering authority. In accordance with section 4 of the Natural Gas Act and Section 315 of NGPA, FERC now possesses authority to secure such agreements. This authority, however, has not been exercised on a consistent basis since the enactment of NGPA in 1978.

Subsection 316(f) is a "savings clause" which provides that any contract provisions which would negate the effect of these amendments would be rendered null and void "as contrary to public policy." The effect of this amendment would be to disqualify any contract provisions which were "triggered" by these new amendments and which, absent Section 316(f), would create rights and obligations inconsistent with any of the amendments in this bill.

Finally, subsection 316(g) clarifies FERC's authority to interpret the terms of contracts covering first sales of natural gas. This amendment would confer jurisdiction on FERC to resolve any dispute involving the interpretation of contract provisions. Accordingly, a single forum (FERC) would be available to interested parties to resolve on a uniform, nationwide basis any disputes between first sale purchases and sellers regarding such matters as the amount or price to be paid for gas under applicable contracts.

Section 204.—This is the "pipeline accountability" amendment which is the concluding amendment of the bill. Section 204 clarifies the relationship between NGPA and the Natural Gas Act of 1938 insofar as the regulation of "natural gas companies" is concerned. In a new NGPA subsection 601(d), section 204 provides that sections 4 and 5 of the Natural Gas Act are expressly applicable to companies regulated under that Act. Among other things, this amendment would require prudent pipeline purchasing practices and would clarify FERC's authority to review pipeline "purchased gas costs" under the well understood just and reasonable standard.

Two new FERC mandates are also provided in Section 204. First, section 204 adds a new subsection 601(e) in NGPA which requires a "rate increase disincentive." In accordance with this subsection, pipelines would be discouraged from filing excessive and/or repetitive rate increases. To achieve this, FERC is required to promulgate a rule which fixes the interest rate paid on refunds on pipeline overcharges at a rate not less then the prime rate plus three percentage points.

Second, new subsection 601(f) requires FERC to undertake and complete a "tariff study" within one year of the date of enactment of the subsection. In this study, FERC would examine "minimum bill and related provisions" in interstate pipeline tariffs and would analyze the effects of such provisions on the "responsiveness of wellhead gas prices to retail market conditions, the rates charged customers of interstate pipelines," and other market related factors. This amendment would not expand FERC's jurisdiction, but would require early attention to pipeline contracting practices in which minimum bill arrangement are prevalent.●

By Mrs. HAWKINS:

S.J. Res. 47. Joint resolution authorizing and requesting the President to proclaim "National Disabled Veterans Week"; to the Committee on the Judiciary.

NATIONAL DISABLED VETERANS WEEK

● Mrs. HAWKINS. Mr. President, today I am introducing a joint resolution to establish the week of November 6, 1983, as "National Disabled Veterans Week."

Mr. President, honor must go to the brave. For the love of country—and

for the love of all Americans—these brave people made so many sacrifices: Physical, emotional, psychological—and are left with an indelible memory of their time that is at once deeper and more painful than our own. We must remind them that their sufferings and sacrifices will not go unremembered or unknown. To be forgotten or ignored by one's countrymen is unbearable. In the words of Edward G. Galian, national commander of the Disabled American Veterans;

When veterans return from wars, their feelings of being unable to share their experience with anyone are intense. So many piercingly strong emotions, and they're all bottled up inside.

After World War II, people were ready to listen to vets like me. They'd at least try to understand, even if they couldn't. They'd give us an opportunity to try to explain what we were feeling, even if we couldn't. It didn't make the pain go away, but it eased the loneliness bit by bit.

I suspect the transition to peacetime, civilian life was tougher for veterans of the Korean War. And I know it was more difficult for those who came home from the Vietnam War. Few wanted to listen to these veterans. Few wanted to understand. Few seemed ready to say, "Welcome home, you've done a good job for your country."

It's natural for a veteran to feel isolated, angry, alone, alienated, and very different from everyone else when he or she first comes home.

Mr. President, we have 2,300,000 disabled veterans in this country—and millions more whose scars are not so evident. We in Congress must, in our own way, fight for the rights of those who, at the risk of their own lives, fought to keep something alive for us. They deserve not only our honor but also our compassion and our concern. I, for one, will continue to support the veterans population in any way that I can—especially in the areas of health care and just compensation. A National Disabled Veterans Week is a week-long expression of appreciation for their lifelong sacrifice and gratitude for their greatness of heart.

And so, Mr. President, I ask that in this way we honor the brave American veterans—battle scarred but good soldiers all—who had the spirit to fight, the strength to win, and, most important, the courage to live.●

By Mr. McCLURE (for himself and Mr. MATTINGLY):

S.J. Res. 48. Joint resolution to amend the Constitution of the United States to limit budget outlays for a fiscal year to not more than 20 per centum of gross national product for such fiscal year; to the Committee on the Judiciary.

FEDERAL GOVERNMENT SPENDING RESPONSIBILITY

● Mr. McCLURE. Mr. President, last year this body passed the proposed constitutional amendment to balance the budget. I strongly supported that measure and felt it would go a long way to restoring fiscal responsibility to our Government. However, as with any compromise, there were imperfections. We can all agree that it is imperative that the Federal Government adopt and stick to a policy of spending no more than it takes in as revenue. The means of accomplishing this goal is under constant scrutiny. I feel, as many of my colleagues do, that the temptation to raise taxes is too great in the balance the budget amendment. There is no doubt that the best way to go about balancing our budget is to focus on decreasing the role of the Federal Government in our economy.

There are those who tell us that we are undertaxed, that the American public pays less than other countries do. But that is one of the unique aspects of the American way—that we are not like other countries. We are free people, and we cherish our freedom. We do not like the idea of government taking away from us, as a matter of right, more than half of all we make, and that is what government at every level is doing today.

Mr. President, sometimes individual examples are more persuasive than abstract principle. When leisure becomes more rewarding to a laboring person than does the aftertax reward of their labor, they choose leisure. They are not stupid. The sawmill worker in northern Idaho suddenly was sick every other Friday afternoon. Naturally his employer doubted whether this was fact. They called him and said "Hank, we noticed that you were sick every other Friday afternoon and we don't believe it." And he said, "Well, you are right. The first Friday afternoon I was sick. I could hardly get home and into bed. I was in bed all weekend, I could hardly get back to work on Monday morning, but when I got my check for that week it was only a few dollars less than if I had worked on Friday afternoon. And, frankly, my Friday afternoon is worth more than that to me."

Not a lazy American worker, a smart American doing what our system tells him to do, and that is to choose leisure as more rewarding to him than the aftertax rewards of labor.

That is what this amendment is all about, to try to get spending back down to the limits where Americans begin to see that the rewards of labor are more important to them than the rewards of leisure. We will never attain that in our system as long as the burden of taxation continues to rise. As important as the proposed constitutional amendment to balance the budget was, it did not do all of the job that needs to be done because spending can continue to rise under the amendment. Senator MATTINGLY and I warned this body of this but at the time we felt that altering it then would have gone further to guarantee its defeat than its passage.

At that time we vowed to bring the issue up again. My views have not changed on this subject. Government spending is bleeding our Nation dry. Those on both sides of the aisle see this and should address it. The American people delivered a clear message in November 1980. They are tired of wasted tax dollars, they are tired of inefficient agencies, and they know that deficits are strangling our economy and their livelihood.

If we look back to the 1950's and 1960's when Federal spending took a smaller share of our economy, we were much more productive. In the 1960's Federal spending was about 18 percent of our gross national product. During this period our economy, as it is measured by GNP, grew 6.72 percent. In the 1970's, during Congress freewheeling spending spree, Federal spending as a percentage of GNP was 21 percent, and at the same time our inflation rate was above 7 percent and the growth of our economy was only 3 percent. There is no doubt that as Federal spending consumes more and more of our economy we are less productive and we turn to inflationary policies to make up the difference. During the 1980's we have seen double-digit inflation, drastically high interest rates and a stagnant economy. Last year even with the hard work of the Appropriations Committee, Federal spending surpassed 24 percent of GNP. This year this figure will surpass 25 percent, thus further choking the productive side of our economy. On the tax side, this administration has a record of success that any administration would be proud of. Even before the Economic Recovery Tax Act of 1981 is fully implemented the Federal Government's share of taxes has been reduced from 21 percent of GNP in fiscal 1981 to an estimated 18.3 percent in fiscal year 1983. The end result in this economic confusion is a deficit that, according to administration sources, could surpass 6.5 percent of GNP.

During the last 80 years, population has tripled, prices have increased 7 times, but the outstanding Government debt has increased 500 times. We must realize that money expenditures do not solve social problems. This body has conducted the world's longest experiment in this and we have failed. More money spent on a bad idea will not make that idea good.

The proposal we have today will go a long way to reaffirm valid financial standards. By reducing the Federal Governments' share of GNP by 1 percent a year until it is back down to productive levels of 20 percent we will go a long way to restore responsibility to government. This was a promise Ronald Reagan made to the American people and I intend to do everything I can to help him accomplish it. It

should be very clear to us that the American people feel that modern government is out of control. They are correct. This year we can fully expect to spend over $100 billion on interest payments on our debt alone.

The time is now to draw the line and give the American people exactly what they want and what the economy needs: A budget that is balanced by taking the foot of the nect of the economy.

I ask all of my colleagues to join me in support of this important measure, and I ask unanimous consent that the joint resolution be printed in the RECORD.

There being no objection, the joint resolution was ordered to be printed in the RECORD, as follows:

S.J. RES. 48

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, (two-thirds of each House concurring therein), That the following article is hereby proposed as an amendment to the Constitution of the United States, which shall be valid to all intents and purposes as part of the Constitution when ratified by legislatures of three-fourths of the several States within seven years after its submission to the States for ratification:

"ARTICLE —

"Section 1. In exercising its powers under article 1 of the Constitution and in particular its powers to lay and collect taxes, duties imposts, and excises and to enact laws making appropriations, the Congress shall assure that the total outlays of the Government during any fiscal year (except for repayment of debt) do not exceed on amount equal to the greater of—

" '(a) the difference between—

" '(b) an amount which bears the same relationship to the gross national product of the United States at the close of such fiscal year as outlays for the preceeding fiscal year bear to the gross national product of the United States at the close of such preceeding fiscal year, and

" '(2) an amount which is equal to 1 per centum of gross national product for such fiscal year, and

" '(b) 20 per centum of the gross national product for such fiscal year.

"Section 2. In case of national emergency or war, the limit may be exceeded but all expenditures in excess of the greater of the limitations listed in Section 1 of this Act must be approved by a concurrent resolution agreed to by a rollcall vote of three-fourths of all the members of each House of Congress. The limitation may be exceeded only in that fiscal year in which such a vote was taken."●

By Mr. PERCY (for himself, Mr. PELL, Mr. BYRD, Mr. DOMENICI, Mr. PRESSLER, Mr. HOLLINGS, Mr. LUGAR, Mr. INOUYE, Mr. JACKSON, Mr. DODD, Mr. SARBANES, Mr. PROXMIRE, Mr. ZORINSKY, Mr. CHAFEE, Mr. BOSCHWITZ, Mr. HUDDLESTON, Mr. MOYNIHAN, Mr. CHILES, Mr. BIDEN, Mr. DIXON, Mr. LEVIN, Mr. HART, Mr. KENNEDY, Mr. SASSER, Mr. DANFORTH, Mr. COHEN, Mr. MATHIAS, Mr. MITCHELL, and Mr. STEVENS):

S.J. Res. 49. Joint resolution to authorize and request the President to proclaim the week of April 10–16, 1983, as "A Week of Remembrance for the 40th Anniversary of the Warsaw Ghetto Uprising"; to the Committee on the Judiciary.

WEEK OF REMEMBRANCE FOR THE 40TH ANNIVERSARY OF THE WARSAW GHETTO UPRISING

Mr. PERCY. Mr. President, Senator PELL and I are today introducing a Senate joint resolution commemorating the 40th anniversary of the Warsaw ghetto uprising. I am confident that a companion resolution will be introduced shortly in the House. This will be the first commemoration in the Congress since 1973 of an event that had profound impact then and still has tremendous meaning today.

In 1939, the Nazis placed restrictions on the Jews of Warsaw. By 1940, the Jews were confined to a walled ghetto. Disease, overcrowding and starvation afflicted them. The Jews of the ghetto attempted to continue their lives by organizing classes to educate their children and by allocating food and other necessities to those who desperately required attention. Jewish poets and authors continuing their writings, and these are among the most poignant pieces of writing of any generation.

At the end, in April 1943, only 70,000 Jews remained inside the ghetto walls. Though they were tremendously out numbered and faced insurmountable odds, they battled the Nazis for nearly a month before the ghetto was razed completely.

The right to freely practice one's religion and the right to freely emigrate are granted to Americans but denied to so many, including Soviet Jews. So in commemorating the Warsaw ghetto uprising, we remember that we must work tirelessly on behalf of all who are oppressed or imprisoned. By their strength and faith, the Jews of the Warsaw ghetto became symbols for their time and for ours.

We ask our colleagues to join in cosponsoring this resolution authorizing and requesting the President to proclaim the week of April 10–16, 1983, as a week of remembrance for the 40th anniversary of the Warsaw ghetto uprising. This week will coincide with activities planned by the American Gathering of Jewish Holocaust Survivors, including commemorations of Jewish resistance to Nazism and programs reinforcing the need for the continuous struggle against anti-Semitism.

Mr. President, I ask unanimous consent that the joint resolution be printed in the RECORD.

There being no objection, the joint resolution was ordered to be printed in the RECORD, as follows:

S.J. RES. 49

Whereas of the more than 400,000 Jews whom the Nazis had imprisoned in the Warsaw Ghetto, only 70,000 remained in April, 1943;

Whereas most of the others had been sent to their deaths in extermination camps by the Nazis;

Whereas the surviving Jews of Warsaw had no hopes of waging successful battle against their tyrannical foes;

Whereas the valiant Jewish freedom fighters of the Warsaw Ghetto, despite the insurmountable odds, fought the Nazis and held their ground for nearly a month;

Whereas by their dramatic and heroic courage, they provided inspiration to all people who revere liberty and a warning to all oppressors;

Whereas remembering those who fought and died so valiantly serves to honor their memory and to renew the determination of the peoples of the free world to oppose tyranny and oppression wherever it occurs; and

Whereas in April of 1983, the American Gathering of Jewish Holocaust Survivors will sponsor commemorations of Jewish resistance to Nazism and will organize programs to reinforce the need for the continuous struggle against anti-Semitism: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of American in Congress assembled, That (a) the week of April 10–16, 1983, is hereby marked in commemoration of the fortieth anniversary of the uprising against the Nazi occupation forces by the besieged and outnumbered Jews of the Warsaw Ghetto who, by their courage and heroism, showed the world for all time that the forces of freedom and liberty cannot long be suppressed by the forces of tyranny, and, by their valor and their faith, gave urgency to the creation of the free State of Israel.

(b) The President is authorized and requested to issue a proclamation designating the week of April 10–16, 1983, as "A Week of Remembrance for the 40th Anniversary of the Warsaw Ghetto Uprising," and calling upon the people of the United States to observe the week of remembrance with appropriate ceremonies and activities.

Mr. PELL. Mr. President, I am delighted to join my distinguished colleague, Senator PERCY, in sponsoring this resolution to designate the week of April 10–16, 1983, as "A Week of Remembrance for the 40th Anniversary of the Warsaw Ghetto Uprising." The history of World War II is replete with stories of courage. However, that of the Polish Jews who courageously rebelled against their Nazi oppressors stands out because it is a story of a people's fight not only for freedom but also for dignity and honor.

Until the Nazi invasion in 1939, Jewish cultural and religious life thrived in Poland. In fact, Warsaw had once been known as the center of Eastern European Jewry. After the invasion, Jews found their freedom sharply curtailed by restrictions established by the Nazis and by 1940, more than 400,000 Polish Jews had been walled into a ghetto in Warsaw. Starvation, disease, and deportation to the death camps took the lives of many of the inhabitants of this ghetto. In April

1943, the 70,000 or so that remained heroically engaged the German soldiers in battle. Armed with homemade weapons and knowing full well that they had no hope of success, these inhabitants of the Warsaw ghetto struggled for nearly a month against the Nazi soldiers. When the rebellion was over and the area was razed, some 40,000 Jews had been slaughtered. It is fitting and proper that we honor these people whose struggle is a testament to the indestructible spirit of liberty by commemorating the 40th anniversary of the uprising this April.

● Mr. DOLE. Mr. President, I would like to express my full support for the resolution authorizing the President to designate April 10-16, 1983, As "A National Week of Remembrance To Commemorate the 40th Anniversary of the Warsaw Ghetto Uprising."

From late 1939 to 1943, it seemed to many of us that the lights had gone out over all of Europe. Resistance to Fascist conquests in Europe appeared futile and unorganized. The few defeats that the Nazis had suffered up until 1943, such as Stalingrad and El Alemain, were on the periphery of the Third Reich. And then, in the largest single instance of unified resistance by a conquered people that the Nazis had ever before experienced, 40,000 Jews of the Warsaw ghetto launched their life-or-death struggle for liberation. It took 44 days for the Wehrmacht and SS units, armed with tanks and artillery, to overcome resistance that relied mainly on primitive firearms and Molotov cocktails. Some 13,000 brave defenders died in the carnage, thousands more were summarily shipped off to Treblinka. On May 16, 1943, Gen. Jurgen Stroop, commander of this genocidal operation, announced that "there was a Jewish section in Warsaw, but it no longer exists."

In 1953, the United Committee to Commemorate the 10th Anniversary of the Warsaw Ghetto Uprising published a compendium of several documents relating to this historic event. I would like to briefly quote from that publication:

> To the very last drop of their blood, until the last of the heroes fell in battle, the ghetto defenders fought for their human dignity, for the honor and survival of their people, and for the liberation of mankind from the curse of Fascism. . . . The uprising made an invaluable contribution towards the strengthening of the struggle against the German Nazis and the ultimate victory over the bloodiest enemy of mankind, a contribution that will be remembered for all time.

I commend the Foreign Relations Committee and my colleagues, Senator PERCY and Senator PELL for introducing this resolution. I am pleased to support it, and I urge my colleagues in the Senate to do the same.●

By Mr. LEVIN (for himself, Mr. BAUCUS, Mr. CHAFEE, Mr. GLENN, Mrs. HAWKINS, Mr. HOLLINGS, Mr. RIEGLE, and Mr. ZORINSKY):

S.J. Res. 50. Joint resolution designating the week beginning September 25, 1983, as "National Adult Day Care Center Week"; to the Committee on the Judiciary.

NATIONAL ADULT DAY CARE CENTER WEEK

● Mr. LEVIN. Mr. President, today I am reintroducing a joint resolution to establish the week of September 25, 1983, as "National Adult Day Care Center Week." I am pleased to have Senators BAUCUS, CHAFEE, GLENN, HAWKINS, HOLLINGS, RIEGLE, and ZORINSKY as cosponsors of the joint resolution.

There are approximately 800 adult day-care centers operating in the Nation today, providing valuable support services to our senior citizens. These centers are designed to serve elderly persons who need some professional attention but do not require round-the-clock treatment. Professional nurses, dieticians, and therapists offer medical testing and referrals, nutrition education, and physical therapy to the elderly, which reduces the need for long-term hospitalizations or nursing care. Adult day-care centers allow senior citizens to remain in their homes, with their families, while at the same time giving them an opportunity to meet with peers and be socially active.

Mr. President, adult day-care centers save the Federal Government money by both reducing the need for hospitalizations and full-time nursing care. But more importantly, they allow the elderly to maintain the independence and self-esteem which is often lacking in institutional settings. I urge my colleagues to support this joint resolution, which will draw attention to the services and the potential of adult day-care centers.●

By Mr. DOLE (for himself and Mr. MOYNIHAN):

S.J. Res. 51. Joint resolution designating May 21, 1983, as "Andrei Sakharov Day"; to the Committee on the Judiciary.

ANDREI SAKHAROV DAY

● Mr. DOLE. Mr. President, the Senator from Kansas and the Senator from New York (Mr. MOYNIHAN) join in introducing a joint resolution that would designate May 21, 1983, as "Andrei Sakharov Day" in the United States, and which would call upon the entire world to recognize one of the distinguished figures of our age. It is a great pleasure and honor for me to offer this legislation today as a testament to Dr. Sakharov, whose high standards and ideals have come to symbolize through his actions modern man's commitment to human rights, basic decency, and freedom.

The name of Andrei Sakharov is familiar to all of us gathered here. The peoples of all the world owe a great debt of gratitude to this Nobel laureate and internationally recognized physicist for his scientific achievements, and for his noble and selfless contributions to the cause of world peace and human rights. As a result of his efforts, which have not been appreciated by the Soviet Union, Dr. Sakharov will celebrate his 62d birthday as a virtual exile in the city of Gorky, to which he has been illegally confined by the Soviet Government since January 1980.

But even under conditions of isolation and harassment by Soviet authorities, Andrei Sakharov has continued to speak out for human rights and world peace, for humane treatment of Soviet Prisoners of Conscience, and for full compliance, by all signatory states, with the provisions of the Helsinki Final Act and the United Nations Declaration of Human Rights.

Mr. President, it is fitting that our Nation, and all nations that hold peace and freedom dear, honor Andrei Sakharov in an appropriate manner on his 62d birthday. My distinguished colleagues in the House of Representatives, Congressman JACK KEMP and Congressman STEPHEN SOLARZ, today are introducing this joint resolution in the House, and it is my hope that it will be speedily passed by the Congress and acted upon by the President. I urge my colleagues to join me in support of this legislation and I ask unanimous consent that the resolution be printed in the RECORD.

There being no objection, the resolution was ordered to be printed in the RECORD, as follows:

S.J. RES. 51

Whereas Andrei Sakharov has earned the admiration and gratitude of all the peoples of the world for his tireless and courageous efforts to secure basic human freedoms for the peoples of the Soviet Union, including those rights and freedoms proclaimed and guaranteed in the Final Act of the Conference on Security and Cooperation in Europe signed at Helsinki, August 1, 1975; and

Whereas Andrei Sakharov has been awarded the Nobel Prize for Peace for "his love of truth and strong belief in the inviolability of human beings . . . his courageous defense of the human spirit . . . " and a life that has made him "the conscience of mankind"; and

Whereas Andrei Sakharov, in direct consequence of his tireless work for world peace and human rights, has been illegally confined by the government of the Union of Soviet Socialist Republics to the remote city of Gorky, where, on May 21, 1983, he will spend his sixty-second birthday in almost total isolation; and

Whereas even under conditions of isolation and harassment by Soviet authorities, Andrei Sakharov has continued to speak with eloquence and great moral force for the causes of human rights and world peace, for amnesty for all prisoners of conscience, and for full compliance by all signatory states with the provisions of the Helsinki Final Act and the United Nations Universal

Declaration of Human Rights; Now, therefore, be it

Resolved by the Senate and the House of Representatives of the United States of America in Congress assembled, That May 21, 1983 is designated "National Andrei Sakharov Day" and the President of the United States is authorized and requested to issue a proclamation calling upon the people of the United States to observe that day with appropriate ceremonies and activities, and be it

Further resolved, That the President of the United States is authorized and requested to call upon all nations of the world to designate May 21, 1983, as "National Andrei Sakharov Day" within their respective nations, and be it

Further resolved, That the President of the United States is authorized and requested to urge the Government of the Union of Soviet Socialist Republics to permit Andrei Sakharov and his wife, Elena Bonner, freely to choose their place of residence; and be it

Further resolved, That the President of the United States is authorized and requested to direct the American delegation to the United Nations to introduce a resolution in the General Assembly calling upon that body to designate May 21, 1983, as "International Andrei Sakharov Day," to be observed by the United Nations with appropriate ceremonies and activities.●

By Mr. QUAYLE (for himself, Mr. INOUYE, Mr. HATCH, Mr. SPECTER, Mr. D'AMATO, Mr. WEICKER, Mr. HOLLINGS, Mr. BAUCUS, Mr. KENNEDY, Mr. BURDICK, Mr. RIEGLE, Mr. COCHRAN, Mr. DECONCINI, Mr. STENNIS, Mr. STEVENS, Mr. ANDREWS, Mr. LUGAR, Mr. STAFFORD, Mrs. HAWKINS, Mr. RANDOLPH, Mr. METZENBAUM, and Mr. DODD):

Senate Joint Resolution 52. A joint resolution to authorize and request the President to designate the week of April 10, 1983, through April 16, 1983, as "National Mental Health Week"; to the Committee on the Judiciary.

NATIONAL MENTAL HEALTH WEEK

● Mr. QUAYLE. Mr. President, on behalf of a number of our colleagues and myself, I am introducing a joint resolution to authorize the President to issue a proclamation designating the week of April 10-16, 1983, as "National Mental Health Week."

The resolution is designed to focus national attention on the problem of mental illness, and the promise of mental wellness.

The cost of excessive stress and mental disorders to our society is immense—both in terms of human suffering and socioeconomic consequences. Stress and mental illness cost this Nation an estimated $65 billion annually, and are one of the leading factors in our Nation's productivity decline and rising health costs.

Regrettably, fear and misunderstanding of mental illness still pervade the Nation. It is estimated that in one out of every three American families there is a member with some type of mental illness, as much as 20 percent of our population is in need of some form of mental health services at any time.

Persons with mental disorders have been shown to be higher users of medical and surgical services, especially if their mental illness goes untreated. Up to 80 percent of all diseases are psychosomatic or stress-related, and mental disabilities account for 30 percent of all hospital admissions. In fact, more than 25 percent of elderly persons diagnosed as senile actually have a diagnosable, treatable, and often reversible mental disorder.

Mental illness is a very treatable disability. Recovery from psychiatric problems is not only possible, but probable. About two-thirds of all mentally ill patients show significant signs of recovery with their initial treatment, and of these, half will never need treatment again. For those 3 to 4 million individuals who suffer from severe and chronic mental illness, it is essential that we retain ongoing supportive services. These services, along with the ministrations of countless dedicated families, provide the emotional support, treatment, education, and care that is so important to these individuals.

Treating the mentally ill is proven to save money. Mental health treatment provides a very effective cost containment tool because treatment results in reduced utilization of more costly hospital, medical, and surgical services. A recent study by the National Institute of Mental Health found that utilization of medical and surgical services dropped anywhere from 5 to 85 percent following psychiatric care. A Washington, D.C., health maintenance organization found that patients receiving needed mental health counseling reduced their nonpsychiatric physician usage by 31 percent and reduced lab tests and X-rays by 30 percent.

Mental health treatment and research is carried out by a wide range of qualified health professionals: Psychiatrists, psychologists, social workers, nurses, physical and occupational therapists, and mental health counselors. These dedicated workers perform in a variety of settings which include private psychiatric hospitals, general and community hospitals, nursing homes, alcoholism and drug treatment facilities, State and VA hospitals, community mental health centers and clinics, physicians' offices, and business and industrial work settings. Recognition should also be extended to the families of the mentally disabled who, in the face of overwhelming emotional and financial distress, provide the needed care and support for our Nation's mentally ill.

This resolution is sponsored by the following groups: American Psychiatric Association; American Psychological Association; National Mental Health Association; National Association of Counties; American Medical Association; American Hospital Association; American Nurses Association; Center for Science in the Public Interest; American Mental Health Counselors Association; Association for the Advancement of Psychology; National Association of State Mental Health Directors; National Association of Community Mental Health Centers; American Academy of Child Psychiatry; National Association of Social Workers; National Association of Private Psychiatric Hospitals; and the National Alliance for the Mentally Ill.

I am being joined in the introduction of this resolution by Senators INOUYE, HATCH, SPECTER, D'AMATO, WEICKER, HOLLINGS, BAUCUS, KENNEDY, BURDICK, RIEGLE, COCHRAN, DECONCINI, STENNIS, STEVENS, ANDREWS, LUGAR, STAFFORD, HAWKINS, RANDOLPH, METZENBAUM, and DODD.●

ADDITIONAL COSPONSORS

S. 27

At the request of Mr. MOYNIHAN, the name of the Senator from Michigan (Mr. RIEGLE) was added as a cosponsor of S. 27, a bill to provide for the conservation, rehabilitation, and improvement of natural and cultural resources located on public or Indian lands, and for other purposes.

S. 44

At the request of Mr. KASTEN, the name of the Senator from Arizona (Mr. GOLDWATER) was added as a cosponsor of S. 44, a bill to regulate interstate commerce by providing for a uniform product liability law, and for other purposes.

S. 137

At the request of Mr. ROTH, the names of the Senator from North Dakota (Mr. BURDICK), the Senator from Georgia (Mr. NUNN), and the Senator from Missouri (Mr. EAGLETON) were added as cosponsors of S. 137, a bill to amend the Internal Revenue Code of 1954 to continue to allow mortgage bonds to be issued.

S. 307

At the request of Mr. RIEGLE, the name of the Senator from North Dakota (Mr. BURDICK) was added as a cosponsor of S. 307, a bill to provide for continuation of health insurance for workers who lose such insurance by reason of unemployment.

S. 314

At the request of Mr. GOLDWATER, the name of the Senator from South Carolina (Mr. THURMOND) was added as a cosponsor of S. 314, a bill to encourage inflight emergency care aboard aircraft by requiring the placement of emergency equipment, supplies, and drugs aboard aircraft and by relieving appropriate persons of liability for the provision and use of such

emergency equipment, supplies, and drugs.

S. 445

At the request of Mr. DOLE, the name of the Senator from Montana (Mr. BAUCUS) was added as a cosponsor of S. 445, a bill to amend title 11, United States Code, and for other purposes.

S. 476

At the request of Mr. LEVIN, the name of the Senator from Illinois (Mr. DIXON) was added as a cosponsor of S. 476, a bill to amend title II of the Social Security Act to require a finding of medical improvement when disability benefits are terminated, to provide for a review and right to personal appearance prior to termination of disability benefits, to provide for uniform standards in determining disability, to provide continued payment of disability benefits during the appeals process, and for other purposes.

S. 518

At the request of Mr. CHAFEE, the name of the Senator from Arkansas (Mr. BUMPERS) was added as a cosponsor of S. 518, a bill to establish a program of grants administered by the Environmental Protection Agency for the purpose of aiding State and local programs of pollution abatement and control.

S. 525

At the request of Mr. HEINZ, the names of the Senator from Michigan (Mr. LEVIN) and the Senator from Tennessee (Mr. SASSER) were added as cosponsors of S. 525, a bill to require that installment payments of revenue sharing allocations be paid at the beginning of each quarter.

S. 571

At the request of Mr. ROTH, the name of the Senator from North Dakota (Mr. ANDREWS) was added as a cosponsor of S. 571, a bill to amend the Federal Property and Administrative Services Act of 1949 to make Federal surplus property more accessible to local emergency preparedness and volunteer firefighting organizations and to authorize and direct the Federal Emergency Management Agency to recommend available Federal surplus to the Administrator of the General Services Administration, and for other purposes.

S. 572

At the request of Mr. DODD, the name of the Senator from Ohio (Mr. METZENBAUM) was added as a cosponsor of S. 572, a bill to provide emergency assistance for children.

S. 586

At the request of Mr. HEINZ, the names of the Senator from Vermont (Mr. STAFFORD), the Senator from Washington (Mr. GORTON), the Senator from Hawaii (Mr. INOUYE), and the Senator from Pennsylvania (Mr. SPECTER) were added as cosponsors of S. 586, a bill to direct the Secretary of Housing and Urban Development to undertake a program to demonstrate the feasibility of funding neighborhood development activities by providing Federal matching funds to private nonprofit neighborhood organizations on the basis of the voluntary contributions to such organizations from individuals, businesses, and religious institutions in their neighborhoods.

S. 599

At the request of Mr. LEVIN, the names of the Senator from Mississippi (Mr. STENNIS), the Senator from Idaho (Mr. SYMMS), the Senator from Florida (Mr. CHILES), the Senator from Oregon (Mr. HATFIELD), and the Senator from Louisiana (Mr. JOHNSTON) were added as cosponsors of S. 599, a bill to provide that the amount of unnegotiated social security checks shall be returned to the social security trust funds.

S. 646

At the request of Mr. DOLE, the name of the Senator from Nevada (Mr. LAXALT) was added as a cosponsor of S. 646, a bill to amend title 18, United States Code, for the purpose of providing authority to the Attorney General to prosecute acts obstructing the flow of commerce, and for other purposes.

S. 656

At the request of Mr. RIEGLE, the name of the Senator from Michigan (Mr. LEVIN) was added as a cosponsor of S. 656, a bill to provide that no interest shall be charged on loans to State unemployment funds in the case of States which enact certain State unemployment compensation provsions, and to revise the criteria applicable to the cap on FUTA tax credit reductions.

S. 669

At the request of Mr. HATFIELD, the name of the Senator from Idaho (Mr. MCCLURE) was added as a cosponsor of S. 669, a bill to authorize the construction of a project for navigation at the Bonneville lock and dam, Oregon and Washington.

SENATE JOINT RESOLUTION 28

At the request of Mr. TSONGAS, the names of the Senator from Wisconsin (Mr. PROXMIRE), and the Senator from Vermont (Mr. LEAHY) were added as cosponsors of Senate Joint Resolution 28, a joint resolution calling for immediate negotiations for a ban on weapons of any kind in space.

SENATE JOINT RESOLUTION 35

At the request of Mr. HUDDLESTON, the names of the Senator from South Carolina (Mr. HOLLINGS), the Senator from Minnesota (Mr. DURENBERGER), the Senator from North Dakota (Mr. BURDICK), the Senator from New Mexico (Mr. DOMENICI), the Senator from North Dakota (Mr. ANDREWS), the Senator from Kentucky (Mr. FORD), the Senator from Mississippi (Mr. STENNIS), and the Senator from Pennsylvania (Mr. HEINZ) were added as cosponsors of Senate Joint Resolution 35, a joint resolution designating the week beginning March 20, 1983, as "National Mental Health Counselors Week."

SENATE CONCURRENT RESOLUTION 13—RELATING TO ECONOMIC GROWTH

Mr. MOYNIHAN (for himself and Mr. HART) submitted the following concurrent resolution; which was referred to the Committee on Banking, Housing, and Urban Affairs:

S. CON. RES. 13

Resolved by the Senate (the House of Representatives concurring), That it is the sense of the Congress that, in order to ensure healthy and sustained economic recovery, the Federal Reserve System shall manage monetary policy to accommodate the growth in the nation's nominal Gross National Product required to achieve real economic growth comparable to the average rate for the first eight quarters of previous post-war recoveries. This average rate shall be calculated on the basis of recoveries beginning in 1954, 1958, 1961, 1971 and 1975.

● Mr. MOYNIHAN. Mr. President, the Nation's economy stands poised at a crossroads. The President's program delineates one course. According to the administration's own forecasts, published in the President's budget for fiscal year 1984, its program will produce the slowest economic recovery in the postwar era.

The Nation's gross national product, which has registered no real growth over the last 4-year period, would expand at an average real annual rate of only 2.75 percent over 1983 and 1984. This amounts to little better than half the real growth which has characterized the typical postwar recovery. This slow growth program will leave 12 million Americans unemployed this year, and some 11,300,000 Americans jobless next year. Once again, I quote from the administration's own forecasts.

There is an alternative. We must agree that the central goal of national economic policy is a robust and sustained economic growth, and we must coordinate both fiscal and monetary policy to produce real growth at least comparable to previous postwar recoveries.

We can do it, and we can start today. Today, Senator HART and I rise to introduce a sense of the Congress resolution directing the Federal Reserve System to manage monetary policy to accommodate the growth in the Nation's nominal gross national product sufficient to produce real growth comparable to previous postwar recoveries.

Resolved, That it is the sense of the Congress that, in order to ensure healthy and sustained economic recovery, the Federal Reserve System shall manage monetary policy to accommodate the growth in the

nation's nominal Gross National Product required to achieve real economic growth comparable to the average rate for the first eight quarters of previous post-war recoveries. This average rate shall be calculated on the basis of recoveries beginning in 1954, 1958, 1961, 1971, and 1975.

I have studied the record of postwar recoveries. Since World War II, the United States has experienced seven business cycles—seven recessions and seven recoveries. Two of the seven recoveries can be considered anomolous. The recovery beginning in the first quarter of 1950 coincided with the expansion of Korean war spending, and produced an anomolously robust recovery nearly 75-percent stronger than any other. Similarly, the recovery beginning July 1980 was the briefest in our history, and registered real growth gains more than 75-percent weaker than any other since the war. Therefore, I excluded these two anomolies from my calculation of a typical postwar recovery. The recoveries beginning in the third quarter of 1954, the second quarter of 1958, the first quarter of 1961, the first quarter of 1971, and the second quarter of 1975 all registered real annual growth gains of between 5 percent and 5.8 percent for the first 2 years of recovery. The average annual real growth rate for these recoveries came to 5.4 percent. That is the real growth rate for a typical postwar recovery, and this resolution will direct the Federal Reserve to target this historical growth path in its conduct of monetary policy.

Senator HART and I have chosen this approach for one, very simple reason. We do not believe that an economic recovery, so-called, that leaves 9.9 percent of the work force jobless 2 years after the trough of a recession—as would the administration's policies, by its own forecast—is acceptable. Moreover, the source of many of our current economic problems, and the single most crucial element in the economic depression we are just now coming out of, has been the basic clash of monetary and fiscal policy. This can go on no longer. We can coordinate these policies if we specify what the goal of that coordination shall be. This is what we have done. We have specified healthy economic growth, within the range of recent historical experience, as the goal and set about to coordinate fiscal and monetary policy to achieve it.

We have chosen an instrument which can work. The Federal reserve is fully capable of targeting nominal GNP growth, in order to achieve a specified real growth rate. There are profound economic reasons, then, for selecting a nominal GNP target. Kenneth Arrow, the distinguished economist and winner of the 1972 Nobel Prize in Economic Science, said recently in U.S. News & World Report:

> The real target of monetary policy ought not to be money supply growth in isolation but growth of the Gross National Product.

Similarly, the President's Council of Economic Advisers wrote in the 1983 Economic Report of the President:

> The principle of targeting money growth rates is not an end in itself, but only a means of achieving control of nominal GNP.

And again, from this year's Economic Report of the President:

> One possible way to avoid (alternating periods of high inflation and economic recession) is to use the observed behavior of nominal GNP to guide a gradual recalibration of monetary growth targets.

The President's Council of Economic Advisers concluded by observing that:

> Basing the recalibration of monetary targets on nominal GNP is consistent with the basic principle of pursuing a stable monetary policy.

There are reasons why Nobel Laureate Arrow and the President's Council of Economic Advisers believe that nominal GNP targeting is an appropriate technique for monetary policy. The chief reason is that there is a very close and very stable relationship between the total credit in the Nation's economy and the Nation's nominal gross national product. The Federal Reserve does not publish a total credit aggregate, but it does publish a close proxy, the so-called L aggregate. This includes M_3—which is M_1's sum of currency, demand deposits, traveler's checks and other checkable deposits, and M_2's overnight repurchase agreements and Eurodollars, general purpose money market fund balances, and savings and small time deposits, plus from M_3 proper, large time deposits, term repurchase agreements, and institution-only money market fund balances—and to this adds other liquid assets. The L aggregate can be compared with nominal GNP, and the relationship becomes quite apparent:

[in billions of dollars]

	Nominal GNP	L aggregate
1970	992.7	816.5
1971	1077.6	903.2
1972	1185.9	1023.6
1973	1326.4	1143.8
1974	1434.2	1249.8
1975	1549.2	1376.6
1976	1718.0	1531.4
1977	1918.3	1724.3
1978	2163.0	1938.9
1979	2417.8	2153.9
1980	2633.1	2370.4
1981	2937.7	2642.6

We know that it can be done: The Federal Reserve can target nominal GNP, to achieve a certain specified real growth rate. And we know why—to what end—we would have them do so: To achieve sustained economic growth, comparable to a typical postwar recovery. The question which remains is, what would be the consequences of doing so.

Let us begin with some of the consequences if we do not do so. We have reviewed the slow growth, high unemployment forecasts of the administration under its current policies. But even these forecasts may be optimistic. It seems certain that we will get some recovery. But will it last, even at the tepid rate forecast by the administration? Perhaps not, and tragically so. The fact is that the real prime rate, and all real long-term interest rates, remains in the region of 6 percent. The historical norm for real long-term interest rates is between 2 percent and 3 percent. I must tell you that there simply is no instance in American economic history of a sustained recovery in an interest rate atmosphere of 5 or 6 percent, in real terms.

And let us consider what sectors of the economy could sustain the recovery under current policy conditions. There are four possible candidates. The first is business investment. But the capacity utilization rate for manufacturing remains below 60 percent, and few businesses will invest when so much idle capacity is available. In real terms, business investment declined 8 percent last year; the Commerce Department is forecasting an additional 5 percent drop this year. The second possible source of a sustained recovery is the export sector. Last year, we recorded the largest merchandise trade deficit in the Nation's history, some $42.7 billion. Martin Feldstein, the President's chief economic adviser, recently forecast that the 1983 trade deficit will be in the range of $75 billion. In the words of the Federal Reserve's recent Monetary Report to Congress, the export sector "will continue to be a drag on U.S. economic activity." The third source of sustained recovery is consumer spending. Here, the Federal Reserve observes that consumers may well "pursue cautious strategies." That is the Reserve's own cautious way of saying that consumer demand may well remain soft this year. At the very least, consumer demand will be highly sensitive to interest rates. If interest rates climb again, consumer spending will decline—and with it, the recovery. And the likelihood of a rise in interest rates is considerable under current policy, given that Federal borrowing will absorb some 50 percent of all available credit in the markets this year, according to the Office of Management and Budget. Certainly, in this context interest rates will rise unless the Federal Reserve insures sufficient credit to avert crowding out private borrowers—which is another way of saying sufficient credit to insure strong economic growth.

This brings us to the last source of economic stimulus—Government spending. The Federal Government will be a significant source of recovery and stimulus—that is, the deficit will be large. But surely we cannot depend

only on the deficit to sustain a recovery. And just as surely, we cannot hope to increase the likelihood of a more robust and sustained recovery by increasing the deficit. Such a course would only drive interest rates even higher, as Federal borrowing to finance the deficit crowded out private borrowers.

No, it is certain that fiscal policy cannot carry the entire burden of economic recovery. Nor can we leave this recovery hostage to the current policies that can only promise the most tepid and slow recovery in 40 years. Instead, we must choose sustained and vigorous growth, and do it by an established means. That is what we offer today in this resolution.

We know it can work. In early February, with the assistance of the staff of the Joint Economic Committee, I asked Data Resources Inc., one of the Nation's preeminent econometric forecasting firms, to simulate the consequences for the Nation's economy of this resolution. I assumed that no action taken today could have any significant impact before July of this year, so I asked Data Resources, Inc. (DRI) to target 5.4 percent real economic growth—the postwar recovery average—for eight quarters beginning this July. I also offered the necessary fiscal policy assumptions, including:

Five percent average annual real growth in defense spending (over 5 years);

The Social Security Commission recommendations;

Moderate restraint in the growth rate of other nonmeans tested entitlements, amounting to $13 billion in spending reductions over 5 years;

Current services in discretionary spending programs, meaning neither real growth nor real reductions in funding for discretionary domestic programs; and

A 4-year delay in the indexation of income tax rates.

I asked DRI to simulate the monetary policy required to achieve the 5.4 percent annual real growth, given these fiscal policy assumptions. In short, I asked whether fiscal policy could be coordinated with monetary policy in such a way as to produce the targeted growth.

DRI reported yes, it certainly could. Some of the results:

Unemployment would fall to 7.6 percent by 1985, instead of the 8.9 percent projected by the Administration under its program. That would mean that 1,400,000 fewer Americans would be jobless in 1985 under this Resolution than under the Administration's program by its own forecasts.

Personal income would be $208 billion greater, or 6.6 percent higher, in 1985 under this Resolution than under the Administration's programs.

Corporate profits by 1985 would be 28.6 percent greater, which comes to $66 billion more, under this Resolution than under the Administration's forecasts for its own program.

There is an inflation cost. The annual inflation rate under this resolution would average 5.5 percent for the years 1983-85, as against the average annual inflation rate of 4.7 percent forecast for those years by the administration. I believe that this Nation is prepared to pay a cost of 0.8 percentage point greater inflation a year over the next 3 years to see high growth, rising personal incomes, rising corporate profits, and sharply declining unemployment.

I ask unanimous consent that a table summarizing the results of the DRI simulation of the economy under our resolution, versus the administration's forecasts for its own program be printed in the RECORD.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

STATE OF THE U.S. ECONOMY: ECONOMIC FORECASTS, ADMINISTRATION PROGRAM VERSUS MONETARY RESOLUTION

	1983	1984	1985	1986	1987	1988
GNP (billions):

[1] Forecast by Data Resources, Inc., Feb. 18, 1983, assuming real growth path under monetary policy resolution (5.4 percent average annual real growth, 8 quarters from July 1983 to July 1985).
[2] Forecast under administration program, "Budget of the United States Government," fiscal year 1984, pp. 2–9 to 2–10.
[3] "The administration's economic program includes support for a policy of gradual reduction in the rate of money growth. . . ." ("Economic Report of the President," p. 139).
[4] "The administration's budget documents say nothing about the assumed behavior of monetary policy." (CBO, "Analysis of the President's Budgetary Proposals," p. 16).

STATE OF THE U.S. ECONOMY: THREE-YEAR COMPARISON (1983-1985), ADMINISTRATION PROGRAM VERSUS MONETARY RESOLUTION

GNP: By 1985, GNP will be $203 billion, or 5.2%, larger under the monetary resolution than under the Administration program.

By 1988, GNP is projected to be $577 billion, or 11.6% larger under the monetary resolution than under the Administration program.

Real GNP: For 1983-1985, real GNP will grow at an average annual rate (year-to-year) of 3.1% under the Administration program; under the monetary policy resolution real GNP is projected to grow at a 4.4% average annual rate, or 41% faster.

Unemployment Rate: For 1983-1985, the unemployment rate will average 9.1% under the monetary resolution, falling to 7.6% in 1985; the unemployment rate under the Administration program will average 9.8%, or 8.5% greater, falling to only 8.9% in 1985.

For the six years 1983-1988, unemployment is projected to average 7.75% under the monetary policy resolution; unemployment for those years is projected to average 8.6%, or 10.6% greater, under the Administration program

Unemployed: The years 1983-1985 will produce an annual average of 11,200,000 Americans unemployed under the Administration program, 840,000 more a year than the annual average of 10,360,000 unemployed under the monetary resolution.

In 1985, the Administration projects 10,300,000 unemployed Americans, or 1,400,000 more than the 8,900,000 unemployed forecast by DRI under the monetary resolution.

CPI: For 1983-1985, the Administration projects an average annual inflation rate of 4.7% under its program, or 0.8 percentage-points lower than the 5.5% average annual inflation rate forecast by DRI under the monetary resolution.

Income: By 1985, personal income will be $208 billion, or 6.6% greater under the monetary resolution than under the Administration program.

By 1988, DRI projects personal income to be $482 billion, or 12.2% larger under the monetary resolution than the Administration projects under its program.

Profits: By 1985, corporate profits will be $66 billion, or 28.6%, larger under the monetary resolution than under the Administration program.

By 1988, DRI projects corporate profits to be $142 billion greater, or 43.2% more, under the monetary resolution than the Administration projects under its program.

Mr. MOYNIHAN. Mr. President, one final note. DRI also projected the implications of high sustained growth, as achieved under this resolution, on our budgetary dilemma. We discovered an obvious fact: much of the so-called structural deficit becomes cyclical—that is, disappears—if we returned to the growth rates which have characterized previous postwar recoveries. As growth accelerates, incomes and profits rise significantly—and Federal revenues increase. At the same time, outlays for unemployment compensation, food stamps, and other welfare programs decline with the rising living standards achieved under this resolution. According to the DRI analysis, this coordination of fiscal and monetary policy would reduce the deficit over the next 5 years by $270 billion more than would the administration's program. The deficits would become manageable. While CBO estimates that the administration's program will produce a deficit of $177 billion in fiscal year 1985, DRI estimates that the fiscal and monetary policies coordinated under this resolution would reduce this deficit to $146 billion.

In fiscal year 1986, the administration's deficit of $147 billion is reduced by $26 billion to $121 billion, under our fiscal and monetary assumptions. By fiscal year 1988, for which the Congressional Budget Office forecasts a $159 billion deficit under the administration's program, DRI estimates that our program would produce a deficit of only $15 billion.

Moreover, the strong growth under this resolution would significantly reduce the share of the Nation's gross national product accounted for by Federal spending and the Federal deficit. Federal spending as a share of GNP would decline from 24.1 percent in fiscal year 1984 to 21.6 percent in fiscal year 1988—while CBO estimates that the administration's program would reduce the share of Federal spending in GNP from 24 to 23.2 percent.

At this point, I ask unanimous consent that a table summarizing the budgetary forecasts under our resolution, versus the administration's proposals, be printed in the RECORD.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

DATA RESOURCES INC. BUDGET PROJECTIONS

	Fiscal year—									
	1984		1985		1986		1987		1988	
	Administration [1]	Resolution [2]	Administration	Resolution	Administration	Resolution	Administration	Resolution	Administration	Resolution
Monetary resolution:										
Outlays	841	886	905	966	973	1,045	1,044	1,122	1,113	1,206
Revenues	665	701	728	820	826	924	884	1,040	954	1,191
Deficit	176	185	177	146	147	121	160	82	159	15
Budget categories as percentage of GNP:										
Outlays	24	24.1	23.7	23.6	23.5	23.1	23.4	22.4	23.2	21.6
Revenues	19	19.1	19.1	20.0	19.9	20.5	19.8	20.8	19.9	21.4
Deficit	5	5.0	4.6	3.6	3.6	2.7	3.6	1.6	3.3	.2

[1] CBO reestimates of administration budget.
[2] DRI budget estimates under Moynihan resolution, national income accounts basis.

Note.—Assumptions:
Administration/CBO: 7 percent average annual real defense growth (over 5 years); Social Security Commission recommendations; $74 billion entitlement cuts (over 5 years); $61 billion discretionary program cuts (over 5 years); interest cost reductions from reduced deficits in the range of $30 billion (over 5 years); contingency tax increase program; tax on health insurance premiums.
Real GNP growth rates of 2.1 percent (1983), 4.7 percent (1984), 4.1 percent (1985), 3.7 percent (1986), 3.5 percent (1987), 3.5 percent (1988).
Unemployment rates of 10.6 percent (1983), 9.8 percent (1984), 9.0 percent (1985), 8.4 percent (1986), 8.0 percent (1987), 7.5 percent (1988).
CPI increases of 3.8 percent (1983), 4.6 percent (1984), 4.7 percent (1985), 4.1 percent (1986), 3.9 percent (1987), 3.7 percent (1988).
Monetary resolution: 5 percent average annual real defense growth (over 5 years); Social Security Commission recommendations; $13 billion entitlement cuts (over 5 years); current services in discretionary programs (no real growth or real cuts); interest cost reduction from reduced deficits and declining interest rates exceeding $120 billion over 5 years); 4-year delay for tax-indexing.
Real GNP growth rates of 2.2 percent (1983), 6.0 percent (1984), 4.9 percent (1985), 4.0 percent (1986), 4.0 percent (1987), 4.0 percent (1988).
Unemployment rates of 10.6 percent (1983), 9.0 percent (1984), 7.6 percent (1985), 6.9 percent (1986), 6.4 percent (1987), 6.0 percent (1988).
CPI increases of 4.9 percent (1983), 5.5 percent (1984), 6.0 percent (1985), 6.1 percent (1986), 6.3 percent (1987), 6.8 percent (1988).

Mr. MOYNIHAN. Mr. President, last year, with Senators JIM SASSER and DONALD RIEGLE, I offered an alternate budgetary program based on a new coordination of fiscal and monetary policy. I had characterized the administration's program of wildly expansionary deficits and stringently tight money growth as a policy at war with itself. I warned that this policy would produce the unprecedented combination of severe contraction and high sustained interest rates. And I offered an alternative, based on revising the Federal Reserve's money growth targets coupled with several measures of fiscal restraint. Had this policy been adopted, the Nation would have avoided the disastrous second dip of this finally passing recession, and recovery could have begun last June or July. We did manage, with the cooperation of Senator DOMENICI, to append a statement on the coordination of fiscal and monetary policy to the budget resolution. The Reserve did finally attend to this sense of the Congress state-

ment in August and October, easing monetary policy in ways which have at last ended this terrible economic decline, the worst since the Great Depression.

Now we can move beyond a halt to an economic decline, and do our best to insure healthy and vigorous growth. The need is all around us. The means are at hand, with this resolution. The results are as certain as any in economics. I urge the adoption of this resolution, for the health and wealth of this great country's economy and people.●

● Mr. HART. Mr. President, for the past 2 years, this administration has tried to achieve economic growth with only one tool: fiscal policy. This led to almost no growth or anemic growth at best.

At the same time, the Federal Reserve Board has conducted a very conservative monetary policy that has made growth nearly impossible. As a result, at a time when we most need to expand the economic pie, it keeps shrinking.

The resolution Senator MOYNIHAN and I are introducing calls on the Federal Reserve Board to manage monetary policy so as to achieve the average real growth rate of previous postwar recoveries. It is based on the experience of those recoveries that economic growth requires an accommodative monetary policy. It makes high economic growth, once again, the primary economic priority of the United States.

The danger of failing to move toward an accommodative monetary policy at this time is clear: the recovery which most economists believe is now beginning could quickly founder and we could sink into a third recession in as many years.

It is time for a strong, affirmative statement that all our economic policies—monetary and fiscal—will be directed toward high economic growth. This is essential for the health of our changing economy and for the health of the world economy. A move by our Government toward a more accommodative monetary policy would alleviate the growing debt problem of developing countries and would give a needed boost to the economies of our allies.

The benefits from higher growth are striking:

The Moynihan-Hart proposal would give us a GNP of $577 billion by 1988, 11.6 percent higher than the current administration projections.

Putting monetary policy back on a growth path would put 1,400,000 more people back to work by 1988 than the administration plan.

Personal income and corporate profits would also be higher.

There would be substantial recovery in housing and autos.

Growth also makes a substantial contribution to reducing the size of the deficit in future years if we also need to take a number of other initiatives to contain spending and increase revenues to keep the deficit under control. For instance, the combination of higher growth under Moynihan-Hart and a delay in the implementation of indexing brings the 1988 deficit down to $15 billion.

The program does contain one cost: Under Moynihan-Hart plan, the Consumer Price Index would rise from 6.1 percent in 1982 to 6.8 percent in 1988. This assumption is based on oil price estimates that came before the recent tumble in world oil prices—the 1988 results would look better if they were based on today's estimates.

However, we still need to develop a program to control inflation. The past 2 years are a stark reminder of the costs of fighting inflation with a deep recession. The country has lost hundreds of billions of dollars, millions of people have been thrown out of work, and investments in our future have been delayed, cut back or cancelled.

The controls of the Nixon years proved to be costly in a quite different way and are an unacceptable solution. What we need is a policy or more likely a combination of policies that will continue to wind down inflation and prepare us for any future price shocks.●

SENATE RESOLUTION 80—TO AMEND THE STANDING RULES OF THE SENATE

Mr. BYRD submitted the following resolution; which was referred to the Committee on Rules and Administration:

S. RES. 80

Resolved, That Rule XV of the Standing Rules of the Senate is amended—

(1) by inserting after "Motions" in the caption a semicolon and the following: "GERMANENESS";

(2) by adding at the end thereof the following new paragraph:

"6. (a) At any time during the consideration of a bill or resolution, it shall twice be in order during a calendar day to move that no amendment, other than the reported committee amendments, which is not germane or relevant to the subject matter of the bill or resolution, or to the subject matter of an amendment proposed by the committee which reported the bill or resolution, shall thereafter be in order. The motion shall be privileged and shall be decided after one hour of debate, to be equally divided and controlled by the Majority Leader and the Minority Leader or their designees.

"(b) If a motion made under subparagraph (a) is agreed to by an affirmative vote of three-fifths of the Senators duly chosen and sworn, then any floor amendment not already agreed to (except amendments proposed by the committee which reported the bill or resolution) which is not germane or relevant to the subject matter of the bill or resolution, or the subject matter of an amendment proposed by the committee which reported the bill or resolution, shall not be in order.

"(c) When a motion made under subparagraph (a) has been agreed to as provided in subparagraph (b) with respect to a bill or resolution, points of order with respect to questions of germaneness or relevancy of amendments shall be decided without debate, except that the Presiding Officer may entertain debate for his own guidance prior to ruling on the point of order. Appeals from the decision of the Presiding Officer on such points of order shall be decided without debate.

"(d) Whenever an appeal is taken from a decision of the Presiding Officer on the question of germaneness of an amendment, the vote necessary to overturn the decision of the Presiding Officer or hold the amendment germane or relevant shall be three-fifths of all Senators duly chosen and sworn."

NOTICES OF HEARINGS

COMMITTEE ON AGRICULTURE, NUTRITION, AND FORESTRY

Mr. HELMS. Mr. President, as chairman of the Senate Committee on Agriculture, Nutrition, and Forestry, I wish to announce that a confirmation hearing on the nomination of John J. Franke Jr., has been scheduled on Monday, March 7. Mr. Franke has been nominated for the position of Assistant Secretary of Agriculture for Administration.

The hearing will begin at 1:30 p.m. in room 328-A, Russell.

Anyone wishing further information should contact Denise Alexander of the Agriculture Committee staff at 224-2035.

AUTHORITY FOR COMMITTEES TO MEET

COMMITTEE ON AGRICULTURE, NUTRITION, AND FORESTRY

Mr. STEVENS. Mr. President, I ask unanimous consent that the Committee on Agriculture, Nutrition, and Forestry be authorized to meet during the session of the Senate on Thursday, March 3, at 10 a.m., to consider agriculture export legislation and S. 17, Domestic Commodity Distribution and Food Assistance Act.

The PRESIDING OFFICER. Without objection, it is so ordered.

ADDITIONAL STATEMENTS

FRANKLIN ROOSEVELT BECAME PRESIDENT OF THE UNITED STATES 50 YEARS AGO

● Mr. RANDOLPH. Mr. President, Friday, March 4, marks the 50th anniversary of the inauguration of Franklin D. Roosevelt as 32d President of the United States.

It was the beginning of the New Deal era, one of the most dramatic and dynamic periods in American history. The New Deal created jobs; it put millions of Americans back to work rebuilding a shattered, depres-

sion-ridden nation. Roosevelt's leadership brought hope where there was despair; it brought work where there was unwanted idleness; it brought unity and purpose where there was chaos and confusion.

I was sworn in as a freshman Member of Congress just 5 days after the inauguration. I am the only Member of Congress who participated in that series of legislative and social reforms.

Millions of words will be written and spoken about the New Deal era, and scholars of the future will spend endless hours of historical analysis in attempts to determine the factors which led to America's admirable recovery from the economic depths.

It is necessary, I feel that we consider not only the statistical evidence but the principles and personalities involved. An individual most qualified to comment on Roosevelt—the individual—and his leadership ability is Washington attorney, James Rowe, who served as a White House assistant during those critical early years of the New Deal administration.

Mr. Rowe recently recalled his personal remembrance of Roosevelt on the occasion of the 50th anniversary of the 1932 election. His eloquent words are most appropriate for Friday's significant occasion.

Mr. President, I ask that remarks by James Rowe be placed in the RECORD.

The remarks follow:

"FDR—THE BOSS"

(By James Rowe)

. . . When you have contemplated the thousands upon thousands of pages, the scores of authors whose single theme has been Roosevelt it is rather humbling to realize that no one now has much of anything to add. He is now best left to the historians who are of course far from speaking their final judgment.

But what one does miss most in these books about the great events, about his leadership, his political skill, his idealism is what some of you present here today most vividly remember as his most human quality—that utterly incredible charm. Perhaps you will forgive me, then, if I dwell not at all today on his towering importance to the saving first of his country, and then of the Free World. I would instead like to recall for a few moments what it was like, when we were all very young, to have worked for such a man. If it is true that no man finds his heroes after he is 30, it was my great good fortune to come to the White House staff at the age of 28.

The New Deal took place in a simpler time for America. But the problems were not less serious than those of today. After all, FDR led the Nation through the two most serious crises we have faced since the Civil War. One was the worst depression the Nation has ever gone through, and the other was the greatest war we have ever been in, World War II. In both of these he was the unmatched leader, and in both he was a most successful leader.

I'm sure that most of you who have come fairly recently to Washington and to watch the White House, the Hill, and the Government would have difficulty in recognizing the White House, the Government, and the city of those days.

The White House during the depression was quite small. In 1939 there were 45 people, including stenographers, on the staff. A handfull were on other payrolls—Adolf Berle in the State Department, Tom Corcoran in the RFC, Ben Cohen in the Department of the Interior, and others.

In 1944, during the greatest war in the history of mankind, the White House staff had 47 direct employees and 145 detailed from other agencies, a total of 192.

In contrast President Reagan's White House staff consists of 1,569—eight times as many as FDR had during World War II.

The Reagan staff has 184 senior officials earning more than $50,000 a year. Indeed the President's wife today has a larger staff than FDR had during the depression.

FDR wanted no more people on his staff than he could deal with personally. His assistants could not have assistants of their own. I remember asking FDR for an assistant because I felt grossly overworked. His reply was that if I needed an assistant I was not doing the job he wanted me to do. He felt that a large staff would shield the President from reality, would make trouble, make work, cut off the nation from the President and the President from the nation.

Of course, Reagan is not the only sinner, but merely the latest one. Every President after Roosevelt has said he would cut the staff drastically and every President from Truman to Reagan has added personnel to the staff. I do not know why and I do not think any of them did. I suppose it is because they did not trust the Executive Branch and preferred to handle the work in the White House instead of in the Departments.

There were three secretaries in the White House—a press secretary, an appointments secretary, and a secretary who did almost everything else. There were also three or four administrative assistants, the so-called "assistants with a passion for anonymity," a phrase taken from the description of the staff of the British War Cabinet in World War I. I was one of those. My friends would have some quarrel about my desire for anonymity but the rule was enforced. I really do not remember ever leaking anything to a newspaper man while I was in the White House. I do remember going in one day to see the President about some minor matter. He said "Didn't I read in some column in the Star that you were at a cocktail party yesterday?" I said, "Yes, Sir, I was at that party." And he said, "If I read this too often, you will need another job." I may say this cut down my cocktail party going considerably.

The President believed he could control the government in two ways—by controlling the budget—the money—and by controlling the personnel—the people. Therefore he moved the Budget Bureau out of the Treasury and into the Executive Office of the President where it still is. In my day, he and I handled all the Presidential appointments to political office, I did the spade work and he did the deciding. He also had an administrative assistant who controlled the work of the Civil Service Commission and handled the other personnel matters. He thought these were the only two tools he needed—budget and personnel control—money and people.

There was no Council of Economic Advisers, there was no Domestic Council, there was no National Security Council, except to the extent that he himself was his own National Security Council.

I do know he spent some time every day reading the State Department cables. I do not know who selected them for him, someone in the State Department. I once suggested to Rudolph Forster that I would like to read them and Forster merely smiled kindly, and said no. Rudolph Forster was the chief civil servant at the White House. He had been there since Teddy Roosevelt who was his hero and on a slow day he would be perfectly willing to discuss all the Presidents between Teddy and Franklin. I remember him as a wise old man.

Every document going to the President and coming back from the President had to go through his hands. He was an extremely competent man and he held the White House up almost by himself, as Grace Tully can testify. He rarely made a mistake. I do recall he once made one that affected me. In those days I had to clear every political appointment with the Democratic Senators from the appointee's home state. I once asked him to hold one up involving the state of New York until I cleared it. Rudolph slipped and the papers went to the Hill without clearance. The two Senators were soon on the phone yelling bloody murder, I said "Mr. Forster, you've gotten me in a lot of trouble by sending that appointment down." He smiled benignly and said, "Young man, you would be terrified if you knew how little I care." This was of course the long view of history and Rudolph Forster had it.

Another informal bastion of power resided in the office of FDR's personal secretaries, Missy LeHand and Grace Tully. Those two were invaluable to the New Dealers because they were considerably more liberal than the secretaries who controlled the front door of the President's office. They came from Virginia and shared some of the conservative political bias of the Virginians of those days. When we could not get in the front door—which was often—I, and a number of others such as Tommy Corcoran and Ben Cohen, went through the back door and Missy or Grace would let us in to see the Boss—unless one or the other said, "Don't try to see him today—his Dutch is up." He really did not object to having this extra channel. The Roosevelt Administration, which always looked quite chaotic on the surface, but which was well and effectively run by the President, could not have functioned without Grace or Missy. And he always had a number of other channels open to him.

He held two press conferences a week—998 in all—always around his desk in the Oval Office with about 50 to 150 reporters, depending on the events. Radio was not allowed.

At these he was like a bull fighter chased by the bulls. You could ask as many questions as you thought proper. He enjoyed the give-and-take as did the reporters, almost all of whom were his ardent admirers. He continually attacked their bosses, the Publishers, which probably endeared him to the reporters more than ever.

Like all Presidents, he was angry about leaks to the press, but most of those which were successfully traced back, where traced to him—he told somebody or other who then told a newspaper man.

He enjoyed every minute of those press conferences. Almost always there was no preparation other than a minute or two ahead of time with Steve Early, his Press Secretary.

He was a most astute politician. There has been no one better, in his sense of political timing, and in the way he handled the Senate and the House. He certainly did not make as many telephone calls as Lyndon Johnson did but he came close to it. In my day he saw a large number of Senators and Congressmen—on the record and off the record—every day. He often smelled out trouble before it began. After one disastrous attempt, he never used a formal Hill lobbyist. But he did tell me and others to go up on the Hill and wander around.

He never lost a battle on the Hill until the Supreme Court packing plan in 1937. He really had won that fight because Chief Justice Charles Evans Hughes and Senator Burton Wheeler, his two most effective opponents, had cleverly got two of the extreme conservative justices to retire and that gave him two liberal appointments. I don't know why he pressed on after that when he had already won except that he was always full of confidence, and had, until then, never lost a legislative battle in all the years since his inaugural in 1933.

He did run into some political trouble in the bi-elections of 1938. He and the New Dealers decided to purge several recalcitrant senators and congressman who had been giving him constant trouble. But they tried their purge on the spur of the moment, without enough campaign money and without very good candidates to oppose the incumbents. This did leave some scars. For instance he went after Senator Walter George of Georgia, later Chairman of the Foreign Relations Committee. George won reelection handily. Some time later when some of the Senators were sitting around discussing Roosevelt's maneuvering, one of them said, "Roosevelt is his own worst enemy." "Not while I'm alive he isn't," said George.

But in general, Roosevelt's relations with the Congress were "a day in the country" compared to those of his successors and his predecessors.

This was not an accident. He kept a careful and sensitive watch on the Congress. I remember he once refused to appoint a brilliant and controversial man to an important position because he knew it would start a real fight in the Senate. He said to me, "We're getting close to a war. I'll need the Senate during that war and particularly after, and I do not propose to make the mistake of my old boss, Woodrow Wilson, who antagonized the Senate and therefore lost the battle for the League of Nations."

His political genius, I think, was never to get too far ahead of the American people. He was from birth an internationalist but he knew the country was not. After World War I, it was strongly isolationist. He had once moved too far ahead of the people in his famous 1937 quarantine speech in Chicago when he suggested, as he watched the rise of the dictators, Hitler and Mussolini, that the United States should quarantine them in terms of goods and help. The isolationist outcry was so strong that he moved cautiously thereafter.

The City of Washington was, until the war, and despite the churning energy of the New Deal, a sleepy town. The White House gates were kept open, and the government servants and anyone else strolled through them on their way to and from work until early 1940. There was little security in those days as I remember. In the White House lobby, just outside the President's office, there were always one or two quiet anonymous secret service agents sitting with a small flock of reporters who were waiting to see who would come out of the President's office so they could be interviewed. There were of course a small number of secret service agents elsewhere.

At the far end of the lobby was a chair behind a desk where sat the well-loved Pat McKenna, the Receptionist. He received all visitors, known or unknown. I remember crossing near Pat's desk one day when he was talking to a very distinguished looking old man with a flowing white beard. "I am sorry, God," I heard Pat say, "but the President is in a sudden urgent meeting and he cannot see you. If he had only known you were coming, he would have been available," "Can you get me in to see him next week, Pat?" God asked. "I really have something important to tell him that he should know." Pat said "God, I'm sure I can arrange to get you in next week," The old man with the flowing beard—who for all I know could have been God—happily left.

In those days, the three secretaries had limousines but the administrative assistants could not reach that pinnacle of splendor. When I was sent on an errand by the President, I took my own car and I paid for my own gas or for the taxi if I used one. I parked my car right outside the President's office. It was a battered old convertible with the top falling apart until someone delicately suggested it was in such complete disrepair I ought to keep it somewhere else, which I did. There was, of course, no such elegance in my day as the White House Mess. We ate our lunch in the nearby beaneries.

Even the young today must have heard of the famous Roosevelt charm. It was indeed there. The staff, everyone of us, worshiped him, basically I believe, because of the way he treated us. He would turn that charm on everyone who ran across him whether he saw them several times a day or hardly ever. It is true he could be somewhat tough occasionally behind a closed door and I have seen him somewhat cross but never really angry toward any of his staff.

The Roosevelt charm radiated out from the office across Washington and across the country. His sense of leadership—of how to be President—was, I think, the main reason why the young flocked in large numbers to Washington in those perilous days of the Depression and later of the War. He was, as you know, a man of hope, he was willing to try anything. If an experiment failed he would try something else. "The country," said Roosevelt in 1932, "needs . . . bold, persistent experimentation. . . . Take a method and try it: if it fails, admit it frankly and try another. But above all, try something. The millions who are in want will not stand by silently while the things that satisfy their needs are within easy reach." One of the relatively young, Rex Tugwell, was quoted as saying "We shall roll up our sleeves and make America over." This caused a great outcry in the press, in Wall Street, and business. It was perhaps a foolish thing for him to have said but in our hearts we all believed it.

With the possible exception of the Founding Fathers, there was never before and certainly has not been since, the excitement, the intellectuality, the excellence or the sense of accomplishment, that existed in the New Deal. It is remembered by the hundreds, even thousands, of young men and women who flocked to Washington to serve under Franklin Roosevelt.

The words of Justice Oliver Wendell Holmes of the Supreme Court, when speaking of his Civil War comrades in a speech delivered on Memorial Day 1884, also apply to the New Dealers—"Through our great good fortune, in our youth our hearts were touched with fire."

There is a new book about Roosevelt called "FDR—1882-1945" by Joe Alsop. The last paragraph of this very good book reads in part:

"Even more than the feeling that there were giants in the land, I now feel nostalgia for the absolute confidence in the American future which was the necessary foundation of this total absence of doubt. Hope was in fact Franklin Roosevelt's greatest gift to his fellow Americans. Partly he gave us hope by his deeds, when he came to office in a time that seemed utterly devoid of hope. But even more, he gave us hope because all could see that he himself felt not the slightest doubt about the future at any time in his years as President. Defeats there might be (though they were rare) on this bill or that in Congress. Fearful military misfortunes there were, with Pearl Harbor itself the most notable and hard to comprehend. Grounds for even a slight temporary loss of hope there never were, however—at any rate in the President's mind; and somehow, his mind formed the minds of the overwhelming majority of other Americans who watched him in action in those years of hope."●

MEALS ON WHEELS

● Mr. ARMSTRONG. Mr. President, in difficult economic times like these, the morning paper brings reports of hardship and the evening news is a litany of despair. At a time when good news in hard to come by, a story of wholesome human action solving problems is most welcome. I have such a story to tell today, and it concerns the Meals on Wheels program in Englewood and Littleton, Colo.

Fourteen years ago, Virginia Baker had been feeding her mother and father lunch most days. They invited some of their elderly friends to eat with them and, before long, Mrs. Baker was regularly serving lunch and providing friendly social contact to 12 people. This woman's thoughtfulness and generosity filled an obvious need in the community, for the popularity of her lunches continued to grow. Soon, the local Presbyterian Church loaned their kitchens for meal preparation and other neighbors helped deliver lunches to elderly people who were more or less housebound.

Eight years ago, the program was such a success that it rented permanent facilities from the Littleton Housing Authority at the Bradley House, an apartment complex for seniors. This Meals on Wheels program now feeds lunch to 85 seniors a day—some in the comfort of their own homes, and more than 20 in the community dining room at the Bradley House. The meals are well balanced, appetizing, and nourishing. A typical recent lunch consisted of baked chicken, mashed potatoes with gravy, mixed vegetables, bread and butter, and dessert. Arrangements can be made for

diabetics and others with special dietary needs.

This program, Mr. President, grew out of a simple neighborhood concern for those who were less fortunate or less active and, though larger, it is still the same today—neighbors helping neighbors in the friendly way they always have. "That's all they need is a good neighbor who cares and shares," says Jan Andrus, who took over the Meals on Wheels program from Mrs. Baker in 1981.

The entire program is run without a penny of Federal or State assistance. These hot and wholesome meals are offered almost at cost to those who can pay—and most seniors want to—and free to those who cannot. All of their other expenses are made up from private contributions of money, time, and labor.

Volunteers for a program like this have not been hard to find, and 90 volunteer-hours a week have become commonplace. The Beta Sigma Phi sorority and the Englewood and Littleton Republican Women's Clubs are among the many who pitch in to serve the lunches at the Bradley House and run the nine different routes delivering the meals to homes and visiting with the elderly. "Sometimes, if you're 80 years old, and have never been patted on the shoulder, or kissed on the cheek, it can make you very sad and lonely. Company is as nourishing to the mind as food is to the body and sometimes more so," Mrs. Andrus says. Hearing this, no one could doubt her sincerity when she adds warmly, "I have a good time doing this job * * * it's so important."

These daily visits, in addition to providing company, can also be a lifesaver in case of mishaps or medical problems, so it is really two programs at once. Many elderly people can remain in the comfort of their own homes longer if they can eat well and be assured of regular visits. In fact, our 1979 study found it gave them an average of 6 more years independence before needing the extra attention of a nursing home—and who could put a price on 6 years of independence?

I wanted to take this time to draw the attention of my colleagues to this neighborly effort, Mr. President, because I think it is an example of the goodwill and generosity of ordinary people who see a problem and work together in practical and effective ways to solve it. It is a good news story, if you like, but it is not unique to Denver. All around the country, other people are solving other problems in other ways—quietly and without fanfare—just because that is what good neighbors do. You will not read about them in the morning paper or hear about them on the evening news, but they go on about their business of caring about others in their own quiet way.

I should like to have printed in the RECORD, Mr. President, something Mrs. Andrus shared with me. It is called Beatitudes for Friends of the Aged, by Esther Mary Walker, and says a great deal about how one group of Coloradans cares for another.

The writing follows:

BEATITUDES FOR FRIENDS OF THE AGED

(By Esther Mary Walker)

Blessed are they who understand
My faltering step and palsied hand.
Blessed are they who know that my ears today
Must strain to catch the things they say.
Blessed are they who seem to know
That my eyes are dim and my wits are slow.
Blessed are they who looked away
When coffee spilled at table today.
Blessed are they with a cheery smile
Who stop to chat for a little while.
Blessed are they who never say,
"You've told that story twice today."
Blessed are they who know the ways
To bring back memories of yesterdays.
Blessed are they who make it known
That I'm loved, respected and not alone.
Blessed are they who know I'm at a loss
To find the strength to carry the Cross.
Blessed are they who ease the days
On my journey Home in loving ways.●

THE CERAMIC EXAMPLE

● Mr. TSONGAS. Mr. President, I commend to my colleagues a February 17 Washington Post article by Hobart Rowen. The article is relevant to a bill I recently introduced, S. 428, titled the "Economically Strategic Industrial Research and Development Act." When I introduced that bill, I had printed in the RECORD an article on the Japanese challenge in ceramic materials. Mr. Rowen's piece succinctly summarizes the problem, and I want to share his insights with my colleagues.

Mr. President, I ask that the text of Mr. Rowen's article be printed in the RECORD.

The article referred to follows:

THE CERAMIC EXAMPLE

(By Hobart Rowen)

About 15 years ago, a British scientific journal published the first article that anyone can remember about an exciting new idea: automobile engines, the article reported, could be made out of ceramic material instead of metal. Such lightweight, thermal-efficient ceramic engines would have stunning advantages, especially a 30 percent reduction in fuel consumption. And the engine itself would practically never wear out.

No one in the West—certainly no one in Great Britain—considered this more than a pipe dream. But—you guessed it—the article on ceramic engines came to the attention of the Japanese government and Japanese businessmen, who carefully scan all technical literature published everywhere.

The potential for ceramics was only one phase of $460 million in R&D money the Japanese government committed for a 10-year exploration of new industrial materials, biotechnology, and so-called "new function elements" in electronics.

So it happened that a few weeks ago on a visit to Japan to study how these new high-tech programs are coming along, Commerce Under-Secretary Lionel H. Olmer drove the world's first car with a ceramic engine on the grounds of the KYOCERA Corp. (Kyoto Ceramics).

"It's an experimental model and it idles sort of rough—but it works, that's the main point," Olmer told me.

KYOCERA already is commerically producing ceramic components for diesel engines. And Olmer says in a report on his trip, "It is anticipated that ceramic parts—including turbine blades—will be usable in ships and aircraft, eventually."

The experimental ceramic engine is a good example of why Olmer argues that American manufacturers trying to compete with Japan are dealing with "a moving target." Merely slapping quotas on Japanese cars for a fourth year (as Tokyo, under pressure from U.S. trade ambassador Bill Brock, has just agreed to do) is a pitiful Band-Aid for Detroit, which simply seems unable to meet Japan's creative challenge.

Olmer says in his excellent report—a public document available from the Commerce Department—that Japan concentrates on high technology because there is a bigger bang to the buck: success in high tech makes all Japanese industries more competitive.

Any company, especially one in Great Britain—where, God knows, something is needed to stir the country out of an economic quagmire—could have pursued the idea of a ceramic automotive engine. But it was a Japanese company that pressed ahead, its instinct for innovation importantly supported by government direction and money.

But Olmer makes the point that it would be a mistake to attribute these successes just to governmental spoon-feeding. The truth is that entrepreneurial skills of private management, the dedication of a nonconfrontational labor force, and just plain common sense are also key factors.

Two examples Olmer cites:

Originally, an American company developed a kind of crane to life airplane fuselages off the assembly line and twirl them in midair while the assembly crew carefully listens for rattles. That's what the Japanese do—and American makers don't—in assembling F15 fighter aircraft. Predictable results: Japanese-made F15s don't rattle.

A recent "time and motion" study in the United States shows that, typically, about 75 percent of a woker's time is spent looking for the right tools and parts, and only 25 percent at the actual assigned task. The Japanese have reversed these percentages—tripling actual work time—by providing each worker with a simple plywood cart in which he neatly stores all of his tools and parts. He doesn't go off the shift until that is done.

What are the lessons here? The West has scoffed at the Japanese as imitators of Western technology. But Olmer quotes Edison's definition of genius—99 percent perspiration and one percent inspiration—to suggest that Japan's special creativity is "incremental improvement," which is just as important as "a blinding flash of insight."

The reality is that the Japanese have become either preeminent or equally eminent in many high-technology fields, including ceramics, carbon fibers, robotics, computers, semiconductors and machine tools. To a substantial degree, Japan has benefited from a transfer of technology from the West, and often has been more alert to the potential of an invention than the inventors.

Now, some of the transfers must go in the reverse direction. Just how this is to be worked out will have an important bearing on the economic development of the noncommunist world for the rest of the century.●

WHAT IS REALLY HAPPENING AT THE EPA?

● Mr. McCLURE. Mr. President, on February 20, the Washington Post ran a very important article written by a good friend of mine, Senator ALAN K. SIMPSON entitled, "EPA Is Doing Things Better."

Senator SIMPSON's article skillfully outlines the direction of the Environmental Protection Agency. He points out that many of the so-called environmentalists attacking the EPA have failed to look at the progress that has been made. The debate over the EPA, he says, closely resembles a pack of wolves high on emotion circling their prey.

He stated:

The administrator of EPA has the task of trying to enforce some of the most convoluted and ambiguous statutes and regs ever enacted. Almost every significant regulatory action she takes is challenged in court—by someone. Not only is she subject to the constant cross fire from the environmentalists but her actions are under a barrage of continuing judicial review. The fact that she is criticized does not mean that Anne Gorsuch is doing a miserable job.

He goes on to say that how easy it is for a lawmaker to gain the headlines of the local paper by subpenaing Anne Gorsuch. This is a wonderful game but it is not very productive.

Senator SIMPSON's comments provide an excellent insight to the politics surrounding the current debate.

Mr. President, I ask that the article by my distinguished colleague from Wyoming be printed in the RECORD:

The article follows:

[From the Washington Post, Feb. 20, 1983]

IN DEFENSE OF ANNE GORSUCH—EPA IS DOING THINGS BETTER

(By Alan K. Simpson)

Lord, here we go again! With the scent of the kill filling the flared and twitching nostrils of "the observers" in Washington, and with good old "high emotion" vaporizing all desire to seek reason and balance, the "pack" is circling in on the Environmental Protection Agency and its administrator, Anne Gorsuch. It reminds me of that old cartoon of the two buzzards in the tree, with one saying, "Patience, my ass. I'm going to kill something!"

I am not an apologist for Anne Gorsuch. She beautifully expresses her own thoughts in a very frank and candid manner—an interesting woman. Yes, I, too, have heard the same comments about her—that she is aloof, cold, tough as hell, arrogant, confrontational, sly—the full spectrum of adjectival abuse.

Have you ever seen a pack of coyotes? They are not the kind of warm and furry animals that you pat gently on the head and feed a dish of warm milk. They circle their prey—fired up and lathered by the chase—and then rip at the throat. They will polish off a lamb in pretty short order. Anne Gorsuch is not perceived as being a lamb—indeed not—and it may be that fact alone that has helped get the old juices flowing as the pack attempts to drag her agency to its knees.

What spurs this kind of attack? What fires and focuses all this energy? It may be that everything else is too dry or boring to bear. After all, legislating—ofter like administering—is just about the driest and sometimes dullest form of human endeavor. For it consists of research, reading, reviewing, meeting with fellow legislators, amending, searching, learning, growing, determining how to compromise an issue without compromising yourself, and in humility finding how to take a crumb when you can't get a loaf. It is not high drama.

But when all of that pent-up frustration born of boredom finds a chink in the boilerplate—then hallelujah, the chase is on! At the first mention of the word "shredder" the old eyeballs bulge and fangs come out. With all the gleeful licking of the chops going on, and now even a new "in" title ("Sewergate"), it is sometimes diffcult to inquire as to whether there is any reason or balance or fairness lurking in the organization being assaulted. Possibly we might consider taking a few moments for a presentation of "the other side."

The version of recent agency history that is currently fashionable is that the pre-Gorsuch EPA was a heady model of efficiency and fairness ("One of the most efficient and capable agencies of government," according to the New York Times). That is not the EPA I remember. I recall an EPA that was hopelessly behind schedule on the implementation of the major environmental laws, constantly mired in controversy and battles with the states and other branches of the federal government, and frequently accused of "anti-business bias" in the ideological interpretation of scientific evidence. It was an agency whose leadership was portrayed as being largely indifferent to the efficient management of the nation's resources.

Given our national fiscal situation, it was both necessary and inevitable that Anne Gorsuch would be asked to prune the EPA budget and subject agency activities to a more rigorous scrutiny than they had ever undergone before.

Perhaps some of the subsequent changes at EPA have been unwise. It is difficult to tell since there seems to be such a dearth of knowledgeable and disinterested analysis of what has really taken place. The hard-hitters in the Washington environmental community have been unremittingly hostile to Gorsuch since well before her confirmation and have always denounced in near hysterical tones virtually everything she has done. Most of Gorsuch's critics are simply so pinched and shriven with bias and partisanship that they would flunk a saliva test.

The administrator of EPA has the task of trying to enforce some of the most convoluted and ambiguous statutes and regs ever enacted. Almost every significant regulatory action she takes is challenged in court—by someone. Not only is she subject to the constant cross fire from the environmentalists, the business community and Congress, but her actions are under a barrage of continuing judicial review. The fact that she is widely criticized does not succinctly mean that Anne Gorsuch is doing a miserable job.

An interesting example is the criticism that EPA is now getting—from the environmentalists, of all people—for taking seriously the statutory deadlines for attainment of clean air standards. We now hear the extraordinary argument that these attainment dates really don't have anything to do with actual air quality—that the deadlines Congress fussed, struggled, and busted its fanny over a few years ago don't apply out there in the real world. I think Anne Gorsuch might be forgiven for having the impression that she just can't win regardless of what she does.

One of the delightful ways for a lawmaker to pick up a few headlines in the old hometown press is to subpoena Gorsuch before one of the many committees and subcommittees in this place, whose staff spend an inordinate amount of hours sniffing out subject matter that can get "the boss" on the tube. Just ran our a subpoena and have Anne Gorsuch haul up to the Hill, by pack mule train, about 750,000 documents having to do with, say, Superfund. It's a great and time-honored game. But is it always productive? I think not.

The theory here, when the fur begins to fly, is to get on the "right side." Which side is the right side? Quite naturally its the side that makes you a folk hero at home.

There is no question that the basic philosophy and style of this administrator is less pleasing and digestible to the environmental community than that of previous administrators. But I do labor under the longstanding illusion that a public official should be judged not on the basis of clamor or conflict but on the basis of certain results—in this case, environmental quality. The truth is that the health of the American people and the quality of their environment are getting better, not worse. The air and water may not be as clean as we wish, but they are eminently cleaner than they were, and show continuing improvement. Hazardous waste dumps are being cleaned up. No previous EPA administrator can boast of that fact.

It is not my purpose to defend all actions that Anne Gorsuch has taken as administrator of EPA. I've surely resisted some. I know I would have handled some matters quite differently had I been in her shoes—but who of us can object to fair and informed criticism of the record of any public official?

What I do not have much stomach for is the mindless antipathy, the raging harassment and assertions, the blatant lust for the "kill" that has been so evident recently.

Much has been made of the reduced budgets at EPA. This is seen by some thoughtful people as a lessening of the commitment to clean up our nation. Is it? What happened may be something that makes sense. Lawyers were fired and scientists were hired. Anne Gorsuch stated, "I don't need all that money for lawyers and litigants and bright stars and fancy writers and papers peddlers and white paper specialists. Just give me some 'grinders' who can sit down with the deputy, John Hernandez, and other scientists and crank out a list of the chemicals that cause difficulties for human beings. I want to know what they are, how they can be controlled, what we should be up to. Let's toss out the lawyers, and hire the scientists and get some rationalization about specific effect of chemicals," Makes sense.

I believe many of us have finally plugged our ears to the old siren song of Washington. The words and music went, "If we only had a good chunk more money and some more good people, we could do you a tremendous job." There aren't too many people left around here pumping out that guff any more or buying it. Many see clearly that we no longer need lengthy litigation, marvelous memorandums, ponderous tomes,

distinction piled upon distinction, and paralysis by analysis. Start walking the walk instead of talking the talk.

But others still don't agree. Seems every time we take a crack at a responsible amending or reauthorization of the Clean Air Act we get letters from constituent groups who have been wired up in a miasma of misrepresentation: "Lay off the Clean Air Act, Simpson, or we'll tear your shorts off!"

Recent public opinion polls clearly show that the American people want clean air and clean water and are willing to pay for it. I go for that. This does not mean that the public's willingness to pay should be translated into a willingness of the federal government to spend itself goofy on environmental programs. We can have a clean environment and reduced budgets if appropriations are expended wisely. That is what Anne Gorsuch's administrative efforts are about—the wise and thoughtful use of limited resources.

All federal agencies and departments are finding the going tough in these times of tremendous deficits. Should EPA be exempted from all economic constraints while our right to sensible environmental protection is already being maintained under current funding levels? None of EPA's harshest critics has shown that EPA has not continued to follow the law just as set out by Congress, nor can the critics show that the environment has been degraded, because just the opposite is true.

"Superfund" is a case in point. Under the stewardship of Anne Gorsuch, EPA has taken significant and effective actions to establish priorities to clean up some of the worst dump sites in the nation. Some will argue that litigation is preferable to any out-of-court settlements. But let us not forget that each case litigated costs the taxpayers hundreds of thousands of dollars while always delaying the actual cleanup. Out-of-court settlements are not intrinsically evil.

So, what the hell have they been doing over there? Well, EPA has been active in reducing the backlog of state implementation plans (plans required of the states before environmental protection strategies can be approved by EPA). This backlog has been reduced by 98 percent under Anne Gorsuch.

Through management streamlining, the requested budget reduction of 50 percent in 1982 has not prevented the EPA from proposing 14 effluent guidelines and promulgating 12 of those—when before this administration came on the scene only one was birthed after an investment of more than $100 million. For the very first time, EPA is on track with court-ordered deadlines. Is this not responsible action? One would think so.

The backlog of overdue decisions on chemical testing has been reduced by 25 percent. Backlogged applications for pesticide registrations have been reduced by 97 percent and use permit delays reduced by 83 percent. The backlog on grants and other resistance agreements has been reduced by 95 percent. The clogging of unresolved audits has dropped from 653 to 5 during the past 18 months. And if one examines the actual record, acid rain research levels have increased—contrary to the comments of the critics.

As chairman of the subcommittee on nuclear regulation, I observe EPA's Office of Radiation Programs. That office has accomplished much since Anne Gorsuch and John Hernandez took charge. It has really zeroed in on its mission of establishing environmental standards for a variety of activities in the nuclear field, many of which were hopelessly behind schedule and had, prior to Gorsuch's arrival, been but "pacing items" for the regulatory programs of other federal and state departments and agencies. This re-emphasis of ORP's mission might well be one of the most important achievements of EPA in the nuclear field.

EPA has also proposed standards for high-level waste repositories, an issue that the agency had been grappling with for an extraordinary period of time. These standards, once adopted, will be incorporated into the Department of Energy and the Nuclear Regulatory Commission high-level waste repository programs.

Final standards for inactive uranium mining and milling activities, which were recently promulgated by EPA, will allow DOE to move forward in its cleanup program for these inactive sites. Standards in numerous other areas related to the nuclear field have shown great progress since Gorsuch took over the shop, including standards for active uranium mill tailings sites that EPA in the past had failed to promulgate, even in the face of a statutory congressional mandate.

Because enforcement and implementation of clean air programs are two of the EPA's most important responsibilities, virtually no funding reductions have been proposed in those areas. Research support for national hazardous air emission standards has increased by $1.3 million to ensure their timely completion. The enforcement effort continues at the same funding levels as fiscal 1983, and EPA is maintaining its focus on the most significant violators, which include those tampering with auto pollution equipment and the large industrial polluters. The 17-percent reduction in state grants in this area is based on EPA's belief that improvements in federal and state operations will enable states to operate effectively with a reduction in the federal share of the total resource support.

Acid rain research will increase by $1.5 million to a total of $14 million. Total government-wide funding for acid rain will be $27.6 million, an increase of $4.3 million over the past fiscal year. Quality assurance efforts will get a $1.3 million injection.

There was an increase of nearly $1 million for improving toxic risk assessments. Total health effect studies will be funded at an increased level of $51 million, an increase felt necessary to continue to protect the health of American people.

The most diligently ignored factor in EPA's budget is the increase in funding for Superfund by 48 percent—and increases in resources for site cleanup by nearly 55 percent. If numbers alone are the game, then know that in 1982 EPA obligated 81 percent of all the funds appropriated in this program—including obligation of 90 percent of all waste-site cleanup funds. In 1984, EPA will be expanding the number of sites where response actions will be conducted.

The EPA budget proposals for 1984 deserve sensible analysis and not ridicule. The proposals for both 1982 and 1983 have resulted in environmental progress. Programs that were dormant are now productive. Savings of nearly $200 million over the 1981 appropriations are to be achieved while the EPA continues environmental progress through a series of actions: addressing a growing number of the most dangerous hazardous waste sites; improving management of our basic regulatory process in the EPA such as in the toxic new source performance standards, effluent guidelines and pesticides programs, and basic and essential regulatory reform efforts that have enabled the agency to implement statutory responsibilities in a much more sensible and effective manner.

We hear much about the acid rain issue—and should. We hear the EPA may be "stalling," prolonging research efforts as a means of reducing any chances for successful acid rain legislation. Yet there are (believe it or not!) professional scientists at EPA—career people—who survive all of the changes in administration throughout the years. The criticism leveled at EPA is a whack in the chops to these dedicated scientists and their objective work, as well as to many of the politically appointed administrators. The real truth is that Congress does need more information on acid rain—regardless of the lack of House action or the recent action taken by the Senate. EPA has been responding to this need for more information and will certainly continue to do so. Congress does need some more information on things like: the buffering capacity of different soils; the effects of oxidant catalysis; the role of long-range transport; the efficacy of different control strategies; and the effects of wind-blown alkaline dust on acid rain formation. EPA is not stalling on the acid rain issue. Instead, Congress is severely reined in by a lack of finite knowledge about the cause-and-effect relationships of different industrial control strategies. Congress should take the rap on inaction and stalling on acid rain, not EPA.

Notice, too, that when persons have expressed to Anne Gorsuch that something might be awry, or that sly trickery is afoot, or that the sneak thieves are in full flight or that the shredder has shorted out—or when they say Rita Lavelle shouldn't be working here, or that she should, or that Hugh Kaufman shouldn't be here, or that he should—all of those mumblings, memos and meanderings get turned over to the Department of Justice. It seems like a good place to report charges of wrongdoing. If things are really out of whack, it will come out in the wash.

And finally—isn't it interesting how "the observers" seem to foster preconceived notions about this administration and the environment? I would hope we might dispel one notion—that the protection of the environment and the public health and safety is solely in the domain of those of the other political faith. Check out the record of the Republican Senate and a Democratic House and review the number of environmentally responsible bills that have been passed by those bodies and praised by the President as he signed them into law—endangered species, barrier islands and nuclear waste legislation to mention but three.

Perhaps it would be well for us all—congresspersons, "the observers" and the public we serve to consider again the words of Edmund Burke: "Those who would carry the great public schemes must be proof against the most fatiguing delays, the most mortifying disappointments, the most shocking insults and worst of all—the presumptious judgment of the ignorant beyond their design."●

SIXTY-FIFTH ANNIVERSARY OF ESTONIA'S PROCLAMATION OF INDEPENDENCE

● Mr. LEVIN. Mr. President, last Thursday, on February 24, the Estonian Community of Detroit gathered to commemorate the 65th anniversary

of Estonia's Proclamation of Independence. Estonian-Americans all over the United States took time to reflect on the significance of the event, but also to bring attention to the fact that Estonians enjoyed independence for only a brief moment in history.

Mr. President, I sent a letter to the Estonian community in Detroit to be read at their gathering and ask unanimous consent that it be printed in the RECORD.

The letter follows:

FEBRUARY 27, 1983.

ESTONIAN COMMUNITY OF DETROIT,
c/o Mr. Raimond Tralla, Oak Park, Michigan.

DEAR FRIENDS: Once again you are gathering to commemorate the anniversary of the Proclamation of Independence of the Republic of Estonia.

It is now 65 years since that day, February 24, 1918, when the people of Estonia established an independent government. And, the people of Estonia enjoyed a period of peace and freedom but it was all too brief.

Forty-three years ago, in 1940, the Soviet Union occupied Estonia, and it, along with Lithuania and Latvia, became a captive nation. To this day, Estonia lives under the oppressive heel of the Soviet Union.

On this day, therefore, as on similar days every year, we pause to remember the past and its glorious history—to think of the present and how we can help our fellow human beings everywhere—and to dream of the future, when Estonia, and all captive nations will once again be free. The battle will not end until all such nations regain their sovereignty and independence.

In the meantime, I know that you will continue to be the watchdogs in this country of your culture, traditions and customs and continue to maintain your strong identification with your roots and your sense of community. America is enriched by your presence.

I am sorry that I cannot be with you today to personally express my thoughts to you. I wish you well in all your endeavors and look forward to a long association with you.

Sincerely,

CARL LEVIN.●

AID TO EL SALVADOR IS IMPERATIVE

● Mr. HELMS. Mr. President, yesterday the White House announced that Congress will be urged to supply an additional $60 million in aid to El Salvador for 1983. President Reagan is requesting this emergency military assistance to counter leftist guerrillas who continue to gain strength in that country. I believe that it is extremely important the El Salvador receive this aid as soon as possible. On Monday of this week, Deputy Assistant Secretary of State, Nestor Sanchez, said the army had less than a 30-day supply of ammunition. Furthermore, our own security is inescapably linked to the security of our allies and trading partners.

On the other side, the guerrillas continue to be well equipped both from Nicaragua and Cuba. I might point out that whereas the United States devotes 3 percent of its security assistance to Latin America, the Soviet Union spends 8 percent. United States inability—or unwillingness—to come to the aid of the Salvadoran Government will simply strengthen the Nicaraguan and Cuban position in the region.

Mr. President, the real issue is whether the United States will, for obvious national interest, develop a policy of commitment to ensure the future of democracy in El Salvador. Failure to grant El Salvador these additional funds would again demonstrate that the United States is not willing to defend the principles of democracy against a determined and programed international Communist aggression.

Mr. President, in dealing with El Salvador it is essential to recall March 28, 1982, when one of the highest voter turnouts ever in the history of democratic elections occurred. Despite death threats by the FDR guerrilla group, more than 80 percent of the Salvadoran voters went to the polls. The United States cannot ignore this remarkable exercise in democracy.

This should be kept in mind when analyzing the pressure by some elements in this country to force the people of El Salvador into a dialog with the FDR to reach a political solution. I am opposed to any negotiations of this nature. The FDR refused to participate in the last elections. Thus, negotiations would be in direct contradiction to the voice and spirit of the March 28 elections, and could give the FDR a role in the government which they have been unwilling to earn through the democratic process.

Those arguing for dialog still have not recognized nor accepted the FDR for what it is—or for what it represents. Neither by fact nor history have they won any popular internal support for their cause. The FDR has been able to survive partially due to the well-orchestrated propaganda machine available to them within the United States. The daily destruction of public and private property caused by the FDR clearly affects all Salvadorans' livelihood, their right to work, to move freely about their country, and to enjoy such basic necessities as medicine, education, and food. By ignoring the violations of human rights committed by the FDR, as well as other guerrilla groups, we provide justification for treason instead of helping develop the necessary democratic solution.

The unmistakable conclusion from the analysis of the March 28 results and the nature of the FDR is that our Government must support the existing legally and democratically elected representatives of the people of El Salvador. We must make it clear to our friends in that country that we reject the principles of the FDR as antidemocratic. We must insist that the FDR reject terrorism and seek acceptance through the democratic process. Only when these steps are taken will it be feasible to expect the Salvadorans to be able to participate in true negotiations for the conditional surrender of the FDR, providing guarantees of life and future participation in the society.

Mr. President, economically El Salvador cannot support itself. I am convinced that their record as the most productive country in the region with the least natural resources will be reaffirmed once peace is established. In the short term, though, they need our help. Aid to El Salvador in the past, though limited, has accomplished a great deal. Political pluralism, a legally elected government and widespread social awareness all have emerged to alleviate the anarchy and turmoil which plagued that country before the United States began providing assistance.

El Salvador is moving in the right direction and further progress depends on our ability to support it in stopping those who have declared themselves diametrically opposed to our values.

Mr. President, I urge the administration to act quickly on sending emergency military aid to our friends in El Salvador. This action is vital to the security of El Salvador, to the security of the United States and, indeed, to the entire hemisphere.●

THE NUCLEAR FREEZE

● Mr. TSONGAS. Mr. President, I commend to my colleagues a resolution issued by the American Physical Society, the main society of American physicists. Among the organization's members are some of the scientists who developed the first nuclear weapons, and many of those who now make such weapons in our national laboratories. The resolution was authored by five of this Nation's most distinguished scientists: Hans Bethe, Herbert York, Sidney Drell, Wolfgang Panofsky, and Marvin Goldberger.

This fall, millions of Americans voted for the nuclear freeze. The momentum of the freeze movement, and the seriousness of American concern for arms control, have made an impression on the prestigious professionals most involved in the technical aspects of our nuclear capability. These professionals have concluded that enough is enough, that efforts to bottle the nuclear genie need more of a sense of urgency. Their resolution calls upon the President and the Congress—together with their counterparts in the Soviet Union—to intensify efforts to reduce the risk of nuclear war by negotiating a verifiable arms control agreement; by inhibiting the further proliferation of nuclear weapons; by banning weapons testing, weapons in space, and tactical weap-

ons; and by ceasing to regard nuclear explosives as ordinary weapons of war.

Mr. President, I ask that the text of the resolution of the American Physical Society be printed in the RECORD.

There being no objection, the resolution was ordered to be printed in the RECORD, as follows:

STATEMENT OF THE AMERICAN PHYSICAL SOCIETY

Whereas nuclear war is an unprecedented threat to humanity;

Whereas the stockpile of nuclear weapons distributed around the globe contains the explosive power of more than one million Hiroshima bombs;

Whereas a general nuclear war would kill hundreds of millions of people;

Whereas the aftereffects of general nuclear war are certain to be catastrophic for the survivors and could destroy civilization;

Whereas any use of nuclear weapons, including use in so-called "limited wars," would bring with it substantial risk of escalation to general nuclear war;

Whereas thirty years of vigorous research and development have produced no serious prospect of effective defense against nuclear attack;

Whereas nuclear arsenals of the United States and the Soviet Union are more than adequate for deterrence;

Whereas the continuation of the nuclear arms race will not increase the security of either superpower;

Whereas the proliferation of nuclear weapons to additional countries, especially in areas of high tension, would substantially increase the risk of nuclear war;

Whereas there has been no progress for several years now toward achieving limitations and reductions in strategic arms, either through ratification of SALT II or the negotiations of a replacement for it;

Whereas negotiations intended to achieve a comprehensive nuclear test ban have been indefinitely adjourned; and

Whereas negotiations intended to prevent or inhibit the spread of nuclear warfare to outer space have been suspended;

Be it therefore resolved that The American Physical Society, through its elected Council, calls on the President and the Congress of the United States, and their counterparts in the Soviet Union and other countries which are similarly involved in these vital matters:

To intensify substantially, without preconditions and with a sense of urgency, efforts to achieve an equitable and verifiable agreement between the United States and the Soviet Union to limit Strategic Nuclear Arms and to reduce significantly the number of such weapons and delivery systems;

To conduct, in a similar spirit, negotiations to restrict the use and limit the deployment of battlefield and intermediate range nuclear weapons;

To resume negotiations to prevent the spread of nuclear weapons to outer space;

To take all practical measures to inhibit the further proliferation of nuclear weapons to additional countries;

To take all practical actions that would reduce the risk of nuclear war by accident or miscalculation;

To continue to observe all existing arms control agreements, as well as SALT II;

To avoid military doctrines and deployments that treat nuclear explosives as ordinary weapons of war; and

To initiate serious negotiations to ban the testing of nuclear weapons in all environments for all times as called for in the Nonproliferation Treaty.●

PROPOSED ARMS SALES

● Mr. PERCY. Mr. President, section 36(b) of the Arms Export Control Act requires that Congress receive advance notification of proposed arms sales under that act in excess of $50 million or, in the case of major defense equipment as defined in the act, those in excess of $14 million. Upon such notification, the Congress has 30 calendar days during which the sale may be prohibited by means of a concurrent resolution. The provision stipulates that, in the Senate, the notification of a proposed sale shall be sent to the chairman of the Foreign Relations Committee.

In keeping with my intention to see that such information is available to the full Senate, I ask to have printed in the RECORD the notifications which have been received.

The notifications follow:

DEFENSE SECURITY ASSISTANCE AGENCY,
Washington, D.C., March 1, 1983.

In reply refer to I-00099/83ct.

Hon. CHARLES H. PERCY,
Chairman, Committee on Foreign Relations, U.S. Senate, Washington, D.C.

DEAR MR. CHAIRMAN: Pursuant to the reporting requirements of Section 36(b) of the Arms Export Control Act, we are forwarding herewith Transmittal No. 83-20, concerning the Department of the Army's proposed Letter of Offer to Indonesia for defense articles and services estimated to cost $26 million. Shortly after this letter is delivered to your office, we plan to notify the news media.

Sincerely,

PHILIP C. GAST,
Director.

TRANSMITTAL No. 83-20

Notice of Proposed Issuance of Letter of Offer Pursuant to Section 36(b) of the Arms Export Control Act

(i) Prospective purchaser: Indonesia.

(ii) Total Estimated value:

	Millions
Major defense equipment [1]	$24
Other	2
Total	26

[1] As defined in Section 47(6) of the Arms Export Control Act.

(iii) Description of articles or services offered: One hundred fifty thousand 105mm cartridges without fuzes for howitzers.

(iv) Military department: Army (UCP).

(v) Sales commission, fee, etc., paid, offered, or agreed to be paid: None.

(vi) Sensitivity of technology contained in the defense articles or defense services proposed to be sold: None.

(vii) Section 28 report: Included in report for quarter ending December 31, 1982.

(viii) Date report delivered to Congress: March 1, 1983.

POLICY JUSTIFICATION

INDONESIA—105MM CARTRIDGES

The Government of Indonesia has requested the purchase of one hundred fifty thousand 105mm cartridges without fuzes for howitzers at an estimated cost of $26 million.

This sale will contribute to the foreign policy objectives of the United States by helping to improve the security of a friendly and strategically important country in East Asia.

These cartridges will be used with the howitzers puchased to upgrade Indonesian artillery forces as the primary field artillery of the Indonesian Army.

The sale of this equipment and support will not affect the basic military balance in the region.

The prime contractor will be the government-owned, contractor-operated Kansas Army Ammunition Plant of Parsons, Kansas.

Implementation of this sale will not require the assignment of any additional U.S. Government or contractor personnel to Indonesia.

There will be no adverse impact on U.S. defense readiness as a result of this sale.

DEFENSE SECURITY ASSISTANCE AGENCY,
Washington, D.C., March 1, 1983.

In reply refer to I-00300/83ct.

Hon. CHARLES H. PERCY,
Chairman, Committee on Foreign Relations, U.S. Senate, Washington, D.C.

DEAR MR. CHAIRMAN: Pursuant to the reporting requirements of Section 36(b) of the Arms Export Control Act, we are forwarding herewith Transmittal No. 83-21, concerning the Department of the Navy's proposed Letter of Offer to Saudi Arabia for defense articles and services estimated to cost $31 million. Shortly after this letter is delivered to your office, we plan to notify the news media.

Sincerely,

PHILIP C. GAST,
Director.

TRANSMITTAL No. 83-21

Notice of Proposed Issuance of Letter of Offer Pursuant to Section 36(b) of the Arms Export Control Act

(i) Prospective purchaser: Saudi Arabia.

(ii) Total estimated value:

	Millions
Major Defense Equipment [1]	$0
Other	31
Total	31

[1] As defined in Section 47(6) of the Arms Export Control Act.

(iii) Description of articles or services offered: This case provides for an amendment adding $31 million to an existing agreement valued at $49 million for a total of $80 million worth of follow-on technical support for the Royal Saudi Naval Forces.

(iv) Military department: Navy (RAI, amendment 1).

(v) Sales Commission, fee, etc., paid, offered, or agreed to be paid: None.

(vi) Sensitivity of technology contained in the defense articles or defense services proposed to be sold: None.

(vii) Section 28 report: Case not included in Section 28 report.

(viii) Date report delivered to Congress: March 1, 1983.

POLICY JUSTIFICATION

SAUDI ARABIA—FOLLOW-ON TECHNICAL SUPPORT

The Government of Saudi Arabia has requested an amendment adding $31 million to an existing agreement valued at $49 million worth of follow-on technical support for the Royal Saudi Naval Forces (RSNF).

This sale is consistent with the stated U.S. policy of assisting friendly nations to provide for their own defense by allowing the transfer of reasonable amounts of defense articles and services. It will demonstrate the continued willingness of the United States to support the Saudi Arabian effort to improve the security of the country through modernization of its naval forces. In a regional context, enhancement of the defensive capabilities of Saudi Arabia will also contribute to overall Middle East security and stability.

The United States is assisting Saudi Arabia in enlarging and improving its naval force through the Saudi Naval Expansion Program (SNEP). This program began in 1972 and is scheduled to be completed in the mid 1980's. The SNEP includes the purchase of 29 ships and craft plus the supporting shore facilities, equipment, logistical support, and training. This sale will provide for the follow-on technical support essential to effective operations of the RSNF.

This sale of follow-on technical support will not introduce a new military capability into the region nor will it affect the basic military balance in the region.

The follow-on technical support will be provided by the U.S. Navy. There will be no prime contractor.

Implementation of this sale will not require the assignment of any additional U.S. Government or contractor personnel to Saudi Arabia.

There will be no adverse impact on U.S. defense readiness as a result of this sale.●

PRELIMINARY NOTIFICATION, PROPOSED ARMS SALES

● Mr. PERCY. Mr. President, section 36(b) of the Arms Export Control Act requires that Congress receive advance notification of proposed arms sales under that act in excess of $50 million or, in the case of major defense equipment as defined in the act, those in excess of $14 million. Upon receipt of such notification, the Congress has 30 calendar days during which the sale may be prohibited by means of a concurrent resolution. The provision stipulates that, in the Senate, the notification of proposed sales shall be sent to the chairman of the Foreign Relations Committee.

Pursuant to an informal understanding, the Department of Defense has agreed to provide the committee with a preliminary notification 20 days before transmittal of the official notification. The official notification will be printed in the RECORD in accordance with previous practice.

I wish to inform Members of the Senate that such a notification was received on March 1, 1983.

Interested Senators may inquire as to the details of this preliminary notification at the offices of the Committee on Foreign Relations, room SD-427.

The notification follows:

DEFENSE SECURITY ASSISTANCE AGENCY,
Washington, D.C., March 1, 1983.

In reply refer to: I-00415/83ct

Dr. HANS BINNENDIJK,
Professional Staff Member, Committee on Foreign Relations, U.S. Senate, Washington, D.C.

DR. BINNENDIJK: By letter dated 18 February 1976, the Director, Defense Security Assistance Agency, indicated that you would be advised of possible transmittals to Congress of information as required by Section 36(b) of the Arms Export Control Act. At the instruction of the Department of State, I wish to provide the following advance notification.

The Department of State is considering an offer to a Middle Eastern country tentatively estimated to cost in excess of $50 million.

Sincerely,

PHILIP C. GAST,
Director.●

HIGH-TECH—NO PANACEA

● Mr HUDDLESTON. Mr. President, during recent months we have been inundated with stories about the value of high technology to the U.S. economy. This economic revolution is claimed by some to be the salvation of our depressed economy and a certain cure for our excessive unemployment. As a result of this high-tech hype and the dazzling success stories from Silicon Valley, we have become partially blinded to the underlying economic realities we face.

High technology is vitally important to our national economy and we should aggressively promote its development, but it is not a panacea for the serious economic ills of America. In our scramble to assist these new industries, we must not lose sight of the value and necessity of our basic industries. These so-called "smokestack" industries—steel, automobiles, heavy manufacturing, and coal—have been the foundation of our economic strength and must continue to be for years to come.

The limitations of the new high-tech industries were clearly revealed in two recent articles in the Washington Post which dealt with the announcement, by Atari, to fire one-quarter—1,700—of its U.S. work force in order to shift production to Hong Kong and Taiwan.

One of the articles pointed out that this production shift:

follows the pattern of consumer electronics items such as watches and television

And went on to state that:

The announcement of the move and the large layoff is bound to raise questions about projections that jobs lost in the foundries and auto plants can be replaced easily by jobs in high technology industries and that high-tech industries can perserve the U.S. position in international trade.

Mr. President, I believe that our national economic policy must be a balanced one which recognizes the value and importance of basic industries as well as high-technology industries. Without such a balanced policy, I fear that we will tend to disregard the needs and concerns of the basic industries. As we all know, many of these industries currently are fighting to say alive and will require our long-term support and assistance. I, for one, am not ready to relinquish these industries to our foreign competition, especially at a time when we have almost 14 million Americans out of work.

I ask that both of the aforementioned Washington Post articles be printed in the RECORD.

The articles follow:

[From the Washington Post, Wednesday, Feb. 23, 1983]

ATARI TO FIRE 1,700, SHIFT PLANTS TO ASIA

(By Martha M. Hamilton)

Atari Inc., the video game and home computer manufacturer that has sometimes been used to symbolize America's employment future in high-technology jobs, said yesterday it will fire nearly a quarter of its U.S. work force in a shift of Atari's manufacturing operations overseas.

Atari said that 1,700 workers in California will lose their jobs as a result of the company's decision to shift production from Sunnyvale, Calif., to Hong Kong and Taiwan. The layoffs will be phased in from now to June or July with 600 workers out of a job yesterday.

The production move comes only weeks after Atari's parent, Warner Communications, reported lower-than-expected earnings for 1982 for its consumer electronics division.

Analysts said the production shift, which follows the pattern of consumer electronics items such as watches and television, results from economic pressures in the highly competitive home computer and video games industries. Atari said yesterday it is designed "to reduce escalating manufacturing costs"—such as labor, the value of the dollar and regulatory costs.

The announcement of the move and the large layoff is bound to raise questions about projections that jobs lost in the foundries and auto plants can be replaced easily by jobs in high technology industries and that high-tech industries can preserve the U.S. position in international trade.

"It clearly indicated that the high-tech firms are also moving abroad and that they are no guarantee for absorbing the nation's jobless," said Rudy Oswald, director of research for the AFL-CIO.

The value of high technology in America's future has been espoused by a group that has been dubbed the "Atari Democrats," who advocate shifting resources away from declining industries, such as steel and automobile manufacturing, into the high technology and service industries where growth is expected to occur.

President Reagan, too, echoed some of those sentiments in his State of the Union speech, earning for himself the label "Atari Republican"—a label likely to be revised as a result of yesterday's announcement.

Atari has said that financial consideration dictate that some of its production be moved abroad. "Our computer production costs will go down dramatically in 1983," John Cavalier, president of Atari's Home Computer division, is quoted in Electronic News, a trade publication.

Atari already manufactures some video games in Taiwan and in Limerick, Ireland.

Interviewed by that magazine at the Consumer Electronics Show, Cavalier noted that "there were no [Atari] computers manufactured offshore in 1982. There will be a significant percentage manufactured offshore in 1983." In fact, an Atari spokesman said yesterday, virtually all its home computers will be manufactured abroad.

[From the Washington Post, Sunday, Feb. 27, 1983]

FRAGILE FRONTIER

ATARI'S DEPARTURE ILLUSTRATES FLAWS IN HIGH-TECH JOB SOLUTION

(By Martha M. Hamilton)

Politically, Atari symbolized the notion that high-technology employment could replace jobs lost in the United States in basic industries—that gleaming factories in the Silicon Valley of California could absorb workers from the devastated industrial "rust bowl."

"Atari Democrats" was the label hung on Democrats who advocated more emphasis on developing jobs and international trade through high-technology industries. And when President Reagan touted the role of high-technology in America's future in his State of the Union address, he earned the label "Atari Republican."

As a result, the announcement last week by home-computer and video-game manufacturer Atari, a division of Warner Communications Inc., that it was firing a quarter of its U.S. workforce and shifting production overseas seemed an ironic blow to the notion that high-tech jobs might be waiting for laid-off automobile and steel workers.

But some economists and "Atari Democrats" disputed that conclusion and suggested that what happened to Atari reveals how misleading a simple, catchy phrase can be in a debate over a subject as complex as the nature of America's industrial future.

For one thing, but the time Atari decided to depart these shores and leave 1,700 workers behind, its video games and home computers were no longer high technology. So rapid is the evolution in consumer electronics that yesterday's "gee whiz" can be transformed quickly into today's "ho hum."

"What you see happening here is the industry is changing," said Max Donner, a research associate at the Harvard business school and a consultant to the American Electronics Association. "Some fields which have been clearly high technology have been shifting into mass market standard technology. * * * The technology of a typical $500 personal computer is, in the spectrum of time, no more sophisticated than an electronic watch or a hand-held calculator in 1975."

When such a change occurs manufacturing becomes "more cost driven than technologically driven," he noted. Manufacturers of virtually every consumer-electronics item, as well as manufacturers of textiles and a host of other items, have looked to overseas manufacturing as a way to reduce costs.

"As far as moving a labor-intensive manufacturing facility to the Far East, Atari is really a johnny-come-lately," said Harry Sello, head of a firm that specializes in establishing overseas operations, joint ventures and marketing plans for U.S. firms.

The manufacture of integrated circuits, which helped create today's electronics products, began moving to Taiwan, South Korea and Singapore about 15 years ago. Approximately 90 to 95 percent of the semiconductor industry's assembly work is done overseas, according to industry officials.

"That ended up creating a lot more jobs in the high-tech area in the U.S. because it expanded the markets for those products," Sello said. "It's been a striking growth. It kept the U.S. companies competitive and allowed them to grow."

The basic argument of those who see no reason for gloom in the Atari news is that it makes sense to allow industries that require low-level skills and in which labor costs play a major role to shift overseas. When U.S. firms move production abroad, they are able to keep their market share, which in turn allows more investment in research and development and permits American industry to keep moving toward industrial frontiers, according to advocates of such a view.

According to Donner, the Atari move is actually promising. "It's very encouraging that people are catching on to it as early as they are here, as opposed to with color television and electronic watches," he said. "By the time the color-television industry moved to a global manufacturing strategy with Zenith and RCA looking at manufacturing abroad, 85 percent of the other U.S. manufacturers had already gone out of business, and there weren't any jobs at all."

"We're seeing the creation of all sorts of companies that didn't exist 10 years ago and are now on the New York Stock Exchange," said Rep. Tim Wirth (D-Colo.), one of the most prominent of the so-called Atari Democrats.

The label "contains a couple of ramifications that are very unfortunate and very wrong," said Wirth, who said that the term suggests a narrow focus on electronics and implies such Democrats are writing off basic industries. Not true, said Wirth.

As jobs disappear, as they did last week in Sunnyvale, Calif., when Atari announced its move, other jobs are created. "There are kinds of other things going on in the economy which are very exciting and very challenging," he said. That "argues very strongly for continuing the development of the new frontiers of industry in this country. We do not live in a static economy," Wirth said.

Even so, assuming that jobs will continue to be produced at the shifting frontiers of high technology, there is the question of whether they will be produced in sufficient numbers and whether the workers looking for jobs will mesh with those available.

Electronics manufacturing is moving abroad, a shift created not just by lower labor costs but also because the relative strength of the dollar makes it cheaper to produce overseas, AFL-CIO research director Rudy Oswald noted. Other high-technology fields, such as bioengineering, employ relatively few, scientifically-trained workers.

"The number of high-technology jobs will be very small," Oswald said. "It certainly won't take care of 12 million unemployed, or even the 1.5 million annual net growth in the labor force in the next five years," he said.

"I think the fact that Atari is moving so many jobs overseas is good evidence of the reality that the choice is not between high-tech and smokestack industries," said Harvard economist Robert B. Reich. A prominent economic adviser to Democratic candidates, Reich said the move indicates that "the lowest skill ends in every industry are going to move abroad."

As a result, for competitive survival, he said, the United States must train its workers for what Reich calls "the highest value-added segments in all industries."

Eventually all the low-skilled, routine jobs in every industry will be shifted overseas, Reich said. "But in every industry some highly skilled jobs entailing precision engineering, or maintenance of sophisticated machines or custom design and fabrication" will remain, he said. "We need to move into those niches because those will be the industries of the future," he said. "Potentially there is a lot of employment."

Some low-skill workers will still find some jobs, Reich and others said. Donner said that estimates are that every high-technology job creates 3.4 to eight jobs in support industries. "They are in unglamorous things, such as custodial jobs, clerical work in accounting firms, legal services, trade and banking-related work," he said.

Jobs in such service industries, which already employ a large percentage of the workforce, will never be lost because they must be close to the customer, Reich noted. A McDonald's in Taiwan is no good to customers in Takoma Park. "Unfortunately, there is not a lot of future in those jobs in terms of advancement, job security and just real income," he said.

Many assembly-line workers and others in routine manufacturing jobs can be successfully trained for jobs that require a higher level of skills, he said.

Companies themselves will do the training required for the more skilled jobs, according to Reich. At least they will if they use the savings realized from moving manufacturing abroad to create a different kind of industry in the United States.

"The issue is not moving abroad," he said. "The central issue is whether they move into higher value-added industries."

Even if moves, such as Atari's, bode well for the future, they are painful for the displaced workers. "It is conspicuous by occurring at a time when the emphasis on jobs and unemployment is high," noted Sello.

"In the not-too-far-distand future, it [Atari's move] will create more jobs than have been eliminated in the U.S. by allowing Atari to regain its lost share of the video-game market," he said. But, he added, European and Japanese firms are moving their manufacturing to the same low-cost area. In the intense competition for the market, Atari's eventual success is far from assured.

"The critical question is not answered," Reich said. That question is, in effect, what happens next? "The same question could have been asked in 1940 or 1910 or 1890. Industrial movement is movement constantly to higher value-added production," he said. "Miraculously, if you do move in that direction, markets open up."

But he added, "The problem has been in the last 10 years that we haven't moved."●

THE VOCABULARY OF ARMS CONTROL: PART II

● Mr. PRESSLER. Mr. President, in the RECORD of February 22, 1983, I entered a brief glossary of arms control terms which are in common use but are, unfortunately, a source of common confusion. This is an unproductive situation, given the desire by the public to join in the extremely important discussion of strategic issues.

Mr. President, today, I am providing a further elaboration of strategic and arms control terms and concepts. By providing this vocabulary, I hope that we can reduce the current situation

where specialists speak not only passed each other but also passed the American public. This glossary will be updated and expanded from time to time.

GLOSSARY OF ARMS CONTROL TERMS

Aerospace Defense—All measures to intercept and destroy or otherwise neutralize hostile aircraft, missile and space vehicles in the atmosphere and beyond.

Airborne Warning and Control System (AWACS)—A system of airborne aircraft equipped with radar to detect and track enemy aircraft, and with data processing and communications capability to direct friendly fire at targets thus acquired.

Air Breathing—Using a power plant requiring the intake of air for combustion of its fuel, and therefore limited to operation within the Earth's atmosphere, as distinguished from rocket-propelled. Specifically said of bombers and cruise missiles, or jointly as the "air breathing" leg of the U.S. nuclear delivery system triad.

Air Defense—All measures, active and passive, taken to reduce or nullify the threat and effectiveness of an enemy air attack; targets may include missiles operating in the Earth's atmosphere.

Air Launched Ballistic Missile (ALBM)—A ballistic missile transported aloft by a carrier aircraft and launched from that aircraft in flight. A concept previously considered for MX deployment.

Air-Launched Cruise Missile (ALCM)—A cruise missile designed to be launched from an aircraft.

Anti-Ballistic Missile (ABM)—A defensive missile used to intercept and destroy or otherwise neutralize an attacking ballistic missile in the upper reaches of the atmosphere and beyond (endoatmosphere and exoatmosphere).

Antisubmarine Warfare—The conduct of air and naval operations related to the tracking and destruction of hostile submarines, or otherwise designed to limit the activities and neutralize the threat of enemy submarines; embraces both tactical and strategic operations.

Area Defense—Measures to protect a given geographical area from the threat of enemy attack, as distinguished from point defense. Specifically, area defenses established by anti-ballistic missile systems would offer protection to population centers, as opposed to weapon sites, usually by engaging attacking missiles in mid-course or earlier.

Area Target—A target covering a significant geographical area, such as a populated region or large military base.

Assured Destruction—(1) The capability of a nation's strategic nuclear forces to inflict damage at levels unacceptable to any aggressor(s), and of a reliability undiminished by a surprise attack executed against these forces; (2) conversely, the recognition by one nuclear power that, by using its strategic forces against another, it invites a response which credibly threatens unacceptable damage to itself.

Ballistic Missile—(1) a missile launched and sustained in flight by non-aerodynamic forces and following a natural trajectory after termination of propulsive force determined only by gravity and drag in the atmosphere; (2) specifically, an unmanned strategic nuclear delivery vehicle, including rocket boosters and one or more reentry vehicles, launched from land, sea or air.

Ballistic Missile Early Warning System—(BMEWS)—An electronic surveillance network of three stations designed to detect attacks by ballistic missiles and to alert authorities, as well as to communicate tracking information.

Bomber—An airplane specifically designed to carry and drop bombs or air-launched missiles, classified by U.S. ACDA by type in reference to combat operating range at design gross weight and bombload as follows:

Short-range: less than 3500 miles maximum.

Medium-range: 3500-6000 miles maximum.

Long-range: over 6000 miles maximum.

Circular Error Probably (CEP)—A measure of the accuracy of a strategic offensive deliver system, specifically the average distance by which a warhead may be expected to miss its aim point. Better understood as "circle of equal probability," CEP is the radius of a circle centered around an aim point, within which a given warhead has a 50% chance of falling.

Cooperative Measures—Measures taken by one side in order to enhance the other side's ability to verify compliance with the provisions of the agreement. Such measures can be voluntary or negotiated.

Countervalue—The employment of strategic air or missile forces to attack selected enemy population centers, industries, and resources and institutions which constitute the social fabric of the society.

Dense Pack Basing—A concept for reducing the vulnerability of land-based ballistic missiles by maximizing fraticide efforts of nuclear detonations (see vocabulary of February 22, 1983). This concept holds that by deploying missiles in close proximity to each other, the first detonation of an attacking nuclear weapon would destroy or disable other attacking nuclear warheads.

Early-Warning Radar—Defense system of radar installations situated for early detection and notification of the launch or approach of unknown weapons or carriers.

Electronic Jamming—The deliberate radiation, reradiation, or reflection of electromagnetic energy with the object of impairing the use of electronic devices, equipment, or systems (radar, surface-to-air missiles, interceptor aircraft) being used by an enemy.

Electron Magnetic Pulse (EMP)—A product of a nuclear explosion which has disabling effects upon electronic systems. EMP creates the need for appropriate hardening of any weapon system whose effectiveness might otherwise be nullified in the electronic environment of nuclear effects (e.g., bombers, warheads).

Enhanced Radiation—The effects of and the technology employed in that class of controlled-effects nuclear weapons designed to intensify nuclear radiation in the target area by attenuation blast and heat.

First Strike—Generally, the first offensive move of a war. Specifically, the launching of a coordinated strategic nuclear attack before the opponent has used any strategic weapons himself.

Although a first strike is not necessarily a disarming attack, in common usage, "first strike capability" implies the ability to sufficiently disarm an opponent so that retaliation is either foreclosed or limited to tolerable levels.

Fission Weapon—Nuclear warhead whose material is uranium or plutonium which is brought to a critical mass under pressure from a fuze detonation to create an explosion that produces blast, thermal radiation, and nuclear radiation. Yield per pound of fissionable material is equivalent to 8,000 lbs. TNT. Commonly known as atomic bomb.

Flexible Response—Refers to the strategic doctrine enunciating a military capability to respond to enemy aggression across the entire conflict spectrum. Specifically refers to a U.S. strategic doctrine of deterrence originating in the early 1960's and expressed in the current NATO strategy MC 14/3, supporting a credible U.S. capability to employ conventional and nuclear weapons in a response short of massive retaliation.

Fractionation—The division of the payload of a missile into several warheads. The use of a MIRV payload is an example of fractionation. The term "fractionation limits" is used to describe the Treaty limitations on the maximum number of reentry vehicles per missile.

Fusion Weapon—Nuclear warhead whose material is deuterium and tritium which is brought to a critical mass under heat from a primary fission reaction (thermonuclear) to create an explosion that produces blast, thermal radiation, and nuclear radiation. Yield per pound of fusion material is equivalent to 26,000 lbs. TNT. Commonly known as hydrogen bomb.

Global Ballistic Missile Defense-1 (GBMD-1)—A concept for the space-based deployment of a non-nuclear ABM defense. This proposal calls for the use of off-the-shelf technology to deploy a network of space-based missile interceptors which would attack Soviet ICBMs in their boost (initial) phase off light (also see: High Frontier).

Global Ballistic Missile Defense-2 (GBMD-2)—A follow-on to GBMD-1. This system would use more advanced technologies, perhaps including laser weapons, to attack ICBM warheads in their coast phase (the middle flight phase between boost and reentry) (also see: High Frontier).

Ground-Launched Cruise Missile—A cruise missile launched from ground installations or vehicles.

Hardening—Protection of a target, such as a weapon site or communications center, with concrete, earth, and other measures so as to withstand the effects of a nuclear attack. ICBM silos are examples of targets hardened to the greatest overpressure.

Hard-Site ICMB—One that is in a fixed site (silo) hardened for protection against the effects of a nuclear attack.

Hard Target—Any weapon site, command and control facility, production center, blast shelter or other strategic target which has been hardened for protection against the effects of nuclear attack.

Hard Target Kill Potential—Destructive capability of a nuclear weapon or force measured specifically in relation to hard targets. Such potential varies inversely with the overpressure of different targets.

Heavy Bomber—The term used in SALT II to describe those aircraft included in the aggregate limitations of the agreement. Heavy bombers consist of four categories of airplanes:

(a) current types are the B-52 and B-1 for the U.S. and the TU-95 (Bear) and Myasishchev (Vison) for the Soviets;

(b) future types of bombers which can carry out the mission of a heavy bomber in a manner similar or superior to that of the bombers listed above;

(c) types of bombers equipped for cruise missiles capable of a range in excess of 600 kilometers; and

(d) types of bombers equipped for ALBMs.

High Frontier—A new concept for ballistic missile defense using space-based weapon to be associated with plans for the utilization

of space for science and commerce (also see, Global Ballistic Missile Defense 1 and 2).

Intercontinental Ballistic Missile (ICBM)—Land-based, rocket-propelled vehicle capable of delivering a warhead through space to a target at ranges in excess of about 3,000 nautical miles.

ICBMs constitute one leg in the U.S. "triad" of present strategic nuclear delivery systems.

Launcher—A facility, mechanism, naval vessel, airborne carrier or other transporter designed to serve as the platform from which a strategic missile (or, in one case, bombs) may be ejected and/or propelled into a trajectory toward its target.

Because SALT II proposes to verifiably limit the number of deployed strategic delivery systems through attention to the numbers of launchers, they are of central concern: specifically, SLBM launching tubes in missile submarines, ICBM launching sites, ALCM carriers, and long-range bombers.

Launch-on-Warning—The triggering of retaliatory strikes upon notification that an enemy missile attack has been launched, but before any attacking warheads have reached their targets, avoiding the risk of pre-launch attrition to friendly strike forces.

Launch Weight—The weight of the fully loaded missile itself at the time of launch. This would include the aggregate weight of all booster stages, the post-boost vehicle (PBV), and the payload.

Light ICBM—Class of U.S. and Soviet ICBMs of lesser size and throw-weight than heavy ICBMs; specifically, U.S. Minuteman missiles and Soviet SS-11, 13, and 17 missiles. The inclusion of the Soviet SS-19 in this class has been a matter of contention (see heavy ICBM).

Look-Down/Shoot-Down—Airborne surveillance and tracking radar capability unique in its filtering process, which allows overhead airborne early warning and control aircraft to distinguish low-flying aircraft from the "ground clutter" of surface activity, combined with the communications and data-processing capabilities to direct the neutralization of such aircraft.

MX—Missile Experimental. Any weapons system which has the designation X is in its development stage. Once deployed, the X designation is replaced either by a number or a name, or it is simply removed. The MX missile currently under development by the Reagan Administration will be renamed the "Peacekeeper" missile, according to President Reagan.

Mobile ICBM Launcher—Equipment which launches an ICBM and which can move or be moved from one location to another. Mobile ICBM launchers could include ICBM launchers on wheeled vehicles, launchers on vehicles which travel on rails, and launchers which are moved among launch-points which might themselves be "hard" or "soft."

Mobile Missile—A ballistic missile which can be transported, either freely or within defined constraints, so as to vary points of launching, and counter enemy targeting of strategic offensive weapons. Specifically, any land-based ICBM or IRBM which is not deployed in a fixed site (silo). A variety of mobility modes have been considered, including the use underground trenches and alternate-site shelters. The Soviet SS-20 missile is currently operational in a mobile mode.

Modernization—The process of modifying a weapon system such that its characteristics or components are altered in order to improve the performance capabilities for that weapon system.

Multiple Aim Points (MPS)—A basing concept proposed by the Carter Administration for the MX missile. This deployment plan has also been called the "shell game" basing concept for it would involve the construction of more silos than missiles and would involve deceptive relocation of missiles from time to time.

Nuclear Proliferation—Refers to the expansion of nuclear capabilities. In most instances, the reference is to the spread of nuclear weapons to nations that at present lack nuclear capabilities. Such proliferation is also referred to as horizontal proliferation. Occasional reference is made to vertical proliferation, the growth of nuclear arsenals of the nuclear weapons states.

Nuclear Weapon—A bomb, missile warhead, or other deliverable ordnance item (as opposed to an experimental device) that explodes as a result of energy released from a fusion or fission reaction, or both.

Older Heavy Ballistic Missile Launcher—A heavy ballistic missile launcher for an ICBM of a type deployed before 1964.

The Soviet SS-7 and 8 have been included in this class. The U.S. Titan II is the only older heavy ballistic missile of current significance to SALT II.

Overkill—Destructive capabilities in excess of those which logically should be adequate to destroy specified targets and/or attain specific objectives.

Overpressure—The measure, expressed in pounds per square inch (psi), of the pressure created by nuclear blasts and, conversely, of a target's ability to withstand such blasts. Accordingly, it is a measure of the force demanded of a nuclear weapon in order to disable a given target, usually referring to a hard target.

Parity—A condition of equality between opposing strategic forces, made difficult to measure because of its qualitative, as well as quantitative, nature.

As a force structure standard, parity demands that capabilities of specific forces and weapon systems be approximately equal in effectiveness to enemy counterparts.

Passive Defense—Those measures intended to protect against the dangers of enemy attack which achieve their effectiveness not by acting on the attacking forces, but by securing or removing friendly forces or assets. In the case of a nuclear attack, passive defenses permit the ability to absorb an attack, through hardening and sheltering against the effects of a nuclear explosion.

Point Defense—Defensive measures designed and organized to defend a point target, such as a naval vessel or a fixed-site ICBM (as opposed to an area target).

Point defenses, including ABM, deployed in that role, characteristically engage a hostile target in the terminal stage of its approach.

Preventive War—War initiated in order to forestall an opponent's acquisition of military preponderance.

Rapid Reload—The ability of a missile launcher to reload and launch multiple missiles so as to conduct multiple strikes as part of the same attack.

Reaction Time—The amount of time permitted a defending or retaliatory force between the initiation of hostile action and the required response.

Research, Development, Test and Evaluation (RDT&E)—The full cycle of technical procedures and management decisions which creates a program for the acquisition of a new weapon (or other) system and brings that system up to the point of initial deployment.

Saturation Attack—The use of weapons in large numbers to overload enemy defenses and/or to blanket areas that contain known or suspected targets.

Sea-Launched Cruise Missile (SLCM)—A cruise missile launched from a submerged or surface ship.

Second-Strike—A retaliatory attack in response to a first strike. Also refers to the strategic doctrine which rejects pre-emptive or preventive attacks on a potential aggressor.

A second-strike capability of high confidence is the primary basis for U.S. and Soviet nuclear deterrence.

Silo—Hardened, underground facility for a fixed-site ballistic missile and its crew, designed to provide pre-launch protection and to serve as a launching platform. High-yield, precision nuclear weapons are required to destroy a silo construction.

Soft Target—Any target not protected against the blast, heat, and radiation produced by nuclear explosion. Generally refers to unprotected populated areas.

Strategic Defense—All measures, active and passive, taken to reduce the threat of strategic attack and to protect national and friendly assets from the hazards of general war. Included are ABM defenses, interceptor aircraft, warning systems and civil defense.

Strategic Missile—A missile system designed to deliver a nuclear warhead against strategic targets on enemy territory, whether launched from air, land, or sea.

Soviet strategic missiles are designated SS- or SS-N-; U.S. counterparts are Titan, Minuteman, Polaris, Poseidon, and Trident to come. Until the deployment of the U.S. ALCM, all strategic missiles will continue to be ballistic.

Strategic Offense—Forces and measures existing to mount a nuclear attack against enemy strategic targets, designed to destroy the enemy's war-making capacity.

Strategic Targets—Military or civilian targets, such as manufacturing centers, raw material sources, power systems, communication and transportation facilities, weapon stockpiles and strategic forces, whose destruction undermines the enemy's capacity and will to make war.

Submarine-Launched Ballistic Missile (SLBM)—A ballistic missile carried in and launched from a submarine, which affords mobility and concealment for a missile force.

SLBM's constitute one "leg" in the current U.S. triad of nuclear delivery systems. Current models are Polaris and Poseidon, with Trident in development. Soviet counterparts are SS-N-4, 5, 6, and 8, with SS-NX-17 and 18 still officially in development. Treaty definition should be consulted.

Tactical—Brought to bear at the level of localized battle areas in order to influence the course of hostilities by engaging enemy forces. General purpose forces are tactical in nature.

Throw-Weight—A measure of a ballistic missile's capacity to project a payload into a trajectory toward a target. Specifically, the maximum useful weight which has been flight tested on the boost stages of a given missile. Useful weight includes reentry vehicles, penetration aids, dispensing and release mechanisms, reentry shrouds, covers, and propulsion devices, along with their propellants.

Warhead—In a nuclear weapon system, such as a bomb or missile RV, that compo-

nent which houses the fuze and the explosive element to be delivered on target. A nuclear weapon, in its narrowest sense.

Weapon System—A distinct military weapon taken to include all integrated parts and all components essential for operational use of the weapon and successful direction of a payload to its target. In the case of a strategic weapon, the warhead(s), targeting and guidance systems, delivery vehicle and launch platform all comprise the system.●

(At the request of Mr. BYRD the following statement was ordered to be printed in the RECORD:)

THE STATE OF BLACK AMERICA

● Mr. GLENN. Mr. President, on January 19, 1983, the National Urban League released its eighth annual report entitled "The State of Black America, 1983." The report, a comprehensive assessment of the status of the Nation's largest minority, consists of eight major papers prepared by noted black scholars. These papers reveal many troubling statistics about life in black America. Some of the major findings were set forth in an article which appeared in the Washington Post. I ask that this article, "Blacks Worse Off Than A Year Ago * * *" be printed in the RECORD at the conclusion of my remarks.

Mr. John E. Jacob, president of the National Urban League, introduced the report at Howard University on behalf of the 72-year-old, nonprofit community service organization and its 118 affiliates. One of the principal concerns that Mr. Jacob expressed in his introductory remarks was that blacks should not be left out of the "inevitable restructuring" of the economy. I ask that Mr. Jacob's thoughtful remarks appear in the RECORD immediately following my remarks.

Mr. Jacob's concern is very real. Many jobs lost from our older industries will never return. As Mr. Jacob points out, blacks are concentrated in our older and more vulnerable industries and too often are the last hired and the first fired.

Thus, as we begin to prepare our Nation for the age of technology that has been thrust upon us, we must insure that blacks and minorities are not left out. It is imperative that they are trained for productive jobs and have the opportunity to acquire and develop new skills for the jobs of the future.

Mr. President, all Americans must share equally in the opportunity to learn and acquire these new skills so that everyone can fully compete for today's jobs, as well as for the jobs of tomorrow.

The articles follow:

REMARKS BY JOHN E. JACOB, PRESIDENT, NATIONAL URBAN LEAGUE, INC.

Today, the National Urban League releases its annual report on the State of Black America.

At the press conference releasing last year's report, I pointed out that we have been publishing this comprehensive analysis of the condition of black Americans since 1976. And I went on to say the following:

"Never in that time has the State of Black America been more vulnerable. Never in that time have black people so strongly felt themselves under siege. Never in that time have black economic and civil rights gains been under such powerful attack. Never in that time have so many black people been so alienated from their government."

That terrible situtation intensified over the past twelve months. The state of black Americans has become more desperate. The ranks of the black poor sharply increased. About half a million more adult blacks are jobless. Our unemployment rate is now 25 percent higher than it was at this time last year. Millions of poor people have been forced off the welfare rolls, off the food stamp rolls, off nutrition, school lunch and health programs.

Vital survival programs were slashed at the same time that the black economy was plunged even deeper into Depression. The result was to drive already disadvantaged people to the wall.

A year that started with savage cuts in poor people's programs ended with a riot in Miami. I do not want to imply a causal connection. But we must draw the obvious conclusion that intolerable living conditions, lack of opportunity, and perceived hostility breed an explosive anger that could erupt anywhere, anytime.

It is simply not true that we are all in the same boat—that the troubled national economy hurts everybody. Just about every measurement you care to choose—and there are a busload of statistics in this State of Black America report—show black people suffering disproportionately.

What's more, white Americans know that when the economy recovers their conditions will improve. But black people have no such assurances. We've always had double the white unemployment rate and triple the white poverty rate. We've never fully participated in post-recession recoveries. We are concentrated in the most vulnerable industries today, those that will never again employ as many people as in the past. Last hired, we are the first fired and the Administration's anti-affirmative action policies ensure we will be last rehired.

So a major question facing the nation in 1983 is whether the inevitable restructuring of the American economy will include black people. Will we get a fair share of the jobs, the education and the training opportunities, or will we be denied them as in the past and present? Will current economic and social policies change for the better, or will we contunue to be victimized by them?

Our nation's economic and social policies are like the runaway Soviet Cosmos satellite—fragmented, out of control, and dangerous.

Those policies were firmly rejected by the voters in 1982. But I see few signs that the Administration or the new Congress understand the rejection of those policies by the voters or the dangers those policies carry for this nation.

Instead, we still hear rumors of more cuts in already decimated programs that help people survive. There is still hand-wringing over the deficit without action to ring it into line by restoring tax cuts for the affluent and cancelling the Pentagon's blank check. And there is still the incredible belief that by passing a token job training program and a highway repair program that might create only 300,000 jobs we have done what is necessary to cut the unemployment rate.

Our elected representatives have to understand that the misery that stalks our land cannot be tolerated; the growing chasm between rich and poor, white and black, employed and unemployed, suburbs and cities, is a split that drains our society of vitality and hope.

Americans can't look at those unemployment figures, and say "that's tough." We can't look at the soup lines and say, "too bad." We can't look at the kids hanging out on street corners with no education, no jobs, and no future, and say, "it's their problem."

It is not their problem. It is our problem—and all of us must come together to help solve it.

That is why I am calling on Congress to launch a bipartisan program of national economic recovery, with special attention to the needs not only of the so-called New Poor, but also of the disadvantaged who have traditionally suffered discrimination and poverty.

I call on our elected representatives to declare a State of National Economic Emergency and to implement our call for a Universal Employment and Training system.

Such a system would guarantee jobs and training for all. It would combine public works, improved public services, partnership with the private sector, and a creative industrial policy.

These are extraordinary times. They demand extraordinary measures.

[From the Washington Post, Jan. 20, 1983]

BLACKS WORSE OFF THAN A YEAR AGO, URBAN LEAGUE STUDY FINDS

(By Spencer Rich)

Black Americans are worse off than they were a year ago and bearing "a disproportionate share of the hardships" from high unemployment and domestic spending cuts, the National Urban League said yesterday in its annual survey of the state of black America.

"Black America ended 1982 in worse shape than in 1981," said the report. "Two statistics are enough to tell the story. Black unemployment was 15.5 percent at the end of 1981. Black unemployment was 20 percent at the end of 1982."

The league called for a large new public-private jobs and training program aimed among other things at rebuilding "the decaying infrastructure of the nation." It also called for a halt to cuts in the food stamp, school lunch and other programs for the poor, plus more vigilant affirmative action and other civil rights enforcement.

Urban League President John E. Jacob, in an introduction, said 1982 "was not a good year, and of course, no year is, to be black and poor in America." The report placed much of the blame on the Reagan administration. Jacob also said the problems of blacks were not confined to the poor.

He deplored "what has happened to the black middle class, which is as it is in all societies, a bastion of strength and a source of motivation within black America." Only 30 percent of black U.S. families can be called middle class, compared with 56 percent of whites, and their position is "precarious," Jacob said, with few reserves to overcome "the bad years that are now upon them."

About one in three blacks lived below the official government proverty line, compared with one in 10 whites, the report said.

Some other major findings of the survey.

Blacks, now totaling 26.5 million, are to some extend migrating back to the South and also to the West, and there has been

some movement out of cities to suburbs, but they still cluster heavily in cities. This is especially true of the black poor.

The 30 percent of black families that were middle class or well-to-do in 1980 (defined as having an annual income over $20,000) were up from the comparable 27 percent in 1970 but down from the 32 percent in 1979.

About 42 percent of black hosueholds were female-headed in 1980, up from 30 percent in 1970. About 44 percent of black children under 18 lived in such families, double the 1970 figure.

Black unemployment was 20 percent in October 1982, and among teen-agers, 50 percent. Personal income was falling and living standards were declining, though largely among the 40 percent of families with the lowest incomes. Blacks generally earned about $59 for every $100 that whites earned from jobs.

Blacks got 17.5 percent of their total income in 1980 from transfer payments, such as welfare, up from 12.6 percent a decade earlier.

In March, 1981, only a third of black women 15 and over were married and living with husbands. Another third were never married, and the rest were separated, divorced or widowed. Half of female-headed households were poor, a slight improvement over 1969, and black women were the poorest of the major race-sex groups in society. But black women were moving significantly out of private household employment.

Blacks in 1977 owned 231,203 of the nation's 14.7 million businesses, mostly small businesses and sole proprietorships, and had $8 billion (2 percent) of the $4 trillion gross receipts received by all businesses.

Life expectancy for blacks in 1979 was 68.3 years to 74.4 years for whites; high unemployment and poverty tended to create depression and low self-esteem, resulting in high rates of alcoholism, drug abuse, suicide, mental illness, child-abuse and wife-abuse and crime. Five times as many black youths die from homicide per 100,000 population (42) as whites (8), and 46 percent of all people in prisons are blacks.

Blacks are 12 percent of total population, but make up 33 percent of the Army, and within the Army have a high proportion of combat roles, where they learn few skills marketable in civilian life.

In 1940 there were 45,000 black undergraduates in colleges, only 10 percent of them in non-black colleges.

By 1980, there were 926,700 and seventenths were in non-black colleges, but recent cuts in educational aid made further growth difficult, especially in private colleges.●

(At the request of Mr. BYRD the following statement was ordered to be printed in the RECORD:)

SALUTE TO COURT AIDES

● Mr. GLENN. Mr. President, with much enthusiasm, I congratulate two fellow Ohioans, Doris A. Dennison and Walter J. Kramer, who have devoted much of their lives to improving the legal system in my State. At a time when the value of devoted public service is too often ignored, it is refreshing to report that the Portage County Bar Association will acknowledge its appreciation on March 23, 1983, by presenting these two fine people with certificates of merit for outstanding service. Mrs. Dennison and Mr. Kramer have demonstrated unfailing patience and courtesy, devotion to duty and attentive service to both the public and to members of the Bench and Bar Association in Portage County.

Mrs. Dennison, presently the assignment commissioner for the Portage County Common Pleas Court, was selected for the position in 1972. She previously worked for 5 years as the Jury Commissioner and receptionist for the Court of Common Pleas and as 2 years as secretary to the 11th District Member of Congress from Ohio. Mrs. Dennison has also been active in local charity work, educational activities, Little League Baseball, and political campaigns. She and her husband, Robert, have three childre and are the proud grandparents of a grandson.

Mr. Kramer, currently administrator for the Portage County Juvenile Court, was chosen for his position in 1967 by the late Honorable Sam Summers. Mr. Kramer first joined the juvenile court as a probation officer in 1951 and then became chief probation officer in 1960. Prior to his work in juvenile court, Mr. Kramer served as a Kent City patrolman for 5 years and as a member of the U.S. Air Force for 4 years. He has long been active in the Fraternal Order of Police, the Kent Masonic Lodge, the Northeastern Ohio Youth Commission and the Ohio Court and Correctional Association. His community work has included area youth sports organizations, the Cub Scouts, the Kiwanis Club and others. He and Muriel, his wife of 44 years, reside in Kent, Ohio.

Again, I congratulate Mrs. Dennison and Mr. Kramer for their long and faithful service to the public interest. Their contributions have done much to improve the quality of life in Portage County.●

(At the request of Mr. BYRD the following statement was ordered to be printed in the RECORD:)

HIGH TECHNOLOGY IN AMERICA

● Mr. HART. Mr. President, I am pleased to join Senator TSONGAS and Senator STENNIS in introducing the High Technology Morrill Act. My hope is that this bill will do for high technology what the original Morrill Act of 1862 did for American agriculture—namely, make it the most highly productive and most globally competitive industry in the world.

America's economic strength has been built on being out front on the leading sectors of the time. We must act swiftly and boldly to insure that America retains its current position as the world's technological and service leader.

Like the original Morrill Act, this bill fuses the interests of industry, the education community and Government (both State and Federal) into a forward-looking national initiative—this time devoted to sharpening the competitive edge of America's knowledge-based industries which are facing a serious global challenge.

Specifically, the bill encourages partnerships nationwide between State government and industry to provide matching grants for higher education. The funds would be used primarily to upgrade curricula in science, engineering, and technology-related fields. The role of the Federal Government is limited to providing national direction and shared funding of the program.

In short, this is a bottom up approach—specific projects would be initiated by local industry in cooperation with education and State economic development agencies. Such joint project initiation by a corporation and campus appears to me the wisest and most effective way to proceed—it insures that programs respond to legitimate technological needs, it makes wise use of educational resources, and it satisfies economic development priorities.

Mr. President, this is truly a bill for America's future that is firmly ground in today's realities and challenges. The decentralized thrust of the bill and its incentives for partnership initiatives by industry, education and State governments should make it appealing to Members on both sides of the aisle.

My hope is that we in this body can put into place this year a legislative platform as creative and farsighted as Senator Morrill's platform over a century ago.●

ORDER OF PROCEDURE

Mr. STEVENS. Mr. President, following the disposition of the resolution of ratification regarding the International Expositions Treaty, I ask unanimous consent that the Senate stay in executive session to consider the nomination of Margaret M. Heckler, to be Secretary of Health and Human Services.

Further, I ask unanimous consent that there be no more than 10 minutes, equally divided, on the nomination, to be divided between the chairman of the Finance Committee and the ranking minority member or their designees.

The PRESIDING OFFICER. Without objection, it is so ordered.

CONCLUSION OF MORNING BUSINESS

The PRESIDING OFFICER. Is there further morning business? If not, morning business is closed.

EXECUTIVE SESSION—AMENDMENT TO THE 1972 PROTOCOL TO THE 1928 CONVENTION CONCERNING INTERNATIONAL EXPOSITIONS

The PRESIDING OFFICER. Under the previous order, the hour of 12 noon having arrived, the Senate will now go into executive session to consider the Amendment to the 1972 Protocol to the 1928 Convention Concerning International Expositions (Treaty Calendar No. 3).

Time for debate on the resolution of ratification shall be limited to 20 minutes, to be equally divided between and controlled by the chairman of the Foreign Relations Committee and the ranking minority member, or their designees, with the proviso that no understandings, reservations, conditions, declarations, and statements to the resolution be in order.

Mr. STEVENS. Mr. President, has a rollcall vote been ordered on this mattter?

The PRESIDING OFFICER. A rollcall vote has not been ordered.

Mr. STEVENS. Mr. President, I ask for the yeas and nays on the treaty.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. STEVENS. Is the treaty now before the Senate?

The PRESIDING OFFICER. The treaty is before the Senate now.

Mr. STEVENS. I suggest the absence of a quorum, and I ask unanimous consent that the time be charged equally to both sides.

The PRESIDING OFFICER. Without objection, it is so ordered.

The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. STEVENS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection it is so ordered.

SHIPPING ACT OF 1983

Mr. STEVENS. Mr. President, as in legislative session, I ask unanimous consent that in the engrossment of S. 47, the enrolling clerk make the following change on page 85, between lines 17 and 18: At the beginning of my Amendment No. 468 to Senator THURMOND'S Amendment No. 467, the word "No" should be inserted prior to the words "Common carrier by water * * *."

Mr. BYRD. Mr. President, reserving the right to object—and I will not object—it is my understanding that nobody on this side objects, so I have no objection.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. STEVENS. I thank the distinguished Democratic leader. That is a technical error that occurred in the presentation. I appreciate his consideration.

HEALTH FAIR PROGRAM

Mr. STEVENS. Mr. President, as in legislative session, I send to the desk, on behalf of Senator THURMOND, Mr. LAXALT, and myself, a resolution, and I ask for its immediate consideration.

The PRESIDING OFFICER. Is it the intention of the acting majority leader that the time be charged against the time on the treaty?

Mr. STEVENS. Yes.

The PRESIDING OFFICER. The resolution will be stated by title.

The assistant legislative clerk read as follows:

A resolution (S. Res. 79) to commend the value of the health fair program.

The PRESIDING OFFICER. Is there objection to the present consideration of the resolution?

There being no objection, the Senate proceeded to consider the resolution.

Mr. THURMOND. Mr. President, I am today cosponsoring a sense of the Senate resolution in support of the health fair program.

This year, I once again have the distinct privilege of having Senators LAXALT and STEVENS join me as sponsors for the Annual Senate Health Fair, which began yesterday and ends tomorrow, March 4. This is a major free service to all our Senate employees and is made possible through an all-volunteer effort. Both this health fair and the one which occurs simultaneously on the House side will serve as the annual national kickoff event for health fairs that will be held nationwide during the month of April.

In addition to the three cosponsors on the Senate side, there are three cosponsors on the House side: Speaker THOMAS "TIP" O'NEILL, Congressman ALBERT GORE, and Congressman CHARLES RANGEL.

Health fairs represent a prime example of private sector initiatives because they provide valuable services to the community without any financial assistance from the Government. For example, last year's national health fairs involved over 100,000 volunteers who provided over three-quarter million volunteer hours to deliver health screening services to the public. These services were valued in excess of $100 million, and the associated health education and health promotion services were worth at least twice that amount. All of this was done as a cooperative effort of the corporate, media, and volunteer communities with little Government involvement and no Government money. The 1982 health fairs were made available to approximately 65 percent of the American people, and the 1983 program has been expanded to potentially reach 85 percent of our Nation's population.

Mr. President, these impressive accomplishments could not have been made without the assistance of many important organizations. In order to recognize particular contributions of these groups, and to officially kick off the 1983 national health fair program, a ceremoney will take place on Friday morning, March 4, in the caucus room of the Russell Senate Office Building. During this event, particular members of the corporate sector, media, volunteer community, and government will be recognized for the outstanding contributions they have made in promoting this worthwhile service. The representatives receiving awards will be: Mr. G. Elsy, president of the American Red Cross, for the volunteer community; Mr. Alan Neuharth, CEO and vice president of the Gannett Corp., for the media; Mr. Kenneth Derr, president of Chevron, USA, for the corporate sector; and Gen. John W. Vessey, Chairman of the Joint Chiefs of Staff, for the Government.

Dr. Timothy Johnson, editor of the Harvard Medical Newsletter and medical reporter on ABC's "Good Morning America," will emcee the ceremony, and the keynote address will be delivered by acting Secretary of Health and Human Services Thomas R. Donnelly, Jr.

Mr. President I should also like to pay tribute to Dr. John Brensike, a visionary individual who founded the National Health Screening Council for Volunteer Organizations (NHSCVO), a private nonprofit organization which assists communities in planning and implementing health fairs. I commend Dr. Brensike and the NHSCVO staff for the pioneer spirit and dedication which enabled them to institute health fairs and to insure their success over the years.

Mr. President, health, fairs serve to increase public awareness of the importance of health education, and these services often help detect situations in which preventive medical action is appropriate. While screening of this type is not intended to be a substitute for a complete physical examination by a personal physician, these tests can assist in educating individuals about potential health problems. For this reason, I believe that it is altogether fitting that the Senate give special recognition to the invaluable service that health fairs render to the public.

The resolution was agreed to.

The preamble was agreed to.

The resolution, with its preamble, reads as follows:

S. RES. 79

Whereas the Health Fairs sponsored by the National Health Screening Council for Volunteer Organizations will provide hundreds of millions of dollars of health education and screening to citizens without charge throughout the United States;

Whereas major representatives of the corporate sector, community organizations, and the media have joined in sponsoring such fairs;

Whereas over 100,000 American citizens will donate their time in such fairs to help serve their fellow Americans;

Whereas many agencies of the executive branch of the Federal Government and many State and local government have contributed in-kind resources to this effort;

Whereas the entire Health Fair Program receives no government tax dollars and yet is the largest health education and health promotion program in the United States;

Whereas the Health Fair Program is an outstanding example of effective and efficient cooperative use of existing resources to provide needed community services; and

Whereas Members of Congress and employees of the legislative branch have the opportunity to participate in a Health Fair on March 2, and March 4, 1983, which inaugurates the Health Fair Program for the coming year: Now, therefore be it

Resolved, That the United States Senate commends those involved in the Health Fair Program, from the individual volunteer to the largest corporation, encourages others to become involved or expand their involvement in this program and similar programs, supports efforts to help maximize the availability of these valuable Health Fair services to all citizens, and urges persons throughout the nation to take advantage of the health education and screening services offered through the Health Fair program.

Mr. STEVENS. Mr. President, I move to reconsider the vote by which the resolution was agreed to.

Mr. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

ORDER FOR CERTAIN ACTION DURING ADJOURNMENT OF THE SENATE

Mr. STEVENS. Mr. President, as in legislative session, I ask unanimous consent that the RECORD remain open today until 3 p.m. for the introduction of bills, resolutions, and the submission of statements.

I also ask unanimous consent that committees may have until 3 p.m. today to file reports.

I ask unanimous consent that committees may file reports tomorrow between 10 a.m. and 3 p.m.

The PRESIDING OFFICER. Without objection, it is so ordered.

PROGRAM

Mr. STEVENS. Mr. President, it is the intention of the joint leadership to ask for a rollcall vote on the pending treaty.

Following that, we will have a brief period for debate, if anyone seeks to debate the Heckler nomination.

Following the vote on the Heckler nomination, it would be the intention of the leadership to adjourn.

Has that order been entered?

The PRESIDING OFFICER. There is an order to adjourn.

Mr. STEVENS. What is the time for convening on Monday?

The PRESIDING OFFICER. 10:30 a.m.

Mr. STEVENS. Is there an order to proceed at that time to the Montreal Protocols?

The PRESIDING OFFICER. The Senator is correct.

Mr. STEVENS. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. STEVENS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT TO THE 1972 PROTOCOL TO THE 1928 CONVENTION CONCERNING INTERNATIONAL EXPOSITIONS

The PRESIDING OFFICER. The hour of 12 noon having arrived, the Senate will consider Executive Calendar No. 3, Amendment to the 1972 Protocol to the 1928 Convention Concerning International Expositions.

The clerk will state the resolution of ratification.

Executive Calendar Item No. 3, Amendment to the 1972 Protocol to the 1928 Convention Concerning International Expositions.

Resolved (two-thirds of the Senators present concurring therein), That the Senate advise and consent to the ratification of an Amendment to the Protocol of November 30, 1972 (TIAS 9948) to the Convention of Novmeber 22, 1928, Concerning International Expositions (TIAS 6548, 6549).

The Senate proceeded to consider the resolution of ratification.

Mr. PERCY. Mr. President, this resolution gives the Senate's advice and consent to the ratification of the Amendment to the 1972 Protocol to the 1928 Convention Concerning International Expositions—the first treaty to be acted upon by the Senate in the 98th Congress. The purpose of this amendment is to permit the United States and Spain to commemorate the discovery of the Americas in a two-site exposition in Chicago and Seville in 1992, and France to commemorate the French revolution in 1989.

Under the protocol, 10 years must elapse between universal expositions occuring in different countries, or 7 years in exceptional circumstances. The amendment will permit the American/Spanish expositions and the French exposition to be held only 3 years apart. The amendment is an acknowledgement that historic events do not necessarily occur in the intervals established for commemorative expositions by the Bureau of International Expositions (BIE). The BIE is the international body that governs world's fairs.

In order for the amendment to enter into force, four-fifths of the BIE's General Assembly must approve it. To date, 14 of the General Assembly's 45-member nations have done so. The United States, Spain, and France are working cooperatively to secure ratification of the amendment by June 15, when the BIE meets formally to register the exposition dates.

I am pleased to note that in transmitting the amendment to the Senate, the President expressed his strong support for it. He stated:

I strongly support the holding of a universal exposition to commemorate the discovery of the Americas and have previously designated Chicago as the site in the United States for that purpose. I recommend that the Senate give prompt consideration to the amendment and advice and consent to its acceptance.

Expeditious action by the Senate is, indeed, necessary so that the United States may exercise a leadership role in urging other nations to accept the amendment.

Mr. President, Chicago has previously hosted two major world expositions: The 1893 Columbian Exposition, where George Washington Gale Ferris introduced his famous wheel, and the 1933-34 Century of Progress. Both of Chicago's earlier fairs were cultural and diplomatic successes. Both were profitable.

Chicago fair organizers project that the 1992 exposition, titled the Age of Discovery, will create 100,000 jobs, draw approximately 60 million visitors, and leave Chicago with a new 500 acre lake front park and $3 billion in civic improvements. BIE officials characterized the Chicago effort as, "a textbook exercise that will set the standards for all nations that follow."

The unprecedented two-site exposition in Chicago and Seville is an innovative means to link the United States and Seville, the city from which Columbus set sail for the New World. This proposal was originally raised in meetings I had in Spain in November of last year with U.S. Ambassador Terrance Todman and Spanish fair organizers, including Enrique Perez-Hernandez, the Vice Chairman of the Spanish National Committee for the Celebration of the Fifth Centenniary of the Discovery of the Americas. In working with Spain on the proposal for the dual expositions, we offered cooperation, not confrontation. We agreed on a proposal that is in the interest of both nations. The world is big enough for two fairs.

Mr. President, on February 22, I chaired a Foreign Relations Committee hearing on this matter, and received testimony in support of the resolution from my good friend Tom Ayers, the chairman of the Chicago World's Fair 1992 Corp., William

Morris, Assistant Commerce Secretary for Trade Development, and Jayne Plank, Director, Office of Intergovernmental Affairs, Bureau of Public Affairs, Department of State. Following the hearing, the Foreign Relations Committee, by voice vote, favorably reported the amendment to the Senate for its advice and consent. I urge my colleagues to adopt this resolution.

Mr. President, I ask unanimous consent that the testimony before the Foreign Relations Committee of Tom Ayers, who has worked diligently and exercised great leadership on behalf of the Chicago World's Fair, be printed at this point in the RECORD.

There being no objection, the testimony was ordered to be printed in the RECORD, as follows:

STATEMENT OF THOMAS G. AYERS

My name is Thomas G. Ayers. I am chairman and president of the Chicago World's Fair 1982 Corporation. Immediately prior to assuming this responsibility, I was Chairman and chief executive officer of Commonwealth Edison Company, the electric utility serving Chicago and northern Illinois. I am pleased to be given the opportunity today to encourage your support of the pending Treaty Document 98-1, Amendment to the 1972 Protocol to the 1928 Convention Concerning International Expositions.

This amendment, which will permit large, universal category expositions to be held less than seven years apart in exceptional cases, is the culmination of more than two and one-half years of planning and hard work by the 1992 Corporation to win both domestic and international approval for a universal class world's fair in Chicago.

Chicago '92 would be the first universal exposition in the Western Hemisphere since Expo '67 in Montreal—a lapse of 25 years. The last universal category fair in the world was in Osaka, Japan, in 1970. And, it will be almost 60 years since the American Midwest has had an opportunity to experience the tremendous cultural and educational benefits of a world's fair . . . not since Chicago's own "A Century of Progress" in 1933 and 1934.

The 1992 Corporation researched and submitted its application for Chicago '92 in August, 1981, to the U.S. Department of Commerce. The Commerce Department finished its review of Chicago's plans in November, 1981, and formally represented Chicago at the December meetings of the General Assembly of the Bureau of International Expositions in Paris. I should note that the B.I.E. already had been apprised of Chicago's intention to bid for a 1992 exposition as early as June, 1980.

In turn, the B.I.E. sent its Pre-Inquiry Team to visit Chicago in May of last year. Based on the team's recommendations, the B.I.E. voted on June 24 to grant Chicago a "provisional date reservation." On November 11, President Reagan officially designated Chicago as the country's choice to host a world's fair in 1992, and directed the Departments of Commerce and State to seek "date registration" for Chicago from the B.I.E. At its December meeting, the B.I.E. gave "final date reservation" to Chicago and to Seville, Spain, to host one universal category fair in 1992, to be split between the two sites.

An Amendment to the Protocol is needed at this time, because Paris, France, also was given a "final date reservation" for a universal category fair in 1989, to celebrate the bicentennial of the French Revolution, only three years prior to the Chicago-Seville exposition. Approval of these expositions was made at the December, 1982 meeting of the full B.I.E. General Assembly, without a single dissent.

In giving date reservations to the two expositions, the member countries effectively recognized the overriding international significance of both the bicentennial of the French Revolution and the Columbian quincentennial, and that historic events may not always fit into the time restrictions imposed by the existing B.I.E. Convention.

Nevertheless, it is imperative that the United States formally approve the Amendment as soon as possible, so that our country can then take the lead in urging those B.I.E. members who have not yet ratified the Amendment to do so. Prompt action, which would result in B.I.E. "date registration" this June, is important, if the 1992 Corporation is to stay on schedule and within budget in its planning for Chicago 1992.

Let me spend a few minutes to explain why the United States should be permitted to host the world in 1992, and some of the benefits accruing to us if we do.

To be called the "Age of Discovery," the Chicago 1992 exposition would celebrate six centuries of human invention and innovation—the 500 years since the discovery of the Americas by Christopher Columbus, and the century to come. Although the United States has hosted special category fairs, such as last year's Knoxville exposition and the planned New Orleans fair in 1984, these are only one-fifth to one-tenth the size and scope of the universal category exposition which we are planning.

At the center of America's heartland, Chicago is within one day's drive of one-quarter of the U.S. population. Based on our initial marketing studies, Americans will account for approximately 88 percent of thee 55-65 million visitors expected to attend Chicago 1992. In addition to the great manufacturing and industrial centers which lie within the Midwest, the region also is an enormously bountiful agricultural network.

Clearly, then, a fair in Chicago would allow this important Midwestern audience a unique opportunity to gain first-hand knowledge not only of how mankind's great discoveries have been achieved in the past, but also those which may be made during the next century in this country and around the world. It is hoped that one of the enduring consequences of this knowledge will be to inspire greater understanding and goodwill toward all nations. This is especially critical if the global challenges, such as poverty, malnutrition, education, and cultural development are to be met effectively in the century to come.

In this regard, Chicago 1992 hopes to attract exhibits from more than 75 foreign countries. International pavilions are to be constructed adjacent to three of the city's existing, world-renowned cultural institutions (the Shedd Aquarium, the Adler Planetarium and the Field Museum of Natural History), which are located on the site.

Chicago's experience with two previous world-class fairs—the only American city with these credentials—has given us an enormous boost to our fair planning. The 1992 fair marks the 100th anniversary of Chicago's first successful universal class fair—the 1893 "World's Columbian Exposition." Our second fair—"A Century of Progress" exposition—was held in 1933 and 1934 to mark the 100th anniversary of the city's beginnings. Both these fairs were not only enormous cultural successes, but they were financially sound despite the difficult economic times under which they were held, namely the monetary Panic of 1893 and the Great Depression.

These fairs demonstrate, then, Chicago's proven ability to host an exposition of truly global significance—to construct a site of unparalled natural and architectural beauty, to attract a large audience of both exhibitors and visitors, and to maintain financial integrity, despite uncertainties in the economy.

The Chicago '92 exposition is being organized by the not-for-profit Chicago World's Fair—1992 Corporation, a coalition of more than 50 leaders from the Chicago metropolitan area who represent many of the country's most prominent financial institutions, businesses, labor groups, and cultural organizations, along with state and local governments, news media, and civic and ethnic groups.

Chicago '92 has strong backing throughout the Chicago area and the entire Midwest. We have received more than $900,000 in cash contributions from private sources and, perhaps even more importantly, approximately $3 million in donated services, during the planning and approval phase. No federal, state or city money has been contributed.

In addition, government on every level, including Chicago's mayor and legislative council, the governor and legislative assembly of Illinois, and the U.S. Congressional delegation from Illinois have endorsed the project. The governors and U.S. Congressional delegations from all the states contiguous to Illinois also have expressed their support for the exposition, as have scores of businesses, community groups, environmental organizations and labor unions.

Midwestern residents certainly are solidly behind Chicago '92. In a sophisticated public opinion survey, 88 percent of the respondents said they were in favor of the idea of a Chicago World's Fair, while even higher percentages of Hispanics and Blacks interviewed—90 and 92 percent, respectively—were enthusiastic about having an exposition in Chicago.

Total revenues from Chicago '92 are estimated at $750 million in 1982 dollars, and are projected to modestly offset expenses, which are estimated at $743 million. Working capital for the exposition is expected to be generated through the sale of bonds, with permanent financing to be arranged following receipt of B.I.E. "date registration."

Benefits from the exposition to the local and national economy have been estimated as follows (in 1981 dollars): Additional business receipts of $1.85 billion, increased wages of $475 million, almost 100,000 jobs; 20,000 construction jobs, 15,000 jobs during the operation of the exposition—and, many of these will be entry-level positions suitable for teenagers and young adults, and estimated 60,000 additional jobs in fair-related businesses, taxable personal income of nearly $619 million, and immediate tax revenues of about $288 million.

The Chicago '92 site itself also will provide the long-lasting residual benefit of a new park of some 500 acres, adjoining Chicago's existing majestic lakefront park system. This new fair parkland may become the

future home of new or expanded cultural institutions, joining the three great museums I mentioned earlier at the south end of one of the most impressive cultural centers in the United States.

These are only some of the direct economic impacts—many others, such as related new business development, residual tourism enhancement, and so forth—are impossible to measure, and yet must surely be counted among the significant benefits of Chicago '92.

In addition to these tangible benefits, a final word should be said about the world's fair experience itself. For millions of Americans who otherwise might never travel overseas, Chicago '92 truly will be a "once-in-a-lifetime" opportunity to view the full spectrum of mankind's knowledge and artistry, right here in their own backyard. Such an experience surely stimulates the minds and imaginations, and especially the aspirations, of all who attend for years to come—an important legacy to succeeding generations of Americans, whose future will depend more heavily on their ideas and ideals, as natural resources become increasingly limited. Chicago '92, then, will be more than a six-month exposition, it will be a global watershed for humanity's dreams as we enter the 21st century.

And, too, as plans for Chicago '92 are publicized around the globe, especially in light of the many cooperative efforts which will be undertaken with our sister site in Seville, the spotlight of the world will focus on the United States as the showcase for the finest examples of six centuries of mankind's achievements during our Columbian "Age of Discovery" celebration.

In closing, I thank you again for allowing me to testify here today, and urge you to promptly recommend ratification of the Protocol Amendment.

Mr. STEVENS. Mr. President, I yield back all the time that remains on this side.

Mr. BYRD. Mr. President, I yield back the time on my side.

The PRESIDING OFFICER. All time having been yielded back, the question is on agreeing to the resolution of ratification.

On this question, the yeas and nays have been ordered, and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from Tennessee (Mr. BAKER), the Senator from Arizona (Mr. GOLDWATER), the Senator from Kansas (Mrs. KASSEBAUM), the Senator from Maryland (Mr. MATHIAS), the Senator from Wyoming (Mr. WALLOP), the Senator from Connecticut (Mr. WEICKER), and the Senator from California (Mr. WILSON) are necessarily absent.

Mr. CRANSTON. I announce that the Senator from Texas (Mr. BENTSEN), the Senator from Arkansas (Mr. BUMPERS), the Senator from Ohio (Mr. GLENN), the Senator from Colorado (Mr. HART), the Senator from South Carolina (Mr. HOLLINGS), the Senator from Hawaii (Mr. INOUYE), the Senator from Louisiana (Mr. LONG), the Senator from New York (Mr. MOYNIHAN), and the Senator from West Virginia (Mr. RANDOLPH) are necessarily absent.

I further announce that, if present and voting, the Senator from West Virginia (Mr. RANDOLPH) would vote "yea."

The PRESIDING OFFICER. Are there any Senators in the Chamber wishing to vote or changing their vote.

The yeas and nays resulted—yeas 84, nays 0, as follows:

[Rollcall Vote No. 7 Ex.]

YEAS—84

Abdnor	Ford	Mitchell
Andrews	Garn	Murkowski
Armstrong	Gorton	Nickles
Baucus	Grassley	Nunn

Glenn	Long	Wilson
Goldwater	Mathias	
Hart	Moynihan	

The PRESIDING OFFICER. On this vote the yeas are 84, the nays are zero. Two-thirds of the Senators present and voting having voted in the affirmative, the resolution of ratification is agreed to.

Mr. STEVENS. Mr. President, I move to reconsider the vote by which the resolution of ratification was agreed to.

Mr. JACKSON. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

NOMINATION OF MARGARET M. HECKLER, OF MASSACHUSETTS, TO BE SECRETARY OF HEALTH AND HUMAN SERVICES

Mr. STEVENS. Mr. President, we will now turn to the nomination of Margaret M. Heckler, of Massachusetts, to be Secretary of Health and Human Services.

The PRESIDING OFFICER. The nomination will be stated.

The assistant legislative clerk read the nomination of Margaret M. Heckler, of Massachusetts, to be Secretary of Health and Human Services.

Mr. DOLE. Mr. President, on March 2, 1983, the Committee on Finance held an executive session on the nomination of Margaret M. Heckler to be Secretary of the Department of Health and Human Services. The committee unanimously reported this nomination.

As I am sure my colleagues are aware, Mrs. Heckler has served in the House of Representatives for over 16 years, and has proven herself to be a strong defender of the rights of our less fortunate citizens. We can be confident that Mrs. Heckler will earnestly represent the segment of our population served by the Department of Health and Human Services, within the constraints imposed by the current budget situation.

Mrs. Heckler has committed herself to keeping the lines of friendship, cooperation, and consultation open with the Congress, and has set forth two broad goals of particular interest. First, to have the Department focus more on long-range problems and long-range solutions. Our current experience with the crisis surrounding the financial solvency of the social security fund certainly argues for a long-range prospective, particularly with respect to the health financing programs.

Second, Mrs. Heckler has set for herself the goal of being a catalyst for caring in America, for the young, the elderly, the sick, the handicapped, and the needy. An important perspective for the administrator of an agency with responsibility for programs like AFDC, child support, medicaid, and disability.

Mr. President, I am pleased today to report the committee's recommendation of Mrs. Heckler, and ask that this nomination be confirmed.

Mr. KENNEDY. Mr. President, it is a privilege for me to support the nomination of my colleague from Massachusetts, Margaret Heckler, as Secretary of Health and Human Services.

Massachusetts takes well-deserved pride in our Commonwealth's long bipartisan tradition of public service to the Nation. Over the years, many distinguished men and women of our State have given unselfishly of themselves. By the sincerity of their commitment and the excellence of their achievement, they have made real and lasting contributions to the common good of our society, to the well-being of our citizens, and to the character of our country.

The Cabinet Department which Mrs. Heckler has been called to serve bears one of the highest public trusts, because it is the agency primarily concerned with the quality of life for all our people, not just the few who have wealth and privilege, but the many others who seek the enduring goals of economic progress and social justice

that have always been the hallmark of the American dream.

Mrs. Heckler and I served for 16 years together in the Congress. Although I have disagreed with her on a number of issues, I have always respected her ability. She will bring important strengths to her assignment as chief executive officer of the largest agency of the Federal Government.

She may have lost a congressional district last fall, but with her new responsibility she has gained a larger constituency—one that is now being asked to bear a heavy sacrifice in these hard economic times. Millions of Americans who depend so much on HHS will place their trust and hope in Mrs. Heckler—the elderly, the sick, the poor, the young, the handicapped, the disadvantaged, and all those who need our help the most.

More than any other Cabinet officer, Mrs. Heckler will be the guardian of the social safety net. I am confident that she will serve her new constituency with wisdom and understanding and meet her new responsibility with fairness and compassion—as her public trust, and ours, requires.

In sum, I believe that President Reagan has chosen a worthy successor to our colleague, Dick Schweiker. Margaret Heckler has been a credit to Massachusetts and to the Congress. I take pleasure in commending her to the Senate, and I urge her confirmation.

Mr. PACKWOOD. Mr. President, it had been my intention initially to vote for Peggy Heckler for Secretary of Health and Human Services. That would have been my intention until we had the confirmation hearing on her where four or five Senators on the Finance Committee quizzed her at some length about her views of overturning Supreme Court constitutional decisions by statute.

I ask unanimous consent that at the end of my remarks there appear pages 35 to 62 of the transcript of the Finance Committee hearings, where the questions and answers on this subject appeared.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 1.)

Mr. PACKWOOD. Mr. President, the reason that I am so bothered—and the transcript will show it rather clearly—is that Peggy Heckler feels strongly on the subject of abortion. I respect her views on it; she is very, very strong in support of her position on pro-life and is opposed to the right of a woman to have a choice on abortion. She is so strong in that position that there is every indication in her answers to the questions that she would do anything, including urging the President to take action to overturn the Supreme Court in the case of Roe against Wade. Roe against Wade is the decision that gives a woman the right to a choice on the subject of abortion under a constitutional right to privacy.

Try as we might, Senator BAUCUS, Senator MITCHELL, Senator MOYNIHAN, and myself, could not budge Mrs. Heckler from the position that she appeared to have, namely that it was perfectly all right to overturn the Supreme Court in that fashion. Because of her intensity of feeling on the subject of abortion, I am afraid she would encourage the President to support the kind of action which so many of us oppose so strongly.

We indicated to her that this was not a new topic; it had been debated extensively on the Senate floor. In questioning her we attempted to draw her into the subject of statutorily overturning a Supreme Court decision on some issue other than abortion. We talked about prayer. We mentioned the fact that in the midfifties, there were efforts to overturn the Supreme Court in some of its Subversive Activities Control Board decisions; in the sixties there had been efforts to overturn apportionment decisions by statute. We were neither quizzing her about a new topic, nor about one that has not been extensively debated over a long period of time in Congress.

Again and again, returned to the subject of the danger of overturning Supreme Court decisions involving constitutional law by statute. Each time she returned to her position that she felt so strongly about the subject of abortion that she would be willing to use a statute to reverse the Supreme Court.

I admire Peggy Heckler—I will work with her. I am delighted that the President has appointed a woman; I hope he appoints more women to different Cabinet positions. However, I feel bound to vote against her. I feel sad about it. I like her. I will continue to work with her. I hope she can do a good job in this position. I think she can. But I hope she will not encourage the President or anyone else to try to reverse the Supreme Court in constitutional decisions by the passage of a statute by a sheer majority vote in the House and in the Senate.

EXHIBIT 1

Mrs. HECKLER. No. I was not familiar with Mr. Svahn. I had heard his testimony as a member of Congress on social security issues earlier. I was—in the discussions about whether or not I would accept this post and about the availability of this Cabinet post, discussions did include the suggestion that there was an Under Secretary under consideration who had been well known by many at the White House and would be suggested and nominated at the same time that I would be.

I met him prior to my making a decision on this Cabinet post, and I feel he has a very fine reputation and I think the White House and the President, who are those who know him best, have strong confidence in him. And I expect to have a very good working relationship with him.

But I also intend to be the Secretary of this Department.

Senator PRYOR. Thank you. My time has expired.

The CHAIRMAN. I would just say, I guess when you're out of town you would have a telephone.

[Laughter.]

Mrs. HECKLER. Yes. But I would not like to suggest there is any unease. I would expect a good working relationship here and will strive for it.

The CHAIRMAN. Senator Packwood.

Senator PACKWOOD. Peggy, you and I have known each other a good many years, and you are indeed a fighter. And you indicated earlier, while you would be a loyal member of the Administration, you had no hesitancy to fight within the Administration for your views.

Let us presume that the present court decisions on the snitch regulations are upheld at the Supreme Court level, indicating that HHS cannot impose the regulations they attempted to impose unless the law were then changed by Congress. What would be your advice to the President as to whether or not the law should be changed at that stage?

Mrs. HECKLER. Well, it is a little hard to forecast future events, and certainly we do not know what the courts will decide. I would not prejudge court action. I think the Court in its process will examine all facets of this, and arguments can be raised in the court process that will have great color and weight.

The fact of the matter is the President himself feels strongly about this issue, and I have discussed the issue with him. He has taken the position that the Department supports, and if he chooses to continue to pursue that course through a legislative approach suggesting a change in law, then my role would be to support that. The issue has been closed, really.

Senator PACKWOOD. What will your advice to him be at that stage, however, when he decides whether or not to come and seek a change in the law?

Mrs. HECKLER. The President knows my views on the subject and I understand his. And I have respect for those who take the other side of this issue. I understand their concerns, the concerns of families.

Senator PACKWOOD. At the moment the President has not taken a position on whether the law should be changed. His position is that the law allows HHS to do what they have done.

Mrs. HECKLER. Right.

Senator PACKWOOD. What I want to know, what your advice to him will be if the court decisions that are presently pending are upheld.

Mrs. HECKLER. My advice will depend upon the circumstances as they exist at the time the issue arises.

Senator PACKWOOD. All right, let's go to another subject. And here I am interested in your personal opinions, because you are well aware from having seen different Cabinets operate that some people rise and some people fall within the Cabinet, and some Cabinet Secretaries are tremendously successful, some others not.

And a great deal of it relates to the diligence with which the Cabinet Secretary will pursue his or her views. You are a lawyer.

Mrs. HECKLER. Yes.

Senator PACKWOOD. What do you legally think about the attempt to reverse the Supreme Court decision on abortion by statute?

Mrs. HECKLER. I have always voted for the Hyde amendment. I am pro-life. I sincerely believe in that position.

Senator PACKWOOD. That is not what I mean. Those are not reversals. What do you think of the effort to take away jurisdiction from the courts to decide the issues like abortion by statute?

Mrs. HECKLER. I feel that the issue—the Hyde amendment has to be finalized into permanent law.

Senator PACKWOOD. That is not the Hyde amendment.

Mrs. HECKLER. I know that, but I am saying that should be the first course.

Senator PACKWOOD. I want to know what you think personally about the efforts to reverse the Supreme Court's decision on abortion by passing a statute that says, henceforth the Supreme Court may not hear cases involving abortion.

Mrs. HECKLER. I feel that obviously the issue is one that is of such great magnitude and seriousness that it is one that I would discuss with the President and indeed debate with him and indeed consider with him. And I have to say, Senator, that regardless of whatever view I might hold, I would certainly carry forth on his view and pursue the stand that he takes.

Senator PACKWOOD. Well, I would hope so. I would hate to think we are going to have a Cabinet full of Secretaries that are going to go off willy-nilly in their own direction. What I am curious about is your personal view.

Mrs. HECKLER. My personal view is not as significant as the President's view, Senator.

Senator PACKWOOD. What is your personal view?

Mrs. HECKLER. I simply have felt that we need to solidify the progress made, and I happen to consider it progress, in stopping federal funding on abortion. And I feel and have felt for some time that going beyond that would not be timely because the issue has not been resolved with any finalization.

And now in the House, with the new rules, the riders to appropriation bills banning the use of federal funds for abortion, which was the Hyde amendment, will no longer be in order. So the first step will have to be banning this.

But I am personally very, very opposed to abortion, and I feel ultimately that that is my strongest stand on the issue. I have not prejudged all future issues.

Senator PACKWOOD. Let me ask you this, Peggy. My time is up but I will come back to it. Do you intend to answer my question about your personal view, personal view as to whether we should try to overturn the Supreme Court decision by a statute which prohibits their taking jurisdiction, whether it be abortion or school prayer or any other particular decision that involves what they call a constitutional right?

Mrs. HECKLER. I would say, Senator, that my positions are formulated very, very decisively on the issues that really have come before me more as a Member of the Congress. I have not faced those issues finally and have never quite determined ultimately that the door was totally closed.

But given my strong feelings about the right to life, I cannot imagine myself coming down on the other side of the issue.

Senator PACKWOOD. What does that mean?

[Laughter.]

Mrs. HECKLER. It means that when faced with a major question on the issue, my own strong convictions on the right to life will I think dominate my own thinking. Now, that does not close the door to consideration of a specific statute or specific events or specific wording, and indeed the total composite of a legislative package or a constitutional proposal.

Senator PACKWOOD. Might I have one last question, Mr. Chairman?

The CHAIRMAN. Yes.

Senator PACKWOOD. Let me just ask your general philosophy on the attempt to prohibit the Supreme Court from having jurisdiction over any particular constitutional case by the act of passing a statute that says they may no longer hear cases involving that subject. Forget abortion, forget prayer. What is your judicial philosophy about that legal approach?

Mrs. HECKLER. I would doubt very much that it would be effective. I do not think you can reverse a constitional provision with a statute.

Senator PACKWOOD. No, I hope you cannot. I hope you are right.

Mrs. HECKLER. As a lawyer, that is my immediate response.

But let me just say, Senator, I am in great support of really those steps taken by government which will advance in my judgment the right values, and I think that the steps have to be legally correct. At the same time, I will say that as a lawyer I do not agree with the *Roe* v. *Wade* decision and I feel that really that in my judgment and my interpretation, that was a decision that created out of whole cloth a new theory. And I have not the greatest admiration for the decision.

So that I would review any issue that related to that subject with that attitude in mind.

Senator PACKWOOD. Well, I would like to quote to you there Robert Bork's testimony on this very issue. He thinks *Roe* v. *Wade* was awful. He was the Solicitor General. The President appointed him to the Court of Appeals. But I thought his reasoning on this subject was extraordinary, after he went through eight or nine pages and concluded that *Roe* v. *Wade* said, namely that there could be an unconstitutional decision that is unconstitutional.

But you cannot have unconstitutional decisions of the Court, because the Constitution is what the Court says it is. Bork then came down in opposition to trying to change the Constitution by statute, because he said you do not cure a deformation of the Constitution with a greater deformation of the Constitution, which would be a legislative reversal of a Supreme Court decision.

I would hope that would be your legal opinion.

Mrs. HECKLER. Well, we have, as I understand it, 300 lawyers to enlighten my legal thinking at the Department, and certainly a general counsel of enormous stature. I feel that these are complex and serious issues, and I have given a great deal of thought to these issues, and feel very strongly that I have to say, Senator—and you and I have disagreed on this issue many times before—I think that the law must be observed and the Constitution must be honored.

At the same time, I also have deep respect for the right to life in this society and would hope to err not in the law or in public policy strategy in terms of dealing with that. But I do have that very, very strong commitment to this concept, and I would expect to honor that in my role.

The CHAIRMAN. Thank you, Mr. Chairman.

Senator Mitchell.

Senator MITCHELL. Thank you, Mr. Chairman.

And Mrs. Heckler, I join the other members of the Committee in welcoming you here today, and look forward to what I am confident will be your prompt approval and confirmation of your nomination.

Senator Packwood has raised a question of very, very great relevance and I think gravity today. I am not going to ask any more questions because he has asked you about it, but I would just make this point.

I am concerned that your earlier answer to one of his questions comes dangerously close to saying that the end may justify the means, when you said that because of your strong commitment to the right to life position you could not imagine coming down on the other side.

I respect that positon. It is obviously a deeply held one. There are many people in this country who have very strong feelings like yours and in opposition to abortion. But the fact of the matter is that there is an effort under way to really dislodge the solid system which we have had for 200 years of three branches of government, and that it is not just abortion. As Senator Packwood has pointed out, there are efforts to deprive the Supreme Court of jurisdiction to achieve indirectly what cannot be achieved directly, either through legislation or through enactment of a constitutional amendment.

And this is a very dangerous thing, Mrs. Heckler. It goes beyond just the issue of abortion and strikes at the very roots of our system of government. And I would urge you to study this with some care and caution, and to reflect upon the views that Senator Packwood has expressed, again not on this particular issue of abortion, but on the issue of whether or not Congress can by a simple majority deprive the Supreme Court of jurisdiction in an area in which the Congress is displeased by the Court's decision.

That in my judgment and my personal opinion is plainly unconstitutional. More than that, if carried forward in the manner which some are attempting to carry it forward, it will subvert the form of government which has served us so well for a couple of centuries.

It is a very serious matter and I would strongly urge you to review it, and particularly to review your response which indicated that because of your deep feelings on this one issue you cannot imagine coming down on the other side. No end justifies any means.

Mrs. HECKLER. I would not suggest that I would accept that philosophy, because I do not believe that the end justifies the means in any case. And I will say that I will ponder the issue very, very deeply, both as a lawyer and as a public servant, and I will not allow my private feelings to stand in the way of what I consider to be my judgment.

And I also intend to honor the law, and should this Congress pass laws with which I do not agree, I am only too familiar from sitting on your side of the aisle that indeed, that the Congress has always been thwarted by the lack of adherence to its will or its purpose in passing a law. And now that I find myself on the other side, I intend to honor that purpose as much as possible.

But I also would say that I want there to be no mistake about where I stand in terms of a commitment on the issue.

Senator MITCHELL. There is no question about that and that was not the thrust of Senator Packwood's question. It was in the method being attempted to achieve a particular objective, abortion being but one example and others exist in legislation pend-

ing in the Congress today, so-called Court-stripping bills.

That is the issue. It is not one's feelings on the issue of abortion.

Mrs. HECKLER. I understand totally and I understand your points as well and certainly will ponder them.

The CHAIRMAN. Senator Baucus?

Senator BAUCUS. Thank you, Mr. Chairman. Mrs. Heckler, I want to join Senator Pryor and others who served with you in the House in our previous incarnation and say to you how much we enjoyed serving with you then and wish you the very best of luck. Because as Senator Mitchell said, obviously, you will have a very difficult time riding herd and controlling the reins over a very large and very difficult department.

And certainly, if Mrs. Burford at EPA is having some difficulty with that agency, that would indicate to me that anyone who is nominated to be Secretary of HSS is going to have probably potentially more problems over an agency that is that much larger.

I, too, was struck, as I think Senator Packwood was and Senator Mitchell, with the response to Senator Packwood concerning attempts of Congress by statute to overturn Supreme Court decisions. The response struck me, in my view—and I am only one senator, but in my view it is clear that Congress cannot, by statute, overturn Supreme Court decisions on federal constitutional issues.

That is to say, Congress could not, by statute, abolish the First Amendment. That would certainly be ruled unconstitutional I think by the Supreme Court. But even more important, it would entirely obliterate the separation of powers as a basis for our form of government. And if Congress by statute can obliterate the First Amendment, abolish the First Amendment, the Congress, by statute, is abolishing the Constitution.

Mrs. HECKLER. Exactly.

Senator BAUCUS. And if that is the case, it seems to me we no longer have a constitutional form of government, but it is a rule by majority only by the whims, the instant whims, of the instance majority, and no longer the form of government that we hold so dear to us.

So with that in mind, and with your answers agreeing with what I have said thus far, how can you possibly say that you will think about and discuss with the administration statutes that would overturn or bills that were introduced in Congress, attempts by statute to overturn Supreme Court decisions?

Mrs. HECKLER. Well, I think there is a great difference between abolishing the First Amendment and having the issues that are raised in every court, every issue that is brought to the courts——

Senator BAUCUS. You think there is a difference; that is, that there are some Supreme Court decisions interpreting the Constitution that Congress can overturn by statute, and there are some other Supreme Court decisions interpreting the Constitution that Congress cannot overturn? What is the difference?

Mrs. HECKLER. What I am saying is that I see the sacredness of the declaration of rights, but my instinct at the moment is to say that while I would agree with the general premise that a legislative enactment cannot repeal a constitutional provision that is added to the Constitution or has that force, then I would have to look at the legal intricacies. And frankly, Senator, I have not reviewed these in terms of prospective issues before the Department and before the Congress relating to such basic questions as you have raised. I would have to ponder this and review my constitutional history, and indeed, look at these questions.

I have always been asked whether I supported this or that constitutional amendment and that was a different proposition. I am not sure of the scope of the legislative proposal that might be forthcoming, and whether or not they would be violative of the Constitution, and I would want to be refreshed and informed.

Senator BAUCUS. I am sorry, my time is running quickly here. I raised the question because to restore, to increase American confidence in government, I think it is important for the American people to believe that their public officials are going to abide by the rule of law. And certainly, the Constitution is paramount.

So I would encourage you and the others in the administration to keep that more firmly in mind than I think has been the case in the past because it would help, I think, restore some needed confidence.

Turning to another matter, Senator Chafee mentioned the cost of Medicare. He very correctly raised that issue. No one has disputed that the trust fund will, as you said, be in balance by, what, 1986 to 1987. In fact, by 1983, it will be about $200 billion out of balance, and a couple of years later, 1995, it will be about $400 billions out of balance.

The problem, many say, is even worse than the problems we presently face with Social Security. What do you intend to do about that? What advice do you have or what mechanism are you putting in place so that we can address that problem? and earlier on rather than later.

Mrs. HECKLER. Well, I would say, Senator, that indeed, the administration does have some proposals which will deal with the problem and, of course, the recommendations of the Bipartisan Commission on Social Security offers some hope for the short run. Our prospective payment proposal should, hopefully, provide a more effective cost incentive program and will be a saving.

But I will say that there is also in place an Advisory Council on Social Security which is working on the Bowen Council appointed by Secretary Shweiker and is presently devoting its time to this and will respond to the Department, which we have made available to the Congress immediately in July. We are going to look for long-term answers, and we feel that the prospective payment approach is the first step.

Senator BAUCUS. I appreciate that, and my time is up. But in my humble opinion, the prospective payment approach is not going to solve very much of the problem at all. And the problem is much, much more difficult than that.

Mrs. HECKLER. I would agree with you, Senator. I do not say that this is the magical answer, but I think it is a necessary and important structural change that is a good beginning. But much more has to be done and we have to look at this because it is a very serious and colossal problem.

Senator BAUCUS. Thank you.

The CHAIRMAN. Senator Chafee?

Senator CHAFEE. Thank you, Mr. Chairman. Mrs. Heckler, I would remind you that the line of question which Senator Packwood and Senator Mitchell and Senator Baucus were pursuing here is not a hypothetical line. We have these issues before us and had them in the last session and had them in the session before and undoubtedly will have them this session; namely, overruling constitutional decisions by legislative fiat, which deeply disturbs many of us. So I do hope that you will be able to give that some attention and further thought.

Have you given any thought to developing some kind of a proposal to deal with the issue of health benefits for the unemployed? I know you are new on the job and it is a massive undertaking, but I would be interested in any thoughts you have on that.

Mrs. HECKLER. Senator, I am not in the job yet, but it is a massive undertaking and I have been attempting to learn as much as possible about the Department in the last month. And this has been a very, very time-consuming task and will be very absorbing for sometime to come.

I will say that I am genuinely sympathetic to the need to find an answer, but totally unprepared to suggest one today. I will look at it in depth.

Senator CHAFEE. Well, I thank you. I would urge you to do so, and have your brain trust have that high on their agenda because it is a matter that deeply concerns me and I am sure it deeply concerns you as well.

Mrs. HECKLER. It does, indeed.

Senator CHAFEE. Thank you. Thank you, Mr. Chairman.

The CHAIRMAN. Senator Moynihan?

Senator MOYNIHAN. Mr. Chairman, lest I not be heard on the subject, may I just join my colleagues in their comments with respect to the issue of court stripping. And I think I can put it into perspective for you. You were not part of this debate which went on all last autumn here in the Senate.

The proposition, which some of us felt to be deeply unconstitutional; others felt, at very least, subversive of the American constitutional arrangements, was before the Congress and before the Senate. And there was a majority in favor of that matter, which would truly alarm many of us. And we had to go through "extended debate" and four motions on cloture before it was finally taken down.

And those of us who felt this to be so unconstitutional were concerned that we never heard a word from the Executive Branch in a matter which seemed to us clear, a matter about which Judge Bork, a distinguished scholar, a professor of law at Yale before the President appointed him to the Court of Appeals here, had no question in his mind. And we can have differences of opinions on many things but in defending the Constitution we have to be together.

Now, I think when you get a chance to look at this, I have a sense your instincts will come out exactly where ours were, but I would ask you to comment on that now.

Mrs. HECKLER. Senator, as you know, we live in two worlds. Or I did as a member of Congress. You have your Senate world in which you have your own agenda, a very absorbing and important one. We in the House were absorbed on other issues. Obviously, there are always two sides to every argument, and these each have their right to an advocate before the court.

I certainly will review your extensive debate on the subject and ponder it, and as I sat here I wondered what position Secretary Schweiker had taken on this, and now you have resolved that. No position, is that right?

Senator MOYNIHAN. No position.

Mrs. HECKLER. Well, I am thoroughly aware of the views of the members of this

committee and respect those views and will take them into consideration and certainly will pursue this subject.

Senator MOYNIHAN. Thank you. That is all we could ask of you.

The CHAIRMAN. Senator Pryor?

Senator PRYOR. I have no further questions, thank you.

The CHAIRMAN. Senator Packwood?

Senator PACKWOOD. Peggy, let me give you an example and, again, I want your personal opinion. I am trying to find out your personal opinion on this.

You have a kidnapping, a Lindbergh type situation. A suspect is caught. He says a few things to the police officer on the way to the police station. The trial is held, the defendant pleads self-incrimination and refuses to take the stand. The police officers take the stand and indicate what the person had said on the way to the police station. The defendant is convicted and sentenced to death.

The case goes to the Supreme Court and they reverse it on the grounds of violation of self-incrimination with respect to the police officers. They should not have been allowed to testify. The country is up in arms about this person whom they think ought to be hung or shot or however we execute people now. And a bill comes along to deny the Supreme Court the right to review cases involving self-incrimination. What would your position be?

Mrs. HECKLER. That is a very extensive situation that you have detailed, and I would like to say this, Senator. I am seeking to be confirmed by this body to head one of the most important and demanding departments in this government. I am preparing myself to handle their issues and their problems.

At this moment, I feel very relieved that I am not seeking a position on the court. [Laughter.]

I feel very strongly that I want to assure you that the law will be enforced, regardless of my personal views. The law, as it is expressed and enforced, will be honored by my department, and I can make that commitment to you.

As to pondering all of the hypothetical legal cases that could occur in any segment of this society, I frankly have been so immersed in human services and human development and Social Security and Medicare that really, I would have to reflect more thoughtfully and at a quieter, more peaceful moment than this.

Senator PACKWOOD. Well, then, Peggy, let me say this in conclusion. That, to me, is a discouraging answer. This is not a new subject. It is not a new subject just this week or this month. We went through this in the mid-fifties with some bills introduced by Senator Jenner to take away from the Supreme Court the right to hear cases involving subversives; to just take it away. We went through it in the mid-sixties on reapportionment when the court finally said after 150 years no longer can you have these gerrymander districts, and there were bills introduced in Congress to take away the court's jurisdiction.

And now we have got it on abortion, and I regard it as the most dangerous ploy to undermine our form of government that we can have. And to say you have not thought about it when you have been in the Congress for 16 years and we have had these issues amazes me.

Mrs. HECKLER. Senator, I did not say that I had not thought abut the bills on abortion. when you asked me about criminal rights and privileges and whether or not they will be——

Senator PACKWOOD. I am asking you about the issue that we have had now for 25 years of taking away the jurisdiction of the court by statute because of a particular passing passion led by a fury of contemporary Cotton Mathers who want to reverse a decision they do not like. That is not a new issue, and it is not going to go away.

Mrs. HECKLER. No, it is not a new issue and I think it deserves a great deal of attention. I think that the issues that relate to the abortion question have been some of the most divisive facing the Congress in all the years that I was there. And, indeed, I consistently, as I told you and as I think you well know, have voted in favor of the pro-life position.

I do not proclude any future judgment on constitutional questions based on the language of a proposal and its implications. But to say that we can never change any postion ever taken by a court, and that to deny the right of a Congress to express the will of the American people is a situation and a proposition that I am not about to embrace at this time.

Senator PACKWOOD. I was going to pursue the subject of a constitutional amendment which I regard as a legitimate way to try to change the Constitution. We are going to have a debate on that, and I will say to Senator Hatch's credit, he has restrained himself in the past on this issue. He has wanted to go the constitutional amendment route. I will oppose him on it. But it is a legitimate way to go, and the way our founders intended we should go.

I do not think in their wildest imagination they ever thought, when they set up the division of branches of government, that the United States Congress ought to have the right to take away from the Supreme Court the ultimate decision as to whether or not an act was constitutional.

The CHAIRMAN. Senator Baucus?

Senator BAUCUS. Mrs. Heckler, not to belabor the point but as you think about this hearing today and in particular, the issue raised by Senator Packwood and most of the rest on this panel today, let me tell you that when Robert Bork was before the Judiciary Committee in his confirmation hearing, he was asked this very question.

He did not hide behind the cloak of ambiguity, but instead stated forthrightly that he was very much opposed to any court stripping measure at all. He felt that so strongly he was willing to say that openly at his confirmation hearing, even though, as you have indicated and others have indicated, Robert Bork is very much opposed to the Roe versus Wade decision.

Mrs. HECKLER. I have great respect for Robert Bork. I also feel that there are valid arguments on the other side of the issue, and I really would not preclude my opportunity to look at those from the perspective of a member of—a Cabinet member and a representative of the Department of Health and Human Services and a representative of the President.

I would consider it essential to look at the other sides of these arguments, but I happen to have very little respect for the Roe versus Wade decision. I have read it extensively, I cannot follow its legal reasoning. I would agree with Robert Bork on that subject, and to think that the Congress of the United States is foreclosed from considering any other option in addressing what I consider to be a very poor judicial ruling is a proposition that I am not about to embrace at this point.

Senator BAUCUS. Well, I think all of us are surprised we have gotton into this so deeply. Senator Packwood indicated earlier——

Mrs. HECKLER. I am very surprised. [Laughter.]

The CHAIRMAN. No one told you it would be easy. [Laughter.]

Senator BAUCUS. Senator Packwood mentioned there are ways that Congress can address this issue. Senator Hatch has a constitutional amendment, and that is the process that our founding fathers provided. But I think, too, that our founding fathers in no way envisioned that Congress, by a whimsical majority, by statute, could overturn Supreme Court decisions.

So I hope you think very, very deeply about that because I think it is probably one of the most important matters that is going to come out of this hearing today.

Mrs. HECKLER. Well, I think that the issue is a very important one, and I also feel that those who have fought on the other side of it in the Congress have valid reasons for the positions they have taken.

And I think when a member of Congress, or when the Congress sees positions taken by the court that they think are very out of line with precedent or judicial reasoning, that should they necessarily be usurped from having any alternative approach. Obviously, the constitutional amendment is the usual approach, and that is a correct one. But to foreclose all other legal options—the drafting of a law, the impact of a statute, I think goes beyond a commitment that I would like to make today.

The CHAIRMAN. Thank you, Senator Baucus. Are there any other questions on HHS? [Laughter.]

Mrs. HECKLER. Are we back to HHS?

The Chairman. Yes. I do have some questions that we would like to have answered in writing; questions from Senator Packwood and Senator Heinz.

Mrs. HECKLER. Certainly.

The CHAIRMAN. And Senator Moynihan, and there may be others because a number of the members are in other hearings, as you know.

Mrs. HECKLER. Yes, I do understand.

Mr. PRESSLER. Mr. President, I rise today to commend the administration for its outstanding choice for the demanding position of Secretary of Health and Human Services, Mrs. Margaret Heckler, and I stongly support her nomination.

It has been my pleasure and privilege to know Peggy Heckler since my student days at Harvard University. Later in my political career I had the good fortune to cross paths with Mrs. Heckler in the U.S. House of Representatives. During that time, we became close personal friends and I was very pleased to work with her on issues affecting the rights of women in this country. During the 4 years I served with her, Peggy Heckler was a leading advocate on women's issues. She sponsored legislation to establish equitable treatment of women in obtaining financial credit. As each bill came to the floor, she led the way on women's rights.

At one point during our past friendship, I had the opportunity to visit Mrs. Heckler's congressional district in Massachusetts and I enjoyed meeting

many of her friends and supporters. My home State of South Dakota was able to reciprocate this hospitality when her daughter served as an intern in one of South Dakota's television stations. I have also been pleased to visit with Peggy and her husband John on a number of occasions in their home. Her family is very supportive of all her achievements, and I want to wish all the Hecklers the very best as Peggy assumes her new position.

This country is very fortunate to have a woman of Mrs. Heckler's caliber and experience. She will do an outstanding job, and I look forward to continuing our working relationship as she assumes her new duties.

Mr. JEPSEN. Mr. President, I commend Peggy Heckler for her steadfast, unfettered commitment, for her concern with respect to the sanctity of human life.

I should like to state further for the RECORD that the Supreme Court at one time, in the Dred Scott decision, indicated that black people were not humans and were just another form of property. They were wrong then. They were wrong in the Wade against Roe decision when they said that an unborn child is not a human being.

So I commend Margaret Heckler for her unfettered commitment and respect for the sanctity of human life.

Mr. THURMOND. Mr. President, I rise today to express my support for the nomination of former Congresswoman Margaret Heckler of Massachusetts to be Secretary of the Department of Health and Human Services.

Mrs. Heckler brings to her new job 16 years of Capitol Hill experience. She represented the 10th Congressional District of Massachusetts for eight consecutive terms. At the close of the 97th Congress, she was the ranking female Member of Congress and the 24th ranking Member of the House of Representatives. Additionally, she was the senior Republican member of the Joint Economic Committee, the Science and Technology Committee, and the House Committee on Veterans' Affairs. Secretary-designate Heckler also previously served on the House Committees on Banking and Currency, Agriculture, and Government Operations. She was a founder and steering committee member of the Textile Caucus. She also founded the Congresswoman's Caucus and cochaired the group.

Mrs. Heckler is an attractive, intelligent, energetic, and courageous lady who is well-qualified to serve the President and the Nation as Secretary of Health and Human Services. Her years of service have proven her to be innovative and possessed of those leadership qualities necessary to head one of the largest Cabinet agencies in the Federal Government.

Mr. President, Mrs. Heckler's extensive experience in the workings of Government will be of great value to her and to the Nation as she faces the new challenges before her. I am confident that she will be an asset to the President's Cabinet as well as the Department of Health and Human Services, and I certainly wish her well.

Mr. STEVENS. Mr. President, I yield back our time.

Mr. KENNEDY. Mr. President, I yield back our time.

The PRESIDING OFFICER. All time has been yielded back.

Mr. KENNEDY. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is, Will the Senate advise and consent to the nomination of Margaret M. Heckler, to be Secretary of Health and Human Services? On this question the yeas and nays have been ordered, and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from Tennessee (Mr. BAKER), the Senator from New Mexico (Mr. DOMENICI), the Senator from Arizona (Mr. GOLDWATER), the Senator from Maryland (Mr. MATHIAS), the Senator from Wyoming (Mr. WALLOP), the Senator from Connecticut (Mr. WEICKER), and the Senator from California (Mr. WILSON) are necessarily absent.

Mr. CRANSTON. I announce that the Senator from Arkansas (Mr. BUMPERS), the Senator from Ohio (Mr. GLENN), the Senator from Colorado (Mr. HART), the Senator from South Carolina (Mr. HOLLINGS), the Senator from Hawaii (Mr. INOUYE), the Senator from Louisiana (Mr. LONG), the Senator from New York (Mr. MOYNIHAN), and the Senator from West Virginia (Mr. RANDOLPH) are necessarily absent.

I further announce that, if present and voting, the Senator from New York (Mr. MOYNIHAN), and the Senator from West Virginia (Mr. RANDOLPH) would each vote "yea."

The PRESIDING OFFICER. Are there any other Senators in the Chamber wishing to vote?

The result was announced—yeas 82, nays 3, as follows:

[Rollcall Vote No. 8 Ex.]

YEAS—82

Abdnor	Byrd	Dodd
Andrews	Chafee	Dole
Armstrong	Chiles	Durenberger
Baucus	Cochran	Eagleton
Bentsen	Cohen	Exon
Biden	Cranston	Ford
Bingaman	D'Amato	Garn
Boren	Danforth	Gorton
Boschwitz	DeConcini	Grassley
Bradley	Denton	Hatch
Burdick	Dixon	Hatfield
Hawkins	Matsunaga	Rudman
Hecht	Mattingly	Sarbanes
Heflin	McClure	Sasser
Heinz	Melcher	Simpson
Huddleston	Metzenbaum	Specter
Humphrey	Mitchell	Stafford
Jackson	Murkowski	Stennis
Jepsen	Nickles	Stevens
Johnston	Nunn	Symms
Kassebaum	Pell	Thurmond
Kasten	Percy	Tower
Kennedy	Pressler	Trible
Lautenberg	Proxmire	Tsongas
Laxalt	Pryor	Warner
Leahy	Quayle	Zorinsky
Levin	Riegle	
Lugar	Roth	

NAYS—3

East	Helms	Packwood

NOT VOTING—15

Baker	Hart	Moynihan
Bumpers	Hollings	Randolph
Domenici	Inouye	Wallop
Glenn	Long	Weicker
Goldwater	Mathias	Wilson

So the nomination was confirmed.

Mr. STEVENS. Mr. President, I move to reconsider the vote by which the nomination was confirmed.

Mr. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. STEVENS. Mr. President, I ask unanimous consent that the President be notified of the confirmation of the nomination of Mrs. Heckler.

The PRESIDING OFFICER. Without objection, it is so ordered.

SENATE SCHEDULE NEXT WEEK

Mr. BYRD. Mr. President, is the acting Republican leader prepared to state for our colleagues who may be listening in on the squawk boxes whether or not there will be any more rollcall votes today and what the situation is on Monday?

Mr. STEVENS. Mr. President, I am delighted to respond to the Democratic leader's request.

There will be no further votes today. We will stand in adjournment until Monday, when we will take up the Montreal Protocols. If there is a rollcall vote ordered on that, it will take place on Tuesday. We then have another nomination to take up after the Montreal Protocols, and that is the nomination of Lewis Arthur Tambs to be Ambassador to Colombia. If there is a rollcall ordered on that, it will take place following the vote on the Montreal Protocols on Tuesday.

It is not contemplated that there will be any votes on Monday as we deliberate on the two matters in executive session. There will be votes, if ordered, on Tuesday. It is our intention to move as quickly as possible next week to the jobs bill and, following that, as the majority leader mentioned, we will try to take up the social security matter. And then following that we will take up the first concurrent budget resolution.

Mr. BYRD. I thank the distinguished Senator from Alaska, the acting Republican leader.

LEGISLATIVE SESSION

Mr. STEVENS. Mr. President, I ask unanimous consent that the Senate return to the consideration of legislative business.

There being no objection, the Senate resumed the consideration of legislative business.

Mr. STEVENS. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER (Mr. HUMPHREY). The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. STEVENS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

15-MINUTE RECESS

Mr. STEVENS. Mr. President, I ask unanimous consent that the Senate stand in recess for 15 minutes.

There being no objection, the Senate, at 1:17 p.m., recessed until 1:32 p.m.; whereupon, the Senate reassembled when called to order by the Presiding Officer (Mr. HUMPHREY).

Mr. STEVENS. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. HEFLIN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

COAL AND THE 98TH CONGRESS: A LEGISLATIVE AGENDA

Mr. HEFLIN. Mr. President, I rise to address myself to some very important and related issues that will face the 98th Congress. Today, I only wish to discuss briefly the following legislative issues: coal, acid rain, inland waterways, coal port decongestion, and coal research and development.

COAL

We all recognize the important role that coal must play in meeting our future energy needs. For this reason, I want to bring to my colleagues' attention several legislative matters that the Senate will address this session affecting the future use of coal, both domestically and internationally,

The coal industry is in a depressed state, as is the general economy. While the national unemployment rate hovers just above 10 percent, unemployment in the coalfields is over 25 percent. United Mine Workers President Trumka stated before a House committee on February 9 that unemployment in his union stands at 32 percent, or over 45,000 UMW members. Therefore, any legislation we act on relative to coal should focus on returning miners to work in the near term and expanding the market potential in the long term.

ACID RAIN

Acid rain or acid deposition is difficult to discuss because of the highly charged emotions that it generates. Visions of fish and vegetation dying are conjured up by the media and the villain is allegedly sulfur dioxide emissions from coal-fired powerplants in the Midwest. The fact is, the scientific community is divided as to the actual cause of acid deposition. To impose rigid controls now on coal-fired powerplants—before we know if they are really the source of acid deposition—will cost thousands of additional miners their jobs and electric consumers billions of dollars. In a December 1982 study by the State of Kentucky Department of Energy entitled, "Economic Impacts of the Senate Acid Rain Bill," it is estimated that further controls on sulfur dioxide emissions could increase electrical cost by 32 percent and lead to the loss of 62,000 jobs.

Recognizing that we do have an acid deposition problem, I have endorsed and am cosponsoring the legislation introduced by Senator ROBERT BYRD (S. 454) on February 3, 1983. The Byrd bill accelerates the ongoing acid deposition study to a 1987 completion date. By then, we should certainly have enough facts to act decisively. This bill also provides a program to mitigate the harmful effects of acid deposition on certain bodies of water and forests. The bill further provides positive action, yet does not impose a controls program that will unnecessarily cripple an already depressed coal industry.

INLAND WATERWAYS

If coal is to play an increasing role in meeting our energy needs, we must have a transportation network to insure that coal gets from the mines to the ultimate user. Passage of the Staggers Rail Act of 1980 has put the Nation's Railroads in a healthy financial state. To augment rail transport, however, we must rebuild a network of aging locks and dams that are essential to water transport of coal. Coal is currently the largest single commodity moving on our inland waterways, accounting for nearly 30 percent of all tonnage transported. This is expected to increase to 50 percent by the turn of the century. For this increase to take place, however, there are some essential improvements that must occur at several key locks and dams, including the Oliver Lock on the Black Warrior River in my State of Alabama. For these improvements to occur, Congress must authorize funds now accumulating in the inland waterway trust fund. There is more than $100 million in this fund to begin necessary improvements. Action in 1983 would end a 5-year lapse in funding inland waterway improvements and begin the restoration of an essential link in our national transportation network.

COAL PORT IMPROVEMENT

It is essential for our ports to be dredged to a level to allow them to accommodate super colliers. Currently, no U.S. port can handle these large vessels, which are the wave of the future in the coal exporting business. Last year, we exported over 100 million tons of coal, a level which far exceeded our expectations of a few years ago and significantly aided our balance of trade. The extent to which we can increase these exports will significantly assist our allies in freeing themselves from the noose of OPEC. As with acid rain, Democratic leader BYRD has indicated his intent to take the lead in a legislative effort to alleviate our port problems. Again, I urge my colleagues to get behind his initiative.

COAL RESEARCH AND DEVELOPMENT

The administration has attempted to reduce the coal R&D budget to a level that represents "close out" funding only. The proposed fiscal year 1983 budget represented a 75-percent reduction over fiscal year 1982. Through the efforts of Senators BYRD, HUDDLESTON, FORD, and others, this funding level was increased to an acceptable level. We now find ourselves facing the same fight for fiscal year 1984.

If coal is the cornerstone of our future energy policy—as Energy Secretary Hodel has asked on numerous occasions—then should we not have a technology development program that will allow us to burn it more efficiently? The answer is, of course, yes. I look forward to working with other supporters of the coal R&D program to insure that the fiscal year 1984 funding level is again adequate to prepare for the future.

While there are other legislative issues such as coal pipelines, rail rate regulation, and Federal coal leasing that may be brought before the Senate this session, the ones discussed above will receive priority attention from me.

SUPPORT OF REPEALING THE INCREASE IN TRUCK USER FEES

Mr. HEFLIN. Mr. President, last December during the hectic days of the lameduck session, Congress hastily approved the Surface Transportation Act of 1982. Even though the intent of this bill was to repair our Nation's badly worn roads and bridges, I could not support its passage because it imposed further tax burdens on the American people. Furthermore, it was approved by Congress without careful scrutiny into the devastating effects it

would have on our Nation's trucking industry.

Before passage of the Surface Transportation Act the maximum use tax on the heaviest trucks was set at $240 per year. Under this bill, the heavy vehicle user fee is scheduled to eventually rise to $1,900. This is an almost 800-percent increase in truck taxes and clearly too burdensome for most truckers to bear. Furthermore, this is not the only tax increase truckers must pay. They must also bear the additional burden of an increase in the fuels tax and an increase in the excise tax on tires.

Small truckers will be particularly hard hit as a result of the increase in truck user fees. Many truckers in my home State of Alabama have expressed to me their inability to carry the additional burden of these taxes at a time when they are struggling merely to survive the current recession. Freight rates have not increased in several years while costs have skyrocketed. For the first half of 1982, freight carriers made only 71 cents for every $100 of gross revenues. It is unrealistic to believe that the higher user fees can be passed to the shipper through rate increases. This would only force shippers to look for alternative means of transporting their goods. Also, many truckers in my State own only one or two trucks and drive less than 25,000 miles per year. Nonetheless these truckers will be forced to pay the same user fees as the large commercial haulers.

We can all agree that our Nation's highways and bridges are badly in need of repair and reconstruction and I strongly support efforts to go forward with this work. However, under the present situation, we are asking too great a sacrifice of our Nation's truckers, which in many cases, will be forced out of business because of their inability to pay this tremendous increase in taxes.

In order to correct this inequitable situation, I am jointly sponsoring with Senator BOREN legislation to repeal the scheduled increases in the truck user fees. I believe this legislation is necessary if we are to insure a viable and healthy trucking industry. I strongly urge my colleagues to join me in supporting this important legislation. I ask unanimous consent that the attached letters appear in the RECORD following this statement. Thank you, Mr. President.

There being no objection, the letters were ordered to be printed in the RECORD, as follows:

KENNEDY, ALA.,
January 21, 1983.

DEAR SENATOR HEFLIN: I know it won't do any good to write this letter but maybe I can get my feelings out in the open. This deal of the highway use tax on trucks is going to kill us small working people. The 5 cents gas and fuel tax is bad enough but how on earth can a man make a living for his family and have to pay that kind of tax. My husband is a log hauler. They don't get any more for hauling now than they did four or five years ago. The tires, insurance, equipment and upkeep of those trucks are almost double now. If the use tax was going to have to go up, why such a jump from $210.00 per truck to $1600.00. That sure isn't going to help the economy any, in fact it's going to stop lots of jobs. If you know anyone that can help us please try to do so.

Yours truly,

MRS. EULIE TAYLOR.

AXIS, ALA.,
February 10, 1983.

Hon. HOWELL HEFLIN,
U.S. Senate, Washington, D.C.

DEAR SIR: We feel it is time for our voices to be heard concerning the additional federal taxes imposed on independent truckers. We feel it is unfair, as we're not even making the minimum wage after truck expenses, which I will itemize for you later.

The cost of everything is up—fuel seems to be coming down some, but not nearly enough—and the freight rates are so low, it is very hard to make a living. The price of fuel and permits is not consistent from one state to another.

This is a breakdown of cost of operation:

Truck payments	16,922.25
Ala. (IRP) base plate	1,117.86
Truck insurance	3,494.00
Fuel	25,544.41
Oil	501.69
Parts and repairs	4,073.31
Tires	1,385.16
Total	53,038.68
Tolls and permits	490.85
Highway use tax	407.84
Weight tickets	43.00
Complete check charges	591.50
Telephone—long-distance only	949.09
Payments on business loans	4,200.00
Daily allowance 20.00 day—food on the road	8,360.00
Total	15,042.28
Income for 1982	75,990.19
Expenses on truck	68,080.96
Difference	7,909.23

Out of what is left, we have to maintain our household, utilities, telephone, hospital insurance and food.

We feel it is unfair to pay the federal highway use tax and then have to pay the highway use tax to states like Ohio and ton mileage tax in states like Colorado and N.Y. This is double taxation and we have to pay it if we travel in those states. It would be easier if all the states had a uniform method to collect for taxes, license, and permits.

Note the amount paid in tolls. We feel it is wrong to have to pay all the other use taxes and still have to pay tolls in many of the states on interstate highways, such as Okla., Ill. and most all of the Northeastern states. This money can't be used on the highways, as their highways are in worse condition than states that don't charge tolls.

There needs to be a change in the tax structure and freight rates, so we can live with it and still make a living. I might add that both my husband and I drive our rig and barely make ends meet.

Hope we will be hearing from you soon.

Sincerely yours,

——— ———.

DEAR MR. HEFLIN: I am soliciting your help in getting some relief in our problems as Independent Truckers and/or-owner operators.

In Etowah County, the Gadsden, Ala., area, there are approximately three to four hundred independent truckers and owner-operators.

The recently passed legislation by the Congress and Senate to increase fuel tax by five cents per gallon, and the 800 percent road use tax increase will force the greater majority of all of us out of business. We were just barely hanging on before this Legislation was passed.

We as independents are furnishing and maintaining the expensive equipment. Loading, transporting and delivering the merchandise, for a lesser net profit than most company drivers make for just driving a company's vehicle. This is a matter of record.

The independents shut down in 1979 caused by very high rising fuel cost would have put us out of business then. But the Government came thru with a fuel surcharge that saved us then. However, the ICC later deregulated the industry and took away the surcharge and allowed the carriers to incorporate it in the rate. The carriers have now cut the rates far below what they were before the surcharge was added. This has allowed the carriers who belong to the AGA and use owner-operators to retain at least 80 percent of the fuel surcharge and they do not pay any highway use or fuel tax at all. Yet a lot of them have 500 to 1,000 trailers that are being pulled by owner-operators who pay all the taxes. On fuel and highway use, all state and local taxes on the equipment.

This allows carriers in this method of operation to derive approx. 40 percent of total revenues without any of the tax obligations afore mentioned.

We definitely must have some relief in this situation or we are all out of business and if this happens, the carriers will have to furnish all this equipment and I guarantee you if this happens, freight rates will increase 100 percent or more and will be passed on to the consumer.

Please consider our plight and try and help us in this fight for mere survival.

Sincerely,

ED MESSER.

STAR TRUCK PARTS,
Birmingham, Ala., January 27, 1983.

The Honorable HOWELL HEFLIN,
U.S. Senate, Washington, D.C.

DEAR SENATOR HEFLIN: This letter is written to ask your support for reducing the Federal Road Use Tax burden that has been placed on trucks and truckers. In dealing with truckers and truck owners on a daily basis, I am very familiar with their operations and business problems.

Most independent and small fleet operators (70 percent) do not control the rates that they receive for their services. Many regulated carriers in the Birmingham area do not own one single truck, yet they control rates and take high commissions from the revenue. Exempt haulers (logs, coal, produce, etc.) encounter the same problems with large paper mills, coal producers, and food brokers. The truck owner must pay all expenses and TAXES, yet cannot price his services. In a situation that is, at best, a break even business, there is no way that thousands of dollars more in taxes, per truck, can be paid.

This tax burden will put thousands of large and small operators out of business.

Please consider the following facts concerning trucks.

1. New truck sales are down 50 percent from 1979.

2. Over 8,000 Diesel Trucks were repossessed in Alabama in 1982.

3. 30 percent of the new truck dealers (large trucks) in Alabama have gone out of business in the last two years, with others to go out soon.

4. Truck load freight rates are at, or below, the rates charged in 1978.

5. The new Road Use Taxes for one year will be more than the combined profits of all regulated trucking companies for the past 3 years.

Please, your help is needed.

Sincerely,

JERALD BROOKS.

SYLACAUGA, ALA.

Senator HOWELL HEFLIN,
U.S. Senate,
Washington, D.C.

DEAR SIR: I am writing to voice my opinion on the Taxes imposed on the Truckers.

I, myself, work at Floyd & Beasley Transfer Co. Inc., and I know it's hard enough now days to make a profit without these added (Tax) cost. Many Companies have went at least Two Years without giving a Pay Raise, simply because they can't afford to. Other Companies such as McLean have sold out because of hard times in the Trucking Industry, others have entered Chapter 11 Bankruptcy. It is regrettable that this happened. That is why I am writing, because I am very concerned that if we don't do something about these Taxes that many more Companies such as Floyd & Beasley will be forced to sell or enter Chapter 11 Bankruptcy.

When things are this tough on large Companies then common sense will tell you that its twice as hard on the Independent Truckers.

What good are better Highways if there is no one to run them. I can't understand what good a Jobs Program is if it causes more job losses than it employs. I realize we need to create more jobs but, there has to be a better way to do so.

Sincerely,

JEFF MCGRADY.

ATHENS, ALA.

Senator HOWELL HEFLIN,
Dirksen Senate Office Building,
Washington, D.C.

DEAR SENATOR: We are in full agreement that our roads and bridges are in dire need of repair, however, we do not feel the truckers should take the full brunt of this expense.

Gasoline prices have decreased so the additional 5¢ per gallon tax will not hurt the motorist. Diesel prices have not come down; therefore, the additional taxes would be a major expense on the truckers.

Rates on almost all commodities shipped on trucks are so low the truckers are having an extremely difficult time making expenses, which have continued to increase.

Raising taxes, such as the Highway Use Tax increase, and taxes on tires, trucks and other equipment necessary to move freight across this Country will make it impossible for the truckers to make any profit, much less a decent living.

Truckers are already paying each state very high taxes for running in them and these taxes have also increased recently.

Raising the weights trucks can carry can in no way compensate the truckers for these additional taxes. The customers order the weights they need and many loads are lighter than even present laws allow. We do need each State to have the same legal length and weight laws but this will not increase revenue enough to even start to compensate the trucker for these additional taxes.

If these taxes remain on the truckers, we will all be out of business and added to the high unemployment already in existence.

We realize all must pay taxes, but we now pay such high fuel taxes, plates and permit charges to each State. The roads and bridges could be new if all the money went for that.

Be fair to us, we are an important industry and necessity to the economy of this country. Putting us out of business is not a good solution to this problem.

If less money was given to Foreign Aid and instead used for the people in the United States, we could balance the budget and be more humane to our own people in need.

Charity does begin at home, and we all need "aid" here.

Thank you for your consideration in this matter.

Sincerely,

ROBERT and SANDIA RIDINGER.

GADSDEN, ALA.,
Feb. 7, 1983.

DEAR SIR: As a owner-operator in Trucking I wish to express my view to the user-fees that are being imposed.

I only drive 40,000 miles per year yet I will have to pay the same as the ones that drive 150,000 miles and some even more. I believe it is too much at a time when we are on the verge of collapse.

Any help you can render will be appreciated.

Yours Truly,

L. V. CLAYTON.

JANUARY 17, 1983.

Senator HOWELL HEFLIN,
U.S. Senate Office Building,
Washington, D.C.

DEAR SENATOR HEFLIN: I use approximately 25 truck owner-operators in my business and every one of them tell me that they will be parking their trucks the 31st of January and remained parked until something was done about these new taxes.

Please get a meeting and do all that you can to get the Surcharge or some type of extra revenue that goes direct to the trucker installed. If something is not done immediately to appease them, me and anyone else depending on the trucking will be without any business.

The estimated additional cost per truck at a minimum figure is:

Gasoline at .05 per gallon (average 4 miles per gallon)	$1,500
Tire tax (average weight, 125 No. per tire) at $.50 per lb. 1 set of tires per year, 18 at $62.50	1,125
Federal highway use tax—additional per truck	1,377
Total	4,002

Plus the additional excise tax on truck and trailer when purchased, in which the amount is a question mark.

Respectfully,

BILL TIDWELL.

P.S.—I believe the truckers would accept the gasoline tax if the other taxes were repealed.

Gadsden, Alabama, February 7, 1983.

Senator HOWELL HEFLIN,
U.S. Senate
Washington, D.C.

DEAR SENATOR HEFLIN: We, the independent truckers, think the fixed Highway Use Tax bill is unfair and too high.

There are thousands of people who make themselves a job with one truck or more. These owner-operators have gross incomes ranging from $25,000 per year to $100,000. The small income truck will pay the same tax. This will put the small business man without a job. This bill was suppose to create jobs not make unemployment.

Our revenue is down due to deregulation and competiton and our taxes are to be higher, this is hard for the independent contractor to understand. We are in favor to increase Highway Use Tax. Independent Truckers work on a percentage basis with no guarantee of monies. We think an increase at the fuel pumps would be more accurate on the way a truck is running his gross income. Even a percentage of the gross income would be fairer, an example of ½ percent up to 1 percent.

With deregulated rates and the sagging economy, freight rates have gone down considerable for the past 14 months. There is no room in the independent trucker's business for fixed taxes in today's profit and economy.

For general information the following is some of the problems the trucker is up against.

We are willing to do away with the surcharge and take our percentage of the gross. As all trucking companies are now interpreting this differently. The surcharge bill was originated to help the independent truckers to pay higher fuel cost. As of now, the large companies are keeping most of the surcharge.

With 100 percent to begin on gross revenue. The company divides 1.15 percent to roll out surcharge. The company pays to the contractor 12.5 cents as of February 10, per dispatched mile which does not equal to the money they are taking away from the independent trucker.

The company's expenses are made up of cargo and liability insurance. Maintaining offices to collect freight charges.

The owner-operators then have to pay their own workman's compensation. Our company deducts 4.3 percent workman's compensation. The owner-operator also pays his bobtail insurance and a portion of cargo insurance which ours amount to $20.00 per month.

All the other incurred charges that go to the independent contractor such as fuel, tires, repairs, payments on tractors and trailers, compensation insurance, hospital insurance, social security tax, income tax, apportioned tags which can cost as much as $1100.00, permits for each state and ad valorem tax.

A large portion of the tax to be collected from the Highway Use Bill will go to the railroads to bail them out of any financial strain. They are our biggest competion with low rates that certainly put a financial strain on the trucking industry.

We need help before we can pay higher taxes.

Yours truly,

BOBBY J. MCKEE
and 48 others.

DIRECTING SENATE LEGAL COUNSEL TO REPRESENT SENATOR MOYNIHAN AND SENATOR D'AMATO

Mr. STEVENS. Mr. President, I send a resolution to the desk on behalf of the distinguished Republican and Democratic leaders and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will state the resolution by title.

The legislative clerk read as follows:

A resolution (S. Res. 81) to direct the Senate legal counsel to represent Senator MOYNIHAN and Senator D'AMATO in the case of Municipal Electric Utilities Association of New York State v. Ronald Reagan, et al.

The PRESIDING OFFICER. Is there objection to the immediate consideration of the resolution?

Mr. BYRD. No objection.

The Senate proceeded to consider the resolution.

Mr. STEVENS. Mr. President, this resolution is necessary in order that legal counsel may appear to represent the two Senators mentioned as defendants in an action brought against the Commission, all of its Commissioners, President Reagan, Representatives KEMP, CONABLE, NOWAK, and LAFALCE, as well as the two Senators mentioned.

The matter will be heard tomorrow in the Federal district court. That is the reason for the urgency.

The PRESIDING OFFICER. The question is on agreeing to the resolution.

The resolution (S. Res. 81) was agreed to.

The preamble was agreed to.

The resolution, with its preamble, reads as follows:

S. RES. 81

Whereas the case of *Municipal Electric Utilities Association of New York State* v. *Ronald W. Reagan, et al.*, Civil Action No. 83-0595, is pending in the United States District Court for the District of Columbia;

Whereas the complaint in this action names the Honorable Daniel Patrick Moynihan and the Honorable Alfonse M. D'Amato as parties defendants;

Whereas, pursuant to sections 703(a) and 704(a) of the Ethics in Government Act of 1978 (2 U.S.C. 288b(a) and 288c(a) (Supp. V 1981)), the Senate may direct its counsel to defend the Senate, its Members and officers, in civil actions relating to their official responsibilities: Now, therefore, be it

Resolved, That the Senate Legal Counsel is directed to represent Senator Moynihan and Senator D'Amato in the case of *Municipal Electric Utilities Association of New York State* v. *Ronald W. Reagan, et al.*

Mr. STEVENS. Mr. President, I move to reconsider the vote by which the resolution was agreed to.

Mr. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

ORDER OF PROCEDURE ON MONDAY

Mr. STEVENS. Mr. President, I ask unanimous consent that, following the convening of the Senate on Monday, no resolutions come over under the rule, the call of the calendar be dispensed with, and the Journal of the proceedings be approved to date.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

ADJOURNMENT TO 10:30 A.M. MONDAY, MARCH 7, 1983

Mr. STEVENS. Mr. President, if there be no further business to come before the Senate, I move, in accordance with the order previously entered, that the Senate stand in adjournment.

The motion was agreed to; and, at 1:43 p.m., the Senate adjourned until Monday, March 7, 1983, at 10:30 a.m.

CONFIRMATION

Executive nomination confirmed by the Senate March 3, 1983:

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Margaret M. Heckler, of Massachusetts, to be Secretary of Health and Human Services.

HOUSE OF REPRESENTATIVES—*Thursday, March 3, 1983*

The House met at 10 a.m.

The Chaplain, Rev. James David Ford, D.D., offered the following prayer:

O God, keep us always in Your mercy and may Your grace remain with us. Protect all those who call upon You, even as we seek to support those who are in any need. Cause us to be aware of the concerns about us that we will bring healing and comfort and compassion to people everywhere. May Your spirit increase in us those good works that honor Your name and serve people everywhere. Amen.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

Mr. WALKER. Mr. Speaker, pursuant to clause 1, rule I, I demand a vote on agreeing to the Speaker's approval of the Journal.

The SPEAKER. The question is on the Chair's approval of the Journal.

The question was taken; and the Speaker announced that the ayes appeared to have it.

Mr. WALKER. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 350, nays 19, answered "present" 4, not voting 60, as follows:

[Roll No. 15]

So the Journal was approved.

The result of the vote was announced as above recorded.

MESSAGE FROM THE SENATE

A message from the Senate by Mr. Sparrow, one of its clerks, announced that the Senate had passed without amendment a bill of the House of the following title:

H.R. 1572. An act to repeal section 311 of the Federal Public Transportation Act of 1982.

The message also announced that the Senate had passed a joint resolution of the following title, in which the concurrence of the House is requested:

S.J. Res. 37. Joint resolution providing that the week containing March 8, 1983, shall be designated as "Women's History Week."

RESIGNATION AS MEMBER OF SELECT COMMITTEE ON AGING

The SPEAKER laid before the House the following resignation as a

□ This symbol represents the time of day during the House proceedings, e.g., □ 1407 is 2:07 p.m.

● This "bullet" symbol identifies statements or insertions which are not spoken by the Member on the floor.

member of the Select Committee on Aging:

HOUSE OF REPRESENTATIVES,
Washington, D.C., February 22, 1983.

Hon. THOMAS P. O'NEILL, Jr.,
Speaker of the House, H-204, Capitol, Washington, D.C.

DEAR MR. SPEAKER: This is to inform you I hereby tender my resignation on the Select Committee on Aging.

Sincerely,

DANIEL E. LUNGREN,
Member of Congress.

The SPEAKER. Without objection, the resignation is accepted.

There was no objection.

APPOINTMENT AS ADDITIONAL MEMBERS OF SELECT COMMITTEE ON AGING

The SPEAKER. Pursuant to clauses 6 (f) and (i) of rule X, and without objection, the Chair appoints as additional members of the Select Committee on Aging the following Members of the House:

Mr. RICHARDSON of New Mexico;
Mr. GEKAS of Pennsylvania;
Mr. SILJANDER of Michigan; and
Mr. SMITH of New Jersey.

There was no objection.

APPOINTMENT AS MEMBERS OF ADVISORY COMMISSION ON INTERGOVERNMENTAL RELATIONS

The SPEAKER. Pursuant to the provisions of section 3(a), Public Law 86-380, the Chair appoints as members of the Advisory Commission on Intergovernmental Relations the following Members on the part of the House:

Mr. FRANK of Massachusetts;
Mr. WEISS of New York; and
Mr. WALKER of Pennsylvania.

PERMISSION FOR COMMITTEE ON WAYS AND MEANS TO HAVE UNTIL MIDNIGHT TOMORROW, FRIDAY, MARCH 4, 1983, TO FILE REPORT ON SOCIAL SECURITY ACT AMENDMENTS OF 1983

Mr. ROSTENKOWSKI. Mr. Speaker, I ask unanimous consent that the Committee on Ways and Means have until midnight tomorrow, March 4, 1983, to file its report on the Social Security Act Amendments of 1983.

The SPEAKER. Is there objection to the request of the gentleman from Illinois?

There was no objection.

ANNOUNCEMENT BY THE SPEAKER

The SPEAKER. The Chair announces that he will recognize Members to make requests for committees to sit during the 5-minute rule only at certain times during the legislative day. While the precedents indicate that such requests when pending are not votes requiring the presence of a quorum, the Chair wishes to avoid the need for a call of the House pending such requests but at the same time to assure predictability as to when he will accord recognition. Therefore, the Speaker intends to set up the following guidelines:

First, as has been established by precedent, permission to sit shall require unanimous consent if the permission pertains to a day for which the program has not been announced. Thus, prior to the announcement of the legislative program for the following week, only one objection would be required to prevent a committee from sitting. Following the announcement by the majority leader, or his designee, of the program for the next week, the Chair would entertain requests for committees to sit during that following week and 10 objections would then be required. The Chair wants it to be clearly understood that the first available opportunity in the House following the announcement of the program is an appropriate time for considering requests pertaining to the following week if the announcement comes before the completion of all legislative business.

Second, the Chair will not entertain requests on days when all votes on legislative matters have been postponed to a later date; however, the chair will accept requests for committee hearings to be held later in the week if the request has the concurrence of the ranking minority member of the committee or subcommittee.

Third, on days when legislative business is to be conducted, and when rollcall votes are in order on legislation, the Chair will recognize during the 1-minute speech period at the beginning of the day for requests that committees sit provided that the Chair has been notified and has received assurance that the minority leader, or his designee, has been notified at 5 minutes before the request is to be entertained.

Fourth, the Chair will bestow recognition at times during the legislative day other than during the 1-minute period only when he is assured that the ranking minority member of the committee or subcommittee involved supports the request for the hearings or meeting.

Requests that have been objected to by 10 or more Members pursuant to clause 2(i) of rule XI may not be renewed on the same day unless the Chair is assured that the objections have been withdrawn.

The Chair will in no instance entertain requests after the legislative business of the day has been concluded; that is, after leaves of absence have been laid down or unanimous consent requests from the majority and minority tables have been entertained at the end of the day.

GOVERNMENT BUREAUCRATS EMERGENCY READING AND WRITING SKILLS PROFICIENCY ACT OF 1983

(Mr. LEVINE of California asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. LEVINE of California. Mr. Speaker, today's news indicates that we might need to get together and draft a bill entitled "The Government Bureaucrats Emergency Reading and Writing Skills Proficiency Act of 1983."

This morning I learned that the National Highway Traffic Safety Administration felt compelled to pay a consultant $23,000 to write a readable letter explaining to consumers that their car has a defect and is being recalled. Apparently the Director felt he could not write such a letter because he is not skilled in linguistics.

Mr. Speaker, how can a man be appointed to a position such as this if he cannot even write a simple letter of this nature?

At a time when the administration is telling us that we cannot afford to feed, house, or care for the more than 14 million Americans its policies have thrown out of work or the millions of other unfortunate Americans who are poor, elderly, and disabled, how can one of our top administrators squander this kind of money in such a wasteful manner?

Does the administration feel that only highly paid linguists are capable of writing a simple, understandable letter?

I am interested in learning what sort of competitive bidding procedures were used to let this contract. Several members of my staff have asked me to volunteer their services and have assured me they would be willing to write the Highway Safety Administration's letter for considerably less than $23,000.

This type of waste should not go unnoticed. I hope the administration might like to take some steps to deal with it.

EMERGENCY JOBS LEGISLATION IS OVERDUE

(Mr. BOUCHER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BOUCHER. Mr. Speaker, later today, this House will vote on the emergency jobs legislation that has been the subject of extended public debate. It is a bill that is overdue; it is a bill that must be passed.

With 12 million Americans out of work, and with the President in his own Economic Report to the Congress predicting that unemployment will remain over 10 percent throughout 1983, it is incredible to me that some in this Chamber would suggest that the crisis has passed and that action is no longer necessary.

The truth is that the crisis has not passed. If there are doubters among you, I say, come to southwest Virginia where overall unemployment exceeds 17 percent. Four of our counties have jobless rates above 25 percent. In one county, more than 30 percent are unemployed.

From the factories to the farms, to the mines, people are out of work. In the country stores and around the dinner table, people are waiting—waiting for this Congress to recognize the crisis and take action.

The American people are not interested in partisan politics; they want action. I urge my colleagues to support this critically needed legislation.

SECOND PHASE OF JOBS BILL NEEDED

● Mrs. KENNELLY. Mr. Speaker, today as we begin consideration of the jobs bill, we no doubt are going to hear a great deal about how the recovery has begun in this country. We are thankful for the many bright signs; however, for millions of Americans there has not been any recovery yet and there might not be one unless we do the right thing. Recovery will not begin unless we address training and retraining of the American people.

I am not saying that today's bill is not good, in fact it is a good jobs bill, but it is not enough. For example, over $700 million is designated to go toward public services, toward jobs that women usually hold. This is not anything; it is a lot of money. But we can use more as far as retraining and new training for women so that they who make up 43 percent of the work force, can have meaningful jobs and help to do for their families what they want.

The President, members of his administration, and many Members of this body that we sit in today have told us that there will be a second phase to the jobs bill. What I urge today is that we go forward with the jobs bill that we are addressing, but we remind those who have promised us a second phase that we need the second phase so that we can continue to train and, more importantly, retrain those who want to go back to work.●

LET US PUT A DENT IN DOUBLE-DIGIT UNEMPLOYMENT

(Mr. ALEXANDER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. ALEXANDER. Mr. Speaker, yesterday was a day of optimistic and perhaps extravagant economic forecasts by various administration spokesmen.

Treasury Secretary Don Regan proclaimed that the economic recovery has already begun, and we hope that is true, but to be on the safe side we ought to remember that Treasury Secretary Don Regan, both during and after his days on Wall Street, has predicted 52 of the last 3 economic recoveries.

Let us suppose, however, that there is more than a smokescreen of rhetoric here, that the first fire of economic revival has indeed been lit.

□ 1030

In that case we need to be sure that this is not just an economic recovery for Wall Street alone but for Main Street as well. We have learned in the past that what is good for big banks on Wall Street is not necessarily what is good for the people. The people's need are the same as always—jobs, housing, and a real opportunity to pursue the American dream.

Mr. Speaker, today we take up the jobs bill, which will provide economic recovery for Main Street as well as for Wall Street. Let us not speak of recovery until we have put America back to work and put a dent in the awful statistical fact of double-digit unemployment.

"CRUCIAL POINT" IN EL SALVADOR IS REMINDER OF VIETNAM

(Mr. SCHUMER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SCHUMER. Mr. Speaker, yesterday the administration announced that it needed more military aid for El Salvador because right now are reaching a crucial point in that war.

As somebody who lived through and spent his formative years during the Vietnam war, I would hasten to remind the administration that many of us who lived through that time heard over and over again, in 1966, in 1968, in 1970, in 1972, and in 1973, that we were at crucial points, turning points in the war in Vietnam, and while we may have believed at first that this was the case, later on we did not believe it.

I would simply hasten to remind the administration that the many millions of Americans and a good number of Congressmen who lived through that time will be very reluctant, without positive proof, to accept increased military aid as a solution to the quagmire in El Salvador, because we saw that military aid did not relieve us from the quagmire in Vietnam.

SUPPORT FOR INDEXING OF INCOME TAX BRACKETS

(Mr. DREIER of California asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DREIER of California. Mr. Speaker, I would like to take a moment to speak in opposition to efforts to repeal or postpone the indexing of income tax brackets.

As we all know, the average American taxpayer—especially those in the lower and middle income tax brackets—has suffered from years of bracket creep. We promised our constituents relief from bracket creep when we passed the Economic Recovery Tax Act of 1981 and I believe we must stand by that commitment.

But indexing raises an important question about the future growth of Federal spending. Indexing is simply a form of discipline. By placing a cap on the growth of Federal tax revenues, it would force Congress to recognize that limits to Federal spending do, in fact, exist. Indexing will force Congress to scrutinize all spending—defense as well as social—and budget accordingly. It will not create deficits. It will not lower taxes. But it will force this body to be honest about our spending priorities, and to choose either increased taxes or spending cuts.

Many of us were elected to Congress with the pledge that we would cut waste from Government and restore prudent responsibility to the budget process. I think we owe it to ourselves to be honest about spending limits and we can only do that if we retain indexing.

Next week I will be introducing a resolution which expresses the sense of the House that indexing should not be repealed or postponed.

Mr. Speaker, I hope you will join me as an original cosponsor.

JOBS BILL UNRESPONSIVE TO PUBLIC NEEDS

(Mr. GREGG asked and was given permission to address the House for 1 minute, and to revise and extend his remarks.)

Mr. GREGG. Mr. Speaker, today we take up a bill which is nothing more than a crass fraud executed at the expense of the American unemployed. This $4.6 billion in what is euphemistically called a jobs bill is being perpetrated for the sole purpose of political perception and the promotion of pet political projects.

This bill represents the politics of past failures. It is nothing more than a frenzied feeding at the public trough and at the expense of the American taxpayers. This Congress should hang its head that it would again foist upon the American public and the taxpayers of this country a bill which is not

responsive to their needs but is, rather, going to have a negative effect on those who are unemployed as it dampens our recovery by expanding the deficit, forcing up interest rates, and in effect slowing down the recovery which is the only real hope for people who are out of work.

WEATHERIZATION ASSISTANCE VITAL PART OF JOBS BILL

(Mr. McKERNAN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. McKERNAN. Mr. Speaker, while we all know that the $4.6 billion jobs and recession relief bill coming before us today is no panacea for all the suffering of the unemployed and homeless of this Nation, nevertheless, it does constitute a much needed beginning for getting the country back on its feet, both in economic terms and in human terms. One objection which has been voiced against this legislation is that the relief provided in the bill will be too long in the pipeline, and will only reach those to whom it is directed long after the economy is recovering on its own. While it remains to be seen how long it will take for all the projects and programs contained in this bill to get underway, at lest one provision in the legislation is certain to provide swift effective assistance to many desperate families throughout the Northeast, where the recession has hit the hardest.

I am referring to the $150 million included in the jobs bill for the weatherization assistance program. Several weeks ago, I joined with several of my Republican colleagues from New England in sending a letter to the White House to urge that funding be included in the jobs package for low-income weatherization assistance. The original proposal submitted by the administration contained no such funding. Therefore, although our letter requested $250 million for low-income weatherization, we are convinced that even the compromise figure of $150 million will go a long way toward helping low-income families weatherize their homes.

In the State of Maine, the low-income weatherization program has resulted in more than 14,000 homes being weatherized. In 1982 alone, a total of 5,064 homes were weatherized through Maine's program. And the financial burden of this program has not been borne solely by the Federal Government. The State of Maine contributed a total of $1 million in each of fiscal years 1982 and 1983 toward this particular program. Clearly, the benefits of the low-income weatherization program have been felt by tens of thousands of individuals throughout the State of Maine. I know that the $2.4 million which will go to Maine under this legislation will benefit thousands more whose homes need weatherizing. I am pleased that the importance of this program was not overlooked in the final hours of crafting the jobs and relief legislation we have before us today.

SPENDING PRIORITIES CRITICAL IN CONSIDERATION OF JOBS BILL

(Mrs. ROUKEMA asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Mrs. ROUKEMA. Mr. Speaker, in a matter of hours we will undoubtedly pass a multimillion-dollar jobs bill. Its support from my own party is predicated largely upon the assurances that the spending provided is really only accelerated spending of money we were planning on in the next several years.

But I must ask you, Can we truly expect that the projected spending down the road will simply not happen? Or can we assume that history will repeat and know that what we spend today will be spent again next year—on other new urgent programs. I make this point not to oppose the jobs bill, but to urge you in every way that I can to look for reductions as you put the necessary funds toward these jobs and look to defense procurement as we know that we must. I am today sending a letter to Secretary Weinberger asking that we reduce our expectations for more and more spending without priorities. Those of my colleagues who have joined me are remarkable in the range of political ideology they represent from the so-called hawks to the doves, yet they are even more remarkable as the only handful of Members who were willing to say we must reduce even if the defense contracts involved are in my own district.

When you vote on jobs today, remember that you are accepting the burden of reducing spending elsewhere, or you will have to accept the blame for the devastating deficits or higher taxes.

GOOD NEWS—ECONOMIC INDICATORS ARE UP

(Mr. LOTT asked and was given permission to address the House for 1 minute, and to revise and extend his remarks.)

Mr. LOTT. Mr. Speaker, the economic good news continues to roll in. Yesterday it was announced that the index of leading economic indicators, that is, the standard measure of economic performance, shot up 3.6 percent in January—the largest single increase since 1950.

My distinguished colleague, the gentleman from Arkansas, in his remarks said it was "extravagant." Well, so it is. It is extravagant, and I ask, "Isn't it wonderful?"

We are getting economic recovery, and there are signs all over the place that it is coming. As a matter of fact, the economic indicators were led by an increase in the average work week of almost eight-tenths of a percent and an increase in new business formations of a third of a percent, representing thousands of new businesses, and a dramatic increase in new building starts.

This is good economic news. Why are we not hearing more about it? Where are all the "expert" economic forecasters from the other side this morning, the ones who have been railing about the performance of the economy over the last few months? Could it be that they were wrong about an economic recovery under Reaganomics?

Mr. Speaker, I submit that they were. The continued upturn in the economy indicates that economic recovery, promised by this administration and implemented by the policies we have adopted over the last 2 years, is just beginning.

PROVIDING FOR CONSIDERATION OF H.R. 1718, EMERGENCY APPROPRIATIONS, 1983

Mr. BONIOR of Michigan. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 113 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 113

Resolved, That at any time after the adoption of this resolution the Speaker may, pursuant to clause 1(b) of rule XXIII, declare the House resolved into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 1718) making appropriations to provide emergency expenditures to meet neglected urgent needs, to protect and add to the national wealth, resulting in not makework but productive jobs for women and men and to help provide for the indigent and homeless for the fiscal year 1983, and for other purposes, and the first reading of the bill shall be dispensed with. All points of order against the consideration of the bill for failure to comply with the provisions of section 311(a) of the Congressional Budget Act of 1974 (Public Law 93-344) and clause 7 of rule XXI are hereby waived, and all points of order against the bill for failure to comply with the provisions of clauses 2 and 6 of rule XXI are hereby waived. After general debate, which shall be confined to the bill and shall continue not to exceed two hours, to be equally divided and controlled by the chairman and ranking minority member of the Committee on Appropriations, the bill shall be considered as having been read for amendment under the five-minute rule. No amendment to the bill shall be in order except the following amendments printed in the Congressional Record of March 2, 1983, which shall be considered

only in the following order and which shall not be subject to amendment but shall be debatable as provided herein: (1) the amendment by, and if offered by, Representative Obey of Wisconsin, said amendment shall be considered en bloc and shall not be subject to a demand for a division of the question in the House or in Committee of the Whole, all points of order against said amendment for failure to comply with the provisions of section 311(a) of the Congressional Budget Act of 1974 (Public Law 93-344) and clause 2 of rule XXI are hereby waived, and said amendment shall be debatable for not to exceed one hour equally divided and controlled by Representative Obey and a Member opposed thereto; (2) the amendment by, and if offered by, Representative Howard of New Jersey, all points of order against said amendment for failure to comply with the provisions of section 311(a) of the Congressional Budget Act of 1974 (Public Law 93-344), clause 2 of rule XXI, and clause 7 of rule XVI are hereby waived, and said amendment shall be debatable for not to exceed thirty minutes equally divided and controlled by Representative Howard and a Member opposed thereto; (3) the amendment by, and if offered by, Representative Wise of West Virginia, all points of order against said amendment for failure to comply with the provisions of clause 2(c) of rule XXI are hereby waived, and said amendment shall be debatable for not to exceed thirty minutes equally divided and controlled by Representative Wise and a Member opposed thereto; and (4) the amendment by, and if offered by, Representative Edgar of Pennsylvania or Representative Coughlin of Pennsylvania, all points of order against said amendment for failure to comply with the provisions of clause 2 of rule XXI are hereby waived, and said amendment shall be debatable for not to exceed one hour equally divided and controlled by the proponent of the amendment and a Member opposed thereto. At the conclusion of the consideration of the bill for amendment, the Committee shall rise and report the bill to the House with such amendments as may have been adopted, and the previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit, and all points of order under section 311(a) of the Congressional Budget Act of 1974 (Public Law 93-344) and under clauses 2 and 6 of rule XXI are waived against instructions contained in a motion to recommit, and against any amendment required by said instructions to be reported back to the House.

The SPEAKER. The gentleman from Michigan (Mr. BONIOR) is recognized for 1 hour.

Mr. BONIOR of Michigan. Mr. Speaker, for purposes of debate only, I yield the customary 30 minutes to the gentleman from Tennessee (Mr. QUILLEN) pending which I yield myself such time as I may consume.

Mr. Speaker, this is an extremely important bill which will be governed by a restrictive rule. I, therefore, hope that Members will lend their attention to its explanation.

The rule provides for 2 hours of general debate to be equally divided between the chairman and ranking minority member of the Appropriations Committee. The rule dispenses with the first reading of the bill to expedite consideration and waives points of order which may lie against the bill for violations of section 311(a) of the Congressional Budget Act concerning the surpassing of budget ceilings.

Violations of clause 7 of rule XXI are also waived. That clause deals with the availability of committee hearings and reports at least 3 calendar days prior to consideration, due to the nature of this legislation and the urgent need to replenish various unemployment funds at the administration's behest, the committee felt it wise to provide this waiver.

Finally, violations of clause 2 of rule XXI (pertaining to appropriations without authorization and legislation on an appropriations bill) as well as clause 6 of that rule (relating to the reappropriation of unexpended balances) are waived for the consideration of H.R. 1718.

After the 2 hours of general debate the bill shall be considered as having been read for amendment under the 5-minute rule.

Mr. Speaker, because of the necessity for expeditions consideration of this bill and its potential for uncontrolled expansion on the floor, the Rules Committee thought it necessary to limit the amendments made in order to a relative few which would address the major concerns of Members regarding the priorities established by the legislation before us, therefore, only the following four amendments have been made in order:

First, an amendment by, and if offered by, Mr. OBEY of Wisconsin which would provide approximately $200 million in additional funds for health care for the poor and unemployed. That amendment will be offered in bloc, indivisible, and debated not to exceed 1 hour equally divided between Mr. OBEY and an opponent of his amendment. Waivers are provided for violations of section 311(a) of the budget act and clause 2 of rule XXI.

Second, an amendment by, and if offered by, Mr. HOWARD of New Jersey relating to the earmarking of transit funds. This amendment is provided 30 minutes of debate to be equally divided between Mr. HOWARD and an opponent of his amendment and waivers are provided for violations of section 311(a) of the Budget Act, clause 2 of rule XXI and clause 7 of rule XVI (germaneness).

Third, an amendment to offer by Mr. WISE of West Virginia relating to the funding of construction for the Stonewall Jackson Dam in his district. This amendment shall be debated for 30 minutes equally divided between Mr. WISE and an opponent of his amendment and waivers for violation of clause 2(c) of rule XXI are provided.

Fourth, an amendment printed in the RECORD by Mr. EDGAR of Pennsylvania relating to targeting of assistance to pockets of unemployment wherever they may occur. This amendment may be debated for 1 hour equally divided between the proponents and opponents of the amendment. Waivers are provided for violations of clause 2 of rule XXI. This specific amendment printed in the RECORD by Mr. EDGAR could be offered by him or Mr. Coughlin of Pennsylvania.

These amendments are to be offered only in the order here listed and shall have been printed in the RECORD of March 2, 1983.

Finally a motion to recommit with or without instructions is provided with waivers of violations of section 311(a) of the Budget Act and clauses 2 and 6 of rule XXI on said instructions or any amendment required thereby.

Mr. Speaker, this is an extensive piece of legislation working through a host of programs both uniformly and particularly throughout the country. The Rules Committee has allotted, in total, 6 hours for debate on the bill and its amendments and I will, therefore, leave a more detailed explanation of its provisions to those more familiar with them than I.

I do, however, wish to touch briefly on its major points.

H.R. 1718 contains two titles. The first provides $4.6 billion for fiscal year 1983 for emergency employment and humanitarian economic assistance for food and shelter.

The largest single item is for the community development grant program which has been allocated $1.25 billion to be distributed based upon two formulas: One divided 70-30 between metropolitan areas and small cities; the second to areas of high unemployment.

The committee has also provided money for social programs not requested in the President's jobs program. These include; $150 million for low income energy assistance, $100 million for summer youth jobs, $75 million for displaced workers, and $100 million for the women, infants, and children feeding program.

The bill further provides $50 million to the Federal Emergency Management Agency for an emergency food and shelter program.

Additionally, money is included for such diverse purposes as mortgage assistance ($500,000), fish and wildlife facilities ($25 million), flood control ($404 million), military family housing ($243 million), and older Americans employment ($25 million). I would refer Members to pages 4 and 5 of the report for a more complete listing of appropriations.

Title II provides $5.033 billion to the Federal unemployment account. These funds were requested by the President to address their depletion which is expected by mid-March.

Finally, the bill provides $276.1 million in grants to States to process unemployment insurance claims.

Mr. Speaker, I am sure that the President never thought that his policies would result in an unemployment rate of nearly 11 percent. But they did. And I am sure that he had no idea that 12 to 14 million Americans would be unemployed at this time. No idea. But they are. And I am sure that all those unemployed Americans know that the President never thought that unemployment benefits in 1983 would cost $32.6 billion. But they will. And I am sure that the tinkerers and flimflams of economic recovery had no idea that the unemployed would line up thousands deep for a few dozen jobs. But they do, and we have yet to recover from their recovery.

There is virtually no district that is untouched to some extent by the suffering and anxiety of our current economic distress. For that reason, it would be silly to claim that this bill is the answer to that distress. It is far too pervasive and massive.

This bill is not all I would wish that it were. Quite frankly, there are provisions in this bill that I take strong exception to while other items are troublesome in their absence. I had hoped that a provision would have been included to deter the interest on unemployment loans owed to the Federal Government by the States. Michigan, for example, is still trying to repay debts incurred in 1974.

Nevertheless, it represents our first effort to inject money into the economy quickly to put some of our people back to work and to provide humanitarian relief to those who have despaired of seeing it.

I am confident that some of the amendments made in order, if adopted by the House, will make great improvements in this legislation.

It is my hope that the House will move expeditiously today to improve and pass this bill and move on to phase II of our recovery:

I would also like to commend to my colleagues attention an initiative authored by Mr. LUNDINE, Mr. HAMILTON, and myself. Phase III, if you will, would make institutional changes in industrial planning that might help us avoid future vicissitudes of domestic and global economic cycles.

I commend the bipartisan spirit reflected in today's legislation, a measure which should help prod our economy into a faster recovery. But our economic problems will not end with a mere swing in the business cycle.

In key industries, American productivity growth has slowed compared to that of our leading international competitors. The decline in those key industries has heightened the economic disparities between our regions.

Over the last decade, increasingly severe recessions have been followed by less robust recoveries. In each of these ways, and in others, it has become tragically clear that the best our economy can do keeps getting worse and that any recovery may only be a recovery for some.

The answer to our long-term economic problems is not more tax cuts for huge corporations and the wealthy that generate windfall income which never seems to find its way into productive investment. Nor is the answer nearly unlimited defense spending that pulls scarce research efforts away from productive civilian technology.

The Nation deserves better. It deserves a policy that helps our basic industries, which are linked to our entire economy, to replace old capacity with more productive facilities.

It deserves a policy that helps the companies of tomorrow find the high risk capital they need not just to conceive new ideas, but to pust those ideas into production and then out into the increasingly competitive world marketplace.

It deserves a policy that addresses the needs of workers, who after years of working and saving, have now lost their jobs, their homes, and their dignity to industrial change.

It deserves a policy driven by a credible industrial strategy, not ad hoc decisions, a policy arrived at, and supported by business, labor, and Government leaders working together. Our present challange cannot be meet with the old methods of interest advocacy that pit each of us against the other in excalating rounds of charge and counter charge.

The Nation deserves better, and I have been particularly proud that the Democratic leadership has committed itself to developing a long-term recovery program for consideration later this year.

The American dream will not be restored while drowsing in the shade, waiting for someone else to act, or for some magic market force to clear the way. At least this body will have the opportunity to point the way to a new prosperity. And so while this bill is a beginning in this Congress, and a second phase may come some time soon. The measure of this Congress to face up to our real economic curse will be measured by our willingness to seriously partake in a phase three national industrial strategy.

□ 1045

Mr. QUILLEN. Mr. Speaker, I yield myself such time as I may use.

Mr. Speaker, the rule and the bill have been ably explained. I want to point out that yesterday in the Rules Committee we heard some 20 witnesses, many of whom had individual amendments they wanted to make in order. Unfortunately, that could not be done because of fiscal constraints. We did not want to present to the House a bill costing more than the agreement that had been reached by the White House and the majority party of this House.

So I think, as a whole, the rule was crafted in the right way, although I would like to have seen some other amendments made in order, but we had to be restrictive. And when we face the fact that we have the highest unemployment rate since World War II, something must be done. But I want to caution the Members of the House that haste makes waste. I think the way these funds are going to be apportioned to the various districts throughout the United States, will make some Members terribly disappointed because some pockets of unemployment are not going to be reached.

There is an amendment to be offered by the gentleman from Pennsylvania (Mr. EDGAR) and the gentleman from Pennsylvania (Mr. COUGHLIN) to target the funds to a degree that might be satisfactory. But I know in the rural areas that we have high unemployment, we have problems. We need to solve those problems hand in hand with the urban areas which have desperate problems. We cannot be selective in working out legislation to help only one segment of society. It must be worked out fairly across the board.

So haste makes waste. I do not know what this bill is going to accomplish in the end, or how many jobs it will create. But the sound way to create a basic recovery is for industry to go forward, leading to more production, and more permanent jobs, so that all of America will have a happy face. Hopefully, this measure will be fully debated on the floor. However you might feel on final passage, I see no objection to the rule, Mr. Speaker. I would urge adoption of the rule so that we can get down to business and discuss this measure thoroughly, along with the amendments made in order.

Mr. Speaker, I yield 5 minutes to the gentleman from Pennsylvania (Mr. GEKAS).

□ 1100

Mr. GEKAS. Mr. Speaker, I appreciate the gentleman yielding the approprite time.

I oppose the presentation of the rule as it was stated and I do so for some of the very same reasons that the gentleman from Tennessee (Mr. QUILLEN) has enunciated in support of the rule; namely, that we need to debate this bill in its fullest capactity on every measure therein.

In my judgment, Mr. Speaker, the most important feature of this bill is the one on which very little discussion has been conducted, and that is on the unemployment compensation portion.

We all seem to agree 100 percent in this Chamber that probably the only point in this whole package on which there is unanimity is the necessity to replenish the unemployment compensation fund of the United States in order to allow the State who have to meet their unemployment compensation obligations to continue to do so after March 15, we are told. We are all agreed on that.

But what is overlooked is that there has presented itself at this juncture a great opportunity to go one step further in the unemployment compensation and really help the States not just to allow them to have increased borrowing capacity to be able to continue their unemployment compensation payments, but here we have a grand opportunity to help the States at this point in the economic recovery where they most need help and where our citizens who are unemployed most need our help. That is not to, for the first time, impose additional penalties on the States of having to pay back the interest already owed to the United States on the unemployment compensation fund that they have already borrowed.

What I am saying is we are compounding a problem if we do not give them breathing space right at this moment when economic recovery is at hand.

All we have to do in order to make this particular provision on the unemployment compensation replenishment of the fund more basic, more useful to us as a nation, is to allow the several States some postponement, some delay, some deferral of the obligation to pay back interest on that total obligation to the unemployment compensation fund.

Why? If we do not do so we are going to be saying to the States that you now have to come up with the additional funds out of your general fund revenues, which in itself will crimp your own style to the individual States to do other measures to try to help the economic recovery, because each State I am certain is trying very hard to do with its tax moneys whatever is possible to put people back to work. But here while we are saying we are going to create jobs, we are going to help the job situation, we are going to give more money for unemployment compensation, and we are going to do all of the other things the rule proposes, we are also not going to take any steps on the question of interest owing and other obligations owing by the States on unemployment compensation.

On one hand we are saying here is more money that you can borrow, but you had better pay back this other money that is owed in interest right away. That makes no sense right at the time when we have to leave the States with as much capability, fiscally, to deal with their problems, to get their people back to work.

That is what this whole bill is about. If we do not have a jobs provision within the unemployment compensation provisions, we have no jobs bill at all.

So I would urge we defeat the rule so that the Rules Committee can have another opportunity to review this situation and to take into account this basic element of the fiscal problems which a majority of our States face; namely, the dilemma of having to borrow more money from the unemployment compensation fund, and then having to borrow from its taxpayers additional money which they could use for economic recovery to pay back interest on the loan.

We are not saying erase the interest. What we are saying is postpone it to such a time in the cycle of the impending economic recovery so it will allow for more jobs to be created and the Federal Government will lose not one penny. It will simply allow the States to do it in a repayment plan that we all understand and support.

Mr. LATTA. Mr. Speaker, will the gentleman yield?

Mr. GEKAS. I yield to the gentleman from Ohio.

Mr. LATTA. I want to commend the gentleman for the statement he has been making in the well of the House and also for the effort he has been giving on behalf of the States in trying to solve this unemployment interest problem to which he has addressed himself.

Yesterday I proposed an amendment to the rule in the Rules Committee to permit such an amendment to be offered on the floor and it was voted down. But perhaps we will live to fight another day.

Mr. GEKAS. I thank the gentleman and personally want to state my appreciation to the gentleman from Tennessee (Mr. QUILLEN), for permitting me this time and also the gentleman from Ohio (Mr. LATTA), for helping in this situation.

Mr. BONIOR of Michigan. Mr. Speaker, I allocate myself such time as I may consume in order to respond to the gentleman from Pennsylvania.

He has correctly stated my position on this issue. I would have hoped that we could have included this provision, this amendment, along with the other four amendments in this rule. We had a vote, as the gentleman from Ohio (Mr. LATTA) indicated. He offered the amendment. I was supportive of the amendment, but we did not have enough votes.

I think it is important for the gentleman to understand, though, that one of the reasons that this amendment was not made available to this House, or the reason the Rules Committee would not accept it, is the fact that the President has told us that he is not going to go beyond a certain figure, $4.3 billion or $4.4 billion.

There is a cost to this amendment, there is no question about it. The cost will be $200-some million in Michigan over a 2-year period. I think, and it is $180 million in Ohio.

I think the gentleman's points are absolutely on target, but the gentleman ought to understand the reason this amendment will not be considered, and the reason we will not have a chance to deal with these critical problems in Ohio, in Michigan, and in about 27 other States, is because the President has artificially set a limit.

Mr. GEKAS. Mr. Speaker, will the gentleman yield on that point?

Mr. BONIOR of Michigan. I yield for purposes of debate only.

Mr. GEKAS. Mr. Speaker, is it not so that the President has opposed some of the other features of this package which the gentleman has proposed be adopted by virtue of the description of the rule that he presented to the House?

I am sure if the gentleman will look at it circumspectly and follow the President's limitations that he would not be proposing this rule at all in the form he has presented it.

So I cannot accept, and I do respectfully accept the gentleman's agreement that I am on the right track with this, but I cannot accept the argument that that President has put some parameters on the unemployment compensation.

While he has not done so, I believe verbally and every other conceivable way he has stated that the Christmas treeing that some of us think is happening by virtue of your rule is also objectionable to the President.

Mr. BONIOR of Michigan. I would say to the gentleman the rule allows no Christmas treeing. There are only four amendments allowed, and the only amendment in which there is a financial factor involved is the amendment to be offered by the gentleman from Wisconsin (Mr. OBEY), which will be at a cost of about $200 million, which many Members of the minority have agreed with.

The other amendments to be offered do not deal specifically in increases in dollar amounts. The Wise amendment, for example, which we have allowed to be in order, would actually decrease money by doing away with the Stonewall Jackson Dam.

Second, the amendment to be offered by the gentleman from New Jersey (Mr. HOWARD) would not cost an additional amount of money.

Also the amendment offered by the gentleman from Pennsylvania (Mr. EDGAR) which is allowed under the rule would distribute the money on a more equitable basis.

So there is no increase in terms of what we allowed or a Christmas tree with respect to this bill.

The real issue here is whether the President wants to deal with this unemployment compensation problem in our States, and if he does he should support the measure that was offered by the gentleman from Ohio (Mr. LATTA), and as suggested by you and others. But the fact of the matter is he does not.

I yield back the balance of my time.

Mr. QUILLEN. Mr. Speaker, I yield 1 minute to the gentleman from Pennsylvania (Mr. GEKAS).

Mr. GEKAS. Mr. Speaker, I simply want to restate that I do not believe that it is rationale enough to sway this body, that we should not commit this measure back to the Rules Committee to do something more about unemployment compensation on the basis that the President would oppose that because if we look at this thing very analytically I believe that it would not pass muster on the President's desk in its present form in any way. So I will not accept that argument.

I simply want to raise the level of consciousness of this body that we must do something about the unemployment compensation problems that are faced by a majority of the States.

Mr. QUILLEN. Mr. Speaker, I yield 5 minutes to the gentleman from Pennsylvania (Mr. WALKER).

Mr. WALKER. Mr. Speaker, I would urge that the House reject this rule as a rule which does not permit the kind of amendments which this supplemental appropriations bill needs.

We have before us a bill that is being called a jobs bill, an emergency jobs bill. That implies that we are going to do something to help the unemployed, that we are looking at this tragic problem of unemployment out across the country and that Congress is going to do something to help those people.

This bill does not do that. As a matter of fact, this bill may be harmful to those people in terms of getting the economy moving again so that it ends up eliminating jobs. This bill is no assurance whatsoever that those unemployed are going to be given work.

There is an old adage in politics that a lot of us like to use. We say hindsight is always 20-20. Well, hindsight is telling us something. It is telling us that when we have tried this approach before, the unemployed have not gotten employed.

How can I say that? The Office of Management and Budget in 1979 did a study of the program that was passed in the 1976-77 time frame of exactly the same kind that we have here. They found that only 12 percent of the people who were employed as a result of that program had been previously unemployed. They found that only 2 percent of the moneys in the bill actually got to the unemployed; 98 percent of the money went somewhere else. Heaven only knows where. But it did not go to the unemployed.

People were not being employed who were previously unemployed. The people being employed were people who already had jobs because that bill was more about pork than it was about jobs. That is exactly what is wrong with this bill. It is more about pork than it is about jobs.

I asked yesterday before the Rules Committee to offer an amendment. I wanted to offer an amendment which said that 90 percent of the jobs created by this bill had to come from the ranks of the people who were now unemployed. In other words, let us really employ the unemployed. If we are going to spend 4.5 billion bucks, why do we not really offer some employment to the unemployed?

That amendment was turned down by the Rules Committee. They said you cannot even offer that amendment. It was turned down, by the way, on a party line vote. The Democrats all voted against that. The Republicans all voted for it.

In other words, we Republicans were saying that we want to employ the unemployed if we are going to spend this money. The Democrats were saying oh, no, we are more concerned about our pork than we are about the jobs.

It disturbs me. That disgusts me. If we are really talking about jobs in this place why do we not get about jobs?

History teaches us, when this kind of bill passes we are not going to get the unemployed employed. We are really going to employ everybody but the jobless.

The one way to get around that, and the one way to assure we can offer amendments to say that the people employed by this bill are those who come from the ranks of the unemployed is by defeating this rule.

Let us go back and get another rule. Let us even have an open rule. Let us come out here with a rule that will permit us to do some things that will correct the mistakes of the past.

I think it is high time that we begin to look at these things in a way that assures the country that we are really doing what we say we are doing because that is what this bill does not do. This rule does not do that. And I would ask for its rejection.

I thank the gentleman for yielding me this time.

Mr. BONIOR of Michigan. Mr. Speaker, for purposes of debate only, I yield 3 minutes to the gentleman from New Mexico (Mr. RICHARDSON).

Mr. RICHARDSON. Mr. Speaker, I come before you and my distinguished colleagues today to try to insure that this jobs bill helps the unemployed people who need it the most; regardless of whether they live in cities or in rural areas.

I strongly favor Congressman ROBERT EDGAR's amendment that will set aside at least 75 percent of the jobs bill money, not related to humanitarian aide, to communities with the highest actual rate of unemployment. Congressman EDGAR's amendment, supported by other freshmen like myself, is a fair and just compromise that will bring jobs to those areas that need it the most—those areas with the highest rate of unemployment.

I represent the Third Congressional District in New Mexico which is a sparsely populated rural area. The unemployment rate in many communities in my district has soared far beyond the national average—and the unemployment projections show no sign of improvement. In Mora County, N. Mex. 33 percent of the people who live in that mountain community are out of work. The employment prospects for Native Americans are even bleaker. On the Navajo Indian Reservation in northwestern New Mexico, unemployment is running anywhere from 60 to 80 percent. Should the people of my district be penalized because they do not live in an urban area? I hope not.

I want to make sure, Mr. Speaker, that you and my colleagues give serious consideration to the wisdom of Congressman EDGAR's amendment and that the majority of funds generated by the jobs bill are focused where the unemployment rate is the highest, not simply on where the population is the greatest.

Let us not make the mistake of favoring location over need, of favoring cities over rural areas, but let us target labor-intensive projects in areas with the highest rate of unemployment.

□ 1115

Mr. WALKER. Mr. Speaker, will the gentleman yield?

Mr. RICHARDSON. I yield to the gentleman from Pennsylvania.

Mr. WALKER. I thank the gentleman for yielding.

Does the gentleman know that in the last time we had a similiar kind of bill in 1977 that we had it targeted the way Mr. EDGAR suggests and I will probably vote for the Edgar amendment, but does he know that we had it targeted but even so that only 12 percent of the jobs went to the unemployed, the targeting to unemployment areas does not necessarily help, because you still end up with massive numbers of people who are already employed, taking the jobs? And is the gentleman at all disturbed about the fact that even with targeting we might not end up really employing the unemployed?

Mr. RICHARDSON. I agree, but at the same time I think we have to go

wherever there are the most unemployed and targeting is the only answer for areas like mine, rural, not especially favored by a bill like this unless a targeting amendment passes.

Mr. WALKER. If the gentleman will yield further, would he have agreed with my amendment that would have assured that 90 percent of the jobs would have gone to people that are now unemployed?

Mr. RICHARDSON. No; I would not have.

Mr. WALKER. I would ask the gentleman why not? Why not give the jobs provided in this bill to people now unemployed? Is that not what we should be all about? Would that not help the gentleman's district, to make sure that the jobs are going to the people who are unemployed right now?

The SPEAKER pro tempore. The time of the gentleman has expired.

Mr. QUILLEN. Mr. Speaker, I yield 5 minutes to the gentleman from Ohio (Mr. LATTA).

Mr. LATTA. Mr. Speaker, I wonder whether or not we are dealing with a jobs bill, as has been pointed out by the gentleman from Pennsylvania, or whether we are dealing with a pork bill. You know, if we are dealing with a pork bill and we just want to spend $4.6 billion, that is one thing. If we are trying to pass a jobs bill to put people back to work, that is something else.

As I look over all the ways they are going to spend money in this bill, I wonder how many people are going to be put back to work. I wonder whether or not they just have not put a lot of projects, a lot of things into this bill that have been on the shelf for a long time that this Congress has already turned down.

I hope that the Members will take a look at the proposed ways they are going to spend this money and then ask themselves: Will this really put people back to work.

Let me say, I have been around this Congress for 25 years and certainly this bill in its present form, with the exception of the unemployment compensation provisions and a few other rare items, is the purest, rarest, most unadulterated pork I have ever seen. Now, if you want to vote for pork, this is it. I want to commend it to you and say vote for it. But then I want you to go back home and try to explain it, unless you happen to be one of the select and favored few who got money for their districts in this bill, by being at the right place at the right time. You go back home and try to explain why you voted for pork instead of jobs.

For example, there is supposed to be $110 million for mass transit; right? And mass transit is a problem of the urban areas in this country. Well, just take a look at the 11 places—11 places that they have selected to get this $110 million. And also check whose districts encompass the projects. Now, we had a little discussion before the Rules Committee yesterday as to why a third of it, get that, a third of it is going to one area, Dade County, Fla.; $33 million. Well, we never did get a satisfactory answer as to why one-third of the money was going to one county. So let us not go out and say that this is going to help other areas of the country with their mass transit problems. Then to dig a little deeper, you wonder whether or not they are really going to put people on city buses or whether down there they are going to take care of the garage and parking needs of the transit system. So, I just do not think that this bill has been subjected to the light that it needs.

You know the press has now started to look into this bill and how it was put together. Yesterday before the Rules Committee I alluded to an article which appeared in the New York Times about some of the pork in this bill. I am not going to take the time to read it to you, but I am going to insert it in the RECORD in its entirety in case you missed it. Or you might just want to go outside the House Chamber and read it before you vote on this rule and vote on this bill.

Now, the only way, the only way that we can possibly put this bill into shape, if we can do that, is to adopt some of the amendments the Rules Committee has made in order. Even then I question whether or not you can really put it in the shape it has to be in in order to pass it and to secure the President's signature.

You know, when the President indicated that he would go along with the spending of x number of dollars for a jobs bill, I am sure he did not have in mind a pork bill.

As I understand it the gentleman from Massachusetts will be offering a substitute in a motion to recommit and hopefully you will take a look at that. It might correct some of the flaws in this bill, which are in my humble judgment fatal, if we are talking about putting people back to work.

At this point I will insert the New York Times article mentioned earlier:

MONEY IN JOBS BILL IS SPREAD AROUND

WASHINGTON, March 1.—Representative Robert J. Mrazek of Long Island, a first-term Democrat with scarcely two months in Congress, got his first look recently at how the House Appropriations Committee works. It was worth $15 million for a section of the Long Island Rail Road that runs through his district.

As the junior Democrat on the Transportation Subcommittee of the House Appropriations Committee, Mr. Mrazek recalls being surprised at how quickly the decision was made to include the money in a $4.6 billion jobs bill.

The $15 million would provide electrification for a section of the railroad, a project that is not listed in the Long Island's five-year plan.

But, Mr. Mrazek recalls, "all members of the subcommittee worked together to select worthwhile projects which would produce a substantial number of jobs." Then he added, "Needless to say, for most of us these projects were in our districts."

There were no public hearings, no public drafting sessions, no public notice of where the money would go until a draft bill appeared last Friday for a full Appropriations Committee meeting.

PRIVATE MEETING HELD

But several people confirm that the chairman of the subcommittee, Representative William Lehman, Democrat of Florida, met privately with other members of the panel and told them how much money would be allocated in the bill for transportation.

"If you've got a project let me know," is how one person recalls Mr. Lehman's message.

Critics deride this behind-the-scenes process as "pork barrel," saying Federal money is allocated on the basis of political influence rather than strictly by national need.

Despite the possible criticism, however, subcommittee members have been very successful at getting a piece of the action for their areas.

There is $110 million in the bill for mass transit, most of it earmarked for the districts represented on the 10-member transportation subcommittee, and the balance set aside for areas represented by members of the full committee or the House Speaker, Thomas P. O'Neill Jr., a Massachusetts Democrat. The biggest amount, $33.8 million, would go for parking garages and a bus repair garage in the Dade County, Fla., area represented by Mr. Lehman.

There is $110 million in the bill for Amtrak, $12 million of which would be used for rail service projects sponsored by committee members and $90 million for a priority list of improvements sought directly by Amtrak.

There is $33 million for highway demonstration projects, and while there is no mention of how the money would be spent, Republicans and Democrats alike say they expect the funds to end up in the Mississippi district of the Appropriations Committee chairman, Jamie L. Whitten, a Democrat.

OTHER AREAS INVOLVED

The practice of funneling money to those with influence has not been limited to transportation funds. Many Democrats are upset, for example, that the jobs bill contains $404 million for emergency flood control, about half of which would go to Mississippi River areas, a program important to Mr. Whitten.

"That's the way it goes," said Kevin Lynch, an aide to Representative William R. Ratchford, a Connecticut Democrat and subcommittee member who gained $6 million for a bus garage in Hartford.

"That's just normal politics," agreed John Shelby, an aide to Mr. Lehman.

The only member of the subcommittee who did not get money for a transportation project in his state was Representative Jack Edwards, an Alabama Republican. Asked about that, he replied through an aide, "Am I really the only one who doesn't have anything in there?"

MANY MEMBERS HAVE PROJECTS

Other members with projects in the bill include:

Carl D. Pursell, Republican of Michigan, who picked up $3.5 million for a "people mover," or moving sidewalk, that is not in

his district, but in nearby Detroit. He also got $1 million to renovate an Amtrak station in Jackson, Mich., and $350,000 for a "dial-a-ride" bus project in Hillsdale, Mich.

William H. Gray, a Democrat, and Lawrence Coughlin, a Republican, who teamed up to secure $7.2 million to improve Philadelphia's commuter railroad.

Bob Carr, a Michigan Democrat, who got $1 million for a railroad station in East Lansing, Mich.

Silvio O. Conte of Massachusetts, the senior Republican on the Appropriations Committee and a subcommittee member, who saw to it that there was $10 million to improve rail service in an area of the state away from his district. The area was not on Amtrak's list of priority projects, agency officials said.

In addition, there is $20 million for mass transit in Boston and its suburbs, an area represented by Mr. O'Neill.

There also is $8 million in mass transit money for Vic Fazio, a California Democrat from the Sacramento area. Mr. Fazio is a former member of the transportation subcommittee, and earlier had gained $25 million for the project. But one House source said committee members also wanted to reward him for taking the lead last year in securing a pay raise for House members.

Mr. BONIOR of Michigan. Mr. Speaker, I yield myself such time as I may consume.

As I indicated earlier in my remarks this is not a perfect bill, it is the workings of many people to try to reach a solution to a very serious problem.

We have worked with Republicans, we have worked with Democrats, we have worked with Members of both bodies in this Congress.

You know, it is easy to label something as "pure pork," but I would suggest to my colleagues there are some very fine things in this bill, some very needed things: Low energy assistance, money for displaced workers, summer youth jobs. There are some very decent humanitarian things in this bill: Food and shelter for literally tens of thousands of people who are going without in this country—$100 million for women, infants and children. And of course Mr. OBEY's amendment to deal with the tremendous health crisis.

The gentleman from Ohio (Mr. LATTA) said you know if the President knew some of the pork was in this bill he would not want to be a part of it. Was he referring to the repair of GSA Federal buildings? Is he referring to mass transit grants to move our people? Is he referring to the Amtrak grants? Is the President opposed to that, is the President opposed to the community block grant development programs? Is he opposed to the women, infant, and children feeding programs? Is he opposed to the food distribution and shelter in this bill?

There are some very good things in this bill. I would suggest to my colleagues before they consider this as a pure pork bill they ought to take a look on pages 4 and 5 in the report and see just exactly what is in this bill. It puts people to work in needed areas of this country. It is not a panacea, but it is a first step.

I look with great anticipation to help from my colleagues on the right side of the aisle when we come in with phase 2 to deal with putting, as Mr. WALKER refers to, the people who are unemployed back to work.

We will have a component in there for Mr. WALKER, we will have a component that deals with putting the people who are unemployed back to work in terms of public services jobs. We will see how much support we get.

Mr. Speaker, I would hope my colleagues look at this bill with fair eyes to understand it is not the cure-all and the panacea for all the problems that we have but it is a beginning, a start.

The SPEAKER pro tempore. The gentleman from Michigan (Mr. BONIOR) has 9 minutes remaining and the gentleman from Tennessee (Mr. QUILLEN) has 11 minutes remaining.

Mr. QUILLEN. Mr. Speaker, I yield 2 minutes to the gentleman from Massachusetts (Mr. CONTE).

Mr. CONTE. Mr. Speaker, I have been listening to the debate here. There has really been nothing new said, apart from my colleagues picking up on my comments at the beginning of this debate about targeting assistance to areas of high unemployment. I have been working with Congressman EDGAR from the very beginning on the targeting amendment, and have included it in my motion to recommit. I feel very, very strongly that anything in this bill should go to areas of high unemployment, and our amendment provides that at least 75 percent of the job-creating money in title I of this bill shall go to areas of high unemployment.

I will have a motion to recommit. As we move along in debate today I will explain that motion to recommit in greater detail. I think it straightens out a lot of the things that are in here. It still does not make it a perfect bill. I do not like the bill. I think it is a real turkey—I mentioned that earlier. I have said before that this bill is like a suppository. It will give you temporary relief, but it is going to hurt like anything down the line, and this bill is really going to hurt down the line, let me tell you.

Nevertheless, i think we ought to adopt the rule. As I said before the Rules Committee yesterday, we have over $5 billion in this bill for unemployment compensation, some 29 States are going to be running out of funds by March 15. So, we are in a crisis situation.

Let us work our will here, today, let us see what amendments are adopted, let us see what happens to the motion to recommit.

We will take some of the boondoggles out of this bill in our motion to recommit, and will try to direct this money to more labor-intensive projects and to those areas of the country with high unemployment that desperately need this assistance.

I therefore urge my colleagues to vote for the rule and let the Congress work its will.

Mr. QUILLEN. Mr. Speaker, I yield myself such time as I may consume. I have no further requests for time but I want to urge the House to adopt the rule. However we may feel about the bill, itself, I think it deserves thoughtful consideration.

Mr. Speaker, I yield back the balance of my time.

Mr. BONIOR of Michigan. Mr. Speaker, I would concur with the remarks of my dear colleague and friend, the gentleman from Tennessee. I hope we do adopt the rule.

Mr. Speaker, I move the previous question on the resolution.

The SPEAKER pro tempore. The question is on ordering the previous question.

The question was taken; and the Speaker announced that the ayes appeared to have it.

Mr. GEKAS. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 299, nays 117, not voting 17, as follows:

So the resolution was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

PERMISSION FOR COMMITTEE ON APPROPRIATIONS TO FILE PRIVILEGED REPORTS ON DEFERRAL DISAPPROVAL RESOLUTIONS

Mr. WHITTEN. Mr. Speaker, I ask unanimous consent that the Committee on Appropriations may have until midnight tonight to file privileged reports on seven deferral disapproval resolutions, House Resolutions 73, 74, 75, 76, 77, 80, and 90.

The SPEAKER pro tempore (Mr. MINISH). Is there objection to the request of the gentleman from Mississippi?

There was no objection.

GENERAL LEAVE

Mr. WHITTEN. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the bill (H.R. 1718) providing emergency expenditures to meet national needs, and that I may include tabular and extraneous matter.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

SEARCH COMMITTEE SEEKS REPLACEMENT IN POSITION OF CBO DIRECTOR

(Mr. JONES of Oklahoma asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. JONES of Oklahoma. Mr. Speaker, I take the floor to notify all Members of the House of the procedures we intend to follow to secure a replacement for the Director of the Congressional Budget Office. As we all know, the current Director of the Congressional Budget Office, Dr. Alice Rivlin, has announced that she will not seek reappointment to that position.

Dr. Rivlin has served two terms in the position of CBO Director. She has built a distinguished reputation in that position and assembled a first-class staff at CBO to aid Congress in its work.

Some of us can recall the time when Congress had no Congressional Budget Office to help analyze the fiscal and economic effects of our actions. The Congressional Budget Office, which was created as part of the Budget Control and Impoundment Act of 1974, has made a major difference in our ability to compete with the executive branch in economic and monetary analysis. Much of the credit for that success goes to Alice Rivlin, who approached her job in a nonpartisan manner and ably defended her analysis when challenged.

Congress will miss her expertise and hard work. I am sure that she will not absent herself from future policy debates, but the immediate task we face is to choose her successor as Director of CBO.

The Congressional Budget Act provides that the House and Senate Budget Committees have the responsibility to recommend a candidate for CBO Director to the Speaker and President pro tempore of the Senate, who must then jointly sign the appointment papers to confirm the Director of CBO.

Because the institution of CBO is so important to Congress, I have explored the proper method to select a new Director for the CBO with our leadership, the ranking minority member of our committee, and with Chairman DOMENICI of the Senate Budget Committee. We are all in agreement that Congress will be best served if the search for a new CBO Director can be conducted in a bicameral manner through the auspices of a joint House-Senate Search Committee, made up members of the House and Senate Budget Committees.

The Search Committee will examine nominees for the job of CBO Director, and will interview leading candidates in closed session with the intention of making a recommendation of a name or names to the full Budget Committees after the Easter district work period. The full Budget Committee of each Chamber will consider the recommendation of the Search Committee and in turn make a recommendation to the leadership of each Chamber for appointment.

Because this process will take place at the same time that the first budget resolution for fiscal year 1984 is being constructed, the Search Committee will try to move as quickly as possible in order to appoint a CBO Director. Dr. Rivlin has graciously agreed to remain in her post until after the first budget resolution for fiscal 1984 is passed, and we must be mindful of her needs and the importance to CBO as an institution of moving quickly to find a suitable replacement. Because of this need for timely action, the Search Committee will be constituted immediately so that the necessary work may begin. With the consent of the Speaker, I have asked the distinguished majority leader of the House, JIM WRIGHT, to serve as a member of the Search Committee. I have also asked the gentleman from South Carolina, Mr. DERRICK, to serve as the other majority member of the Search Committee, along with me. The ranking minority member of the Budget Committee, Mr. LATTA, will serve on the committee, and he has asked that Mr. FRENZEL also be appointed. Thus the Search Committee House delegation will reflect a 2-to-1 ratio. The chairman of the Senate Budget Committee will cochair this Search Committee with me, and it will be comprised of three members of the majority and two members of the minority of the other body.

Because of the difficult task that lies ahead, the Search Committee would like all nominations for the new Director of the Congressional Budget Office to be turned into the chairman of the Search Committee by March 11, 1983, at the close of business. That will be the cutoff day for nominations to be considered by the Search Committee. Further meetings of the Search Committee will be held in public. Nevertheless, because of the nature of the process, and because personalities will be discussed, the Search Committee will undoubtedly choose to close most of its sessions to preserve confidentiality for nominees under consideration.

It is my sincere hope, and I believe the hope of Chairman DOMENICI, that all Members will feel free to participate in furthering the consideration of this matter.

EMERGENCY APPROPRIATIONS, 1983

The SPEAKER pro tempore. Pursuant to House Resolution 113 and rule XXIII, the Chair declares the House in the Committee of the Whole House on the State of the Union for the consideration of the bill, H.R. 1718.

The Chair appoints the gentleman from Michigan, Mr. BONIOR, to preside over the Committee of the Whole.

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 1718), making appropriations to provide emergency expenditures to meet neglected urgent needs, to protect and add to the national wealth, resulting in not make-work but productive jobs for women and men and to help provide for the indigent and homeless for the fiscal year 1983, and for other purposes, with Mr. BONIOR of Michigan in the chair.

The Clerk read the title of the bill.

The CHAIRMAN. Pursuant to the rule, the first reading of the bill is dispensed with.

Under the rule, the gentleman from Mississippi (Mr. WHITTEN) will be recognized for 1 hour, and the gentleman from Massachusetts (Mr. CONTE), will be recognized for 1 hour.

The Chair recognizes the gentleman from Mississippi (Mr. WHITTEN).

Mr. WHITTEN. Mr. Chairman, I yield myself such time as I may require.

Mr. Chairman, may I say that the job we have here today—and it is a job in itself—is one that I did not volunteer for, but I was more or less drafted to do. However, being drafted as I was, I felt it is an area where we need, as I see it, to work together for the good of the country.

There is no question that unemployment is rampant over the country. There is no question that many, many people are in bankruptcy, and the situation is growing worse. I read in the papers that the stock market has picked up, but we know that the stock market has picked up in times past when the bottom was falling out. Now is the time that we do something for the unemployed people of our country.

May I trace briefly with the Members the legislative situation that we have here. Last year I was asked to deal with a bill that was referred to our Committee on Appropriations that amounted to jobs relief to be distributed over the United States. It was my advice that there was no way that the Congress should pass such a bill as it was proposed. After conferring with my friends who had introduced it, the authors, the gentleman from Kentucky (Mr. PERKINS), the gentleman from Texas (Mr. WRIGHT), the gentleman from Minnesota (Mr. OBERSTAR), and the gentleman from California (Mr. HAWKINS), we rewrote it into a jobs bill in the Committee on Appropriations.

May I say that when the pressure was on us to come up with a jobs bill, I did not know any better way to approach it than the way we did.

Then during December in connection with the continuing resolution, we developed a jobs bill which the House passed, and which the President had said in the newspapers he was going to veto. Later in conference, it was withdrawn with the approval of the leadership of the House. This year I called the subcommittee chairman of the Appropriations Committee together and asked them to bring to us those projects in their respective jurisdictions which take care of our country's needs and create jobs. Many of these programs have been justified but not funded. I do not know how we could go about getting a better base on which to start, because the Appropriations Committee and its 13 subcommittees each year holds hundreds of days of hearings before the committees. That is an annual procedure. In the last Congress, the 97th Congress, we had over 11,000 witnesses, Americans, that come before us and testify in behalf of various projects.

So there is no better starting point, in my opinion, than to ask the subcommittee's who are familiar with it and the subcommittee chairmen to bring forward the needed projects, again those which had been justified but had not been funded, as a starting point toward putting people back to work.

Please remember, last year's bill was passed by the House, and it went to the Senate. We were in process of working out a compromise with our counterpart on the other side, and the President announced that he was going to veto it if we tried to move with a jobs title. At that point I came to our leadership and said, "The President has said in advance that he is going to veto it, and we might just as well withdraw it." So we went ahead and did withdraw it.

Mr. CONYERS. Mr. Chairman, will the gentleman yield?

Mr. WHITTEN. I will yield in just a moment. On January 6 of this year I reintroduced virtually the same jobs bill, figuring that when we came back here, we doubtless would take up that jobs bill again.

Mr. Chairman, I yield to the gentleman from Michigan.

Mr. CONYERS. Mr. Chairman, I thank the committee chairman for yielding.

May I ask, why is this not called a supplemental appropriations bill rather than a jobs bill?

Mr. WHITTEN. Well there are so many different programs in there that I believe are needed to describe the efforts being made here because they said they hated just to have jobs created.

May I briefly describe the situation? In the other jobs bill, it was sold to the country as creating jobs. The difference between this bill and that bill is that we get something of real value for our dollars in this bill. We are doing some work to improve and protect our country. The person gets a job working for the country, and the country ends up in better shape and richer. So this creates a job, it creates work which improves our country and adds to our basic wealth. That is the difference here.

One of my friends said to me that we have a bill that intends to create jobs. We have got plenty of jobs to do if we look around our country, and that is what this bill does. The jobs have been provided, but it has not been played up in just that way, the emphasis is different.

Mr. CONYERS. Mr. Chairman, will the gentleman yield further?

Mr. WHITTEN. I will be glad to yield to the gentleman from Michigan.

Mr. CONYERS. Mr. Chairman, I thank the committee chairman for that information.

My inclination is not to support this legislation because it insults the obvious fact that there are somewhere between 16 million and 20 million people out of work, and calling this a jobs bill in March 1983 is to mislead millions of people out of work and millions more that are probably going to end up out of work.

Mr. WHITTEN. Mr. Chairman, if the gentleman will allow me to proceed, I will touch on that.

Let me say that with the constraints in which I was put in this case, instead of calling up my bill which I had introduced on January 6, there was a meeting between the leadership and the President's representative, in which an agreement was reached, according to the press, of around $4.3 billion in relief. The intention, as I understand it was to get a bill that could be signed. This was not my decision. I would not say I was dissatisfied with it, but it was not my decision.

Then I was more or less drafted again into bringing out a bill that would stay within the reasonable limit, so that would be signed. So we had those wraps around us to start with.

So with that understanding, let me go into how we proceeded. Again let me say that I have not heard any complaint here up to now that we are paying out $32 billion a year on unemployment compensation, and in this bill we are providing an additional $5 billion to pay unemployment compensation.

Keep in mind that however necessary that is to the individual who gets it, it does not contribute one activity to the wealth of this country. May I say to my colleagues that if we had passed the bill which we had last year, which was in effect vetoed in advance, I think the $5 billion in this bill for unemployment compensation would be down to about $3 billion. We need to get the economy moving, and the best place to do it is to get value received, plus the jobs and plus the economic activity. Again I say that I was under an overall constraint, and I daresay that most members on the Appropriations Committee were not satisfied to have those wraps put around us. But if we are going to get a bill signed, we were told that was necessary.

□ 1215

So may I say again that in the Appropriation Committee we went to the subcommittees who know the most about these problems, this was during the February recess. I have cleared this with the subcommittee, we arranged it by jurisdiction, by those folks who understand the problems in their own areas.

Now, in this bill there are many things that are a must in my opinion. If we are going to get value received—and maintain and improve the real wealth of our country rather than our

paper money. If our money was backed by gold and silver and had an intrinsic value, it would be one thing. But in order to protect the paper money viewpoint or the bookkeeping as it shows, they are letting our country go down the drain.

So here we are getting worthwhile work which provides jobs. And I think, in view of the way the country has been sold on jobs, we should have spelled out that to a greater degree. But here we are getting value received for what we spend.

Now, you come and say, "Well, what did you do about the various areas?"

We have had three of the so-called 100-year floods in the Mississippi Valley, which drains 40 percent of your country. Unless it is repaired, those gaps in the levees, and those things that are broken down completely will not protect our land from the next rain and it will do 10 times the damage that has already been done.

We had the disastrous snow problem in New England and the entire Eastern side of our country, where the watersheds are, if you do not keep the watersheds safe and get them restored, you are going to have more and more flooding and future problems. In this Mississippi Valley area, water drains from Minnesota and Wisconsin, moves down the Mississippi, and these past few months we had over 9 million acres flooded. We had over 3 million acres down around New Orleans flooded. These problems cannot be ignored they must be restored. Why not put our people to work where they get back to paying taxes, get off of the unemployment rolls, and at the same time you end up a richer country because you restored it.

In this bill we have provisions for that which restores our country, and protects our country.

In the community development program we provided that of the $1 billion that will be distributed would be on a 70-30 basis, which is the law. But in an effort to reach the urban areas, where there is a higher rate of unemployment, we added a quarter of a billion dollars directed toward those urban areas where you have high unemployment conditions.

So may I go back, then, to say that your committee has tried every way it could to see that we reduce the money that is going out at the same time that we see some of it go out for productive employment. Nobody should complain about that.

Mr. CONYERS. Mr. Chairman, if the gentleman will yield, using the gentleman's theory, which I think is as good as any around, why did we not then make this a $30 or $40 billion emergency assistance supplemental appropriation package?

Mr. WHITTEN. Because there was an agreement between our leadership and the President that if they stayed in this area, he would sign it. Now, as I told the gentleman, I was not a party to it. I was called in afterwards. I cannot take issue——

Mr. CONYERS. An agreement with the President beforehand?

Mr. WHITTEN. May I say that this was not my decision. Let me finish if I may, because, having said that, those who feel that that is the best approach will have to answer that question. May I proceed?

Now, in connection with this overall situation, may I point out again that our real wealth is our land, our houses, our roads, our factories, our harbors, the country itself. Unfortunately, our money is paper money today. It is not gold and silver. It does not have an intrinsic value.

I have had a number of people call me and say, "Why did you put this humanitarian money in here?" I tell them that when people are unemployed, out of work, they need to be housed and fed, and I make no apologies for it. And what gets me is that you do not have to go to Mexico or to South or Central America to find people living on the streets. Recently they were forced to come out at night during the snow storm. And I am proud of having recognized this need and having put it in here.

We also took care of our hungry by soup kitchens, going along the line of looking after people. But you look after people at the same time you protect the real wealth that we have, which is our country. And whatever may be said about economics and making our bookkeeping look good, it is far more important to protect our wealth.

May I say, you can leave all of your children and your children's children all of the money in the world, but without a strong country you have got nothing. In this bill we protect and restore the country and get value received.

We have leaned over backward to see that the formulas are handled in such a way that it goes to rural areas where people are facing bankruptcies and where small businesses are going into bankruptcy. We have also tried to reach northern cities where the situation moneywise and peoplewise is far more acute. We put special language in for that, and even though they got 70 percent of the original billion dollars. We put in another quarter of a billion dollars to reach those areas. So I say we have been fair.

I would like to touch on the Edgar amendment. Mr. EDGAR is a very conscientious Member of Congress. But when I read his amendment, it would slow down rather than accelerate programs, and nobody here, including Mr. EDGAR, in my opinion, wants that. I have serious questions what the effects will be except that it will throw wrenches into the works of this program and delay it, because goodness only knows how it would be construed.

And there is another thing. Let me say this: The worst thing you could do with the economic situation that we all face is to drive a wedge between the 85 percent of small towns and the 15 percent in the cities in this Nation. I have done my best here, and I have always tried to do so. In the past I supported the Chrysler loan, and I voted to support New York City, both of these are vital parts of our country. And to say that folks affected by these things should look after themselves, let me tell you this: A man who handles a national program and leaves his district out, better not go back home. I want to say something else: Those of you who may want to leave this up to the executive branch, you better read the record. Our committee is conducting hearings now that show that everything the Congress wrote into its bills has been stricken out, and what is left is what the executive branch wants. I am not just talking about this administration. Every administration.

Our Committee on Appropriations spends its time listening to our colleagues and constituents and we try to do something about it. I want to keep on trying to do something about it. Those who might want to turn this selection over to the executive branch, have not read the record. And I cannot understand their being shortsighted enough to ever do that, because it is a constant effort, regardless of who controls the administration.

So, I tell you that what we have is a bill where you get something for what you spend; we have the resulting jobs; we end up a richer country instead of a poorer country. And we try to reduce this $32 billion in unemployment compensation that everybody is willing to spend each year for continuing to be unemployed. Nobody mentions that.

Again, let me tell my friends, the leadership fought in the best interest of the country to get a bill signed. That was their decision. I cannot say that I have to argue with it, because if it does not get signed, while it might have some political benefit, we would be losing the jobs, we would not get anything and the country would suffer. So the decision was made. And I just want to tell you how I was drafted into this. All I had to do here was to get along with 435 of my colleagues, the President, our leadership, Mr. HATFIELD in the Senate and others. I honestly do not know how we could have done better. I ask my colleagues not to have some last minute gadgets put in here that turns the selection of these things over to the executive branch. Do not put something in here now that will have the effect of slowing it down. Let us look after our country.

I am proud of the record of our committee, and I am proud of having brought this bill here. I came here today under constraints with about half a dozen things to do, and I could not have done them without the help of the subcommittee chairmen, because each subcommittee chairman handled his section of the bill, and they will handle it here today. My job has been to try to bring it together. I do not know of a better way to bring it together than this proposition we have before us today.

I would like at this point in the RECORD to insert the highlights of the bill that we have before us today and ask for all of your support.

BILL HIGHLIGHTS

Title I—Meeting Our Economic Problems With Essential and Productive Jobs

	Amount
Business and housing plans	$500,000
GSA—repairing Federal buildings	125,000,000
Highway demonstration projects	33,000,000
Mass transit grants	110,000,000
Amtrak grants	110,000,000
Repairing VA hospitals	75,000,000
Expedite emergency mortgage assistance	500,000
Community development block grants	1,250,000,000
Urban development action grants (deferral disapproval)	(244,000,000)
Economic Development Administration	200,000,000
SBA—new direct loans	202,000,000
SBA—natural resources development	50,000,000
Repairing urban parks	50,000,000
Improving and maintaining our national parks	50,000,000
Preserving our national forests	45,000,000
Indian health facilities	39,000,000
Fish and wildlife facilities	25,000,000
Bureau of Indian Affairs	20,000,000
Rural water and sewer grants	200,000,000
Farmers Home Administrative expenses	6,500,000
Resource conservation and development	15,000,000
Soil Conservation Service—flood prevention	160,000,000
Corps of Engineers—emergency flood control	404,000,000
Bureau of Reclamation	101,000,000
Tennessee Valley Authority	40,000,000
Repairing prison facilities	90,000,000
Family housing for the military	243,000,000
Low-income weatherization—DOE	150,000,000
GSA—Federal motor vehicle replacement	75,000,000
Employment and training assistance:	
Jobs Corps	32,400,000
Summer youth	100,000,000
Displaced workers	75,000,000
Older Americans employment	25,000,000
Community and home health services	30,000,000
Home health services	(10,000,000)
Maternal and child health	10,000,000
Alcohol, drug abuse and mental health	30,000,000
Social services block grants	150,000,000
Day care	(50,000,000)
Head Start	30,000,000
Community services block grants	25,000,000
School facilities	35,000,000
Humanitarian assistance plan	250,000
Distribution of agricultural commodities	75,000,000
Women, infant and children feeding program	100,000,000
Food distribution and shelters—FEMA	50,000,000
Subtotal, title I	4,637,150,000

Title II—Supplemental Unemployment Appropriations

Advances to the unemployment trust fund	$5,033,000,000
Grants to States for unemployment insurance and employment services (trust funds)	(276,100,000)

Mr. PEPPER. Mr. Chairman, will the gentleman yield?

Mr. WHITTEN. I yield to my colleague, the gentleman from Florida.

Mr. PEPPER. I thank the gentleman for yielding.

Mr. Chairman, I understand this bill provides $1,250,000,000 for community development block grants and that funds under this program may be used for public works and public facilities. The school district which I represent has already identified over $760 million in school improvement projects for which there are no funds. Many of these projects required minimum startup time and could put some of our unemployed people back to work in labor-intensive jobs without delay.

Is it the intent of the gentleman's distinguished committee that some of the funds provided for community development block grants can be used for public school facilities?

Mr. WHITTEN. That is the intention of the committee.

Mr. PEPPER. But school districts are to be considered like any other?

Mr. WHITTEN. The gentleman is correct insofar as the committee bill is concerned, it provides for that.

Mr. WALKER. Mr. Chairman, will the gentleman yield?

Mr. WHITTEN. I yield to the gentleman from Pennsylvania.

Mr. WALKER. I thank the gentleman for yielding.

Mr. Chairman, I just have a couple of questions on the gentleman's statement that I would appreciate his answering for me.

The gentleman says that he is proud of the bill that he brings forward, and I believe that to be the case.

Mr. WHITTEN. I thank the gentleman and I trust he agrees that when we put people back to work and get value received for the country, the country benefits.

Mr. WALKER. If the gentleman will remember, this gentleman is for having 90 percent of the jobs go to people who are now unemployed. But the question I have——

Mr. WHITTEN. Do I understand the gentleman is for a different bill than what we have got?

Mr. WALKER. I am for having a bill that actually employs the unemployed. The approach that the gentleman had supported before has ended up by having 88 percent of the people coming from the ranks of the unemployed.

Mr. WHITTEN. Does the gentleman mean he is for Government jobs as against letting contractors get busy restoring the damages of a flood from one coast on down to the——

Mr. WALKER. I am saying that this gentleman is for having 90 percent of the jobs go to the unemployed, and that is not in the gentleman's bill.

But let me ask the gentleman about some of these things. The gentleman's bill, in the transportation area, has as one of the high priority items in mass transit in this country the building of, I think it is, bus sheds in Dade County and a moving sidewalk somewhere in Michigan. Does the gentleman really tell me these are some of the high priority projects that this country needs to address?

Mr. WHITTEN. To those who live in that area—I am sure this is of interest and need. If the gentleman would yield I would like to continue my statement. The gentleman makes it clear that he is against all of this. Is it all right with him to pay unemployment compensation, where you get nothing in return? But is he against anything where the country gets value received in those areas—where you have mass transit?

Mr. WALKER. Including moving sidewalks?

Mr. WHITTEN. I have every reason to believe that the President will sign it. I did not talk directly to him. So I do not know.

Let me tell you one other thing we have in here. With about 40 percent of small businesses and others facing bankruptcy, we could not put the big money in here, but what we did was this: We put $500,000, and called on the Secretary of the Treasury to send up a plan for a HOLC type organizations or corporations to prevent foreclosure of homes. We also asked them to send up a plan for a RFC type organization where the lenders and borrowers could go in and correct the matter.

□ 1230

Then we also set up a plan to examine farm credit problems. We asked them to do what was fair and right. We asked them to stop foreclosures of homes, stop putting people out, and

let them rearrange their debts so they could pay it.

I do not believe you can improve on that. I cannot find any fault with it, and you cannot find any fault.

I repeat: We tried to treat everybody in every section of the country fairly, and we left enough latitude so that whoever runs it can adjust to the realities of each situation.

We have tried to protect people in their homes, tried to protect them in their jobs, and provide productive employment so when they work, the country ends up a richer country.

Mr. YATES. Mr. Chairman, the Interior and related agencies appropriations programs in this bill total $379,000,000 to stimulate jobs and at the same time enhance our Nation's resources and the energy conservation effort.

The largest single item is for the low-income weatherization program for which we have provided $150,000,000. We believe this is a wise investment for several reasons. Most importantly, it will put people to work. Direct employment created as a result of this program is estimated to be 8,000. This includes those who install the insulation materials and those who manufacture insulation materials. There is a strong demand for the program. A conservative estimate is that 6,000,000 low-income homes remain to be weatherized. These funds are sufficient to weatherize 150,000 of those homes. The mechanism to get the work done in a timely manner exists and as an extra benefit energy is saved where there is the least ability to conserve. Providing the money now has the added advantage of having the weatherization in place for the next heating season.

Many of you have asked about a jobs program patterned after the civilian conservation program of the 1930's. Unfortunately, the framework for reestablishing that most valuable program no longer exists. Similarly, the YACC program, the Young Adult Conservation Corps, is not authorized. We have, however, included $50,000,000 for the National Park Service for cyclic and operational maintenance and for rehabilitation of structures, roads, trails, fences, and other facilities of the national park system. As we stated in the report accompanying the bill, we would support the use of these funds to transport and house urban and rural unemployed to parks with vacant residential YCC or YACC facilities to do productive work.

In addition to the $50,000,000 for the Park Service, the bill also includes $25,000,000 for maintenance of forest roads, trails, and facilities of the Forest Service and $25,000,000 to permit the Fish and Wildlife Service to contract for maintenance and rehabilitation of structures, roads, trails, and other facilities at wildlife refuges, hatcheries, and research stations.

For related improvements in the Forest Service, there is $20,000,000 for health and safety rehabilitation projects in national forest recreation areas. Many of the forest recreation sites are old, or have developed potentially unsanitary conditions and this program will accelerate revitalization and correct problems at 150 sites.

For our Indian people, where unemployment is currently running as high in some areas as 60 to 80 percent, we have two programs. There is $39,000,000 in the bill for construction and/or provision of domestic water supplies, waste disposal facilities, and other essential sanitation facilities for Indian homes, communities, and lands. The Indian community will also benefit from $20,000,000 for acceleration of planned activities on Indian reservations. Included are such activities as brush control, seeding, sodding, and drainage of agricultural and rangelands, as well as forestation and timber stand improvement activities.

We have not been negligent in providing resources for urban areas either. There is $50,000,000 for the urban park and recreation recovery program to stimulate jobs and to serve as a catalyst for the revitalization of many urban neighborhoods, especially those where unemployment is high.

Mr. Chairman, we have been selective in the programs for this bill. We have placed a premium on those programs where the mechanism for quickly using the appropriated funds exists, where the maximum number of people will be put to work and where all of the people will benefit. I urge everyone to support the bill.

Mr. CONTE. Mr. Chairman, I yield myself as much time as I need.

Mr. Chairman, the most essential portion of this legislation is contained in title II, which provides slightly more than $5 billion for urgently needed advances to the Federal and extended unemployment accounts.

Representatives of the Department of Labor have testified, and as recently as yesterday the Office of Management and Budget has confirmed, that by March 15 the Federal Government and some 29 States will run out of money with which to pay unemployment benefit compensation. It is clear, therefore, that we must pass title II of this bill, and as quickly as possible.

Title I of this measure has been characterized by some as a jobs bill, designed to create jobs and meet national needs. In my view, such a characterization is unfair to the American public, because it claims too much.

Certainly this bill does contain some funds for worthwhile programs that will help put people to work within a reasonable time, proving that if you fire over 4.6 billion shots, some of them are bound to hit the target, even if it is only by chance alone.

Among the more productive proposals in this bill are the provisions of $125 million to repair Federal buildings; $200 million for the Economic Development Administration, to stimulate local economic development in both urban and rural areas; $50 million for the Federal Emergency Management Agency, to provide emergency food and shelter to needy individuals through private voluntary organizations; $75 million to provide surplus food for the needy; $25 million for community service employment for older Americans; $75 million for training and employment services for displaced workers; and $100 million for summer youth employment.

Unfortunately, the catchall, something-for-everyone approach that was used in drafting this bill misses the mark more times than not.

Let us look at the $200 million for rural water and waste disposal grants, a 160-percent increase over the regular fiscal year 1983 appropriation of $125 million. The spend out rate for this program is so slow, that it would take until 1989 to spend $200 million. Less than $80 million would even be spent by the end of 1984. We have checked this with the Department.

That reminds me of that old song, "You take the high road and I'll take the low road, and I'll get to Mississippi before you."

Mr. Chairman, just look at some of the items in this bill. It has $50 million for a Small Business Administration "natural resources development grant program." In my 24 years on the Small Business Committee, I have never heard of such a program. It does not exist. This money is for tree planting, and I can tell you that the small businessmen and women in my district do not want to plant trees—they want the Federal Government to reduce the deficit and stop crowding the capital markets, so that they can get back in.

The bill contains $33 million for an unidentified project to demonstrate methods of accelerating the widening of existing highways. The committee report does not say whose district that project is supposed to pave, but I bet we will find out by the time the conference report is adopted.

We have the same problem with the proposed $150 million for the Soil Conservation Service's flood prevention program. This money is supposed to be for quick action on flood repair and control, yet it appears that less than $50 million of this money could be spent in 1983.

At a time when we are facing budget deficits approaching $200 billion, how can we justify simply "priming the pipeline" of long-term projects? How can we go home to the long-term unemployed in the industrial cities of the

Northeast and Midwest or the rural areas of the South and tell them that we are spending money on studies and surveys and planning?

Then there are the water projects. Under the committee bill, funding for water projects of the Army Corps of Engineers and the Bureau of Reclamation comes to over one-half billion dollars, more than 10 percent of the total funding available under title I. Yet these programs will provide fewer jobs per dollar than almost any other major program in the bill.

Furthermore, the committee would apparently give a blank check to these agencies to decide which projects are to be funded, instead of publishing the usual project-by-project allocations as would be contained in a regular energy and water appropriations bill report.

The question of allocation is critical. If the funding in this bill is to serve its purpose, it must be carefully targeted to areas of high unemployment, or used to hasten the completion of projects with strong multiplier effects upon the local economy.

Unfortunately, the committee's lump sum appropriation to the major corps and bureau construction accounts is a blunt instrument where a scalpel is required. How can we explain the funding of the WEB rural water development project in South Dakota, a State that had a 6.6-percent unemployment rate at the end of 1982, the second lowest in the Nation? How can we justify additional funds at this time for the McGee Creek project in Oklahoma, a State that had an unemployment rate of 6.8 percent at the end of 1982, the third lowest in the Nation?

Perhaps the greatest defect of this bill, Mr. Chairman, is that it does not target its economic stimulus to those areas of greatest need. For this reason, I am pleased to cosponsor and will urge my colleagues to support the amendment to be offered by the gentleman from Pennsylvania, Mr. EDGAR, that would require at least 75 percent of the funds in title I to be directed at areas of high unemployment. As a matter of keeping faith with those unemployed Americans who are looking to us for assistance, passage of this amendment is essential. I am sorry to say there are no water projects in Detroit.

I will also be urging my colleagues to support the amendment of our colleague from West Virginia, Mr. WISE, to prohibit funding of the Stonewall Jackson Dam. A bill such as this is no place to fund projects of dubious economic merit with harmful environmental consequences.

Finally, Mr. Chairman, I will be offering a motion to recommit, with instruction directing the committee to report back a substitute bill. That measure will offer more bang for the buck in terms of job creation and will respond more effectively to the humanitarian needs of our people than does the committee bill. My substitute will provide for targeting of assistance to areas of high unemployment; will provide more assistance for unemployed women, who have been shamefully ignored by the committee's heavy construction-oriented bill; and will provide less money for slow spendout programs and more money for quickly implemented, labor intensive approaches to solving the unemployment problem.

Mr. Chairman, I urge my colleagues to support the various perfecting amendments that are offered today, and especially urge their support for the substitute measure.

COMMERCE, JUSTICE, STATE

Concerning programs under the jurisdiction of the Commerce, Justice, State, and the Judiciary Subcommittee, the Conte substitute deletes two of the five programs funded in the committee bill and retains unchanged the other three.

My substitute does not include the $50 million in the committee bill for a tree planting program funded by the Small Business Administration, nor does it include the $200 million for SBA direct loans.

The SBA tree planting program is wasteful and unnecessary. While some communities might engage in park and recreation projects in order to obtain Federal grant funds, it is doubtful that the supposedly small nurseries they would use would need to hire a substantial number of new employees to do the work.

The SBA direct loan program is an extremely wasteful use of SBA resources. The default rate on these loans is high. The loans have been limited in the past to a very small portion of the small business community, and the special loan terms are resented by that community. Guaranteed loans are far more effective and efficient.

My substitute does include $200 million for the public works grants program of the Economic Development Administration, $2 million for the SBA certified development company program, and $90 million to modernize and expand Federal, State, and local prison facilities.

The EDA public works grants program is a popular and effective job creator in urban and rurual areas alike. It is estimated that the $200 million included in my substitute would provide about 33,000 jobs in such activities as industrial park development, water and sewer development, street and railway improvements, and rehabilitation of inner city housing for residential use.

The SBA certified development company program requires only a small amount, $2 million, of budget authority to generate $100 million in financing for small businesses for plant expansion and the purchase of equipment. As pointed out in the committee report on this bill, 23,000 jobs have been created since the initiation of this program in 1980 with almost no direct outlay of Federal funds. This is a good investment.

The $90 million included in my substitute of Federal, State, and local prison modernization is badly needed and can be used immediately. Federal prisons are now more than 20 percent over capacity, and nearly 40 States are under court orders to alleviate overcrowding in their facilities. New mandatory sentencing laws and special anticrime and antidrug initiatives at all levels will compound these problems in the future. Of the total amount provided, $60 million is for the modernization and repair of existing Federal buildings and facilities, and $30 million is to meet Federal responsibilities under cooperative agreements with States and localities which house Federal prisoners awaiting trial or transfer to Federal penal institutions. The latter amount will be used to expand and improve the State and local facilities.

HOUSING AND URBAN DEVELOPMENT

The substitute that I will propose includes the same funds for community development grants as Mr. WHITTEN's bill. But, I propose an additional $240 million for section 312 direct loans to low- and moderate-income homeowners to rehabilitate and in some cases, refinance their homes and bring them up to local code. This is an existing Federal program in HUD which has been used successfully. It is a good idea because:

First, the money can be spent this year.

Second, jobs are created this year.

Third, the "Little guy," the old couple, and the poor who are barely hanging on to their homes can finally get some help from their own government to live decently.

Fourth, we take advantage of the lower interest rates for rehab and refinancing like the higher income homeowners are doing.

Fifth, it preserves and upgrades the Nation's housing stock.

Sixth, it improves old neighborhoods.

Seventh, it coincides with the interest cities have in revitalizing their older neighborhoods.

Eighth, it is not a giveaway. It is an investment by this Government which creates jobs this year in the building trades and materials industries.

MILITARY CONSTRUCTION

These funds are retained in the substitute because they are needed to bring housing up to date and because the funds can be committed and spent quickly and efficiently, creating jobs in the near term.

These funds will be used for improvements as well as repair and maintenance on existing housing. None is to be used for new construction.

Each base or facility has on hand details of what improvements or repairs are needed. No time-consuming design is required. Contracts can be let within a very short time after funds are available.

Also, it makes sense to maintain and improve existing military housing rather than building new units in the United States.

The funds in this bill are allocated to enhance the short-term employment picture with $67.5 million for modernization and $175.5 million for maintenance and repair projects, the faster spendout projects.

The majority bill stated these funds would create 10,000 new jobs and we cannot take issue with that projection.

TREASURY, POSTAL SERVICE, GENERAL GOVERNMENT

Under the heading "Maintaining and Protecting Public Investment in Federal Buildings," my substitute provides $150 million to go to the Federal buildings fund in the General Services Administration for repairs and alterations of Federal buildings for projects which do not require prospectuses.

Under this category, labor-intensive jobs would be provided on such projects as repairs to buildings to reverse deterioration and protect the life of the property, installing aids for the handicapped, installing fire prevention devices, retrofitting for energy conservation and altering building floor plans to promote space utilization.

I put $150 million in this category, up $25 million from the chairman's version because I felt that since some 1,000 more jobs would be created by this increase, and since the name of the game is to create jobs, the $25 million increase would be better spent in this category than it might somewhere else.

With this figure of $150 million, the General Services Administration estimates that some 6,000 jobs could be created as bids go out to contractors in such businesses as roofing, painting, electrical wiring, and so forth projects forecasted for the near future could be speeded up so that a large part of the funds under this heading could be obligated very quickly. Again 6,000 jobs instead of 5,000 jobs provided in the other version—that is the benefit of my $25 million increase over the other bill.

This Federal buildings category is important because throughout the Federal regions around the country, there are numerous Federal buildings in need of repair which have not been tended to for the simple reason that funds have not been provided. With an extra $150 million in the building fund, the GSA can move ahead with these repairs, and at the same time, provide the labor-intensive jobs to accomplish them.

Under the heading "Scheduled Motor Vehicle Procurement," $75 million is provided to the General Services supply fund for the purchase of approximately 12,000 new motor vehicles to upgrade Federal fleets which presently have older, fuel-inefficient vehicles on hand.

Given the problems the automobile industry is having, and the spinoff problems being experienced by the industries which support that economic mainstay, I felt that efforts to provide some support in this area were worthwhile.

With the provision of this $75 million, some 1,500 jobs can be created in the automobile and support industries. According to the General Services Administration, the full $75 million could be outlayed in fiscal year 1983 as the orders could go to bid in about 90 days from receipt of funds.

Mr. CONYERS. Mr. Chairman, will the gentleman yield?

Mr. CONTE. I yield to the gentleman, my good friend from Michigan (Mr. CONYERS).

Mr. CONYERS. Will it be bigger?

Mr. CONTE. Unfortunately, no. It is not any bigger. I know what the gentleman is driving at, but let me say that you have something here to work with and you might as well make the best of what you have.

You mentioned those projects, and it was mentioned here in the well of the House that if you represent the Congress you should try to get these projects. Unfortunately, I say to my friend from Michigan (Mr. CONYERS) you were not in the cookie store when it was handed out.

Mr. WALKER. Mr. Chairman, will the gentleman yield?

Mr. CONTE. I yield to the gentleman from Pennsylvania.

Mr. WALKER. Did I understand the gentleman correctly that some of the money in this bill is going to places that are distinctly not high unemployment areas, that there are places where the bill allocates money which are among the lowest of the unemployment areas in the Nation?

Mr. CONTE. Definitely. There are quite a few.

Mr. WALKER. So, in other words, if you were in the proper place at the proper time; namely, on the committee, you got a project and you are taking care of your district, even though it has nothing to do with unemployment. But if you were not and if you did not get a project, then you were unfairly discriminated against, even though you might be in a very high unemployment area? Is that what seems to be going on here?

Mr. CONTE. That is right.

Mr. WALKER. That is a shame and I thank the gentleman.

Mr. SILJANDER. Mr. Chairman, will the gentleman yield?

Mr. CONTE. I yield to the gentleman from Michigan (Mr. SILJANDER).

Mr. SILJANDER. Just in response to the point by my friend from Pennsylvania, I understand that Hyannis, Mass., which is an area of relative affluence, if I am not mistaken, has $10 million targeted into this bill to improve the Amtrak rail line in that area while areas such as the area that I represent in Benton Harbor, Mich., which suffers from 33.7 percent unemployment, that they are not receiving a nickel in this whole porkbarrel legislation.

So, in response to the question, I think that is just one of many examples where affluent areas are receiving millions of dollars and where riddled areas of real unemployment are receiving virtually nothing.

Mr. CONTE. I know the gentleman is an expert now in jobs, being on the task force, and I hope he will support my railroad bill which will spread money out to all of the railroads in this country to repair their railbeds. We will pick up the tab for the employees and the railroads will pick up the material, the ties, the spikes, and the rail line, and this will put a lot of people to work 4 days after it is passed.

I hope you can get on to that bill.

The CHAIRMAN. The gentleman from Massachusetts (Mr. CONTE) has consumed 11 minutes.

Mr. WHITTEN. Mr. Chairman, I yield 1 minute to the gentleman from West Virginia (Mr. WISE).

Mr. WISE. Mr. Chairman, I would ask the chairman of the Subcommittee on Energy and Water Development of the Committee on Appropriations to enter into a colloquy and answer a question.

Mr. Chairman, from your Subcommittee on Energy and Water of the Appropriations Committee, I would like to inquire whether there is any money in the emergency supplemental appropriation to construct the Stonewall Jackson Dam in West Virginia.

Mr. BEVILL. Mr. Chairman, will the gentleman yield?

Mr. WISE. I yield to the gentleman.

Mr. BEVILL. I can assure the gentleman from West Virginia that the Army Corps of Engineers is fully funded for the construction of the Stonewall Jackson Dam by previous appropriation, and no funds will come from this emergency supplemental appropriation for the construction of that project.

Mr. WISE. I thank the chairman of the subcommittee and thank the Chairman, Mr. WHITTEN for yielding.

Mr. Chairman, while I am pleased that we have reached this understanding whereby no funds under this bill be appropriated for the Stonewall

Jackson Dam in Lews County, W. Va., I intend to carry on my fight against the project through the regular appropriations process.

The gentleman from Alabama (Mr. BEVILL) will be holding hearings later this month or early next, at which time I plan to testify in opposition to the dam.

It makes no sense to spend money on a project that will flood thousands of acres of prime farmland, displacing 1,800 people from their homes. The General Accounting Office has reported the dam will not provide effective flood control. Flood control can be better accomplished, at less cost, through a series of smaller watershed projects.

When the House Government Operations Subcommittee on Energy, Environment and Natural Resources—a panel on which I now serve—considered the feasibility of the dam during the post-election session of Congress last fall, a bipartisan cross-section of the panel were decidedly against it.

Opposition to the dam comes from agriculture interests, environmental groups, the United Mine Workers, and the National Taxpayers Union, among a number of other organizations.

There are many more reasons why the dam should not be constructed. Since we have resolved my immediate concern, I will not take further time now to elaborate. But I believe that when we have thoroughly studied this project, Congress will decide that tax dollars can be better spent on more worthwhile pursuits.

Thank you, Mr. Chairman.

Mr. WHITTEN. Mr. Chairman, I yield myself 2 minutes.

Mr. MITCHELL. Mr. Chairman, will the gentleman yield?

Mr. WHITTEN. I yield to the gentleman from Maryland (Mr. MITCHELL.)

Mr. MITCHELL. I thank the gentleman for yielding. During the course of the 1-minute speeches this morning a Member on that side made the statement that any funds that would be expended under this bill would be taken away from funds to be spent in the future. In other words, they are taking the position that this does not really represent any new money, that it is really an early drawdown. Is that correct?

Mr. WHITTEN. May I say that the recommendations of the President had that in there, but in this bill that is not true.

May I also add this, with regard to this bill I have had requests to include certain other things which I understand might be included in the other body, but this is new money and the earlier statement is not true.

The original proposition was along that line, but we did not buy it.

Mr. MITCHELL. All right. That is new money.

Then would you respond to just one more brief question? Do we have any kind of guarantee or commitment on the part of the Democratic leadership that there will be no change of compromising down the line on future moneys to be spent?

Mr. WHITTEN. Insofar as I am concerned, I am committed to bringing up the supplemental and including those things that are necessary. Others would have to speak for themselves.

Mr. MITCHELL. I thank the gentleman. I heard this morning very distinctly that this was a tradeoff and this was why the Republicans who will vote for the bill were going to be persuaded to vote for it.

But I take your assurances that it is not being done that way.

Mr. WHITTEN. I have not been included in any such agreement and would not. But I realized that we have to deal with other things and we have spending proposals now in several other supplementals that are musts in themselves.

We have about $11 billion that is requested, recommended by the President. So there will be other bills coming up. What they will contain I cannot say, but I know what my feelings are.

Mr. MITCHELL. I thank the gentleman for his information.

□ 1245

Mr. CONTE. Mr. Chairman, I yield 6 minutes to the gentleman from Illinois (Mr. ERLENBORN).

Mr. ERLENBORN. Mr. Chairman, the economic report of the President, transmitted to the Congress in February 1983, states that unemployment is the most serious economic problem now facing the United States. This statement should not come as a surprise to us when statistics show that by December 1982 the number of unemployed had risen by more than 4 million since the beginning of the recession in mid-1981. The unemployment rate is higher than at any point since the Depression, with over 12 million persons counted as unemployed. Even with economic recovery, which is the best creator of jobs, it is likely that the unemployment rate will remain high and eventually plateau between 6 and 7 percent.

We all recognize the need to address this devastating problem and its subsequent affects on the physical, mental, and social well-being of unemployed people and their families. The financial losses of the unemployed are not the only costs associated with prolonged economic decline.

All of us in the Congress have a stake and an interest in cooperating to produce emergency jobs legislation to meet the most immediate unemployment problems, and then to work together to develop legislation that will lessen the intensity of our structural unemployment problem. We must demonstrate publicly that we want to work expeditiously in this Congress to improve employment opportunities and deal with the Nation's economic problems immediately and effectively.

I serve as the chairman of the Republican Task Force on Employment Opportunities appointed by Mr. MICHEL to examine alternative strategies in attacking both short- and long-term unemployment. In order to give careful consideration to emergency employment legislation we developed a set of basic principles. These principles are:

First, the utilization of existing programs and projects to best serve the immediate employment needs of the Nation.

Second, the adherence to the basic spending limitations recommended by the administration in order to minimize any adverse impact on current deficit projections and interest rates.

Third, the selection of public works projects that will enhance national productivity or directly address the problems of a neglected national infrastructure in those areas where these problems are the most severe.

Fourth, the selection of public works projects that are the most labor intensive.

Fifth, the selection of projects, with the exception of those meeting the criteria of No. 3, located in urban and rural areas of high unemployment.

Sixth, the special consideration of the employment needs of women and youth in the implementation of programs and projects funded under emergency jobs legislation.

In light of these principles our review of the jobs proposal before us did not yield uniformly prositive results. What is the basic goal of this legislation? Are we really serious about trying to help the unemployed? Will the bill really create jobs? The answers to these questions are quite revealing.

If we intend to generate jobs through this legislation, then the allocation of $500,000, in this bill, to provide for administrative expenses to develop plans for three new bureaucracies certainly should be questioned. How can such an expenditure create jobs, let alone aid the unemployed, particularly when there are many other programs already in existence to meet the specified needs that these new bureaucracies are supposed to resolve? What we do not need is more bureaucracy to cure our unemployment problems.

The members of the task force agree that it is the long-term unemployed who are of special concern, considering that 16.6 percent of the unemployed have been without jobs for longer than 26 weeks. Our concern should be primarily for unemployed heads of

households. The share of unemployment among husbands, wives, and family heads in families without a working spouse reached 24 percent in 1982. We know also that youth continue to comprise a disproportional share of the unemployed and that women head a major segment of those families with income below the poverty level. Few of the items funded under this proposal target on the long-term unemployed or heads of households. It also strikes us that for the most part, the skills that will be required to fill the few jobs that are created are not those typically held by youth or women. This legislation is not designed to assist the major populations most severely affected by unemployment. Instead, the funding under the act appears to be targeted by congressional district rather than on the unemployed.

It is hard to understand why an agency that is targeted to receive funding for projects under this bill has not been consulted as to whether it can use the additional funding or for what purposes or priorities the funds should be used. We must also note that some agencies were not confident that the additional funding to be received could be spent in fiscal year 1983. Therefore, how can we be certain that the projects listed are of high priority or can be implemented quickly?

A further concern is that for under water resource funding, only vague reference is made to the areas of the country that would receive funds for projects. This leads us to believe that projects which have been opposed by the Congress—and environmental groups—may be funded by these provisions. Water projects tend to be capital intensive rather than labor intensive thereby creating fewer jobs for the dollars spent. Additionally, it appears that the water reclamation projects to be funded are located in Western States where the average unemployment rate is below the national average, diverting the investment of scarce resources from areas where unemployment is highest.

Additionally, is it possible to justify a highway demonstration project that shows methods to accelerate the widening of existing highways as a job-creation strategy? I question the contribution of such projects to our efforts in repairing our infrastructure.

With just a quick review, the Republican Task Force on Employment Opportunities was able to raise these significant questions regarding the provisions in the emergency supplemental bill.

Our intention is not to thwart meaningful legislation that would effectively and quickly generate jobs as a start toward meeting the needs of this Nation's unemployed. Rather we would support such a bill.

Some of the provisions of the bill do meet the criteria the task force has established. I urge my colleagues to carefully weigh the few amendments allowed by the Rules Committee in the light of our desire to extend near-term relief for the unemployment situation. I also commend for your attention the motion to recommit with instructions that will be offered by the gentleman from Massachusetts (Mr. CONTE). It may yet be possible to redirect this bill to meaningful, near-term relief and away from the "pork barrel" slant that the media have observed and commented upon.

Mr. WHITTEN. Mr. Chairman, I yield 3 minutes to the gentleman from Connecticut (Mr. RATCHFORD).

Mr. RATCHFORD. Mr. Chairman, we have heard it said all day that this is not the best of bills. I would remind those saying it: it is the only jobs bill, it is the only show in town and today is the day, not tomorrow, or the next day, or the day after. We need this bill as a start. We need it as a symbol and we need it more significantly as a signal to 12 million unemployed Americans, Americans on the edge of despair, that finally in Washington there will be the beginning of a movement that will put Americans back to work.

I would like to talk about three areas that are very significant in my part of the country, significant in the North, significant in the Northeast, and significant specifically in my State, the State of Connecticut.

The first, and I am glad the gentleman from Massachuesetts agrees, is the whole issue of the displaced worker.

We have in this part of the country older workers who have been put out of work because of imports, put out of work because of industries that are operating below capacity. These displaced workers need this commitment now for their retraining for new jobs.

A second significant factor is the older workers' portion of the Older Americans Act.

I would say to you, Mr. Chairman, that for every one of the positions in American today under this section there are six or seven older Americans waiting for an opportunity so that they can preserve decency and dignity and they can stave off unemployment or, above all, going on welfare.

Finally, in our part of the country nothing is more significant than economic development. I would say to you, Mr. Chairman, that the $200 million in here for economic development in my part of the country, in the frost belt, is the most significant part of the bill.

More jobs, not public service jobs, not make-work jobs, not CETA jobs, but more private-sector jobs have been created as a result of economic development than any other Federal program. In my district alone, which is the economic heartland of Connecticut, 20,000 jobs have been retained or created since 1979 under economic development programs.

These are jobs in the private sector. These are jobs replacing those that have been lost in footwear, lost in chemicals, lost in copper, lost in brass, lost in steel. These are jobs that are available now if this program can be approved.

The best bill, no; a perfect bill, no; but the only bill that says to those in America who are in despair: "Finally in Washington we are on a road back, we are on a road back for those Americans who live in despair and seek hope that has not been there."

Mr. WHITTEN. Mr. Chairman, I yield 1 minute to the gentleman from Arkansas (Mr. ALEXANDER).

Mr. ALEXANDER. Mr. Chairman, I thank the gentleman for yielding me this time.

Mr. Chairman, in debating the jobs bill today we are engaging in something more than an idle forensic contest. The issue is one of recovery, not merely for the big banks and investment houses but for the people of this country. Imagine the awful cries emanating from Wall Street—and, for that matter, the actual state of disaster—if there had been, these last several months, an 11-percent failure rate among banks. Yet 11-percent unemployment is the rate at which our people have been asked to endure this long recession, and in my own State of Arkansas, the rate has been even higher and more catastrophic for most of these dreary months.

So it is relevant, as a means of focusing on the statistics and the rhetoric and the abstract arguments which we will hear in this Chamber today, to point out in concrete terms what the acutal, beneficial effect of the proposed jobs bill might be on my constituents in the First Congressional District of Arkansas—an area which is typical of the rest of America both in the degree to which it has been hurt by the recession and in the extent to which its recovery is dependent on competent, far-sighted legislation—or at least related to it.

And I think that such a partial itemization of benefits to the First Congressional District of Arkansas would reveal also—in the form of projects which have been deferred too long—a vision of progress which we used to take for granted in this country before the onset of hard times and indifferent national policies.

To begin with defense, the one aspect of national policy which has greatest claim to bipartisan support, the bill would speed up funding for new construction at the Strategic Air Command base at Blytheville, Ark.—specifically, an estimated $1,533,000 for support and maintenance facilities

and an estimated $3.6 million for dormitories. Blytheville Air Force Base is not only an economic keystone to the northeast Arkansas area, but it is a vital element in the Nation's defense structure—as President Carter recognized by confirming the base's importance in 1979 and as President Reagan, with his well-known emphasis on an enhanced defense posture, has acknowledged in his turn.

Under the jobs bill, some $1,250,000 would be provided for community development block grants, under programs operated by the Department of Housing and Urban Development. Of this amount, some $375 million is earmarked for nonmetropolitan towns and cities. All of the First Congressional District except for Crittenden County is eligible for a share of this funding, and Crittenden is free to compete for a share of the other $875 million. Some of the purposes for which these funds can be used are public works and public facilities; construction and repair of streets and highways; demolitions and site improvements; parks and open spaces; historic preservations; and redevelopment activities. A recent survey of cities and counties in roughly one-third of my district showed no less than 171 specific and identifiable needs that would be covered by the block grant provisions of this bill—with road repairs and housing for the elderly being typical of the list.

Of special interest to Arkansas and the First Congressional District, of course, is the $200 million in additional funding which the jobs bill provides for the Economic Development Administration. The EDA has already invested more than $130 million in Arkansas, and has thereby created or saved more than 67,000 jobs with annual payrolls of more than $500 million. As a general rule, it has been estimated that the taxes paid by these jobholders over a 2-year period more than repay the total EDA investment.

And in 1983 the need for EDA funding in Arkansas is especially acute. On Wednesday, at Speaker O'NEILL's request, I briefed the national press on the enormous and catastrophic damage inflicted in the State, and in my district in particular, by last December's floods. EDA would appropriate money for an assortment of flood control projects, including hydroelectric dam construction.

Other possible EDA projects would be industrial park development, central business district improvements, and renovations of streets, railways, and public buildings. In the east Arkansas planning and development district alone, there are 45 identifiable projects that could be put under contract within 90 days and completed within 1 year.

The jobs bill proposes an additional $200 million for water and sewer grants by the Farmers Home Administration and an additional $600 million in new loan authority. And an important aspect of the bill is that it would prohibit the FmHA from applying its new, unduly restrictive median family income provisions to the new money made available for grants. In a letter to Charles W. Shuman, FmHA Administrator, incidentally, I have protested in the strongest terms those provisions—which would render 19 of the 24 counties in the First Congressional District ineligible for help under the water and waste disposal grant program. The jobs bill functions as a signal to the FmHA that its new formula is unacceptable; our communities should not be penalized merely because their modest standard of living is not at rock bottom on the FmHA scale.

Incidentally the aforementioned survey of one-third of the First Congressional District turned up identifiable needs for: 17 water system improvements or installations and 28 sewer system improvements or installations.

So the FmHA provisions of the jobs bill are especially needful.

Another category of the jobs bill which is especially meaningful for my constituents in the First Congressional District is the provision of $25 million in additional funding for the older Americans employment program. More than 25 percent of the First District population is of an age that could benefit from this employment program—designed for citizens 55 years of age or older. Auxiliary services for local senior citizen government programs, senior citizen centers, and transportation programs will all benefit from the bill, as will Green Thumb in Arkansas, an extremely popular and useful service.

These are merely highlights—and only a few, at that—designed to show how practical the jobs bill is in what it will do for people and, more importantly, in what it allows people to do for themselves and for their communities. In its entirety, the bill would serve, not as the perfect remedy for the lingering social consequences of the recession, but as a first step designed to get us focused on the goal of recovery. The people of my district and my State are certain to welcome it enthusiastically, and it is no wonder, surely, why the President—hesitant about a jobs bill as recently as this past December—should be willing to embrace one now.

He has heard from the people, who want this bill. It was the people's will last November that such a bill be enacted into law, and it is the people's will now. We who helped prepare this bill offer it to the Nation—and to our separate constituencies—in that knowledge.

Mr. PURSELL. Mr. Chairman, I yield 5 minutes to the gentleman from Texas (Mr. GRAMM).

Mr. GRAMM. Mr. Chairman, it would be wonderful if we had $4.5 billion stuck in a mattress somewhere that we could use for humanitarian purposes. Who would say if we had that money hidden away, that we ought not spend it to try to put people to work? There are those here more knowledgeable about this bill than I am who would argue if we had that $4.5 billion, we ought to spend it better, to try to train people for the jobs that are available, we should use it as a transition bill. But, Mr. Chairman, we do not have $4.5 billion. Every dollar that we spend by this bill we are going to have to go out and borrow.

What a paradox it is that we are here today talking about spending $4.5 billion we do not have on programs that we worked for 2 years to try to cut, to try to free capital for private growth, on the day after the leading economic indicators for January were released showing that economic activity in January rose at the highest rate in 33 years. We are on the verge of an economic recovery.

Housing starts are up 46 percent over 1 year ago. There is a clear growth in the demand for private capital to build new homes, new farms, new factories, to modernize the steel industry, to modernize the automobile industry, to make America competitive on the world market again.

But what we are doing here is adding to the one barrier that stands between the American economy and a strong economic recovery in a period of stable prices and declining interest rates; and that is why we are here today, with the best intentions, adding $4.5 billion to the deficit.

By adding $4.5 billion to the deficit we are going to deny that $4.5 billion to those who would build and buy their own homes; we are going to deny that money to those who would modernize the steel industry and automobile industry; we are going to deny that money to those who want to create jobs in the private sector and I am convinced that we are going to destroy more permanent, productive, tax-paying jobs than the temporary dead end public and private jobs we create here today.

If we are concerned about getting the economy moving we need to deal with the root cause of our problem and the root cause of our problem is the deficit which has pushed interest rates up and which has collapsed private investment. There are those who believe that this compromise minimizes the damage, that in the absence of a compromise a larger so-called jobs bill would become law and the destruction of jobs would be even greater.

□ 1300

I cannot speak for that thinking, but it is clear to me and I believe it is clear to most of the American people that we are not going to create jobs with this bill here today. We are going to destroy more private jobs that are permanent, that represent an improvement in technology, that represent a permanent commitment to growth and employment than we create jobs through this bill.

I think it is, indeed, a strange tragedy that here on the very verge of a strong economic recovery, we are passing a bill that will drive up the deficit and that will slow the recovery.

Therefore, Mr. Chairman, I intend to oppose this bill and I intend to support any amendment or any motion to recommit that reduces the deficit.

Our problem today is the deficit. We will vote on a jobs bill and that jobs bill will be the 1984 budget. Those who are for jobs, who are for lower interest, who are for economic growth, will vote to reduce the deficit. Those who want to continue the recession and those who want to continue unemployment will vote for big deficits and will vote for tax increases.

I thank the gentleman for yielding.

Mr. WHITTEN. Mr. Chairman, I yield myself such time as I may require.

Mr. Chairman, I respect the views of the gentleman who preceded me, but I do not agree in the least about the effect of the theories the gentleman espouses.

We have had now something over 2 years of these theories, and what is the result? We have unemployment of 10.4 percent on a national basis, reaching 17.8 percent in West Virginia; 12.6 percent in Illinois; 15.5 percent in Michigan; 14 percent in Ohio, 13.6 percent in Pennsylvania, and in my State of Mississippi, 17.5 percent in my home county. Unemployment compensation has now reached the annual level of $32 billion. Business failures are up 49 percent from 1 year ago. Only 35.7 percent of the raw domestic steel capacity is currently utilized, which represents the lowest capacity since 1932. The American farmer is more than $215 billion in debt. Financed at rates ranging between 15 and 20 percent for last year.

I think, Mr. Chairman, we have had about all of our friend's views that we can afford in 2 years.

May I also point out here, that on April 26, 1982 I requested the General Accounting Office to investigate the actions of the Federal Reserve Board, and the effect on interest rates, and see how it is operating.

On April 26 the GAO started investigating the Federal Reserve System. I have been with Mr. Volcker when he said, "You can't control us. We are not going to do this and we are not going to do that."

Well, when they started investigating the Federal Reserve System, beginning April 26 last year, they pointed out that the Federal Reserve System did have control of the interest rates. I received oral reports all along during the GAO investigation. The first formal report from GAO was due in August. The Federal Reserve got busy in July, knowing they were being investigated with the spotlight on them, and that is when you saw interest reductions come.

Now, I will be frank with the gentleman. The Federal Reserve has to be careful and not let the money supply expand too much, because of the very magnitude of it, it will get high again. But the overly restrictive policy of the FED had driven up interest rates to the extent it was choking off business growth, but it is within their control. And this committee, by getting the General Accounting Office to investigate, was ahead of everyone in focusing the public eye on the Federal Reserve. That is when you began to get some relief.

So I say, Mr. Chairman, I can see as a student of economics myself—I think down to earth economics—the wealth of this country is not in paper money. You can leave all the money in the world to our children, but without land you would not have anything.

But we have had just about all of the economic policies espoused by the gentleman that we can stand in one administration.

Mr. PURSELL. Mr. Chairman, I yield 3 minutes to the gentleman from Michigan (Mr. SILJANDER).

Mr. GRAMM. Mr. Chairman, will the gentleman yield?

Mr. SILJANDER. For 30 seconds, yes.

Mr. GRAMM. Mr. Chairman, we are suffering from a recession today that started in June 1981, 4 months before any budget cut or tax cut of the Reagan administration went into effect. From the passage of the first Reagan budget, inflation is down by three-fourths, prime interest rates have fallen by 50 percent, and in the last month the prime economic indicators rose to a 33-year high.

The recovery is underway and if we will continue to try to control spending, we will have one of the strongest recoveries in American history through a period of stable prices and declining interest rates.

I thank the gentleman for yielding.

Mr. SILJANDER. Mr. Chairman, we have been considering jobs legislation to put the most people that we possibly can back to work. Yet as of this moment there is no provision in the bill to give areas of highest unemployment first priority. This is not kosher; this bill is riddled with pork. Instead the guts of this bill are going to special interest pork barrel projects that will provide partisan opportunity for a few members of our body.

I question that logic when in Hyannis, Mass., an area of relative affluence, there is $10 million targeted in the bill to improve the AMTRAK railline, while a city like Benton Harbor, Mich. suffers 33.7-percent unemployment. What Michigan needs more than a few "porks" for unnecessary projects is a 1-year delay of unemployment compensation interest charges. If, however, the Government allows Michigan to borrow more money to pay unemployment, it will be like the IMF giving more money to Mexico. It will cause higher debt that Michigan can only pay by increasing taxes—burdening the people and driving business out of the State.

As a member of the Republican Task Force on Employment Opportunity, I have the specific honor of serving with 10 other members who have approached the unemployment problem with a spirit of national interest—coming up with alternatives that will be fairly and evenly distributed to those areas of our country hit hardest. Along with the rest of the committee, I initially supported the concept of this bill but now that manipulation has become very evident, I cannot in good conscience continue that support.

I know by and large that this body also has that spirit of national interest that transcends local political constituencies. As you have heard and will hear many of us speak today, bear in mind that we have two major responsibilities with this legislation. One, is to insure that we maximize the number of jobs in those areas where unemployment has become akin to any natural disaster that has hit this country, and two, that this money will put those heads of households back to work and put bread back on the tables of their families instead of gold in the pockets of those who have the right political connections.

We can now choose between acceptance of this special interest, pork barrel legislation, or really helping those areas of our country hit hardest by unemployment. I sincerely hope that you, as my colleagues in Congress, will take the time to review this legislation and accept the Edgar amendment proposed to shift 75 percent of the moneys in the jobs bill to areas of high unemployment. If this amendment is adopted this bill becomes supportable. Rather than use this jobs bill as a purely selfish piece of legislation, let us make the responsible decision, as entrusted in us by the American people, and come forth out of this session with a truly substantive piece of legislation.

Mr. WHITTEN. Mr. Chairman, I yield 5 minutes to the gentleman from Wisconsin (Mr. OBEY).

Mr. OBEY. Mr. Chairman, I think all of us are truly faced with a dilemma on this bill. I think everyone here is trying to make a good faith effort to do what they think is right in dealing with the agonizing problems of unemployment.

I recognize that everybody is operating under severe limitations, because of the administration's refusal to support anything other than a very small initiative on the jobs front. That means that at best even if this bill works exactly the way its supporters hope it will work, it means that at best this bill will be providing only marginal impact on the unemployment situation. That is not just true of the bill under consideration, it is true of any bill that could be fashioned, given the limitations which have been imposed upon us by the White House.

Under those circumstances, it has seemed to me that therefore the most practical thing to do would be to not pretend that we are passing anything that has a really significant effect upon the employment situation itself, because as I say, it will have at best a marginal impact.

It seems to me, therefore, that what we ought to be doing is trying to provide as many mercy initiatives as we can for people who are suffering because of the consequences of the economic situation. We need a better balance than we have in the bill at the moment between brick and mortar items for construction and flesh and blood items for human beings. That is why when the proper time comes, I will be offering the amendment made in order by the Rules Committee to add $200 million to this bill for health services for those who are unemployed and, therefore, who have lost their health insurance coverage.

I want the Members of the House to know that in the Appropriations Committee I tried to add $450 million to these various health programs to provide at least some assistance to persons whose only crime is that they were unlucky and therefore had lost their jobs and therefore were not being covered by the health care system.

When I lost that amendment, I also tried to provide that additional health care coverage by reducing other less necessary brick and mortar items by about $450 million in order to finance that amendment.

The committee saw fit not to accept either one of those amendments, so I went to the Rules Committee and asked the committee to make them in order. In an attempt to reach a compromise, the Rules Committee allowed us to offer an amendment which will add $200 million for health services for the unemployed and the destitute.

It would seem to me that that is the minimum, in fact, it is far less than the minimum that any civilized society would provide. When you lose your job, what happens is that, first of all, you lose your health coverage, then, in fact, as the gentleman from Massachusetts (Mr. CONTE) has pointed out, in many instances if you wind up in the hospital and you are too sick to go down to the employment service or too sick to conduct a job search regularly, you also stand the risk of losing your unemployment check.

No civilized society would treat its most unfortunate people in that manner.

Incidentally, I am joined in the amendment by Chairman DINGELL of the Commerce Committee, by Chairman WAXMAN of the Health Subcommittee on that committee, and by Congressman EARLY on the Labor-HEW Subcommittee on the Appropriations Committee. What we are simply trying to do is to provide a very minimal amount of health care for people who have nowhere else to turn but to us.

I frankly think we ought to do a lot more. It would be possible, for instance, to provide health insurance coverage for those on unemployment. If we were to deduct a small amount from the unemployment check of every person receiving unemployment compensation, we could raise about $1,700 million. We could match that on an 80–20 basis between the Federal and the States and provide at least minimum health care coverage for everybody who is on unemployment compensation. We have not tried to do that in our amendment. We simply tried to provide a tiny effort at providing some mercy for people who otherwise have no place to go to get very needed health care.

I would urge you when the time comes to support the amendment.

Mr. CONTE. Mr. Chairman, I yield 2 minutes to the gentleman from Arizona (Mr. RUDD).

Mr. RUDD. Mr. Chairman, there is no doubt that something must be done to ease the suffering of widespread unemployment, but I think we must consider the manner in which we must attack the problem in order to achieve success.

For the first time in several years the economy is beginning to experience an explosive recovery that for at least the present has no inflationary component.

Last month in a very slight upturn in the economy, over 500,000 persons went back to work, which is more than this bill would put to work.

Yesterday the Department of Commerce announced that the leading economic indicators jumped by 3.6 percent in February, the highest monthly economic growth in the past 33 years.

Clearly, we are on the road to economic recovery, a recovery that looks much stronger than had been previously predicted or estimated.

I recognize that this Congress can and does want to assist in that recovery. The best way to do it is to adopt policies that are consistent with growth and minimal intervention by the Government itself.

□ 1315

One way to do that is to help by tax incentives which we have relied on in the past, such as incentives in the housing industry. For example, I have a bill, H.R. 675, which would do that, rather than pour public funds into a spending program such as this, we should let the recovery continue. In any case this legislative program will have no effect for at least 2 years on actual employment. Legislative tax incentives put into effect such as the one I mentioned will hasten the recovery.

Mr. NATCHER. Mr. Chairman, I yield 2 minutes to the gentleman from Pennsylvania (Mr. FOGLIETTA).

Mr. FOGLIETTA. Mr. Chairman, this jobs is a day late and a dollar short. Congress should have passed a jobs bill last year, but President Reagan threatened veto. And for the last 2 years, Federal job-creating programs should have been given full funding, but President Reagan said no.

The urban development action grant program is one which should have been enjoying the full support of Congress and the President these last 2 years. Between 1978 and 1982, $2.3 billion in urban development action grant funds leveraged $14 billion in private investment and created or retained 450,000 jobs. That is as many jobs as we can expect to be generated by the $4.3 billion we will spend today. Yet, the Reagan administration has cut urban development action grants by 35 percent.

The jobs bill before us gives a funding shot-in-the-arm to job-creating programs like urban development action grants.

The Economic Development Administration will get $200 million, the community development block grant program will get $1.25 billion, and the urban development action grant program will get $244 million.

But because we did not put Americans to work last year, more is needed than this jobs bill provides.

Fully 50 percent of the unemployed, which is now 11.5 million Americans, lose their health insurance coverage within 1 month of being laid off from their jobs. And only 20 percent of the Nation's unemployed are covered for 3 months or more after layoff. The average duration of joblessness is now approximately 19½ weeks and one-sixth of all those unemployed in 1982 were out of work for 27 weeks or more. Yet, this jobs bill does nothing for the unemployed who have lost their health insurance coverage.

During 1982, home mortgage defaults reached a record level. At the end of September 1982, 172,000 mortgages were in foreclosure proceedings. The unemployed of this Nation cannot afford to keep their homes. Yet, this legislation provides only "planning" money for mortgage payment assistance.

Even with the oft-predicted economic recovery, as many as 1.2 million Americans will find the jobs they once held gone forever. The $75 million provided in this jobs bill for these economically dislocated workers is not enough.

Next week, I will introduce comprehensive employment and jobless assistance legislation. My legislation will supplement today's jobs bill by:

One. Authorizing health care assistance for the unemployed and their families.

Two. Authorizing Federal loans to out-of-work homeowners to help them meet their mortgage payments.

Three. Reauthorizing and increasing funding for Federal job-generating programs slated for discontinuance or funding cuts by the Reagan administration (such as urban development action grants, the Department of Housing and Urban Development's public housing modernization program, the programs of the Economic Development Administration).

Four. Expanding the availability and increasing the amount of the targeted jobs tax credit to include economically dislocated workers.

Mr. Chairman, too many Americans have been unemployed for too long. We must pass this jobs bill today and then move forward on the work that still must be done.

Mr. CONTE. Mr. Chairman, I yield 3 minutes to the gentleman from Pennsylvania (Mr. WALKER).

Mr. WALKER. I thank the gentleman from Massachusetts for yielding this time to me.

Mr. Chairman, if ever there was an indication that the Democratic Party has become the party of doom and gloom rather than the party of hope and opportunity, they had only to listen to the gentleman from Mississippi as he presented this bill today.

The gentleman from Mississippi sought to deal with the gloomy aspects without ever once referencing the fact that there are many things in the economy that are beginning to look up. He refused to even acknowledge the fact that the leading economic indicators were up yesterday in the biggest jump in 33 years. He refused to acknowledge that housing starts are up dramatically, that automobile production is up dramatically, that savings are up dramatically.

If he did acknowledge that a little bit a little later on, he said that this is because the Committee on Appropriations had brought about a change in monetary policy because they sent a letter somewhere along the line. What nonsense. What nonsense.

The spending patterns of that committee under the leadership of the gentleman from Mississippi have done more to undermine monetary performance than any single thing in our society.

I think it is high time that we recognize that what we spend here is what causes economic problems out there. That is exactly what the problem with this bill is. The gentleman from Mississippi has admitted this is a deficit add-on bill. This adds deficit to the $200 billion deficits that we are already faced with. Evidently the people in Mississippi do not think that $200 billion deficits are big enough. The people in my district think that they are too big.

But we do know one thing: that every time we have deficit add-on we cost jobs in the private sector of the economy; that people out there are not going to work as a result of what we add on in deficit in this body.

I think there is another major problem with the bill that we have before us, and that is that the bill really does not go to the heart of what it says it is going to do, and that is create jobs. It seems to me that if you look at what happened when we have had similar approaches in the past, you find that instead of employing the unemployed, they end up reemploying the already employed. We ended up the last time we had a similar bill with the people who were already employed getting the jobs. Eighty-eight percent of those who got the jobs the last time were people who were already employed, and only 12 percent came from the unemployed ranks. Only 2 percent of the total money got spent on the unemployed, and this bill has not done one thing to correct that problem.

It seems to me that what we ought to be doing is making certain that the unemployed get the jobs, and we could have done that with a simple amendment to say that 90 percent of the jobs should go to the people who are now unemployed, but the Committee on Rules refused to allow that amendment to be considered on the House floor.

By a straight party line vote, by the way, the Democrats voted not to do that; the Republicans voted to do that. Why? Because the Democrats are more concerned about the pork barrel aspects of this bill than they are about jobs. It is more important to them. And the gentleman from Mississippi said that he is proud of the bill that distributes the money by congressional district and primarily by seniority, rather than by proof of need based upon real unemployment problems.

Mr. NATCHER. Mr. Chairman, I yield such time as he may consume to the gentleman from Texas (Mr. BROOKS).

Mr. BROOKS. Mr. Chairman, I rise in support of this legislation and would urge that priority be given to projects that will fit into other ongoing federally supported local projects.

In my congressional district in Texas, where the city of Port Arthur has 20 percent unemployment, local and private interests have invested in a large project to revitalize the city, a part of which is a new community under the Department of Housing and Urban Development criteria which is well on its way to completion.

The city has two areas which are critical for its economic survival. The first is bounded by Highway 347 on the east, Port Arthur Road on the west, and from Highway 73 on the south to the north city limits line. This broad area already includes a combination of commercial and residential complexes, including low- and middle-income housing, and a portion meets all the criteria for a new community development.

The second area, desperately in need of job-creating commercial and industrial facilities, includes an expanded port, a governmental complex, Lamar University campus, and related light industry and a housing complex. This area is bounded by the ship channel on the south, 19th street on the north, K.C.S. Railroad on the west, and Lake Charles Avenue on the east.

As a result of these efforts and other earlier investments, this area is particularly well prepared to provide the job opportunities and training that are required. Residing in the immediate area is possibly the largest group of skilled labor in the United States—who, although presently unemployed, are well on their way to the level of skills that the new technologies require. This pool of capable and ready-to-be-trained individuals have available the educational resources of Lamar University (formerly Lamar State College of Technology). This institution can provide any necessary upgrading, training, or retraining that may be required.

It is just areas such as this that need priority for grants, loans, guarantees, and other Federal assistance under the proposed legislation in order to enable the local public entities to meet and overcome the severe problem of unemployment they are now experiencing. I urge that such priorities be extended to both public and private entities which can expedite the effects of such legislation in the targeted areas.

Mr. Chairman, to encourage the quickest employment and speediest economic recovery the funds provided in the legislation under consideration must be properly targeted. We should target those ongoing projects which

have proved effective, are proceeding on schedule and, therefore, have the maximum potential for success in our local and national efforts to restore economic vitality and full employment.

Mr. NATCHER. Mr. Chairman, I yield such time as he may consume to the gentleman from California (Mr. DIXON).

Mr. DIXON. Mr. Chairman, although I rise in support of this emergency appropriations legislation, my enthusiasm is tempered by the realization that it does not begin to address the unemployment crisis and the attendant social problems resulting from the economic policies of this administration.

While in support of this measure, I ask how long the American people must wait before a comprehensive approach stimulating employment, economic productivity, and community renewal will be enacted for our Nation. This emergency package may put out some brush fires, but America's bitter economic stagnation will continue to smolder and flame until meaningful jobs legislation is addressed.

It was also disappointing that unseccessful amendments in committee to increase funding for essential health and human service programs were defeated not on their merits, but because additions beyond the President's minimal program might prompt a Presidential veto. Such action is testimony that this package is more a political accommodation than a full and needed effort to help those most affected by unemployment.

The proposed second phase of jobs legislation must not be similarly limited or compromised because of this administration's marginal commitment to alleviate joblessness. Just 3 months ago, the President forced Congress to abandon a program similar to this bill by threatening his veto. America cannot wait for unemployment to sufficiently worsen so the President might finally acknowledge a Federal role in stimulating job creating and economic productivity. Legislation which would have a meaningful effect on reducing unemployment has been introduced and should be expeditiously considered by Congress.

Congress must have the courage and resolve to promptly consider a comprehensive employment and economic stimulus program, and that the legislation before us today is only acceptable when paired with a measure completing the task which this legislation only begins.

Mr. NATCHER. Mr. Chairman, I yield 1 minute to the gentleman from Oregon (Mr. WYDEN).

Mr. WYDEN. Mr. Chairman, Congress has long recognized the national interest in encouraging and promoting the recovery and conservation of discarded materials.

The significant role the Federal procurement process could play in stimulating the growth of the emerging resource recovery industry was explicitly recongnized when Congress enacted section 6002 of the Resource Conservation and Recovery Act of 1976.

Section 6002 requires each procuring agency—under the guidance of the EPA and the Office of Procurement Policy—to procure items composed of the highest percentage of recovered materials practicable, consistent with maintaining a satisfactory level of competition.

The law mandates the EPA to develop guidelines for the procuring agencies to follow in encouraging and promoting the use of recovered materials. The Office of Procurement Policy in the Executive Office of the President was charged with implementing this policy and coordinating it with the other policies for Federal procurement in such a way as to maximize the use of recovered resources.

The law specifically called for EPA to develop guidelines for no less than five product categories by September 1982. Yet, despite explicit timetables in the law, the EPA just produced the first guideline in late January of 1983, for procurement of concrete or cement containing fly ash.

The Office of Federal Procurement Policy has also been unresponsive to the law, and has failed to encourage the procuring agencies to make goodfaith efforts to purchase recycled materials to the maximum extent that is practicable and to review their specifications to insure recycled materials are not discriminated against.

Sadly for our Nation's resource and energy conservation programs—and unfortunately for city and State programs aimed at reducing solid waste disposal costs as well—almost nothing effective has been done so far to comply with these congressional mandates for maximum promotion of recycling of critical materials in the national interest.

I am disturbed over the lapse in implementation of this provision. Since this statutory mandate is already part and parcel of Federal law, I wish to inquire of the distinguished floor manager, if it is the intent of the Appropriations Committee that the Federal procurement policy in RCRA also govern the disbursement of new Federal moneys provided by this legislation?

Mr. NATCHER. Mr. Chairman, if the gentleman will yield to me at this time, the answer to the gentleman's question is yes.

Mr. WYDEN. I very much appreciate the gentleman's answer, and he will yield further, I would just like to ask the distinguished minority member of the Committee on Appropriations if he concurs in the remarks of the chairman.

Mr. CONTE. If the gentleman will yield to me, I agree with my good friend, the gentleman from Kentucky (Mr. NATCHER), and it is appropriate that with the new Federal money provided by this legislation, Congress also reaffirms its recognition that Federal procurement policy can play a very large role in stimulating the market for recovered materials and create jobs in the emerging resources recovery indusry.

Mr. WYDEN. I thank the gentleman and I am very grateful to him and to the distinguished chairman for this discussion on the applicability of section 6002 of RCRA to the procurement process under this legislation.

Mr. NATCHER. Mr. Chairman, I yield 1 minute to the gentlewoman from Colorado (Mrs. SCHROEDER).

Mrs. SCHROEDER. I thank the gentleman from Kentucky for yielding this time to me.

Mr. Chairman, this bill contains $50 million for emergency food and shelters to be distributed through a board made up largely of voluntary organizations. I want to be clear that any voluntary organization, whether or not it is a part of one of the umbrella organizations on the board, can be eligible to receive reimbursement under this authority if it meets the requirements of the section.

Also, will the Appropriation Committee ask to audit the $50 million to insure that it all goes to the truly needy and is not ripped off?

Mr. NATCHER. Mr. Chairman, if the gentlewoman will yield to me at this time, I will answer the gentlewoman's question.

In our report on page 33, and I quote in part as follows:

> Participation in the program shall not be limited to private voluntary organizations that are part of a national organization.

And further, I would like to say to the gentlewoman, down about five sentences the report states the following:

> After the funds have been expended, the Federal Emergency Management Agency is to conduct a postaudit of fund utilization.

The answer to the gentlewoman's question is "Yes."

Mrs. SCHROEDER. I thank the gentleman from Kentucky. I appreciate that.

Mr. CONTE. Mr. Chairman, I yield 2 minutes to the gentleman from California (Mr. SHUMWAY).

Mr. SHUMWAY. Mr. Chairman, our Nation faces no greater challenge than that of providing jobs for the unemployed men and women of America. The unacceptably high unemployment rate we currently face is our most serious economic problem. The human and social costs of a situation where over 10 percent of the national work force cannot find jobs is obvious; the direct economic costs, in terms of fore-

gone production and higher budget deficits, are substantial as well.

The Federal Government can play a meaningful role in reducing unemployment. However, it makes little sense for the Government to spend billions of dollars for the creation of temporary public works programs of the type proposed here. The jobs creation value of such programs is highly suspect; one of the problems with the bill is that no one really knows how many jobs would actually be created. Estimates have ranged from a high of 340,000 to a low 90,000. With over 12 million unemployed the jobs created by the legislation before us would at most be a very small drop in the unemployment bucket.

Not only would few jobs be created by the expenditures proposed, the jobs created would be extremely expensive. The high cost of the materials and equipment demanded by public works programs of the type contemplated here results in relatively few jobs per dollar spent. It has been reported in the press that in the first 2 years of existence, each direct and indirect job created by public programs would cost almost $50,000 a year.

The plan before us calls for the acceleration of construction and maintenance projects which include work on highways, mass transit projects, Federal buildings, dams, and veterans' hospitals. Mr. Chairman, I have traditionally supported funding for necessary public works projects throughout the Nation which have been authorized through the required legislative process. In my district, for example, I have supported the construction of the Auburn Dam but believe that the dam should be debated in the House on its own merits, not on the number of jobs it would provide in central California.

Public works projects are a wholly inadequate way of fighting the problem of unemployment. Mr. Speaker, I submit that the passage of this legislation will not have a direct impact on unemployment for a minimum of 18 months. In fact, with recent signs that our economy is emerging from recession, these expenditures could well be counterproductive. The injection of additional stimulus into a strong and expanding economy will only serve to fuel inflation and exacerbate the cyclical swings of the economy.

The capability of public works programs to combat unemployment is limited and, simply put, these programs are too late and too little. The most effective way to reduce unemployment is not through symbolic legislation which appropriates billions of dollars for projects that do little to help the unemployed. Such programs result in larger deficits and higher interest rates and thus threaten to increase unemployment in the long run.

Rather, the most effective way to reduce unemployment is to stimulate economic recovery and growth, so that permanent employment opportunities can be provided by the private sector. I am greatly encouraged by recent signs of economic recovery. For the month of January, unemployment fell from 10.7 percent to 10.2 percent, housing starts grew by 35.9 percent, and the index of leading economic indicators jumped 3.6 percent, the largest such increase since 1950. Key industries such as steel and automobiles are also showing signs of improvement. These figures underscore the growing strength of the U.S. economy—an increasingly healthy economy which is, without a doubt, the best cure for the problem of long-term unemployment.

The expenditure of Federal funds for the creation of jobs is the wrong approach at the wrong time. A jobs program is an inadequate substitute for economic recovery. I therefore urge my fellow colleagues to oppose this symbolic legislation; the greatest contribution Congress can make to reducing unemployment is not through legislating public works programs, but through supporting policies which encourage savings and investment, cut wasteful and unnecessary Federal spending, and slow the growth of Government generally. A strong economic recovery is underway; a healthy economy is what is needed if we are to return our Nation's unemployed to the work force.

Mr. NATCHER. Mr. Chairman, I yield 2 minutes to the gentleman from Oklahoma (Mr. WATKINS).

Mr. WATKINS. Mr. Chairman and Members of the House, I rise in support of this bill, and let me say, Mr. Chairman, I think we all hope and pray for a speedy economic recovery for the people of this country.

Let me add: When the United States is at the lowest economic point in nearly 50 years, when you are near the bottom, there is only one way to go, and that is up. That is up and hopefully that is where we are headed.

Mr. Chairman, I want to take a moment to address something the ranking minority Member mentioned in his debate concerning the McGee Creek project in Oklahoma. He mentioned Oklahoma has 6.7 percent unemployment, and that is probably true for the entire State of Oklahoma. The ranking minority Member from Massachusetts is a friend of mine. And hopefully, there might be some money for that project if the Bureau of Reclamation sees fit. In Atoka County where that project is, there is 13.4 percent unemployment. There is 17.3 percent unemployment in the neighboring Pushmataha County. There is 16.4 percent in the coal county just north of Atoka County and there is 15.4 percent in Choctaw County to the south.

That is an economic rural depressed area of chronically unemployed and underemployed in this Nation, that has not been addressed by this Congress or by this administration. The people in rural America are the underdogs of the underdogs. They are the forgotten people.

I regret very much when I find people coming up and attacking a project or an area who do not have the facts concerning the economic situation. Sixty-eight percent of the people have left many of these counties in the 50 years in the search for a job. They have left trying to find a decent fulltime job. Our children still outmigrate and the Grapes of Wrath of our educated young people is continuing.

I ask the people to take these facts into consideration when they vote on this jobs bill. I have asked the leadership of the House and I have asked the administration not to just look at State statistics, but ask, "What about economically deprived, depressed rural areas of this country?" They have been ignored in the past, but hopefully this bill will meet a few of those needs.

I ask you to support this bill.

□ 1330

The CHAIRMAN. The time of the gentleman from Oklahoma (Mr. WATKINS) has expired.

Mr. CONTE. Mr. Chairman, I will yield the gentleman from Oklahoma (Mr. WATKINS) 1 additional minute if he will yield to me.

The CHAIRMAN. Does the gentleman from Oklahoma (Mr. WATKINS) request additional time?

Mr. WATKINS. Yes, I do, Mr. Chairman.

The CHAIRMAN. The gentleman from Oklahoma (Mr. WATKINS) is recognized for 1 additional minute.

Mr. WATKINS. I yield to the gentleman from Massachusetts.

Mr. CONTE. Let me tell the Members that when they vote for the Conte-Edgar amendment which targets 75 percent of the money in here for areas of high employment, the gentleman's county will be all right. There will be other places in Oklahoma that will not be all right, but they can gush on those oil wells they have got; they do not need this money.

Mr. WATKINS. Mr. Chairman, I appreciate the gentleman's comments, and I appreciate his concern. I want to invite him to come down to my part of the country one of these days. We have a few endangered species down there, and we have a lot of human beings endangered if we do not build some needed jobs.

I want the Members to know that there is a good Republican or two around this country, too.

Mr. CONTE. Mr. Chairman, I yield 3 minutes to the gentleman from Vermont (Mr. JEFFORDS).

Mr. JEFFORDS. Mr. Chairman, I listened to the speaker immediately before me, and I am sorry that I cannot agree with him.

There will be shouts of triumph and boasts that we have done great things for the unemployed at the end of this day, for this bill's locomotive, extension of unemployment benefits, is powerful and on a fast track. It is the freight it carries, heralded as "hope for the unemployed," that concerns me. It is basically a sham. This is basically a no-work public works package.

When jobs bills are considered, there is a misguided, nostalgic preoccupation with public works. Most of us have heard of the excellent results of public works in the Great Depression. But these are the 1980's, not the 1930's. What was done in the 1930's with shovels and wheelbarrows is now done with bulldozers and trucks. For comparable amounts of money, in equal real dollars, where millions could be put to work in the 1930's, only thousands of unemployed will be put to work in the 1980's.

The reasons for this are fairly simple. The programs of the New Deal were targeted to the unemployed. Jobs under the Work Projects Administration, for example, were given almost exclusively to men and women who were unemployed heads of households who had exhausted their assets. Roughly 95 percent of WPA workers came from the ranks of the unemployed. Few unemployed workers will be hired as a result of the bill before us today.

The workers who will be hired will be mostly from the skilled construction trades. Again, the model of the New Deal does not serve us well. The vast majority of workers under the New Deal programs were unskilled workers.

The proportion of labor to nonlabor costs has changed even more dramatically. Under the WPA, three-quarters of the money went to wages. Under our public works program of the late 1970's, only a quarter of the funds did.

With national unemployment at devastatingly high levels, the temptation is strong to advocate massive, New Deal-style public works programs. Unfortunately, the economic climate of 1983 does not lend itself to the same responses as 1933. A trillion dollar national debt and a $200 billion deficit will simply not accommodate a large public works program designed more to stimulate the economy than to create jobs. By increasing pressure on the limited funds available for capital investment, such programs would most likely be counterproductive.

When one considers the fiscal restraints placed on us by the $200 billion deficit, the predominant use of public works programs, as against other alternatives, is irresponsible, if not criminal.

A little math makes it apparent why public works programs, while they might be justifiable on other grounds, cannot be justified as a good way to create jobs. Every billion dollars we spend can accommodate a million participants in summer youth jobs programs. Or we could pay for 1 million participants in vocational rehabilitation for the unemployed handicapped. That same $1 billion would pay for 500,000 training slots for disadvantaged workers, or 400,000 training slots for dislocated workers—assuming a State match of 40 percent. Or it could pay for 400,000 Youth Conservation Corps slots, or 130,000 Job Corps slots, or 100,000 public service jobs. But if we put the $1 billion into capital-intensive public works projects, we will create only 15,000 to 30,000 jobs.

I just spent the morning listening to panels of unemployed individuals. This past week I talked with unemployed Vermonters. I asked them what their priorities were. They emphasized basically two groups of needs, humanitarian, with emphasis on the unemployed whose benefits have expired, and jobs or training to get jobs.

What are the humanitarian needs? Nutrition, health care, and preserving the home. How much of this bill's baggage is dedicated to this issue? As written, about 5 percent, largely untargeted.

What about jobs? About $3.6 billion is dedicated to public works. That is close to 80 percent. In the last public works go-around, each job cost $64,500 and only 13 percent of those jobs went to individuals who were unemployed. Few if any jobs go to youth, to women, or to unemployed minorities. Nor does this bill target money to areas of high unemployment. It is conceivable that this bill could result in less than 20,000 being hired in a sector which is only 6 percent of our industry.

Yes; this train will go full throttle through the House. But it is bound for something less than glory, and its riders are not quite holy. I reluctantly will support it. It does provide much-needed humanitarian relief. It also shores up the ailing unemployment compensation system. Without it, the unemployment checks will stop in my home State within a week.

In summary, whereas we will spend from $40,000 to $400,000 for each unemployed person helped by untargeted public works, we can train a person to be employed for $2,000 to $4,000, or give meaningful work in other areas for $10,000 per person.

At a time when we need imaginative legislative initiatives to maximize utilization of our limited resources to help the unemployed, we are instead building brick and mortar monuments of monumental waste out of these meager resources.

Mr. Chairman, as to this so called jobs bill, I say a pox on this $4.6 billion hoax.

Mr. NATCHER. Mr. Chairman, I yield 2 minutes to the gentleman from South Carolina, Mr. TALLON.

Mr. TALLON. Mr. Chairman, last year when unemployment in the United States climbed over 10 percent, a national reporter called me and asked for my reaction. Unfortunately, I had to simply tell him that it was nothing new for my district where the unemployment rate had been over 10 percent for the past 2 years. In many of the counties, it was well over twice that percentage.

As I travel in my district, the most depressing sight I see are the hundreds of men and women who want jobs, need jobs to support their families, and for their own self-respect.

This is a serious drain on our economy. We are paying out in unemployment benefits and losing valuable tax revenues. But more importantly, we are letting our most valuable natural resource—our people—sit idle.

We must provide relief for these people who are willing, able, and ready to work, all they need is the opportunity, and this bill is the first step.

As well, this bill provides substantial relief for those unable to work for whatever reasons through humanitarian aid for those who are the greatest victims of this recession.

Other features of this bill that I am particularly pleased to see include the timely and vitally necessary funds for the Small Business Administration. This section of our business economy is suffering greatly, while at the same time, has the capability of providing the majority of American jobs.

As well, the additional funding for the Farmers Home Administration will assist many of those in our rural communities where the recession is bringing back memories of the Depression.

The causes of our national recession are too numerous to mention and too complex to easily explain. There are no easy cures, no magic wand to wave to solve our problems. But we can take action to start the process of recovery by putting our people back to work, by improving our highways, waterways, rails, water and sewer systems, so that the basic structures for industrial growth and economic prosperity will be in place for the future. This bill will provide training for our youth, our displaced workers, and our senior citizens.

But most importantly, I believe the passage of this bill will demonstrate to the American people that their representatives in Government are compassionate people who are willing and ready to use the resources available to

promote the general welfare of its people as stated in our Constitution.

Mr. CONTE. Mr. Chairman, I yield 2 minutes to the gentleman from Ohio (Mr. WYLIE).

Mr. WYLIE. Mr. Chairman, I rise in qualified support of this bill.

There is no question that unemployment and the great need to create productive jobs are our most pressing national problems. The $5 billion urgent supplemental for unemployment compensation is of vital importance to 28 States in the United States, including my own State of Ohio. We are going to have to borrow from the trust fund to pay benefits for this month. So that is very important to us.

Title I is designed to accelerate existing jobs programs. I have reservations, as I say, that the bill does not do all the things we would want it to do, but it does use existing programs and does avoid pressures on the budget. I think President Reagan and House Speaker TIP O'NEILL are to be commended for working together in a bipartisan way to help address our most pressing national problem.

As far as this bill is concerned, some have said that it does not do enough, but as far as the State of Ohio is concerned, using the community block grant program will help Ohio and the country. Our Republican task force which was appointed by the gentleman from Illinois, Mr. BOB MICHEL to study this problem came up with a recommendation that the community block grant program be implemented to help employment. The gentleman from Illinois (Mr. ERLENBORN), the chairman of our task force suggested was of like mind.

I note that if we use the CDBG formula that is presently in place, my city of Columbus will get an additional $2.5 or a total of $8.8 million and the State of Ohio will realize an additional $49 million for a total of $167.6 million. That is a considerable amount of money going into a State which is now third or fourth in the whole United States in unemployment.

Mr. Chairman, I realize that there are signs on the horizon that economic recovery is underway, and these are certainly encouraging signs. We see lower inflation rates, lower interest rates, and a 3.6-percent rise in the leading economic indicators, the highest rise in 30 years. But I do feel that we need this bill for this transition period.

Mr. NATCHER. Mr. Chairman, I yield 2 minutes to the gentleman from California (Mr. MILLER).

Mr. MILLER of California. Mr. Chairman, I thank the subcommittee chairman for yielding this time to me.

Mr. Chairman, there can be no joy in this body today as we begin consideration of this legislation or even if we pass this legislation. I support this legislation. But if there is any question in the people's minds in this country about whether or not the policies of the last 2 years have been an economic disaster, let them understand that for the first time in 30 years, the Congress of the United States is voting humanitarian aid for Americans. Humanitarian aid has been reserved for Third World countries and for countries that had experienced natural disasters, economic disasters, or great poverty. We find that in America today, we have experienced all three. And so this legislation provides us emergency medical care for those who are without.

This bill also provides food for those who lack nutrition. This bill provides for blankets for those who do not have heat, and it provides jobs for those who do not have jobs. No longer will this country allow this Congress to debate real jobs versus make-work jobs, Republican jobs versus Democratic jobs. What the 12 million unemployed in this country want is jobs. Let us debate that after the fact.

So I would hope that we understand that we can measure the last 2 years' economic performance by the fact that this is only the first phase. We still have to come back and ask for additional money for the unemployed, additional health services for those without health care, and additional nutritional dollars for those without adequate diets in this country, and they number in the tens of millions.

So I would hope that the Congress would understand that this is a sad day in this country and a sad day in this Congress, because we have followed an economic policy that has led to the Congress voting disaster aid for the United States of America, supposedly the most wealthy economy in the world.

Mr. Chairman, I would like to ask the subcommittee chairman a question with respect to one section of the legislation.

The CHAIRMAN. The time of the gentleman from California (Mr. MILLER) has expired.

Mr. NATCHER. Mr. Chairman, I yield myself 1 minute, and I yield to the gentleman from California (Mr. MILLER).

Mr. MILLER of California. Mr. Chairman, the gentleman is well aware of the tremendous costs being incurred by school districts throughout the country involved in the detection and abatement of hazardous asbestos materials. It is my understanding that funds included in the emergency jobs legislation before us today may be used for the purposes of detecting and abating hazardous asbestos materials in schools and public buildings, specifically those in the sections entitled, "Maintaining and Protecting Public Investment in Federal Buildings," "Community Development Grants," "To Aid Local Economic Development To Offset Present Business and Plant Closures," and "Providing Urgently Needed School Facilities."

Mr. NATCHER. Yes. Let me state to the gentleman from California, that funds from the sections of this legislation you have just referred to may be used to alleviate the costs of detecting and abating asbestos materials in schools. We are also aware that asbestos materials in public buildings pose a potential health hazard to Federal employees.

Mr. MILLER of California. Mr. Chairman, it is my understanding that this legislation will not mandate any action, but will grant discretion to State and local agencies to use Federal funds in this bill to remedy asbestos emergencies in their communities.

Mr. NATCHER. That is correct, I say to the gentleman from California, (Mr. MILLER). State and local agencies will be able to use funds contained in this emergency jobs legislation, if they so choose, to detect and abate asbestos materials in schools and public buildings.

Mr. MILLER of California. Mr. Chairman, I thank the gentleman from Kentucky (Mr. NATCHER) for his answers.

Mr. CONTE. Mr. Chairman, I yield 3 minutes to the gentleman from Michigan (Mr. DAVIS).

Mr. DAVIS. Mr. Chairman, I have heard some of my colleagues from rural districts around the country talk about their unemployment rates, and allow me to read some distressing, in fact alarming, unemployment statistics for countries in my northern Michigan district:

	Percent
Cheboygan	29.0
Delta	23.2
Montmorency	32.6
Schoolcraft	32.1
Mackinac	40.1
Chippewa	28.4
Ontonagon	42.7

These figures compel me to comment on the so-called jobs bill we are considering today.

Now, let me share with my colleagues the unemployment rates for areas in other parts of the country:

	Percent
Boston	5.6
Miami	9.6
Long Island	5.9
Philadelphia	8.6
Sacramento	11.9
Hartford	6.1

The most glaring difference between these communities and those in my district is not the obvious disparity in unemployment rates, but that they will be the benefactors of this bill, in Federal construction projects, and my district will not.

The almost 50,000 unemployed forest products employees, iron ore miners, copper miners, shipbuilders, cement and other workers in my district can expect no relief from this bill.

With the exception of funds for military housing improvements to K. I. Sawyer AFB and those funds that will find their way to northern Michigan from the formula funded humanitarian programs, we have been ignored.

Few of my colleagues can appreciate what it is like to have almost one of every four constituents out of work. When people in certain parts of our country are suffering the effects of our present economy at a rate three or four times the national average, those citizens must be helped first. The time has come to put parochial interests aside.

No Member of this body was as heartened as I at the prospect of a jobs bill. I had hoped that high unemployment areas would be targeted when determining those Federal projects to be funded. The traditionally ignored rural areas have been forgotten again. I will vote for this bill, but only because to do otherwise would deny my district even those small benefits from the humanitarian programs and because I recognize the national need. I am deeply disappointed with this bill.

□ 1345

Mr. DIXON. Mr. Chairman, I yield 1 minute to the gentleman from Mississippi (Mr. MONTGOMERY).

Mr. MONTGOMERY. Mr. Chairman, this bill would appropriate $4.6 billion in additional funding in fiscal year 1983 for programs to create jobs for repair and rehabilitation of public facilities, resource conservation projects, park improvement and maintenance and urban renewal and community development programs.

Of the total amount in this bill, there is $75 million for maintenance and repair at various VA facilities. According to the committee report, some 3,000 jobs would be made available by the $75 million appropriation. According to the Congressional Quarterly and other news stories which recently appeared in various papers and periodicals, the $75 million for the Veterans' Administration is a compromise that has been worked out.

I commend my good friend, Chairman BOLAND of the HUD-Independent Agencies Subcommittee for including in the bill funds for maintenance and repair of VA facilities; however, I am disappointed that veterans programs are not given the priority they should be in this bill. For example, $90 million is contained for repair in prison facilities—$15 million more than that for repair of VA hospitals. This emergency jobs bill contains $32.4 million for employment and training assistance for the Job Corps; $100 million for summer youth; and $75 million for displaced workers. It contains $25 million for older Americans employment.

Mr. Chairman, I am not being critical of the funds contained in this bill for these programs, but I take the time to call to the attention of my colleagues that no group of American citizens deserves higher priority than do Vietnam era and disabled veterans. I want my colleagues to know that our Subcommittee on Education, Training and Employment, chaired by the distinguished gentleman from Texas, MARVIN LEATH and the ranking minority member, GERRY SOLOMON, is developing legislation that would create a 2-year emergency jobs program for these veterans, and we have asked the Budget Committee to make certain that the budget resolution contains funding levels necessary to fund this program. We cannot justify employment and training assistance for all of these other groups of citizens while ignoring veterans.

Mr. LEATH will be introducing the legislation within the next 3 or 4 weeks, and I hope that my colleagues will join him in cosponsoring the bill.

The latest statistics show that in January, 883,000 veterans were out of work. Most tragic is that there are 217,000 Vietnam veterans between the ages of 25 and 34 that have been unemployed for 15 weeks or longer.

Mr. Chairman, I know the leadership of the House will support us in our efforts to assist veterans in obtaining jobs. I want everyone to be aware that the Veterans' Affairs Committee is not forgetting the terrible difficulty being encountered by so many veterans who are being displaced and out of work. We are moving to do something about it, and I hope we will have a bill reported by the full committee no later than May 15 so that we can consider it on the House floor.

Mr. CONTE. Mr. Chairman, I yield 5 minutes to my good friend, the gentleman from Michigan (Mr. PURSELL).

Mr. PURSELL. Mr. Chairman, I think many of us have been seriously concerned not only with the national unemployment figure but the lack of targeting and probably the lack of retraining money in this bill. I see two major flaws. The first is the lack of targeting to the high unemployment areas that have been expressed by some Members in areas of high unemployment.

So I want to congratulate the gentleman from Pennsylvania (Mr. EDGAR) and the gentleman from Massachusetts (Mr. CONTE) for sponsoring an amendment yet to be debated this afternoon in regard to targeting, particularly the discretionary money that will be used in States and areas of high unemployment in the Nation.

Without that amendment in the bill, the bill lacks a lot of credibility and should be defeated.

The second concern is that we have no retraining money in the bill. We are looking for quick fixes here, and Congress and legislative bodies generally talk about quick fixes which is usually bad public policy. I think we ought to look at retraining, because many people who have been unemployed are simply older Americans, displaced people who are in need of new jobs mostly different jobs. I think one of the major weaknesses of this bill is the lack of retraining funds.

A final comment, the Edgar amendment will be discussed later: This is not a regional problem just basically in the Northeast, Midwest. In the States with over 10.5-percent unemployment, the national average, you will find that eight of them are in the South, seven States in the North and three in the West.

So I suggest that we look at this in terms of national interest and concern.

Mr. EDGAR. Mr. Chairman, will the gentleman yield?

Mr. PURSELL. I yield to the gentleman from Pennsylvania.

Mr. EDGAR. Mr. Chairman, I would like to commend the gentleman on his statement. It is not a regional issue, and it is important to target.

The gentleman from Pennsylvania, who is going to offer the amendment on behalf of the gentleman from Massachusetts (Mr. CONTE) and the gentleman from Pennsylvania (Mr. COUGHLIN), and other Members who have expressed a need for targeting to be part of this bill, will be on the floor. I plan to stay here and help Members understand the targeting provisions of my amendment. It does in fact, zero in on those pockets of poverty, those people in areas of high unemployment who most need the resource of a jobs bill.

Mr. PURSELL. I thank the gentleman from Pennsylvania.

Mr. NATCHER. Mr. Chairman, I yield 1 minute to the gentleman from New York (Mr. LUNDINE).

Mr. LUNDINE. Mr. Chairman, I rise in support of this legislation. I do so not because I believe the provisions of this bill are perfectly drawn, or because I believe that it is a panacea for all that ails our troubled economy. Rather, I am supporting this legislation because I am convinced that it is an important first step in a program that can help our economy become healthy once again.

This bill concentrates on creating jobs and on providing some badly needed assistance to those in our society who have borne the brunt of the economic recession—the unemployed and less fortunate. In addition, this bill lays some important groundwork for further legislation and actions which can form the basis of a lasting economic recovery.

Currently, more than 11 million people remain unemployed. While the economy is sending some early signals that an economic recovery is beginning, most analysts acknowledge that it will be painfully slow. Such a weak recovery will not generate anywhere

near the jobs that are going to be needed to put most of these 11 million Americans back to work within any reasonable period of time.

An argument can also be made that this legislation will only provide a small fraction of the jobs that will be needed to put 11 million people to work. But, by putting 250,000 or more of these people to work we will be providing the economy with some stimulus. In addition, if we can target these jobs to areas of the country with the highest levels of unemployment and if we can take steps to see that these jobs are created quickly, some of the most severe economic dislocation will be diminished.

This bill is not a make work jobs bill. The bill is drawn to utilize some economic development tools that have been effective in the past.

COMMUNITY DEVELOPMENT BLOCK GRANTS

I strongly support the provision which provides an additional $1.25 billion in funding for community development block grants under the Department of Housing and Urban Development. These grants have been used very effectively by both large and small cities to expand public facilities, promote commercial and industrial programs, and encourage other economic development and job creating activities.

I must object, however, to the Appropriations Committee's plans to subject only $1 billion of this additional funding to the traditional 70- to 30-percent allocation between urban entitlement communities and nonmetropolitan communities. The remaining $250 million is placed in a special fund for distribution only among urban communities. This has the effect of reducing the rural share of this additional assistance where in many instances unemployment is just as severe.

URBAN DEVELOPMENT ACTION GRANTS

I also support the committee's rejection of the administration's request to rescind $244 million in prior year funding for the urban action grant program. Nearly 70 percent of these funds had been allocated for projects submitted by smaller cities. Recision of this funding would have meant the cancellation of numerous UDAG grants. Progress on expenditure of these funds have been stalled by the inability of cities to coordinate appropriate financing in this weakened economy and by the administration's reluctance to aggressively administer this program. Disapproval of the administration's request for deferral will continue to make these funds available. However, I do urge that in addition to this everything possible be done to facilitate use of these funds in the areas most in need.

DEPARTMENT OF INTERIOR WATER AND SEWER ASSISTANCE

Another important provision in this legislation is the addition of $39 million in construction funds for sanitation facilities on Indian reservations. In recent years, millions of dollars in Federal financing for the construction of Indian housing has gone unused because of a lack of water or sewer facilities. The additional funding provided will permit the construction or rehabilitation of more than 6,500 Indian housing units, providing hundreds of new jobs within Indian reservations and in nearby communities.

SOIL CONSERVATION

The addition of $25 million in loan funds for soil conservation activities is also urgently needed to provide additional jobs in rural communities and in protecting future employment in agriculture. Recent reports indicate that the levels of wind and water erosion on our Nation's farmland have reached critical proportions. The additional funding for soil conservation efforts provided in this bill offer important steps toward addressing the serious problem of farmland preservation.

OTHER IMPORTANT ASPECTS OF THE BILL

This legislation will also finance efforts to assist small businesses, to improve the quality of our parks and recreational facilities, and to support energy conservation efforts for low-income homes. Services will be provided and programs continued to help meet the needs of our senior citizens and the unemployed; $75 million will be made available to purchase, process, and distribute surplus perishable commodities to those who need food assistance. An additional $50 million will be appropriated to private voluntary organizations for emergency assistance for shelter and food for the homeless. Finally, $5 billion is to be made available under the terms of this bill to provide additional weeks of unemployment compensation to those who are unemployed. Without this assistance, by the middle of March, funding shortfalls will begin to occur in the unemployment compensation program.

As careful examination of many of these provisions reflects, this bill is indeed needed to address the fallout from the prolonged economic recession of the past year and to contribute to getting the economy moving again.

Beyond this, however, I am supporting this legislation because it candidly recognizes that this is only the first step toward solving our economic problems. The American people know our economy is not functioning properly. And they know that this bill by itself will not bring it back to health. They expect and deserve more from us in the future months.

As a step in the right direction, this bill recognizes that we must have a responsive monetary policy to continue to encourage economic recovery. I support the language included in the committee report accompanying this legislation urging the Federal Reserve to continue to take action to reduce interest rates. As was recently stated in the March 7 issue of Business Week,

> The course of interest rates continues to pose a threat to the economy. . . . In the near term, stable or falling rates would be a big help to such interest-sensitive sectors of the economy as housing and autos. But over the longer run, relative low interest rates will be vital to maintaining the expansion. Although consumers can get the recovery started and sustain it for a while, capital investment will have to kick in to keep the economy moving.

The article goes on to point out that capital spending is still falling.

The authors of this legislation also wisely acknowledge this as only one phase in what must be a much larger legislative effort by the 98th Congress. The bill appropriates $500,000 to the Department of Treasury to prepare a plan within 30 days for submission to the Congress for creation of a Reconstruction Finance Corporation-type governmental entity to help restore economic vitality to our economy.

In doing so, this legislation is correctly recognizing the fact that many of the problems which plague our economy are structural and long term in nature. Solutions to these problems are going to require Federal financial assistance to insure that funds are available to address this economic transition at a pace that will facilitate modernization of our industrial base and enhance our international competitiveness.

I will be especially interested in the attitude the administration takes toward the mandate in this legislation for recommendation of a plan for a development bank. I urge the members of this body to be particularly attentive to it as well. Such a developmental institution does not have to be, as many fear, an institution which picks "winners" and "loosers." Rather, it can be designed to react to market signals and to support and industrial strategy that is based on the development of consensus between the major stakeholders in our society—high tech and declining industry, government, labor, and public interest groups such as small business, environmentalists, and consumers.

DAVE BONIOR, LEE HAMILTON, and I have introduced legislation we initially proposed last year to establish a National Industrial Development Board. This board is designed specifically to assist with coordination of an industrial strategy aimed particularly at goods which are traded internationally. It would be designed: First, to provide credible information and an early warning mechanism regarding the problems plaguing these industries now and in the future; second, to forge

consensus between the major stakeholders in our society regarding the necessary tradeoffs that must be made to insure stability and long-term economic growth in the industrial sector; and third, to make recommendations to the Congress regarding policy initiatives needed to maintain international competitiveness so that we can keep our economy moving.

An advisory board such as we have proposed, properly structured, and coupled with a development bank which places equal emphasis and importance on rationalization and modernization of declining industries, support for emerging industries, and development of public infrastructure improvements to complement industrial development can take us a long way down the road toward implementation of a long-term economic program for our country.

Without such an effort, we will not be able to compete effectively internationally and long-term economic growth will continue to elude us. In the interest of advancing the dialog in this body on this very important subject, I commend the committee for including in this bill moneys for the administration to develop a recommendation for long-term economic recovery for our country.

In summary, this bill is a necessary first step, not alone a sufficient measure to restore economic vitality to our country. It will create badly needed jobs, and provide badly needed relief to the hungry and the homeless. But, in order to avoid having to come back time and again to pass additional emergency bills of this type, we need as soon as possible to get on with development of additional legislation to address the problem of long-term economic recovery for our country.

Mr. CONTE. Mr. Chairman, I yield myself 6 minutes.

Mr. Chairman, let me briefly outline some differences between the substitute that I plan to offer and the committee bill.

I will just try to hit some of the highlights of my substitute.

There will be some general provisions in my substitute. The first would target at least 75 percent of the job creating funds in title I to be spent in areas of high unemployment or labor surplus areas. I have been working on this amendment with the gentleman from Pennsylvania, Mr. EDGAR. He has the right to offer it to the committee bill, and will do so. And if that amendment is adopted, it will appear again in my substitute. For my colleagues information; my substitute will include everything that is in the Committee bill, plus an amendment that are adopted, except for the changes that I am suggesting.

Mr. KAZEN. Mr. Chairman, will the gentleman yield?

Mr. CONTE. I yield to the gentleman from Texas.

Mr. KAZEN. Mr. Chairman, I appreciate what the gentleman is doing, and I am particularly interested in the targeting to high unemployment areas.

How does the gentleman describe "high unemployment"? And how would it be targeted?

Mr. CONTE. Seventy-five percent of the funds will be targeted to areas of high unemployment, which is defined as 90 percent of the national average, which today would be, roughly 9.5 percent.

Mr. KAZEN. Let me tell the gentleman, what worries me in the bill that is before us now and probably in the bill that the gentleman is going to offer, I have counties in my district with as high as 38-percent unemployment and we need work.

Mr. CONTE. The gentleman's district would be in good shape under our amendment.

Mr. KAZEN. This is what I wanted to find out.

Mr. CONTE. The gentleman's district is going to be all right under our amendment, you can count on that.

Second, I have included strong language prohibiting discrimination on the basis of sex, and requiring equal opportunity in all hiring under this bill. That language also contains a strong commitment to equal pay for equal work, which will go a long way toward opening this bill up to unemployed women who make up a very small portion of the construction trades, toward whom the committee bill is geared.

My third general change will make funds available for all programs in this bill only to the end of fiscal year 1983. This is supposed to be an emergency bill, a job creating bill. And, as it appears from the morning news report, we are finally moving on to economic recovery. Any stimulus that needs to be applied should take effect this year. Funds that would not be obligated until fiscal year 1984 and beyond can and should be included, if necessary, in our regular fiscal year 1984 appropriations bills.

In addition, in part to reflect the impact of targeting and our fiscal year limitation provisions, certain programs are proposed to be funded at higher or lower levels than are contained in the committee bill. I proposed to cut a highway demonstration project of $33 million. The SBA tree planting program will be gone. Now that we have passed the American Conservation Corps legislation, that should take care of our tree-planting needs. For rural sewers, I will propose a $120 million cut, no more than $80 million can be spent on this program this year. From Soil Conservation Service, flood control, I would cut $100 million, since no more than $50 million can be spent this year. From the Corps of Engineers, construction, I propose to cut $50 million, since no more than $75 million can be spent in 1983.

From the Corps of Engineers, Mississippi River flood control, I will cut $128 million. I understand that not more than $75 million under this program can be spent this year. For the Bureau of Reclamation, construction, I will cut $25 million, since not more than $25 million can be spent.

And then, Mr. Chairman, I have added $25 million for the repair of Federal buildings. I have added $50 million for airport development grants. There is a backlog of $1.4 billion in approved projects under this program. I will add $240 million for direct loans to low and moderate income homeowners for housing rehabilitation and refinancing, to enable them to bring their homes up to local code. I have added $50 million for the Youth Conservation Corps, which will bring this program to its authorized level, and I have added $135 million—listen to this, Mr. Chairman—I have added $135 million for school and hospital weatherization over and above the committee bill. This is one of the most labor-intensive and worthwhile programs we have, and we might also be able to use it to help take care of the asbestos problem. I have added $15 million for increases in employment and training assistance funds. I have added $30 million to provide for training of unemployed teachers in much needed math and science skills, consistent with the legislation that we passed yesterday. I have added $50 million for grants to States for labor employment services. I have added $100 million for emergency flood relief to California. I have done all of this, and I am still $31 million below the Chairman's mark. I was able to do all this because I took the pork out of here and I gave my colleagues something that they all could vote for.

Mr. CLINGER. Mr. Chairman, will the gentleman yield?

Mr. CONTE. I yield to the gentleman from Pennsylvania.

Mr. CLINGER. Mr. Chairman, I would like to rise in very strong support of the substitute which the gentleman is offering. I think it is an enormous improvement over what we are being offered here today.

Mr. Chairman, while the bill we have before us today represents an improvement—albeit a lodestone—over the so-called jobs bill we considered during the lameduck session it still leaves a great deal to be desired. Last year's $5.4 billion bill contained a huge $1 billion emergency makework jobs provision. It was my experience as Chief Counsel of the Economic Development Administration that such efforts have been tried and failed. The cost per job was too high; a new bureaucracy needed to be treated; and

the program was fully implemented only long after the recession had ended.

There are some provisions of this bill that are worthy of support—indeed the supplement of $5 billion for unemployment compensation benefits for those who have exhausted their sole means of support short of public welfare assistance—cries out of our support. I am also pleased to see $200 million included for the economic development administration's traditional programs. Because of the failure of EDA to obligate funds for projects which are ready to go to construction, there are a great many of such projects in the pipeline which could be gotten underway immediately.

But as reported from committee H.R. 1718 contains many, many offensive aspects. I am particularly offended by the public works components in the bill. I am a member of the Republican Jobs Task Force which drew up a number of standards on principles by which to judge any jobs proposal.

Those six basic principles are:

First. The utilization of existing programs and projects to best serve the immediate employment needs of the Nation;

Second. The adherence to the basic spending limitations recommended by the administration in order to minimize any adverse impact on current deficit projections and interest rates;

Third. The selection of public works projects that will enhance national productivity or directly address the problems of a neglected national infrastructure in those areas where these problems are the most severe;

Fourth. The selection of public works projects that are the most labor intensive;

Fifth. The selection of projects, with the exception of those meeting the criteria of No. 3, located in urban and rural areas of high unemployment; and

Sixth. The special consideration of the employment needs of women and youth in the implementation of programs and projects funded under emergency jobs legislation.

The public works portions of this bill fail to satisfy almost all of these principles. Too many of these projects will not get underway until too late. They will help balloon the deficit because substantial amounts of new money are authorized. There is no effort made to insure that the most labor intensive projects are funded.

But by far the most egregiously offensive aspect is the blatant pork barrel approach. The Republican Jobs Task Force recommended that public works projects should be targeted on neglected infrastructures in areas of highest unemployment. The only areas that are targeted in this bill are the congressional districts of members of the Appropriations Committee.

In the designation of specific projects for highway demonstrations, for mass transit, for Amtrak, and rumor has it, for flood protection there is no consideration given as to the unemployment rates in those areas. Are these really the areas that are really the most distressed and deserving of our largess. We do not know but I doubt. There is also no evidence that these projects are the most needed when compared with competing projects from other areas.

That is why I believe that we must correct this critical defect in this bill by passing the amendment that will be offered by Mr. EDGAR. This amendment will insure not only that the money is equitably distributed but that it is distributed to areas of greatest need—those with the highest unemployment. If we are going to have a jobs bill—let us at least put the money where the jobs are desperately needed.

Mr. CONTE. I only hope that our colleagues are watching this debate on television in their offices, because after hearing this description, I do not see how they can vote against my substitute bill.

Mr. NATCHER. Mr. Chairman, I yield 2 minutes to the gentleman from Florida (Mr. LEHMAN).

Mr. LEHMAN of Florida. Mr. Chairman, I rise in strong support of this legislation and urge all my colleagues to support this effort to accelerate our Nation's economic recovery.

As reported, the transportation component of this bill would provide additional obligations of $753 million. This includes $533 million for highways, $110 million for mass transit and $110 for railroad improvements.

There have been several allegations that these transportation funds are targeted to just a few areas. Such allegations are misleading unfounded and incorrect. The truth is, every State in the Union would receive part of this $753 million, and no one State would receive more than 8 percent of these funds. For example, under our recommendations, Pennsylvania would receive the largest amount, $59.6 million; New York would receive $53 million; California would receive approximately $50 million; Texas nearly $30 million; Florida about $52.5 million; and New Jersey nearly $32 million.

The following list shows a State-by-State breakdown of the transportation funding recommended by the committee:

Alabama	$10,322,000
Alaska	6,671,000
Arizona	6,874,000
Arkansas	5,364,000
California	49,919,000
Colorado	7,811,000
Connecticut	22,606,000
Delaware	4,414,000
Florida	52,497,000
Georgia	15,657,000
Hawaii	4,697,000
Idaho	3,389,000
Illinois	25,201,000
Indiana	9,028,000
Iowa	6,779,000
Kansas	7,015,000
Kentucky	10,191,000
Louisiana	13,804,000
Maine	2,753,000
Maryland	33,721,000
Massachusetts	42,914,000
Michigan	18,667,000
Minnesota	13,483,000
Mississippi	6,091,000
Missouri	11,255,000
Montana	4,722,000
Nebraska	4,787,000
Nevada	3,133,000
New Hampshire	2,553,000
New Jersey	31,783,000
New Mexico	4,311,000
New York	52,966,000
North Carolina	11,237,000
North Dakota	3,489,000
Ohio	15,312,000
Oklahoma	6,819,000
Oregon	8,149,000
Pennsylvania	59,639,000
Rhode Island	5,407,000
South Carolina	6,724,000
South Dakota	3,590,000
Tennessee	10,130,000
Texas	29,042,000
Utah	5,166,000
Vermont	2,475,000
Virginia	12,740,000
Washington	13,296,000
West Virginia	7,541,000
Wisconsin	7,259,000
Wyoming	3,571,000
District of Columbia	3,004,000
Puerto Rico	2,032,000
Unallocated	41,000,000
Total	753,000,000

As the table indicates, contrary to some recent misleading statements and inaccurate articles, the transportation component of this bill is national in scope.

I also believe that all of these transportation funds can be obligated on a timely basis. Estimates which we have received from AASHTO indicate that at least $12.6 billion, the level recommended in the bill, can be obligated during the current fiscal year for highway projects.

The National Railroad Passenger Corporation, Amtrak, has assured us that the full $110 million included in the bill can be obligated rapidly and will assist in rebuilding our Nation's railroad infrastructure.

With regard to the mass transit section, the bill includes $110 million. Under the rule, the gentleman from New Jersey (Mr. HOWARD) will, as I understand it, offer a motion to increase this amount to $171 million and will insert language disapproving the deferral of $229 million in transit formula grant funds provided by the recently enacted gas tax legislation. I certainly have no objection to this effort to provide increased funds for mass transit and intend to vote for that amendment.

Clearly, this bill will improve our Nation's transportation system. It will provide funds to every State in the Nation to put our citizens back to work and to help them get to work.

I urge all Members to support this bill.

□ 1400

Mr. CONTE. Mr. Chairman, I yield 5 minutes to my good friend the gentleman from Illinois (Mr. MICHEL).

Mr. MICHEL. Mr. Chairman, there needs to be some perspective applied to our debate here today.

Nearly all of the economic indicators we have seen in recent weeks tell us that this Nation is on the road to economic recovery. We are indeed on the threshold of a sustained period of economic growth.

It is up to us in Government to nurture that growth and to help it all we can.

While the prospects for economic recovery across this Nation are good, they are not good enough for me. They are not sufficient for many in this House who represent districts like mine.

In Peoria and Pekin and Decatur and other areas of my district the unemployment rate is not 10 percent or even 12 percent. It is upwards of 17 percent.

Some of that unemployment in my district has been caused by a 6-month old strike in my largest industry that continues today. Some of it was caused by the worldwide recession. Some of it was caused by two decades of criminal neglect of our industrial base, our ability to produce our commitment to a free and competitive system of private enterprise.

Regardless of the cause for us, it is not enough to wait for recovery. The problems are too severe, the solutions too long in coming and the needs too pressing.

That is why we have this bill before us today. The intent is to deal with the present problems, the immediate needs of those in Peoria and elsewhere who are running out of time, running out of resources.

The administration recognized those immediate needs. The Congress has recognized them as well. The administration knows and this House knows that we can shift money from one place to another, move up funding from future budgets and offer a small, but significant measure of relief now, without jeopardizing recovery, without refueling inflation, without exacerbating our deficit woes.

That is what H.R. 1718 is supposed to be all about.

Unfortunately, it does not live up to the expectations of those of us who encouraged its creation.

The legislation is inefficient, misdirected, exploitive, and politically tainted.

It is in a word, mediocre.

How on Earth are we going to offer hope and help to someone who has been out of work for months, by spending $50 million planting trees?

How are we going to get a worker back on the job this spring or summer by giving the Corp of Engineers money it cannot physically spend this year, or may very well spend in a State where unemployment is literally not a problem?

How can we fund programs that will create 1,000 jobs when we could spend the same amounts for programs that could create 2,000 jobs?

How can we do that to people in areas with 17 or 18 or 20 percent unemployment? Why would the Congress move in such a misguided way? Look at the programs. Look at the projects. You will find your answer.

This legislation does not target in on the chronic unemployed. We are being asked to send $4.6 billion up in a plane to be scattered across the landscape with little hope of it ever reaching those who need it the most. Some of it will hit the mark, too much of it will not.

This legislation, as well, represents entirely new money. It represents a total disregard for the critical deficit problems we face and throws fiscal responsibility to the wind.

The legislation drafted by the ranking member of the Appropriations Committee restores reason and rationality to the allocation of these funds, and I hope my colleagues will support it.

The Member from Massachusetts directs expenditures to existing programs that stand the best chance of producing the most jobs at the least cost. The Conte provisions rifle shot the assistance to areas of high unemployment and offers the most help to those who need it the most.

That makes sense. That is what this Congress ought to do.

Is it so difficult for us to simply do what is right?

Is it so difficult for us to produce quality legislation?

Is it so difficult to put partisan and personal considerations aside long enough to really accomplish something worthwhile without wasting time, the taxpayers money or the energies of the people who are ready to go to work?

Let us clean up this bill and send it to the other body today with the confidence that what we have done is the best we can do.

Mr. NATCHER. Mr. Chairman, I yield such time as he may consume to the gentleman from Massachusetts (Mr. BOLAND).

Mr. BOLAND. Mr. Chairman, this is really our second attempt at putting together a jobs bill that will provide essential work as soon as possible. The Members will recall that last December we had included a $5.4 billion jobs bill in the continuing resolution. The President made it very clear to the Appropriation Committee conferees that if that $5.4 billion was included in the continuing resolution, he would veto it. In short, we did not have much choice. It was either shut down the Government for 3 or 4 days with no assurance an attempt to override would succeed—or give up at that time and come back with the proposal that we have before you today.

I know that there has been a number of Members express views that this is not a jobs bill—that it is not a good bill. I would agree that it is not perfect. But I would challenge any chairman or subcommittee chairman in this House to tell me, that he brings out a perfect bill. This bill was not easy to put together. What we tried to do is to draw some kind of balance between those programs that provide jobs quickly—those programs that involve humane issues such as $50 million for soup kitchens—and those programs that are targeted at areas of higher unemployment.

We may not have arrived at a perfect balance—we did the best job we could in a very short period of time. So while this may not be a perfect bill—the President has said he can support about 75 percent of it—and I believe we should send it down to the White House in its present form and get it signed and get the money out there and start providing jobs. We can stand around here for the next 5 weeks and debate what should go into a jobs bill. But that is not going to get the money out and get it to work.

The HUD Subcommittee has several items in this bill. Let me review them for you.

We have provided an extra $75 million on top of the approximately $70 million assumed in the 1983 appropriation for maintenance and repair projects at Veterans' Administration hospitals. This type of work is handled at the local level for the smaller types of construction projects—and I might say for the smaller contractors. These projects usually run anywhere from $50,000 to $400,000. These projects are capable of generating jobs in a very short time and it will be extremely helpful to hospitals to get these small construction projects underway. Very often, in the budget crunch each year, it is the maintenance and repair line item that gets either cut or severely restricted. This small amount of extra funding is just the kind of thing that meets the ticket for the Veterans' Administration and creates jobs.

We have included $1,250,000,000 for additional jobs under the community development block grant program. It is anticipated that this will create about 80,000 jobs—and in that connection, I want to point out that the

CDBG program produces jobs at one of the lowest cost per job rates of any program we have here before us. The cost per job is roughly $15,000.

Now the $1,250,000,000 is broken down as follows. The first billion dollars is allocated on the basis of the 70-30 formula currently carried in the existing authorization law. That means that 70 percent of the billion dollars will be made available under the formula entitlement provisions to the metropolitan cities. The remaining 30 percent will be made available primarily through the State governments, to the small cities—which are those of under 50,000 population.

The second part of the CDBG funding is contained in the $250 million provided only for metropolitan entitlement formula cities. We have also included language that these funds shall be available in metropolitan cities that have high unemployment.

In connection with the CDBG funding, we also added a provision which sets aside the 10-percent limitation on the amount of funds that can be made available under this program for public service jobs. Public service type jobs include mental and health counseling—day care centers—et cetera. The 10-percent limitation was contained in the Omnibus Budget Reconciliation Act of 1981—and I want to make clear that we are setting aside that limitation only for the purposes of this jobs bill in order to insure that there is an equal opportunity for both women and men to share in these emergency jobs.

The report accompanying the bill also restricts the use of the moneys primarily to "light construction" work. That restriction should help put these funds to work as quickly as possible. I know that CBO has estimated that a substantial part of these funds will not be outlayed until fiscal years 1984 and 1985. However, the important point to remember is that the projects will get under way within 6 months to a year and will insure that the construction industry has a strong and vigorous recovery from the recession.

Mr. Chairman, we have also included $50 million for a new program to help private charitable organizations feed the very needy and unemployed. What we have done is very similar to last December. We have appropriated the money to the Federal Emergency Management Agency—which will be responsible for auditing the funds—and directed that the funds be granted to a national board that consists of representatives of major voluntary organizations and FEMA.

Now I will be the first to admit that we are charting some new ground here—and we may have to make some minor adjustments in this approach. But I do believe that if you have watched television during the past 8 to 10 weeks you cannot help but come away with the feeling that the private agencies are doing a good job of setting up soup kitchens and trying to feed people who have just plain run out of money—or have not got a place to sleep. Last Sunday, for example, there was an excellent article in the New York Times on St. George's Episcopal Church in Manhattan which is running a temporary refuge for about a dozen homeless men and women. These private agencies, such as the Salvation Army and the local church in your community or local charity under the United Way, have put together these programs with very limited resources. The fact is that they are strapped for money and we felt they could do the best job in getting out funds for food and shelter to those people who need it immediately. What we are hoping for is that this effort will provide the kind of a one-time emergency shot in the arm to get hot meals and some decent shelter for an increasing number of Americans that simply cannot afford it.

I know some of you might ask the question "Isn't that what food stamps are for?" The answer is that there are literally hundreds of thousands of Americans that slip through the cracks in connection with the food stamp program. Very often these people do not have kitchens—or they have nowhere they can really call home—and therefore, they do not really have cooking facilities. That is the group we are targeting, and regrettably, that group is getting larger with each passing month.

I know that there are many of you here that will ask, "Why did you not fund this through the States? Why did you not fund this through some existing program in the Department of Health and Human Services? Why did you not fund it this way or that way?" I will grant you we could have taken other approaches. But we felt that this was the best approach to get the money out as quickly as possible with the least bureaucratic delays and with the least administrative costs.

In addition to the jobs bill items, we have included language disapproving two deferrals—one relating to assisted housing and one related to the urban development action grants program. The committee report spells out the details.

Mr. Chairman, an amendment will be offered to this bill to increase funding for health services to the unemployed. The amendment will increase funding for direct health services to unemployed and destitute families by $200 million. It is estimated that these funds would permit 1 million additional patient visits over the next 12 months and create about 10,000 new jobs. Approximately one-half of the money will be focused on maternal and child health and the remainder will be divided between community health centers and grants to States to assist public hospitals and emergency services at community hospitals. This amendment makes sense and I intend to support it.

I would hope that you will give this bill a chance to work and I think it will work.

Mr. NATCHER. Mr. Chairman, I yield 2 minutes to the gentlewoman from Louisiana (Mrs. BOGGS).

Mrs. BOGGS. I thank the chairman for yielding.

Mr. Chairman, I rise to pay particular expressions of gratitude to the members of the committee and the leadership of the committee on both sides of the aisle for recognizing that over 40 percent of the work force in this country is made up of 50 percent of the population, women; also to recognize that among those people who are numbered among the unemployed, 43 percent of them are women.

Also I would recognize further that among the households with children in the family that are headed by a single parent, 15.9 percent of those households are headed by women and among those women the percentage of unemployment is 11.9 percent.

So I was especially grateful to the committee for seizing the leadership role making the supplementary funds in the community development block grant program available to the public service jobs in which women are usually employed. These are very labor-intensive jobs and are very important to the employment of women.

I would like especially to say that lifting the cap of 10 per centum on the amount that can be spent in these public service areas has probably done more to assure the working women of America and the women who wish to be at work in America, more than anything else I can think of, that this Congress and this committee is truly dedicated to making certain that women share equally in the economy of this country.

I thank the committee with all my heart for having included them in this bill.

Mr. CONTE. Mr. Chairman, I yield myself such time as I may consume.

I just want to make one point. I want to commend the gentlewoman in the well for her remarks. Because of her interest in community development grants, I wanted her to know that in the substitute that we will offer, we provide $240 million for this program over and above the so-called Whitten bill, intended for housing rehabilitation. I also wanted to draw the gentlewoman's attention to the fact that I have included strong language in my substitute prohibiting discrimination on the basis of sex and requiring equal opportunity in all hiring under this bill. That language also contains a strong commitment to

equal pay for equal work which goes a long, long way, I think, toward opening this bill up to unemployed women.

I just wanted to bring those facts to the gentlewoman's attention once again.

Mrs. BOGGS. Mr. Chairman, will the gentleman yield?

Mr. CONTE. I yield to the gentlewoman from Louisiana.

Mrs. BOGGS. I thank the gentleman for yielding because there has been no stronger advocate of women's rights and women's promotion than the gentleman from Massachusetts.

I would like to say, however, that I thought the purposes of our bill and the report language that accompanied it did indeed lift the cap completely so that the resources in whatever amounts deemed advisable would be made available to the communities who under the law must indeed vote on the kind of grants they wish to participate in.

Mr. CONTE. I thank the gentlewoman.

Mr. NATCHER. Mr. Chairman, I yield 1 minute to the gentleman from South Carolina (Mr. DERRICK).

Mr. DERRICK. Mr. Chairman, I rise in support of H.R. 1718, which will provide emergency expenditures to meet national needs.

There can be no doubt that the national needs are great at this moment. There are some 11.4 million Americans unemployed. We are paying unemployment compensation to these unemployed workers at a rate of $32 billion a year. Business failures are up 49 percent over last year. Nearly one-third of our industrial capacity is not being used.

In my own district in South Carolina the unemployment rate is 12.5 percent 2.1 percent above the national average. The textile industry, which employs one-third of the labor force in South Carolina and produces one-third of all fabrics made in the United States, is in dire straits. There were 17 textile plant closings in South Carolina last year, 16,000 textile workers are now unemployed. These people have very few job opportunities now, and little chance of ever returning to the jobs they have been trained for. We need to offer people like these—the victims of the current recession and the long-term structural changes in our economy—both immediate help in the form of short-term job opportunities and humanitarian aid and long-term help in the form of retraining for jobs in the emerging sectors of our economy.

I support this bill because it does provide some of this help. It does not do nearly enough. Less than $5 billion simply will not meet all of the needs of this Nation's unemployed. I support this bill, however, because I understand the political pressures from the White House that prevent us from doing more at this time, and because I hope that we will move quickly to do more.

Let me just mention one example of how we should be doing much more. The displaced workers program, established by the Jobs Training Partnership Act, provides exactly the kind of retraining that the displaced textile workers in my district need to prepare themselves for work in the new industries we all hope will flourish in the coming years. Piedmont Technical College in my district has obtained funds under this program and already has a class of 30 displaced workers preparing for new careers. The problem is that we have not allocated nearly enough money to this program. The program is authorized for $250 million in fiscal 1983, but we have only appropriated $25 million for it. This legislation before us today will add $75 million for the program. This addition helps, but the structurally unemployed workers in my district, and in 434 other districts around this country, deserve more. I hope that this Congress acts quickly to provide more of this and other kinds of assistance to the 11.4 million unemployed workers in the country.

More than 4 hours of testimony yesterday by Members from all around the country before my colleagues and me on the Rules Committee made clear the concerns that we all have about the unemployment crisis in this country. It also made it clear that this bill will not solve all of the problems we face. I believe that the amendments that we made in order, especially the Edgar amendment to target the money toward areas with particularly severe unemployment, will help this bill to do more to ease the suffering of our unemployed citizens and their families, but we are kidding ourselves and our constituents if we think that this ends our responsibility to deal with the problem.

I hope my colleagues will support this bill, and the amendments that will be offered to it. It does not go nearly far enough, and it contains some provisions I take strong exception to, but I cannot turn my back on a chance to provide at least some relief for the acute distress of more than 11 million Americans. I urge you to join me in voting for this bill, and then join me in working to enact legislation which will do more to meet the national needs.

Mr. CONTE. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, in the explanation of my substitute I left out a couple of I think very important items that we are putting into this substitute.

I add $50 million to the State employment services under title II to fund 3,300 additional staff to help our unemployed locate jobs. Labor groups have been after this committee to add this money ever since the supplemental started kicking around. I think this is a very, very important item, and it is strongly supported, I might say, by the AFL-CIO and all labor groups.

I have also added $15 million more in my substitute to jobs training money for displaced homemakers entering the labor force. This program is authorized in the Jobs Training Partnership Act, and this is one more example of how this substitute is more responsive to the needs of unemployed women than the committee bill.

Again I emphasize the strong anti-sex discrimination provisions. I have not seen too many women on these big dredges down there on the Mississippi River.

Mr. NATCHER. Mr. Chairman, I yield 1 minute to the gentleman from Texas (Mr. KAZEN).

Mr. KAZEN. Mr. Chairman, I have a very deep interest in this bill because I think I represent one of the highest unemployment areas in the entire United States and am looking for help in its provisions. Let me just give some figures.

I stand here and listen to you people that are complaining because your districts have 14 percent unemployment. In my district, Webb County has 27.4 percent unemployment. Maverick County has 38.2 percent. Dimmitt County has 14 percent. Zavala County has 19.8 percent unemployment, and so it goes in my district, keeping in mind that the average rate in the county is 11.4 percent.

Therefore, my interest in this bill is intense. I wish I had the time, and probably will take the time under the 5-minute rule, to ask some questions about which one of these bills, and which of these amendments are going to help my district.

I want to get work for my people who are unemployed, and have been unemployed for such a long time. I want to make sure that funds are being targeted into areas like mine.

Mr. NATCHER. Mr. Chairman, I yield 1 minute to the gentleman from Pennsylvania (Mr. EDGAR).

Mr. EDGAR. Mr. Chairman, I am pleased to stand in the well as a person who will offer the amendment on targeting. I think it is appropriate following my colleague's comments previously to simply state that his communities will be helped very much more under a targeting provision of either the Conte substitute or the committee resolution.

Let me be very specific. There are $4.6 billion worth of funding in the bill. The targeting amendment which I will offer relates to $2,450 million of that, or a total of 52.7 percent of the entire bill.

Let me explain specifically what the targeting provisions would do. (A) At

least 75 percent of the discretionary funds in the legislation would go into area of high unemployment. (B) The definition of areas of unemployment conforms with the Labor Department's designation under the definition "labor surplus area." (C) Eligible criteria are as follows, at least 90 percent of the national average unemployment rate over the last 12 months. That figure is 9.7 percent.

The bottom line is that my amendment targets to pockets of poverty.

The CHAIRMAN. The time of the gentleman from Pennsylvania (Mr. EDGAR) has expired.

Mr. CONTE. Mr. Chairman, I yield 1 minute to the gentleman from Pennsylvania (Mr. EDGAR).

Mr. EDGAR. I thank the gentleman.

Let me just take 15 seconds of that 1 minute to commend the gentleman from Massachusetts (Mr. CONTE) for his leadership not only to the substitute but particulary his leadership in both areas of trying to talk about targeting.

□ 1415

The gentleman from Massachusetts and the gentleman from Pennsylvania (Mr. COUGHLIN) and others on the Republican side I think have done an excellent job in reminding us we ought not to simply take $4.6 billion and send it out across the Nation to every community, but in fact we ought to target a portion of those funds to the areas in greatest need.

Let me conclude by just pointing out that the eligibility criteria suggest that at least 90 percent of the national average is covered under the bill; presently that would be about 9.7 percent over the last 12 months; 90 percent of that figure is 8.7 percent. So, all of the communities above that would get top priority or 75 percent of the funding. Communities below that would get 25 percent.

I should point out to all Members of the House that exempted programs like humanitarian relief are not covered by the amendment. I urge my colleagues to support this targeting amendment.

Let me clearly explain the Edgar amendment.

My amendment to the emergency supplemental appropriation, H.R. 1718, reported by the Appropriations Committee, contains funding for 45 programs, totaling $4.6 billion. While the report language does contain specific projects and locations for some of the bill's provisions, an area's level of economic distress was not used as an indicator in the selection process. As a result, there is no certainty that the discretionary funds to be appropriated under this bill will go to those people and places suffering the greatest economic hardship.

My amendment requires that 75 percent of the funds for each program included in the Appropriation Committee bill be spent in areas where unemployment is most severe. Exempted from this amendment are the humanitarian aid programs and programs that distribute funds on the basis of a formula. As a result, the Edgar amendment would affect approximately 52.7 percent or $2.45 billion of the $4.6 billion in the bill reported by the Appropriations Committee.

Under the provisions of this amendment, an area would be eligible to receive funds for the 75-percent share if it met one of the following criteria:

It had an average unemployment rate over the past year no less than 90 percent of the national unemployment rate during the same period; or

It was designated a labor surplus area; or

It met the criteria necessary to be eligible for funds under the Urban Development Action Grant (UDAG) program; or

It met the criteria necessary to be considered a pocket of poverty under the UDAG program.

The amendment is purposely flexible in defining eligible areas to insure that the needs of the most economically distressed communities—urban and rural, large and small—are met in the distribution of funds under this amendment.

Finally, passage of my amendment would correct a serious flaw with the emergency jobs bill reported by the Appropriations Committee. The failure to require that the funds under this bill be targeted to those areas of highest unemployment seriously undermines the intent of the bill and brings into question the ability of this bill to meet the goals of providing assistance to those people and areas in greatest need.

Mr. CONTE. I yield myself such time as I may consume.

Let me close by saying one other thing I want to emphasize in our substitute bill for job creation; it is that we add $30 million over and above the chairman's bill to immediately fund part of the emergency math and science bill that passed this House only yesterday; $30 million to fund scholarships to encourage the training of math and science teachers. In my own State of Massachusetts where we have proposition 2½, there are 3,000 teachers that are unemployed, and this $30 million will help retrain those teachers. We have one college already, Westfield State College, which has already started a 9-month program of retraining teachers so they can get back into the classroom, to teach math and science. This bill provides $30 million for that purpose. I yield back the balance of my time.

Mr. DANNEMEYER. Mr. Chairman, this morning the rains and heavy wind endanger many citizens and homes in my home State of California. Evacuations, emergency relief measures, pulling together is the order of the day for those weathering the storm.

This morning we in this Congress threaten a fiscal flood of equal proportions, but that one that will threaten the entire economy. H.R. 1718, the emergency supplemental appropriations bill is nothing less than cloud seeding in an economy that is awash in high real interest rates. And yet we hear this morning that the index of leading economic indicators shot up 3.6 percent in January, the largest increase since 1950.

Let me be clear: I object to the $4.6 billion side of this bill, the one that provides such things as: $75 million for new cars for the Federal Government; States to maintain welfare spending if they want to get any additional title XX money; and funds for fish hatchery rehabilitation.

This is a cynical bill. It hides behind the unfortunate lines of the unemployed. It puts its arm around the unemployed and then reaches deep into their pockets to fund yet another pork barrel project, when some of those families have not seen that kind of meat on their table. It seeks to provide funds to weatherize homes with a bill that can only raise interest rates for those who want to buy their first home.

Let us stop and consider where the $4.6 billion is going to come from. Not from taxes. We are running a deficit. Not from the Federal Treasury. Again, we are running a huge deficit. There is only one other mattress the Congress can look under for funding this program: The private sector captial markets. It is the mattress which supports our economy and which has become terribly shredded in recent years from the excessive weight of Federal spending and deficits. Indeed, Dr. Irwin Kellner, senior vice president and economist for the Manufacturers Hanover has estimated that total Federal borrowing in 1983 may consume more than 90 percent of the net national savings in this country. We are literally draining the pool of savings in this country that will provide for more jobs, more affordable homes, and an expanding economy, a bigger pie.

The economy needs bucks, not Federal spending. The essential ingredient for job creation is capital. This is the very same capital which the lack thereof has so far inhibited such growth. And the shortfall is driven by two forces: Inflation in times past which has resulted in diminished buying power and savings rates, and Federal spending which has consumed as much as 90 percent of our net national savings. What we are faced with as a consequence of inflation and the crowding out of investment captial is a deteriorating industrial base. Hence high unemployment. A so-called jobs

bill will do absolutely nothing but continue, in fact guarantee, the roller coaster ride.

This bill does not create jobs, it takes jobs. Experience has shown that there is litle net job creation when Federal public works jobs program are enacted. This is because the program will cause a reduction in spending for some other Federal program, an increase in taxes, or the displacement of private expenditures due to crowding out.

This bill is not only cynical but unrealistic. Experience shows that public works job bills do not create jobs in time. Although the 1960-61 recession ended in February 1961, antirecessionary measures were still being taken in September 1962 when Congress adopted a $900 million accelerated public works program. The public works impact program was approved in 1972 to fight the recession that ended in 1970. Two public works programs were enacted in response to the 1973-75 recessions. A 1976 program was used to fight the 1973 recession, and a 1977 program was used to fight the 1975 recession. By the time we get the Interior Department wound up to charge into those fish hatcheries with this public works bill, the fish will be long gone.

These programs are not only too late, but too little. The jobs are often of short duration, an average of 4.1 weeks of employment under the 1972 public works program. And these jobs are too little for those unemployed. Very few of the jobs are actually filled by unemployed workers. Only 12 percent of all such jobs under the 1976 and 1977 public works programs went to the unemployed.
